Give in to your desires.

The 2018 Toyota Camry is a joyride for the senses. The redesigned exterior is enhanced by a sleek, flowing shape. It’s an evocative look that’s less subtle and more seductive. XSE and SE models push the limits of the new, wider stance with unique catamaran-inspired accents and a black sport mesh grille that demand to be seen! Sporty yet elegant front and rear bumpers set your heart racing, while standard Toyota Safety Sense™ P (TSS-P) helps provide peace of mind. Camry has undergone a total transformation, from a proven sedan to one that pushes the limits. Now you can go more places in complete confidence — and always arrive fashionably great.
EXPAND YOUR HORIZONS

Slip into a premium space that puts a premium on your comfort. Brighten each day with Camry XSE’s available panoramic glass roof with front power tilt/slide moonroof, which invites in more than twice the light of a traditional moonroof. A power-retractable sunshade helps you stay in control if things start to heat up. This distinctive styling extends to the interior’s appealing materials and textures, from the available Cockpit Red leather trim to the upscale textured metal moldings and the ambient interior lighting. It’s a practical and stylish cabin with an unrivaled attention to detail.
“It delivers on everything Camry owners have come to expect...and adds to it jaw-dropping design, more-advanced tech, cutting-edge safety and stirring performance — raising it to an unparalleled level of excitement.”
— Bob Carter, Executive Vice President, Sales, TMNA
Leave a lasting impression.

Camry XSE’s powerful stance and captivating style will announce your arrival with authority. The muscular shape is defined by a pleasing mix of sweeping curves and chiseled surfaces. Sport side rocker panels and the integrated rear spoiler emphasize the coiled stance and redirect airflow to enhance efficiency and performance. It’s an irresistible symphony of flowing lines and sharp, unconstrained edges that always makes an impact.

19-IN. MACHINED-FINISH ALLOY WHEELS WITH BLACK-PAINTED ACCENTS

Add to the allure with the lustrous black hue found on Camry XSE’s 19-in. alloy wheels. The deep color dramatically contrasts the exquisite machined finish of the V-shaped spokes. Low-profile 40-series tires complete the distinctive look while providing a precise, confidence-inspiring drive.

SMOKE-TINT LED HEADLIGHTS WITH LED DAYTIME RUNNING LIGHTS (DRL)

More efficient and powerful available LED headlights add a stylish touch, stretching outwardly from the thin upper grille. The XSE’s LED headlights with smoke tint and fully integrated LED Daytime Running Lights (DRL) add an illuminating touch. This expressive look is highlighted by a design inspired by the symmetrical lines in the sand of a Japanese Zen garden.

LED TAILLIGHTS

Camry’s available LED taillights feature an eye-catching organic shape. It’s a powerful look that flows seamlessly into the rear bumper. Stylish lights like these are the perfect way to brighten any drive.

Take a commanding view.

It’s a space that’s all about you with an inviting, wide-open sensation. Get behind the wheel and the driver-centric position envelops you. Thanks to the perfectly placed steering wheel controls, everything you want is right at your fingertips. The available 10-in. color Head-Up Display (HUD) projects important information such as your speed, turn-by-turn directions, and more, right onto the lower portion of the windshield. It helps you stay focused on the road ahead.
A joyride for your senses.

Indulge your sporty side with Camry’s breathtaking performance. The light, strong body enhances both handling and ride quality. The lower, wider stance delivers a crisp, responsive feel and creates an optimal driving position. Choose between a new 3.5-liter V6 and a new 2.5-liter 4-cylinder gasoline engine, which comes paired to a new Direct Shift 8-Speed Automatic Transmission. When coupled with the enhanced suspension, they help Camry deliver an impressive drive without suppressing your comfort. It’s time to take the long way — and celebrate every moment.

V6 AND 2.5L ENGINES

Camry offers a compelling choice of gasoline engines, the new 2.5-liter Dynamic Force 4-cylinder and a new 3.5-liter V6, each delivering a sophisticated blend of performance and efficiency. Both engines utilize the D-4S direct-injection system, which selects the optimal injection method based on driving conditions to pack a powerful punch with enhanced fuel economy to boot. It proves the rational choice can also be an exciting one.

NEW DIRECT SHIFT 8-SPEED ELECTRONICALLY CONTROLLED AUTOMATIC TRANSMISSION WITH ECO, NORMAL AND SPORT MODES

Camry’s newly developed Direct Shift 8-Speed Automatic Transmission improves acceleration from a stop, provides a smooth ride at highway speeds and helps enhance fuel efficiency. Three distinct available drive modes give you even more control. Sport Mode indulges your spirited side with a sharper acceleration feel, while ECO Mode adjusts throttle input to maximize your efficiency. Normal Mode blends fuel economy with performance. Thanks to this choice of drive modes, a perfectly tailored drive arrives with the push of a button.

It’s got your back. And sides. And front.

Camry’s standard Toyota Safety Sense™ P (TSS-P) is an active safety package that combines Pre-Collision System with Pedestrian Detection (PCS w/PD), Lane Departure Alert with Steering Assist (LDA w/SA), Automatic High Beams (AHB) and Dynamic Radar Cruise Control (DRCC) to assist you. TSS-P’s comprehensive features create in-the-moment safety designed to help keep you safe under certain circumstances.

Pre-Collision System with Pedestrian Detection helps keep the road safe by detecting a vehicle or a pedestrian in certain situations. By combining millimeter-wave radar with a camera capable of shape recognition, the system provides an audio/visual alert, warning you of a possible collision with a pedestrian under certain circumstances. If you don’t react, the system is designed for automatic braking support to help mitigate the potential for a collision.

Lane Departure Alert with Steering Assist is designed to issue both an audible alert and visual warning on the MID screen. If the system determines that the driver is not taking corrective steering action, the Steering Assist function is designed to initiate and provide gentle corrective steering to help keep Camry in the lane.

Automatic High Beams enhance visibility and helps make nighttime driving safe. The Automatic High Beam system uses a camera to help detect oncoming vehicles as far away as 2000 feet and, depending on the circumstances, it is designed to automatically switch the high beams on and off, helping make it easier for other drivers on the road.

Dynamic Radar Cruise Control takes cruising to the next level. Using forward-sensing radar technology and an intelligent camera, the system is designed to detect the speed and distance of the vehicle traveling directly ahead of you and adjust your speed accordingly. It works in traffic, as well, helping you maintain a preset following distance, slowing when the preset distance shortens, then accelerating back to your original cruising speed when the road clears.

Good for all. Even better for you.

The transportation revolution continues. The powerful, stylish Camry Hybrid gives up nothing with its optimized fuel economy, advanced tech and a striking look that will leave you breathless. Its dependability has been refined for 11 years, and speaks to the reliability of Toyota’s proven Hybrid Synergy Drive.

Camry Hybrid’s elevated efficiency arrives with a remarkably stunning drive, thanks to a revised hybrid system. The improved EV motor produces more torque and helps make acceleration even more responsive. Relocating the hybrid battery and employing the same trailing double-wishbone style multi-link rear suspension as the traditional Camry helps Camry Hybrid conquer every twist and turn. It’s an exciting drive that lets you do even more.

The energy monitor displays how the power is being delivered to the drive wheels. It’s smart tech wrapped in a sensational package.

Rust-Through: 60 months/unlimited miles (corrosion perforation of sheet metal).

Accessories: For Genuine Toyota Accessories purchased at the time of the new vehicle purchase, the Toyota Accessory Warranty coverage is in effect for 36 months/36,000 miles from the vehicle’s in-service date, which is the same coverage as the Toyota New Vehicle Limited Warranty.

For Genuine Toyota Accessories purchased after the new vehicle purchase the coverage is 12 months, regardless of mileage, from the date the accessory was installed on the vehicle, or the remainder of any applicable new vehicle warranty, whichever provides greater coverage.

You may be eligible for transportation assistance if it’s necessary that your vehicle be kept overnight for repairs covered under warranty. Please see your authorized Toyota dealership for further details.

For complete details about Toyota’s warranties, please visit www.toyota.com, refer to the applicable Warranty and Maintenance Guide or see your Toyota dealer.

DISCLOSURES

1. Toyota strives to build vehicles to match customer interest and thus they are built with popular options and option packages. Not all options/packages are available separately and some may not be available in all regions of the country. If you prefer to drive a vehicle with no option or different options, contact your dealer to check for current availability or the possibility of placing a special order.

2. Extra-cost color. Do not rely exclusively on the blind-spot mirror. Always look over your shoulder and use your turn signal. There are limitations to the function of the mirror. See Owner's Manual for additional limitations and details.

3. Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times. Apps/services vary by phone/carrier; functionality depends on many factors. Select apps use large amounts of data; you are responsible for charges. Apps and services subject to change. See toyota.com/entune for details.

4. The Scout® GPS Link app is compatible with select vehicle models. Availability and accuracy of the information provided by Scout® GPS Link is subject to change at any time without notice and is dependent upon many factors, including smartphone connectivity, capability and cellular reception. Always use safe driving practices and follow all traffic rules. Data charges may apply. Scout® and Telematics are registered trademarks of Telanav, Inc. 6. Always drive safely, obey traffic laws and focus on the road while driving. Siri® is available on select iPhone®/iPad® models and requires Internet access. Siri® is not available in all languages or all areas and features vary by area. Some Siri® functionality and commands are not accessible in the vehicle. Data charges may apply. See Toyota Entune® and iPhone® or iPad® for details. 7. Siri® is a registered trademark of Apple Inc. 8. May not be compatible with all mobile phones, MP3/WMA players and models. 9. iPod® and iPhone® are registered trademarks of Apple Inc. All rights reserved.

9. Advanced voice recognition capabilities vary by head unit.

10. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by Toyota is under license. Any such use of such marks by Toyota is under license. Always use safe driving practices and follow all traffic rules. Apps and services subject to change. See toyota.com/entune for details.

11. HD Radio™ Technology manufactured under license by Detcon Corporation U.S. For more information, visit detcon.com. 12. "Acc" is a high precision laser speed sensor at speeds above 25 mph. 13. To deploy the Smart Key System, drivers must push the brake pedal to the floor and have stationary/stopped status to deploy the system. 14. Vehicle Stability Control is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe and attentive driving practices. 15. The Smart Key System may interfere with some pacemakers or cardiac defibrillators. If you are subject to these conditions, you should consult your physician prior to driving a vehicle with a Smart Key System. 16. The Bird's-Eye-View Camera does not provide a comprehensive view of the area surrounding the vehicle. You should also look around outside your vehicle and use your mirrors to confirm surrounding clearance. 17. For additional details, see the vehicle's Owner's Manual.

18. The Scout® GPS Link app is compatible with select vehicle models. Availability and accuracy of the information provided by Scout® GPS Link is subject to change at any time without notice and is dependent upon many factors, including smartphone connectivity, capability and cellular reception. Always use safe driving practices and follow all traffic rules. Data charges may apply. Scout® and Telematics are registered trademarks of Telanav, Inc. 19. Smart Stop Technology® is operated only in the event the vehicle is in Drive and the brake pedal is fully depressed. Vehicle Speed Limit with Smart Stop Technology® is designed to assist the driver in maintaining the speed limit set by the driver and not substitute for attentive driving practices. 20. The Smart Key System may interfere with some pacemakers or cardiac defibrillators. If you are subject to these conditions, you should consult your physician prior to driving a vehicle with a Smart Key System. 21. For additional details, see the vehicle's Owner's Manual.

System effectiveness is dependent on many factors including roadway conditions, weather and vehicle condition. See Owner's Manual for additional limitations and details.

26. CAUTION! When driving a hybrid vehicle, pay special attention to the area around the vehicle. Because there is little vehicle noise in EV Mode, pedestrians, people riding bicycles or other people and vehicles in the area may not be aware of the vehicle starting off or approaching them, so take extra care while driving. EV Mode works under certain conditions at low speeds for up to one-half mile. See Owner's Manual for details.

27. Drivers are responsible for their own safe driving. Always pay attention to your surroundings and drive safely. System effectiveness is dependent on many factors including road, weather and vehicle condition. See Owner's Manual for additional limitations and details.

28. The Bird's-Eye-View Camera does not provide a comprehensive view of the area surrounding the vehicle. You should also look around outside your vehicle and use your mirrors to confirm surrounding clearance. See Owner's Manual for additional limitations and details.

29. Environmental conditions may limit effectiveness and view may become obscured. See Owner's Manual for additional limitations and details.

Intelligent Clearance Sonar (ICS) is designed to assist drivers in avoiding potential collisions at speeds of 9 mph or less. Certain vehicle and environmental factors, including an object's shape and composition, may affect the ability of the ICS to detect it. Always look around outside the vehicle and use your mirrors to confirm rear clearance. See Owner's Manual for additional limitations and details.
use mirrors to confirm clearance. See Owner’s Manual for additional limitations and details. **42.** Do not rely exclusively on the Rear Cross-Traffic Braking system. Always look over your shoulder and use your mirrors to confirm rear clearance. The system cannot prevent all collisions, and performance is dependent on road, weather and vehicle conditions. See Owner’s Manual for additional limitations and details. **43.** Hill Start Assist Control is designed to help minimize backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. **44.** The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a Smart Key fob into the vehicle, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key/fob matches the code in the vehicle’s immobilizer. Because the transponder chip is embedded in the key/fob, it can be costly to replace. If you lose a key or fob, your Toyota dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local Yellow Pages or by contacting www.aloa.org. **45.** ToyotaCare plan covers normal factory scheduled service for 2 years or 25K miles, whichever comes first. See Toyota dealer for details and exclusions. Valid only in the continental U.S. and Alaska. **46.** Meets Tier 2/Bin 3 Federal emissions standard. **47.** Hybrid vehicle battery expected life is 150,000 miles based on laboratory bench testing. **48.** Cargo and load capacity limited by weight and distribution. **49.** 2018 EPA-estimated mileage. Actual mileage will vary. **50.** This floor mat was designed specifically for use in your model and model year vehicle and SHOULD NOT be used in any other vehicle. To avoid potential interference with pedal operation, each mat must be secured with its fasteners. Do not install a floor mat on top of an existing floor mat. **51.** The Toyota Genuine Accessory Warranty will only apply when the installation is performed by a trained Toyota-approved installer. Please see dealer for details. **52.** The universal tablet holder is intended for passengers only. Drivers should always be sure to obey traffic regulations and maintain awareness of the road and traffic conditions at all times. Use of aftermarket accessories may pose an increased risk of injury to occupants in the event of an accident. After the trial period expires, enrollment in paid subscription is required to access the service. Terms and conditions apply.
