

## **About [www.toyotaupfitter.com](http://www.toyotaupfitter.com)**

Toyota has been selling automobiles in the U.S.A since 1957. Our presence has grown slowly but steadily and has allowed us to become a leading brand in the passenger car and SUV markets. With the introduction of the 2007 Tundra, we look forward to expanding our presence in the full size pickup segment and providing a new level of support to the commercial pickup user.

This website serves three purposes:

- 1 – Provide technical information on 2007 & later light duty 1/2 ton Toyota Tundra trucks to commercial truck equipment manufacturers.
- 2 – Help Toyota learn more about the use of our trucks.
- 3 -- Help Toyota learn more about the commercial upfitter's needs.

We look forward to helping commercial truck equipment manufacturers grow their business by developing and selling products for Toyota trucks. If any information you need is not available on this website, please contact us through the "Tell Us What You Need" page or call us at 1-888-5TUNDRA. We are happy to serve you.

**Hino Trucks**, a Toyota group company, produces commercial trucks that are Class 3 (14,050 GVW) and larger. Please visit their website [www.hino.com](http://www.hino.com) for more information on their product line and upfitting opportunities.

In addition, Toyota supports upfitted products for customers with **mobility** needs. Please visit [www.toyota.com/mobility](http://www.toyota.com/mobility) for information.
