Features designed for your safety.

The road can be unpredictable. That’s why RAV4 is equipped with eight standard airbags, and integrated features like the Star Safety System™ and standard Toyota Safety Sense™ P (TSS-P). This package of safety features combines Pre-Collision System with Pedestrian Detection (PCS w/PD), Lane Departure Alert with Steering Assist (LDA w/SA), Automatic High Beams (AHB), and Dynamic Radar Cruise Control (DRCC) to assist you. TSS-P’s comprehensive features create in-the-moment safety designed to help support your awareness and decision-making on the road.

**PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION (PCS w/PD)**

Using an in-vehicle camera and radar to help detect a vehicle or a pedestrian in front of you, the Pre-Collision System with Pedestrian Detection (PCS w/PD) can help you mitigate or avoid a potential collision. If the system determines that a frontal collision is likely, it prompts you to take action using audio and visual alerts. If you notice the potential collision and apply the brakes, PCS w/PD may apply additional force using Brake Assist (BA). If you don’t brake in time, it may automatically apply the brakes to reduce your speed, helping to minimize the likelihood of a frontal collision or reduce its severity.

**DYNAMIC RADAR CRUISE CONTROL (DRCC)**

Intended for highways and similar to “constant speed” cruise control, Dynamic Radar Cruise Control (DRCC) lets you drive at a preset speed. DRCC uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance. If a driver is traveling slower than you, or within your preset range, DRCC will automatically slow your vehicle down without deactivating cruise control. If DRCC determines you need to slow down more, an audio and visual alert notifies you and brakes are applied. When there’s no longer a vehicle driving slower than your set speed in front of you, DRCC will then accelerate and regular cruise control will resume.

**AUTOMATIC HIGH BEAMS (AHB)**

Automatic High Beams (AHB) are a safety system designed to help you see more clearly at night without blinding other drivers. Designed to activate at speeds above 25 mph, AHB rely on an in-vehicle camera to help detect the headlights of oncoming vehicles and taillights of preceding vehicles, then automatically toggle between high and low beams accordingly to provide the appropriate amount of light. By using high beams more frequently, the system may allow earlier detection of pedestrians and obstacles.

**LANE DEPARTURE ALERT WITH STEERING ASSIST (LDA w/SA)**

Under certain circumstances, Lane Departure Alert (LDA) is designed to detect lane departure on roads with clear markings. LDA only activates when you’re traveling at a speed of 32 mph or faster. When you hear and see the alert, after carefully checking the road around you, you should safely direct your vehicle back to the center of your lane. In addition, Toyota vehicles equipped with Toyota Safety Sense™ P (TSS-P) and Electronic Power Steering (EPS) include Steering Assist functionality. When it’s activated and senses that you’re unintentionally drifting, the system may automatically make small corrective steering inputs to help keep your vehicle in its lane.

Redefine what a hybrid SUV can do, with more efficiency and excitement.

Let’s bring tech, style and efficiency to every adventure. With RAV4 Hybrid’s advanced innovations and Toyota’s proven hybrid powertrain, you can make the most of any trip. And in addition to great fuel economy, RAV4 Hybrid adds extra oomph with 194 net horsepower and outstanding acceleration. For extra confidence when Mother Nature rains on your parade, the available Electronic On-Demand All-Wheel Drive with intelligence (AWD-i) is designed to help make any trek a sure-footed experience, with an electric motor that delivers instant torque to the rear wheels when you need more traction. It helps you get even more from everything you want to do.

RAV4 Hybrid engages a variety of future-forward tech to help make every journey as efficient as possible. You’ll enjoy the extra thrills that come from the power and acceleration, and with RAV4 Hybrid’s EPA-estimated 34 mpg city, your wallet will be happy too.

Stay on top of it all. RAV4 Hybrid’s unique gauge cluster lets you monitor the Hybrid Synergy Drive® system with just a glance. You can quickly track when the system is charging and providing power to the drive wheels, so you can get the most out of every drive.

RAV4 Hybrid has the tools to help increase the efficiency of your drive. The energy monitor indicates the operation of the gas engine, electric motor generator and hybrid battery. As conditions change, it provides real-time information showing how power is being routed to the drive wheels, or how the battery is being charged.
