Alphabetical index ................. 606
For your information

Main Owner’s Manual

Please note that this manual applies to all models and explains all equipment, including options. Therefore, you may find some explanations for equipment not installed on your vehicle.

All specifications provided in this manual are current at the time of printing. However, because of the Toyota policy of continual product improvement, we reserve the right to make changes at any time without notice.

Depending on specifications, the vehicle shown in the illustrations may differ from your vehicle in terms of color and equipment.

Noise from under vehicle after turning off the engine

Approximately five hours after the engine is turned off, you may hear sound coming from under the vehicle for several minutes. This is the sound of a fuel evaporation leakage check and, it does not indicate a malfunction.

Accessories, spare parts and modification of your Toyota

A wide variety of non-genuine spare parts and accessories for Toyota vehicles are currently available in the market. You should know that Toyota does not warrant these products and is not responsible for their performance, repair, or replacement, or for any damage they may cause to, or adverse effect they may have on, your Toyota vehicle.

This vehicle should not be modified with non-genuine Toyota products. Modification with non-genuine Toyota products could affect its performance, safety or durability, and may even violate governmental regulations. In addition, damage or performance problems resulting from the modification may not be covered under warranty.
Installation of a mobile two-way radio system

The installation of a mobile two-way radio system in your vehicle could affect electronic systems such as:

- Multiport fuel injection system/sequential multiport fuel injection system
- Cruise control system (if equipped)
- Anti-lock brake system
- SRS airbag system
- Seat belt pretensioner system

Be sure to check with your Toyota dealer for precautionary measures or special instructions regarding installation of a mobile two-way radio system.

Vehicle data recordings

Your Toyota is equipped with several sophisticated computers that will record certain data, such as:

- Engine speed
- Accelerator status
- Brake status
- Vehicle speed
- Shift position (except vehicles with a manual transmission)

The recorded data varies according to the vehicle grade level and options with which it is equipped. Furthermore, these computers do not record conversations, sounds or pictures.

Data usage

Toyota may use the data recorded in these computers to diagnose malfunctions, conduct research and development, and improve quality. Toyota will not disclose the recorded data to a third party except:

- With the consent of the vehicle owner or with the consent of the lessee if the vehicle is leased
- In response to an official request by the police, a court of law or a government agency
- For use by Toyota in a law suit
- For research purposes where the data is not tied to a specific vehicle or vehicle owner
This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an air bag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle’s systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less.

The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur.

NOTE: EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

Disclosure of the EDR data

Toyota will not disclose the data recorded in an EDR to a third party except when:

- An agreement from the vehicle’s owner (or the lessee for a leased vehicle) is obtained
- In response to an official request by the police, a court of law or a government agency
- For use by Toyota in a law suit

However, if necessary, Toyota may:

- Use the data for research on vehicle safety performance
- Disclose the data to a third party for research purposes without disclosing information about the specific vehicle or vehicle owner
**Scraping of your Toyota**

The SRS airbag and seat belt pretensioner devices in your Toyota contain explosive chemicals. If the vehicle is scrapped with the airbags and seat belt pretensioners left as they are, this may cause an accident such as fire. Be sure to have the systems of the SRS airbag and seat belt pretensioner removed and disposed of by a qualified service shop or by your Toyota dealer before you scrap your vehicle.

**Perchlorate Material**

Special handling may apply, See www.dtsc.ca.gov/hazardouswaste/perchlorate. Your vehicle has components that may contain perchlorate. These components may include airbag, seat belt pretensioners, and wireless remote control batteries.

⚠️ CAUTION

- **General precautions while driving**
  - Driving under the influence: Never drive your vehicle when under the influence of alcohol or drugs that have impaired your ability to operate your vehicle. Alcohol and certain drugs delay reaction time, impair judgment and reduce coordination, which could lead to an accident that could result in death or serious injury.
  - Defensive driving: Always drive defensively. Anticipate mistakes that other drivers or pedestrians might make and be ready to avoid accidents.
  - Driver distraction: Always give your full attention to driving. Anything that distracts the driver, such as adjusting controls, talking on a cellular phone or reading can result in a collision with resulting death or serious injury to you, your occupants or others.

- **General precaution regarding children's safety**
  - Never leave children unattended in the vehicle, and never allow children to have or use the key.
  - Children may be able to start the vehicle or shift the vehicle into neutral. There is also a danger that children may injure themselves by playing with the windows, the moon roof, or other features of the vehicle. In addition, heat build-up or extremely cold temperatures inside the vehicle can be fatal to children.
Reading this manual

⚠️ CAUTION:
Explains something that, if not obeyed, could cause death or serious injury to people.

⚠️ NOTICE:
Explains something that, if not obeyed, could cause damage to or a malfunction in the vehicle or its equipment.

123... Indicates operating or working procedures. Follow the steps in numerical order.

⇒ Indicates the action (pushing, turning, etc.) used to operate switches and other devices.

⇒ Indicates the outcome of an operation (e.g. a lid opens).

⇒ Indicates the component or position being explained.

🚫 Means “Do not”, “Do not do this”, or “Do not let this happen”.

1-1. For safe use

**Before driving**

**Floor mat**

Use only floor mats designed specifically for vehicles of the same model and model year as your vehicle. Fix them securely in place onto the carpet.

1. Insert the retaining hooks (clips) into the floor mat eyelets.

2. Turn the upper knob of each retaining hook (clip) to secure the floor mats in place.

*: Always align the △ marks.

The shape of the retaining hooks (clips) may differ from that shown in the illustration.
Observe the following precautions. Failure to do so may cause the driver’s floor mat to slip, possibly interfering with the pedals while driving. An unexpectedly high speed may result or it may become difficult to stop the vehicle. This could lead to an accident, resulting in death or serious injury.

**When installing the driver’s floor mat**
- Do not use floor mats designed for other models or different model year vehicles, even if they are Toyota Genuine floor mats.
- Only use floor mats designed for the driver’s seat.
- Always install the floor mat securely using the retaining hooks (clips) provided.
- Do not use two or more floor mats on top of each other.
- Do not place the floor mat bottom-side up or upside-down.

**Before driving**
- Check that the floor mat is securely fixed in the correct place with all the provided retaining hooks (clips). Be especially careful to perform this check after cleaning the floor.
- With the engine stopped and the shift lever in P (automatic transmission or continuously variable transmission) or N (manual transmission), fully depress each pedal to the floor to make sure it does not interfere with the floor mat.
For safety drive

For safe driving, adjust the seat and mirror to an appropriate position before driving.

Correct driving posture

① Adjust the angle of the seat-back so that you are sitting straight up and so that you do not have to lean forward to steer. (→P. 124)

② Adjust the seat so that you can depress the pedals fully and so that your arms bend slightly at the elbow when gripping the steering wheel. (→P. 124)

③ Lock the head restraint in place with the center of the head restraint closest to the top of your ears. (→P. 128)

④ Wear the seat belt correctly. (→P. 28)

Correct use of the seat belts

Make sure that all occupants are wearing their seat belts before driving the vehicle. (→P. 28)
Use a child restraint system appropriate for the child until the child becomes large enough to properly wear the vehicle’s seat belt. (→P. 53)
1. For safe use

Adjusting the mirrors

Make sure that you can see backward clearly by adjusting the inside and outside rear view mirrors properly. (→P. 133, 135)

CAUTION

Observe the following precautions. Failure to do so may result in death or serious injury.

- Do not adjust the position of the driver’s seat while driving. Doing so could cause the driver to lose control of the vehicle.
- Do not place a cushion between the driver or passenger and the seatback. A cushion may prevent correct posture from being achieved, and reduce the effectiveness of the seat belt and head restraint.
- Do not place anything under the front seats. Objects placed under the front seats may become jammed in the seat tracks and stop the seat from locking in place. This may lead to an accident and the adjustment mechanism may also be damaged.
- When driving over long distances, take regular breaks before you start to feel tired. Also, if you feel tired or sleepy while driving, do not force yourself to continue driving and take a break immediately.
Seat belts

Make sure that all occupants are wearing their seat belts before driving the vehicle.

Correct use of the seat belts

1. Extend the shoulder belt so that it comes fully over the shoulder, but does not come into contact with the neck or slide off the shoulder.
2. Position the lap belt as low as possible over the hips.
3. Adjust the position of the seatback. Sit up straight and well back in the seat.
4. Do not twist the seat belt.

Fastening and releasing the seat belt

1. To fasten the seat belt, push the plate into the buckle until a click sound is heard.
2. To release the seat belt, press the release button.
Adjusting the seat belt shoulder anchor height (front seats)

1. Push the seat belt shoulder anchor down while pressing the release button.
2. Push the seat belt shoulder anchor up.
   Move the height adjuster up and down as needed until you hear a click.

Seat belt pretensioners (front seats)

The pretensioners help the seat belts to quickly restrain the occupants by retracting the seat belts when the vehicle is subjected to certain types of severe frontal or side collision.

The pretensioners do not activate in the event of a minor frontal impact, a minor side impact, a rear impact or a vehicle rollover.
n Emergency locking retractor (ELR)
The retractor will lock the belt during a sudden stop or on impact. It may also lock if you lean forward too quickly. A slow, easy motion will allow the belt to extend so that you can move around fully.

n Automatic locking retractor (ALR)
When a passenger’s shoulder belt is completely extended and then retracted even slightly, the belt is locked in that position and cannot be extended. This feature is used to hold the child restraint system (CRS) firmly. To free the belt again, fully retract the belt and then pull the belt out once more. (→P. 57)

n Child seat belt usage
The seat belts of your vehicle were principally designed for persons of adult size.
- Use a child restraint system appropriate for the child, until the child becomes large enough to properly wear the vehicle’s seat belt. (→P. 53)
- When the child becomes large enough to properly wear the vehicle’s seat belt, follow the instructions regarding seat belt usage. (→P. 28)

n Replacing the belt after the pretensioner has been activated (front seats)
If the vehicle is involved in multiple collisions, the pretensioner will activate for the first collision, but will not activate for the second or subsequent collisions.

n Seat belt extender
If your seat belts cannot be fastened securely because they are not long enough, a personalized seat belt extender is available from your Toyota dealer free of charge.
CAUTION

Observe the following precautions to reduce the risk of injury in the event of sudden braking, sudden swerving or an accident. Failure to do so may cause death or serious injury.

- Wearing a seat belt
  - Ensure that all passengers wear a seat belt.
  - Always wear a seat belt properly.
  - Each seat belt should be used by one person only. Do not use a seat belt for more than one person at once, including children.
  - Toyota recommends that children be seated in the rear seat and always use a seat belt and/or an appropriate child restraint system.
  - To achieve a proper seating position, do not recline the seat more than necessary. The seat belt is most effective when the occupants are sitting up straight and well back in the seats.
  - Do not wear the shoulder belt under your arm.
  - Always wear your seat belt low and snug across your hips.

- Pregnant women
  Obtain medical advice and wear the seat belt in the proper way. (→P. 28)
  Women who are pregnant should position the lap belt as low as possible over the hips in the same manner as other occupants, extending the shoulder belt completely over the shoulder and avoiding belt contact with the rounding of the abdominal area.
  If the seat belt is not worn properly, not only the pregnant woman, but also the fetus could suffer death or serious injury as a result of sudden braking or a collision.
### CAUTION

#### People suffering illness
Obtain medical advice and wear the seat belt in the proper way. (→P. 28)

#### When children are in the vehicle
Do not allow children to play with the seat belt. If the seat belt becomes twisted around a child’s neck, it may lead to choking or other serious injuries that could result in death. If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.

#### Seat belt pretensioners (front seats)
- Do not place anything, such as a cushion, on the front passenger's seat. Doing so will disperse the passenger's weight, which prevents the sensor from detecting the passenger's weight properly. As a result, the seat belt pretensioner for the front passenger's seat may not activate in the event of a collision.
- If the pretensioner has activated, the SRS warning light will come on. In that case, the seat belt cannot be used again and must be replaced at your Toyota dealer.

#### Adjustable shoulder anchor (front seats)
Always make sure the shoulder belt is positioned across the center of your shoulder. The belt should be kept away from your neck, but not falling off your shoulder. Failure to do so could reduce the amount of protection in an accident and cause death or serious injuries in the event of a sudden stop, sudden swerve or accident. (→P. 29)

#### Seat belt damage and wear
- Do not damage the seat belts by allowing the belt, plate, or buckle to be jammed in the door.
- Inspect the seat belt system periodically. Check for cuts, fraying, and loose parts. Do not use a damaged seat belt until it is replaced. Damaged seat belts cannot protect an occupant from death or serious injury.
- Ensure that the belt and plate are locked and the belt is not twisted. If the seat belt does not function correctly, immediately contact your Toyota dealer.
- Replace the seat assembly, including the belts, if your vehicle has been involved in a serious accident, even if there is no obvious damage.
- Do not attempt to install, remove, modify, disassemble or dispose of the seat belts. Have any necessary repairs carried out by your Toyota dealer. Inappropriate handling may lead to incorrect operation.
**CAUTION**

- **Using a seat belt extender**
  - Do not wear the seat belt extender if you can fasten the seat belt without the extender.
  - Do not use the seat belt extender when installing a child restraint system because the belt will not securely hold the child restraint system, increasing the risk of death or serious injury in the event of an accident.
  - The personalized extender may not be safe on another vehicle, when used by another person, or at a different seating position other than the one originally intended.

**NOTICE**

- **When using a seat belt extender**
  When releasing the seat belt, press on the buckle release button on the extender, not on the seat belt.
  This helps prevent damage to the vehicle interior and the extender itself.
SRS airbags

The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.

1. **SRS front airbags**
   - SRS driver airbag/front passenger airbag
     Can help protect the head and chest of the driver and front passenger from impact with interior components
   - SRS driver’s knee airbag
     Can help provide driver protection
   - SRS seat cushion airbag
     Can help restrain the front passenger

2. **SRS side and curtain shield airbags**
   - SRS front side airbags
     Can help protect the torso of the front seat occupants
   - SRS curtain shield airbags
     Can help protect primarily the head of occupants in the outer seats
SRS airbag system components

1. Front impact sensors
2. Front passenger occupant classification system (ECU and sensors)
3. Seat cushion airbag
4. Side impact sensors (front doors)
5. Front passenger airbag
6. Side airbags
7. Seat belt pretensioners and force limiters
8. Side impact sensors (front)
9. “AIR BAG ON” and “AIR BAG OFF” indicator lights
10. Curtain shield airbags
11. Side impact sensors (rear)
12. Driver airbag
13. Driver’s seat belt buckle switch
14. Driver’s knee airbag
15. Airbag sensor assembly
16. Front passenger’s seat belt buckle switch
17. SRS warning light
Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.

**CAUTION**

**SRS airbag precautions**

Observe the following precautions regarding the SRS airbags.

Failure to do so may cause death or serious injury.

- The driver and all passengers in the vehicle must wear their seat belts properly.
  - The SRS airbags are supplemental devices to be used with the seat belts.
- The SRS driver airbag deploys with considerable force, and can cause death or serious injury especially if the driver is very close to the airbag.
  - The National Highway Traffic Safety Administration (NHTSA) advises:

    Since the risk zone for the driver’s airbag is the first 2 - 3 in. (50 - 75 mm) of inflation, placing yourself 10 in. (250 mm) from your driver airbag provides you with a clear margin of safety. This distance is measured from the center of the steering wheel to your breastbone. If you sit less than 10 in. (250 mm) away now, you can change your driving position in several ways:

    • Move your seat to the rear as far as you can while still reaching the pedals comfortably.
    • Slightly recline the back of the seat.
    
    Although vehicle designs vary, many drivers can achieve the 10 in. (250 mm) distance, even with the driver seat all the way forward, simply by reclining the back of the seat somewhat. If reclining the back of your seat makes it hard to see the road, raise yourself by using a firm, non-slippery cushion, or raise the seat if your vehicle has that feature.
    • If your steering wheel is adjustable, tilt it downward. This points the airbag toward your chest instead of your head and neck.

The seat should be adjusted as recommended by NHTSA above, while still maintaining control of the foot pedals, steering wheel, and your view of the instrument panel controls.
For safe use

CAUTION

SRS airbag precautions

- If the seat belt extender has been connected to the front seat belt buckles but the seat belt extender has not also been fastened to the latch plate of the seat belt, the SRS front airbags will judge that the driver and front passenger are wearing the seat belt even though the seat belt has not been connected. In this case, the SRS front airbags may not activate correctly in a collision, resulting in death or serious injury in the event of a collision. Be sure to wear the seat belt with the seat belt extender.

- The SRS front passenger airbag also deploys with considerable force, and can cause death or serious injury especially if the front passenger is very close to the airbag. The front passenger seat should be as far from the airbag as possible with the seatback adjusted, so the front passenger sits upright.

- Improperly seated and/or restrained infants and children can be killed or seriously injured by a deploying airbag. An infant or child who is too small to use a seat belt should be properly secured using a child restraint system. Toyota strongly recommends that all infants and children be placed in the rear seats of the vehicle and properly restrained. The rear seats are safer for infants and children than the front passenger seat. (→P. 53)
1-1. For safe use

CAUTION

SRS airbag precautions

- Do not sit on the edge of the seat or lean against the dashboard.

- Do not allow a child to stand in front of the SRS front passenger airbag unit or sit on the knees of a front passenger.

- Do not allow the front seat occupants to hold items on their knees.

- Do not lean against the door, the roof side rail or the front, side and rear pillars.

- Do not allow anyone to kneel on the passenger seats toward the door or put their head or hands outside the vehicle.
**CAUTION**

*SRS airbag precautions*

- Do not attach anything to or lean anything against areas such as the dashboard, steering wheel pad and lower portion of the instrument panel. These items can become projectiles when the SRS driver, front passenger and driver's knee airbag deploy.

- Do not attach anything to areas such as the door, windshield glass, side door glass, front or rear pillar, roof side rail and assist grip.

- Vehicles without a smart key system: Do not attach any heavy, sharp or hard objects such as keys and accessories to the key. The objects may restrict the SRS driver’s knee airbag inflation or be thrust into the driver’s seat area by the force of the deploying airbag, thus causing a danger.
CAUTION

SRS airbag precautions

- If a vinyl cover is put on the area where the SRS driver’s knee airbag will deploy, be sure to remove it.
- Do not use seat accessories which cover the parts where the SRS side airbags and SRS seat cushion airbag inflate as they may interfere with inflation of the SRS airbags. Such accessories may prevent the side airbags and seat cushion airbag from activating correctly, disable the system or cause the side airbags and seat cushion airbag to inflate accidentally, resulting in death or serious injury.
- Do not strike or apply significant levels of force to the area of the SRS airbag components. Doing so can cause the SRS airbags to malfunction.
- Do not touch any of the component parts immediately after the SRS airbags have deployed (inflated) as they may be hot.
- If breathing becomes difficult after the SRS airbags have deployed, open a door or window to allow fresh air in, or leave the vehicle if it is safe to do so. Wash off any residue as soon as possible to prevent skin irritation.
- If the areas where the SRS airbags are stored, such as the steering wheel pad and front and rear pillars garnishes, are damaged or cracked, have them replaced by your Toyota dealer.

Modification and disposal of SRS airbag system components

Do not dispose of your vehicle or perform any of the following modifications without consulting your Toyota dealer. The SRS airbags may malfunction or deploy (inflate) accidentally, causing death or serious injury.

- Installation, removal, disassembly and repair of the SRS airbags
- Repairs, modifications, removal or replacement of the steering wheel, instrument panel, dashboard, seats or seat upholstery, front, side and rear pillars or roof side rails
- Repairs or modifications of the front fender, front bumper, or side of the occupant compartment
- Installation of a grille guard (bull bars, kangaroo bar, etc.), snow plows, winches
- Modifications to the vehicle’s suspension system
- Installation of electronic devices such as mobile two-way radios and CD players
- Modifications to your vehicle for a person with a physical disability
If the SRS airbags deploy (inflate)

- Bruising and slight abrasions may result from contact with a deploying (inflating) SRS airbag.
- A loud noise and white powder will be emitted.
- Parts of the airbag module (steering wheel hub, airbag cover and inflator) as well as the front seats, parts of the front and rear pillars, and roof side rails, may be hot for several minutes. The airbag itself may also be hot.
- The windshield may crack.

SRS airbag deployment conditions (SRS front airbags)

- The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).

However, this threshold velocity will be considerably higher in the following situations:

- If the vehicle strikes an object, such as a parked vehicle or sign pole, which can move or deform on impact
- If the vehicle is involved in an underride collision, such as a collision in which the front of the vehicle "underrides", or goes under, the bed of a truck

Depending on the type of collision, it is possible that only the seat belt pretensioners will activate.

- The SRS front airbags for the front passenger will not activate if there is no passenger sitting in the front passenger seat. However, the SRS front airbags for the front passenger may deploy if luggage is put in the seat, even if the seat is unoccupied.
- The SRS seat cushion airbag on the front seats will not operate if the occupant is not wearing a seat belt.

SRS airbag deployment conditions (SRS side and curtain shield airbags)

- The SRS side and curtain shield airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to the impact force produced by an approximately 3300 lb. [1500 kg] vehicle colliding with the vehicle cabin from a direction perpendicular to the vehicle orientation at an approximate speed of 12 - 18 mph [20 - 30 km/h]).

- The SRS side and curtain shield airbags may also deploy in the event of a severe frontal collision.
Conditions under which the SRS airbags may deploy (inflate), other than a collision

The SRS front airbags and SRS side and curtain shield airbags may also deploy if a serious impact occurs to the underside of your vehicle. Some examples are shown in the illustration.

- Hitting a curb, edge of pavement or hard surface
- Falling into or jumping over a deep hole
- Landing hard or falling

Types of collisions that may not deploy the SRS airbags (SRS front airbags)

The SRS front airbags do not generally inflate if the vehicle is involved in a side or rear collision, if it rolls over, or if it is involved in a low-speed frontal collision. But, whenever a collision of any type causes sufficient forward deceleration of the vehicle, deployment of the SRS front airbags may occur.

- Collision from the side
- Collision from the rear
- Vehicle rollover
Types of collisions that may not deploy the SRS airbags (SRS side and curtain shield airbags)

The SRS side and curtain shield airbags may not activate if the vehicle is subjected to a collision from the side at certain angles, or a collision to the side of the vehicle body other than the passenger compartment.

- Collision from the side to the vehicle body other than the passenger compartment
- Collision from the side at an angle

The SRS side and curtain shield airbags do not generally inflate if the vehicle is involved in a rear collision, if it rolls over, or if it is involved in a low-speed side collision.

- Collision from the rear
- Vehicle rollover
When to contact your Toyota dealer

In the following cases, the vehicle will require inspection and/or repair. Contact your Toyota dealer as soon as possible.

- Any of the SRS airbags have been inflated.
- The front of the vehicle is damaged or deformed, or was involved in an accident that was not severe enough to cause the SRS front airbags to inflate.
- A portion of a door is damaged or deformed, or the vehicle was involved in an accident that was not severe enough to cause the SRS side airbags and curtain shield airbags to inflate.
- The pad section of the steering wheel, dashboard near the front passenger airbag or lower portion of the instrument panel is scratched, cracked, or otherwise damaged.
- The seat cushion surface is scratched, cracked, or otherwise damaged.
- The surface of the seats with the side airbag is scratched, cracked, or otherwise damaged.
The portion of the front pillars, rear pillars or roof side rail garnishes (padding) containing the curtain shield airbags inside is scratched, cracked, or otherwise damaged.
Front passenger occupant classification system

Your vehicle is equipped with a front passenger occupant classification system. This system detects the conditions of the front passenger seat and activates or deactivates the devices for the front passenger.

1 SRS warning light
2 Seat belt reminder light
3 “AIR BAG OFF” indicator light
4 “AIR BAG ON” indicator light

*1: The system judges a person of adult size as an adult. When a smaller adult sits in the front passenger seat, the system may not recognize him/her as an adult depending on his/her physique and posture.

*2: In the event the front passenger is wearing a seat belt.

*3: In the event the front passenger does not wear a seat belt

*4: For some children, child in seat, child in booster seat or child in convertible seat, the system may not recognize him/her as a child. Factors which may affect this can be the physique or posture.

*5: Never install a rear-facing child restraint system on the front passenger seat. A forward-facing child restraint system should only be installed on the front passenger seat when it is unavoidable. (→P. 53)

*6: In case the indicator light is not illuminated, consult this manual on how to install the child restraint system properly. (→P. 57)
CAUTION

Front passenger occupant classification system precautions
Observe the following precautions regarding the front passenger occupant classification system. Failure to do so may cause death or serious injury.

- Wear the seat belt properly.
- Make sure the front passenger’s seat belt plate has not been left inserted into the buckle before someone sits in the front passenger seat.
- Make sure the “AIR BAG OFF” indicator light is not illuminated when using the seat belt extender for the front passenger seat. If the “AIR BAG OFF” indicator light is illuminated, disconnect the extender tongue from the seat belt buckle, and reconnect the seat belt. Reconnect the seat belt extender after making sure the “AIR BAG ON” indicator light is illuminated. If you use the seat belt extender while the “AIR BAG OFF” indicator light is illuminated, the SRS airbags for the front passenger may not activate, which could cause death or serious injury in the event of a collision.
- Do not apply a heavy load to the front passenger seat or equipment (e.g. seatback pocket).
- Do not put weight on the front passenger seat by putting your hands or feet on the front passenger seat seatback from the rear passenger seat.
- Do not let a rear passenger lift the front passenger seat with their feet or press on the seatback with their legs.
- Do not put objects under the front passenger seat.
Front passenger occupant classification system precautions

Do not recline the front passenger seatback so far that it touches the rear seat. This may cause the “AIR BAG OFF” indicator light to be illuminated, which indicates that the SRS airbags for the front passenger will not deploy in the event of a severe accident. If the seatback touches the rear seat, return the seatback to a position where it does not touch the rear seat. Keep the front passenger seatback as upright as possible when the vehicle is moving. Reclining the seatback excessively may lessen the effectiveness of the seat belt system.

If an adult sits in the front passenger seat, the “AIR BAG ON” indicator light is illuminated. If the “AIR BAG OFF” indicator is illuminated, ask the passenger to sit up straight, well back in the seat, feet on the floor, and with the seat belt worn correctly. If the “AIR BAG OFF” indicator still remains illuminated, either ask the passenger to move to the rear seat, or if that is not possible, move the front passenger seat fully rearward.

When it is unavoidable to install a forward-facing child restraint system on the front passenger seat, install the child restraint system on the front passenger seat in the proper order. (→P. 57)

Do not modify or remove the front seats.

Do not kick the front passenger seat or subject it to severe impact. Otherwise, the SRS warning light may come on to indicate a malfunction of the front passenger occupant classification system. In this case, contact your Toyota dealer immediately.

Child restraint systems installed on the rear seat should not contact the front seatbacks.

Do not use a seat accessory, such as a cushion and seat cover, that covers the seat cushion surface.

Do not modify or replace the upholstery of the front seat.
Safety information for children

Observe the following precautions when children are in the vehicle.
Use a child restraint system appropriate for the child, until the child becomes large enough to properly wear the vehicle’s seat belt.

- It is recommended that children sit in the rear seats to avoid accidental contact with the shift lever, wiper switch etc.
- Use the rear door child-protector lock or the window lock switch to avoid children opening the door while driving or operating the power window accidentally.
- Do not let small children operate equipment which may catch or pinch body parts, such as the power window, hood, trunk, seats etc.

⚠️ CAUTION

Never leave children unattended in the vehicle, and never allow children to have or use the key.
Children may be able to start the vehicle or shift the vehicle into neutral. There is also a danger that children may injure themselves by playing with the windows or other features of the vehicle. In addition, heat build-up or extremely cold temperatures inside the vehicle can be fatal to children.
Child restraint systems

A child restraint system for a small child or baby must itself be properly restrained on the seat with the LATCH anchors or the lap portion of the lap/shoulder belt.

The laws of all 50 states of the U.S.A. and Canada now require the use of child restraint systems.

Points to remember

Studies have shown that installing a child restraint on a rear seat is much safer than installing one on the front passenger seat.

1. Choose a child restraint system that suits your vehicle and is appropriate to the age and size of the child.

2. For installation details, follow the instructions provided with the child restraint system.

General installation instructions are provided in this manual. (→P. 57)
Types of child restraints

Child restraint systems are classified into the following 3 types according to the age and size of the child:

- Rear facing — Infant seat/convertible seat
- Forward facing — Convertible seat
- Booster seat

Selecting an appropriate child restraint system

- Use a child restraint system appropriate for the child until the child becomes large enough to properly wear the vehicle’s seat belt.
- If the child is too large for a child restraint system, sit the child on a rear seat and use the vehicle’s seat belt. (→P. 28)
For safe use

1-1. For safety and security

**CAUTION**

**Child restraint precautions**

- For effective protection in automobile accidents and sudden stops, a child must be properly restrained, using a seat belt or child restraint system depending on the age and size of the child. Holding a child in your arms is not a substitute for a child restraint system. In an accident, the child can be crushed against the windshield, or between you and the vehicle’s interior.

- Toyota strongly urges the use of a proper child restraint system that conforms to the size of the child, installed on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.

- Never install a rear-facing child restraint system on the front passenger seat even if the “AIR BAG OFF” indicator light is illuminated. In the event of an accident, the force of the rapid inflation of the front passenger airbag can cause death or serious injury to the child if the rear-facing child restraint system is installed on the front passenger seat.

- A forward-facing child restraint system may be installed on the front passenger seat only when it is unavoidable. A child restraint system that requires a top tether strap should not be used in the front passenger seat since there is no top tether strap anchor for the front passenger seat. Adjust the seatback as upright as possible and always move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated, because the front passenger airbag could inflate with considerable speed and force. Otherwise, the child may be killed or seriously injured.

- Do not use the seat belt extender when installing a child restraint system on the front or rear passenger seat. If installing a child restraint system with the seat belt extender connected to the seat belt, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of a sudden stop, sudden swerve or accident.

- Do not allow the child to lean his/her head or any part of his/her body against the door or the area of the seat, front and rear pillars or roof side rails from which the SRS side airbags or SRS curtain shield airbags deploy even if the child is seated in the child restraint system. It is dangerous if the SRS side airbags and curtain shield airbags inflate, and the impact could cause death or serious injury to the child.

- Make sure you have complied with all installation instructions provided by the child restraint manufacturer and that the system is properly secured. If it is not secured properly, it may cause death or serious injury to the child in the event of a sudden stop or accident.
**CAUTION**

**When children are in the vehicle**
Do not allow children to play with the seat belt. If the seat belt becomes twisted around a child’s neck, it may lead to choking or other serious injuries that could result in death.
If this occurs and the buckle cannot be unfastened, scissors should be used to cut the belt.

**When the child restraint system is not in use**

- Keep the child restraint system properly secured on the seat even if it is not in use. Do not store the child restraint system unsecured in the passenger compartment.
- If it is necessary to detach the child restraint system, remove it from the vehicle or store it securely in the trunk. If a head restraint was removed when installing a child restraint system, always install the head restraint before driving. This will prevent it from injuring passengers in the event of a sudden stop or accident.
Installing child restraints

Follow the child restraint system manufacturer's instructions. Firmly secure child restraints to the seats using the LATCH anchors or a seat belt. Attach the top tether strap when installing a child restraint.

The lap/shoulder belt can be used if your child restraint system is not compatible with the LATCH (Lower Anchors and Tethers for Children) system.

Child restraint LATCH anchors (→P. 58)

LATCH anchors are provided for the outer rear seats. (Buttons displaying the location of the anchors are attached to the seats.)

Installation with a seat belt (→P. 59)

Anchor brackets (for top tether strap) (→P. 62)

An anchor bracket is provided for each rear seat.
Installation with LATCH system

1. Widen the gap between the seat cushion and seatback slightly.

   Type A

2. Latch the hooks of the lower straps onto the LATCH anchors. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

   For owners in Canada:
   The symbol on a child restraint system indicates the presence of a lower connector system.

   Type B

2. Latch the buckles onto the LATCH anchors. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor.

   For owners in Canada:
   The symbol on a child restraint system indicates the presence of a lower connector system.
Installing child restraints using a seat belt

Rear-facing — Infant seat/convertible seat

1. Place the child restraint system on the rear seat facing the rear of the vehicle.

2. Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.

3. Fully extend the shoulder belt and allow it to retract to put it in lock mode. In lock mode, the belt cannot be extended.

4. While pushing the child restraint system down into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.

   After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.
For safe use

Forward-facing — Convertible seat

1. Place the child restraint system on the seat facing the front of the vehicle.
   If your child restraint system interferes with a head restraint and cannot be installed properly, install the child restraint system after removing the head restraint. (→P. 129)

2. Run the seat belt through the child restraint system and insert the plate into the buckle. Make sure that the belt is not twisted.

3. Fully extend the shoulder belt and allow it to retract to put it in lock mode. In lock mode, the belt cannot be extended.

4. While pushing the child restraint system into the rear seat, allow the shoulder belt to retract until the child restraint system is securely in place.
   After the shoulder belt has retracted to a point where there is no slack in the belt, pull the belt to check that it cannot be extended.

5. If the child restraint has a top tether strap, the top tether strap should be latched onto the top tether strap anchor. (→P. 62)
Booster seat

1. Place the child restraint system on the seat facing the front of the vehicle.

2. Sit the child in the child restraint system. Fit the seat belt to the child restraint system according to the manufacturer's instructions and insert the plate into the buckle. Make sure that the belt is not twisted.

   Check that the shoulder belt is correctly positioned over the child's shoulder and that the lap belt is as low as possible. (→P. 28)

Removing a child restraint installed with a seat belt

Push the buckle release button and fully retract the seat belt.
Child restraint systems with a top tether strap

1. Adjust the head restraint to the downmost position. (if equipped) (→ P. 128)

2. Secure the child restraint system using the seat belt or LATCH anchors.

3. Open the anchor bracket cover, latch the hook onto the anchor bracket and tighten the top tether strap. Make sure the top tether strap is securely latched.
Laws and regulations pertaining to anchorages
The LATCH system conforms to FMVSS225 or CMVSS210.2. Child restraint systems conforming to FMVSS213 or CMVSS213 specifications can be used.
This vehicle is designed to conform to SAE J1819.

**CAUTION**

- **When installing a booster seat**
  To prevent the belt from going into ALR lock mode, do not fully extend the shoulder belt. ALR mode causes the belt to tighten only. This could cause injury or discomfort to the child. (→P. 30)

- **When installing a child restraint system**
  Follow the directions given in the child restraint system installation manual and fix the child restraint system securely in place.
  If the child restraint system is not correctly fixed in place, the child or other passengers may be seriously injured or even killed in the event of a sudden braking or an accident.
  - If the driver’s seat interferes with the child restraint system and prevents it from being attached correctly, attach the child restraint system to the right-hand rear seat.
  - Adjust the front passenger seat so that it does not interfere with the child restraint system.
  - Only put a forward-facing child restraint system on the front seat when unavoidable. When installing a forward-facing child restraint system on the front passenger seat, move the seat as far back as possible even if the “AIR BAG OFF” indicator light is illuminated. Failure to do so may result in death or serious injury if the airbags deploy (inflate).
**CAUTION**

**When installing a child restraint system**
- When using the LATCH anchors for a child restraint system, move the seat as far back as possible, with the seatback close to the child restraint system.
- When a booster seat is installed, always ensure that the shoulder belt is positioned across the center of the child’s shoulder. The belt should be kept away from the child’s neck, but not so that it could fall off the child’s shoulder. Failing to do so may result in death or serious injury in the event of sudden braking, sudden swerving or an accident.
- Ensure that the belt and plate are securely locked and the seat belt is not twisted.
- Shake the child restraint system left and right, and forward and backward to ensure that it has been securely installed.
- After securing a child restraint system, never adjust the seat.
- Follow all installation instructions provided by the child restraint system manufacturer.

**Do not use a seat belt extender**
If a seat belt extender is used when installing a child restraint system, the seat belt will not securely hold the child restraint system, which could cause death or serious injury to the child or other passengers in the event of a sudden braking, sudden swerving or an accident.

**To correctly attach a child restraint system to the anchors**
When using the LATCH anchors, be sure that there are no foreign objects around the anchors and that the seat belt is not caught behind the child restraint system. Make sure the child restraint system is securely attached, or it may cause death or serious injury to the child or other passengers in the event of a sudden braking, sudden swerve or an accident.
Exhaust gas precautions

Harmful substance to the human body is included in exhaust gases if inhaled.

**CAUTION**

Exhaust gases include harmful carbon monoxide (CO), which is colorless and odorless. Observe the following precautions. Failure to do so may cause exhaust gases to enter the vehicle and may lead to an accident caused by light-headedness, or may lead to death or a serious health hazard.

- **Important points while driving**
  - Keep the trunk lid closed.
  - If you smell exhaust gases in the vehicle even when the trunk lid is closed, open the windows and have the vehicle inspected at your Toyota dealer as soon as possible.

- **When parking**
  - If the vehicle is in a poorly ventilated area or a closed area, such as a garage, stop the engine.
  - Do not leave the vehicle with the engine on for a long time. If such a situation cannot be avoided, park the vehicle in an open space and ensure that exhaust fumes do not enter the vehicle interior.
  - Do not leave the engine running in an area with snow build-up, or where it is snowing. If snowbanks build up around the vehicle while the engine is running, exhaust gases may collect and enter the vehicle.

- **Exhaust pipe**
  - The exhaust system needs to be checked periodically. If there is a hole or crack caused by corrosion, damage to a joint or abnormal exhaust noise, be sure to have the vehicle inspected and repaired by your Toyota dealer.
1-2. Theft deterrent system

**Engine immobilizer system**

The vehicle’s keys have built-in transponder chips that prevent the engine from starting if a key has not been previously registered in the vehicle’s on-board computer.

Never leave the keys inside the vehicle when you leave the vehicle.

This system is designed to help prevent vehicle theft but does not guarantee absolute security against all vehicle thefts.

Vehicles without a smart key system:

The indicator light flashes after the key has been removed from the engine switch to indicate that the system is operating.

The indicator light stops flashing after the registered key has been inserted into the engine switch to indicate that the system has been canceled.

Vehicles with a smart key system:

The indicator light flashes after the engine switch has been turned off to indicate that the system is operating.

The indicator light stops flashing after the engine switch has been turned to ACCESSORY or IGNITION ON mode to indicate that the system has been canceled.
1-2. Theft deterrent system

- **System maintenance**
  The vehicle has a maintenance-free type engine immobilizer system.

- **Conditions that may cause the system to malfunction**
  - If the grip portion of the key is in contact with a metallic object
  - If the key is in close proximity to or touching a key to the security system (key with a built-in transponder chip) of another vehicle

- **Certifications for the engine immobilizer system (vehicles without a smart key system)**
  - For vehicles sold in the U.S.A.
    FCC ID: WRKRI-44BTY
    This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
    Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
  - For vehicles sold in Canada
    This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

- **Certifications for the engine immobilizer system (vehicles with a smart key system)**
  - For vehicles sold in the U.S.A.
    FCC ID: NI4TMIMB-3
    This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
    Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
  - For vehicles sold in Canada
    This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

---

**NOTICE**

- To ensure the system operates correctly
  Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.
1-2. Theft deterrent system

Alarm*

The alarm

The alarm uses light and sound to give an alert when an intrusion is detected. The alarm is triggered in the following situations when the alarm is set:

- A locked door or trunk is unlocked or opened in any way other than using the entry function, wireless remote control or mechanical key. (The doors will lock again automatically.)
- The hood is opened.

Setting the alarm system

Close the doors, trunk and hood, and lock all the doors. The system will be set automatically after 30 seconds.

The indicator light changes from being on to flashing when the system is set.

Deactivating or stopping the alarm

Do one of the following to deactivate or stop the alarm:

- Unlock the doors or open the trunk.
- Vehicles without a smart key system:
  - Turn the engine switch to the “ACC” or “ON” position, or start the engine. (The alarm will be deactivated or stopped after a few seconds.)
- Vehicles with a smart key system:
  - Turn the engine switch to ACCESSORY or IGNITION ON mode, or start the engine. (The alarm will be deactivated or stopped after a few seconds.)

*: If equipped
1 System maintenance
   The vehicle has a maintenance-free type alarm system.

2 Items to check before locking the vehicle
   To prevent unexpected triggering of the alarm and vehicle theft, make sure of the following:
   - Nobody is in the vehicle.
   - The windows and moon roof are closed before the alarm is set.
   - No valuables or other personal items are left in the vehicle.

3 Triggering of the alarm
   The alarm may be triggered in the following situations:
   (Stopping the alarm deactivates the alarm system.)
   - A person inside the vehicle opens a door, the trunk or hood, or unlocks the vehicle using a door lock switch or inside lock button.
   - The battery is recharged or replaced when the vehicle is locked. (→ P. 541)

4 Alarm-operated door lock
   In the following situations, the doors are locked automatically to prevent intruders:
   - The doors are unlocked manually without the mechanical key and the alarm is triggered.
   - While the alarm is operating, the doors are unlocked manually without the mechanical key.

   NOTICE
   To ensure the system operates correctly
   Do not modify or remove the system. If modified or removed, the proper operation of the system cannot be guaranteed.

There may be a malfunction in a system if a light does not come on, or turn off. Have the vehicle inspected by your Toyota dealer.

Vehicles with a smart key system:
These lights turn on when the engine switch is turned to IGNITION ON mode to indicate that a system check is being performed. They will turn off after the engine is started, or after a few seconds. There may be a malfunction in a system if a light does not come on, or turn off. Have the vehicle inspected by your Toyota dealer.

*2: If equipped
*3: The light flashes to indicate that the system is operating.
*4: The light does not turn on when the system is disabled.
*5: This light illuminates on the center panel.

CAUTION

- **If a safety system warning light does not come on**
  Should a safety system light such as the ABS and SRS warning lights not come on when you start the engine, this could mean that these systems are not available to help protect you in an accident, which could result in death or serious injury. Have the vehicle inspected by your Toyota dealer immediately if this occurs.
**Gauges and meters (drive monitor display)**

The displayed content may differ depending on the type of meter.

1. **Tachometer**
   Displays the engine speed in revolutions per minute.
2. **Speedometer**
3. **Fuel gauge**
4. **Drive monitor display**
   The drive monitor display presents the driver with a variety of driving-related data including the current outside air temperature.
2. Instrument cluster

Drive monitor display

1. Engine coolant temperature gauge
   Displays the engine coolant temperature.
2. Eco Driving Indicator Zone Display* (→P. 93)
3. Outside temperature display (→P. 410)
4. Shift position and gear position indicator* (→P. 176, 178, 180)
5. Trip information (→P. 79)

*: Except vehicles with a manual transmission

Instrument panel light control

When the tail lights are on, the brightness of the instrument panel lights can be adjusted. (On vehicles with an automatic light control system, the instrument panel lights can be adjusted when the surrounding area is dark and the tail lights are on.)

The brightness of the clock light can be adjusted regardless of whether the tail lights are on or off.

1. Brighter
2. Darker
Switching the display

Items displayed can be switched by pressing the “DISP” switch.

Odometer
Displays the total distance the vehicle has been driven.
Except vehicles with a manual transmission: Press and hold the “DISP” switch to change the display to the Eco Driving Indicator Light customization screen. (→P. 80)

Trip meter A*/trip meter B*
Displays the distance the vehicle has been driven since the meter was last reset. Trip meters A and B can be used to record and display different distances independently.

Current fuel consumption
Displays the current rate of fuel consumption.
Use the displayed current fuel consumption as a reference.

Average fuel consumption*
Displays the average fuel consumption since the function was reset.
• Use the displayed average fuel consumption as a reference.
• Except vehicles with a manual transmission: While the average fuel consumption is being displayed, the Eco Driving Indicator Zone Display is displayed.
Driving range
Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.
• This distance is computed based on your average fuel consumption. As a result, the actual distance that can be driven may differ from that displayed.
• When only a small amount of fuel is added to the tank, the display may not be updated.
  When refueling, turn the engine switch off. If the vehicle is refueled without turning the engine switch off, the display may not be updated.

Average vehicle speed
Displays the average vehicle speed since the engine was last started.
*: Press and hold the “DISP” switch to reset.

Eco Driving Indicator Light customization (except vehicles with a manual transmission)

Eco Driving Indicator Light can be activated or deactivated.

1. While the odometer is being displayed, press and hold the “DISP” switch to display the Eco Driving Indicator Light customization screen.

2. Press the “DISP” switch to set Eco Driving Indicator Light to on or off.

3. Press and hold the “DISP” switch to complete the setting.
2. Instrument cluster

The meters and display illuminate when
- Vehicles without a smart key system
  The engine switch is in the “ON” position.
- Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

When disconnecting and reconnecting battery terminals
The following information data will be reset:
- Average fuel consumption
- Driving range
- Average vehicle speed

**CAUTION**

The display at low temperatures
Allow the interior of the vehicle to warm up before using the display. At extremely low temperatures, the display monitor may respond slowly, and display changes may be delayed. For example, there is a lag between the driver’s shifting and the new gear number appearing on the display. This lag could cause the driver to down-shift again, causing rapid and excessive engine braking and possibly an accident resulting in death or injury.

Cautions during setting up the display
As the engine needs to be running during setting up the display, ensure that the vehicle is parked in a place with adequate ventilation. In a closed area such as a garage, exhaust gases including harmful carbon monoxide (CO) may collect and enter the vehicle. This may lead to death or a serious health hazard.

**NOTICE**

To prevent damage to the engine and its components
- Do not let the indicator needle of the tachometer enter the red zone, which indicates the maximum engine speed.
- The engine may be overheating if the high engine coolant temperature warning light comes on. In this case, immediately stop the vehicle in a safe place, and check the engine after it has cooled completely. (→P. 543)
Gauges and meters (multi-information display)

The displayed content may differ depending on the type of meter.

1. Tachometer
   Displays the engine speed in revolutions per minute.

2. Speedometer

3. Fuel gauge

4. Multi-information display
   The multi-information display presents the driver with a variety of driving-related data including the current outside air temperature.

5. Display change button
   Switches the trip information.

6. Engine coolant temperature gauge
   Displays the engine coolant temperature.
2. Instrument cluster

Multi-information display

1. Outside temperature display (→P. 410)
2. Driving monitor (→P. 84)
3. Warning messages (→P. 510)
4. Eco Driving Indicator Zone Display* (→P. 93)
5. Trip information (→P. 84)
6. Shift position and gear position indicator* (→P. 176, 178, 180)

*: Except vehicles with a manual transmission

Instrument panel light control

When the tail lights are on, the brightness of the instrument panel lights can be adjusted. (On vehicles with an automatic light control system, the instrument panel lights can be adjusted when the surrounding area is dark and the tail lights are on.)

The brightness of the clock light can be adjusted regardless of whether the tail lights are on or off.

1. Brighter
2. Darker
2. Instrument cluster

**Trip information**

**Switching the display**

Items displayed can be switched by pressing the display change button.

**Odometer**

Displays the total distance the vehicle has been driven.

**Trip meter A/trip meter B**

Displays the distance the vehicle has been driven since the meter was last reset. Trip meters A and B can be used to record and display different distances independently.

Press and hold the display change button to reset.

**Driving monitor**

**Switching the display**

Items displayed can be switched by pressing the “DISP” switch.

**Average fuel consumption**

Displays the average fuel consumption since the function was reset.

- Press and hold the “DISP” switch to reset when the average fuel consumption is displayed.
- Use the displayed average fuel consumption as a reference.

**Current fuel consumption**

Displays the current rate of fuel consumption.

Use the displayed current fuel consumption as a reference.
Driving range
Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.
• This distance is computed based on your average fuel consumption. As a result, the actual distance that can be driven may differ from that displayed.
• When only a small amount of fuel is added to the tank, the display may not be updated.
  When refueling, turn the engine switch off. If the vehicle is refueled without turning the engine switch off, the display may not be updated.

Average vehicle speed
Displays the average vehicle speed since the engine was last started.

Elapsed time
Displays the elapsed time since the engine was started.

Customization
Language and Eco Driving Indicator Light settings can be changed. (→P. 86)

Eco Driving Indicator Zone Display (except vehicles with a manual transmission)
→P. 93
Customizing vehicle features

It is possible to customize the language and Eco Driving Indicator Light settings using the “DISP” switch.

When customizing vehicle features, ensure that the vehicle is parked in a safe place with the shift lever to P (continuously variable transmission) or N (manual transmission) and the parking brake set.

1. Press the “DISP” switch to display the setting screen while the vehicle is stopped, and then press and hold the “DISP” switch to display the customize mode screen.

2. Press the “DISP” switch to select the item to be set, then press and hold the “DISP” switch.

3. Press the “DISP” switch to select the desired setting, and then press and hold the “DISP” switch.

To go back to the previous screen or exit the customize mode, press the “DISP” switch to select “EXIT”, and then press and hold the “DISP” switch.

*: Except vehicles with a manual transmission

The meters and display illuminate when

- Vehicles without a smart key system
  The engine switch is in the “ON” position.
- Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

When disconnecting and reconnecting battery terminals
The following information data will be reset:

- Driving range
- Average vehicle speed
- Elapsed time
- Average fuel consumption

Liquid crystal display
Small spots or light spots may appear on the display. This phenomenon is characteristic of liquid crystal displays, and there is no problem continuing to use the display.

Setting display automatic suspension
In the following situations, the setting display will be suspended.

- When a message appears.
- When the vehicle begins to move.
2. Instrument cluster

⚠️ CAUTION

- **The display at low temperatures**
  Allow the interior of the vehicle to warm up before using the display. At extremely low temperatures, the display monitor may respond slowly, and display changes may be delayed.
  For example, there is a lag between the driver’s shifting and the new gear number appearing on the display. This lag could cause the driver to down-shift again, causing rapid and excessive engine braking and possibly an accident resulting in death or injury.

- **Cautions during setting up the display**
  As the engine needs to be running during setting up the display, ensure that the vehicle is parked in a place with adequate ventilation. In a closed area such as a garage, exhaust gases including harmful carbon monoxide (CO) may collect and enter the vehicle. This may lead to death or a serious health hazard.

⚠️ NOTICE

- **To prevent damage to the engine and its components**
  1. Do not let the indicator needle of the tachometer enter the red zone, which indicates the maximum engine speed.
  2. The engine may be overheating if the engine coolant temperature gauge are in the red zone. In this case, immediately stop the vehicle in a safe place, and check the engine after it has cooled completely. (→P. 543)
Fuel consumption information*

Fuel consumption information can be displayed on the Entune Audio system and/or the navigation system.

Entune Audio system or navigation system

Trip information

- Entune Audio system with “CAR” button

  Press the “CAR” button.
  
  If the “Past Record” screen is displayed, select “Trip Information”.

- Entune Audio system or navigation system with “APPS” button

  1. Press the “APPS” button.
  2. Touch “Eco” on the “Apps” screen.

  If the “Past Record” screen is displayed, select “Trip Information”.

*: If equipped
2. Instrument cluster

1. Average vehicle speed
2. Elapsed time
3. Range
4. Previous fuel consumption per minute
5. Current fuel consumption
6. Reset the trip information data
7. "Past Record" screen appears

Vehicles without a smart key system:
Average fuel consumption for the past 15 minutes is divided by color into past averages and averages attained since the engine switch was last turned to the "ON" position. Use the displayed average fuel consumption as a reference.

Vehicles with a smart key system:
Average fuel consumption for the past 15 minutes is divided by color into past averages and averages attained since the engine switch was last turned to IGNITION ON mode. Use the displayed average fuel consumption as a reference.

This image is an example only.
2. Instrument cluster

- **Past record**
  - Entune Audio system with "CAR" button
    Press the "CAR" button.
    If the “Trip Information” screen is displayed, select “Past Record”.
  - Entune Audio system or navigation system with "APPS" button
    1. Press the “APPS” button.
    2. Touch “Eco” on the “Apps” screen.
    If the “Trip Information” screen is displayed, select “Past Record”.

   1. Previous fuel economy record
   2. Current fuel economy
   3. Best recorded fuel economy
   4. Update the past record data
   5. Reset the past record data
   6. “Trip Information” screen appears
   7. Average recorded fuel economy

   These images are examples only, and may vary slightly from actual conditions.

- **Resetting the data**
  Selecting “Clear” on the consumption screen will reset the consumption data.
  Selecting “Clear” on the “Past Record” screen will reset the past record data.

- **Updating the past record data**
  Selecting “Update” on the “Past Record” screen will update the past record data.

- **Cruising range**
  Displays the estimated maximum distance that can be driven with the quantity of fuel remaining.
  This distance is computed based on your average fuel consumption.
  As a result, the actual distance that can be driven may differ from that displayed.
Eco Driving Indicator (except vehicles with a manual transmission)

**Eco Drive Indicator Light**

During Eco-friendly acceleration operation (Eco driving), Eco Driving Indicator Light will turn on. When the acceleration exceeds Zone of Eco driving, and when the vehicle is stopped, the light turns off.
Eco Drive Indicator Zone Display

Suggests Zone of Eco driving with current Eco driving ratio based on acceleration.

1. Eco driving ratio based on acceleration
   If the acceleration exceeds Zone of Eco driving, the right side of Eco Driving Indicator Zone Display blinks.

2. Zone of Eco driving

Eco Driving Indicator Light customization

- Drive monitor display
  (→P. 80)
- Multi-information display
  (→P. 86)

Operation of Eco Driving Indicator

Eco Driving Indicator will not operate in the following conditions:

- The shift lever is in any position other than D.
- Paddle shift switch* is operated.
- Sport mode* is selected.
- The vehicle speed is approximately 80 mph (130 km/h) or higher.

*: If equipped
3. Operation of each component

Keys

The keys

The following keys are provided with the vehicle.

► Vehicles without a smart key system (type A)

1. Keys
2. Key number plate

► Vehicles without a smart key system (type B)

1. Keys
   - Operating the wireless remote control function
2. Key number plate

► Vehicles with a smart key system

1. Electronic keys
   - Operating the smart key system (P. 115)
   - Operating the wireless remote control function
2. Mechanical keys
3. Key number plate
Wireless remote control (if equipped)

- Vehicles without a smart key system
  1. Locks all the doors (→P. 101)
  2. Unlocks all the doors (→P. 101)
     Pressing the button unlocks the driver’s door. Pressing the button again within 5 seconds unlocks the other doors.
  3. Sounds the alarm (→P. 98)
  4. Opens the trunk (→P. 111)

- Vehicles with a smart key system
  1. Locks all the doors (→P. 102)
  2. Unlocks all the doors (→P. 102)
     Pressing the button unlocks the driver’s door. Pressing the button again within 5 seconds unlocks the other doors.
  3. Opens the trunk (→P. 111)
  4. Sounds the alarm (→P. 98)

Using the mechanical key

To take out the mechanical key, push the release button and take the key out.

The mechanical key can only be inserted in one direction, as the key only has grooves on one side. If the key cannot be inserted in a lock cylinder, turn it over and re-attempt to insert it.

After using the mechanical key, store it in the electronic key. Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the entry function does not operate properly, you will need the mechanical key. (→P. 535)
Panic mode (with a wireless remote control function)

- Vehicles without a smart key system
  When (关键) is pressed for longer than about one second, an alarm will sound intermittently and the vehicle lights will flash to deter any person from trying to break into or damage your vehicle.
  To stop the alarm, press any button on the wireless remote control.

- Vehicles with a smart key system
  When (关键) is pressed for longer than about one second, an alarm will sound intermittently and the vehicle lights will flash to deter any person from trying to break into or damage your vehicle.
  To stop the alarm, press any button on the electronic key.

If you lose your keys

New genuine keys can be made by your Toyota dealer using the other key (vehicles without a smart key system) or mechanical key (vehicles with a smart key system) and the key number stamped on your key number plate.
Keep the plate in a safe place such as your wallet, not in the vehicle.

When riding in an aircraft

When bringing a key with wireless remote control function onto an aircraft, make sure you do not press any button on the key while inside the aircraft cabin. If you are carrying the key in your bag etc., ensure that the buttons are not likely to be pressed accidentally. Pressing a button may cause the key to emit radio waves that could interfere with the operation of the aircraft.
Electronic key battery depletion (vehicles with a smart key system)

The standard battery life is 1 to 2 years.

If the battery becomes low, an alarm will sound in the cabin when the engine stops. (→P. 504, 515)

As the electronic key always receives radio waves, the battery will become depleted even if the electronic key is not used. The following symptoms indicate that the electronic key battery may be depleted. Replace the battery when necessary. (→P. 469)

- The smart key system or the wireless remote control does not operate.
- The detection area becomes smaller.
- The LED indicator on the key surface does not turn on.

To avoid serious deterioration, do not leave the electronic key within 3 ft. (1 m) of the following electrical appliances that produce a magnetic field:

- TVs
- Personal computers
- Cellular phones, cordless phones and battery chargers
- Recharging cellular phones or cordless phones
- Table lamps
- Induction cookers

Replacing the battery

→P. 469

Confirmation of the registered key number
The number of keys already registered to the vehicle can be confirmed. Ask your Toyota dealer for details.

If a wrong key is used (vehicles with a smart key system)
The key cylinder rotates freely to isolate inside mechanism.

Certification for the wireless remote control

For the U.S.A.
FCC ID: HYQ23AAH    FCC ID: HYQ12BEL

NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For 12BEL
The FCC ID/IC Certification number is affixed inside the equipment. You can find the ID/number when replacing the battery.
3-1. Key information

For Canada

NOTE:
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

For 12BEL/12BDP
The FCC ID/IC Certification number is affixed inside the equipment. You can find the ID/number when replacing the battery.

NOTICE

To prevent key damage
- Do not drop the keys, subject them to strong shocks or bend them.
- Do not expose the keys to high temperatures for long periods of time.
- Do not get the keys wet or wash them in an ultrasonic washer etc.
- Do not attach metallic or magnetic materials to the keys or place the keys close to such materials.
- Do not disassemble the keys.
- Do not attach a sticker or anything else to the surface of the electronic key and key (with a wireless remote control function).
- Vehicles with a smart key system: Do not place the keys near objects that produce magnetic fields, such as TVs, audio systems and induction cookers, or medical electrical equipment, such as low-frequency therapy equipment.

Carrying the electronic key on your person (vehicles with a smart key system)
Carry the electronic key 3.9 in. (10 cm) or more away from electric appliances that are turned on. Radio waves emitted from electric appliances within 3.9 in. (10 cm) of the electronic key may interfere with the key, causing the key to not function properly.

In case of a smart key system malfunction or other key-related problems (vehicles with a smart key system)
Take your vehicle with all the electronic keys provided with your vehicle to your Toyota dealer.

When an electronic key is lost (vehicles with a smart key system)
If the electronic key remains lost, the risk of vehicle theft increases significantly. Visit your Toyota dealer immediately with all remaining electronic keys that was provided with your vehicle.
Unlocking and locking the doors from the outside

**Smart key system (if equipped)**

Carry the electronic key to enable this function.

1. Grip the driver’s door handle to unlock the door. Grip the passenger’s door handle to unlock all the doors.*
   - Make sure to touch the sensor on the back of the handle.
   - The doors cannot be unlocked for 3 seconds after the doors are locked.
   - *: The door unlock settings can be changed. (→ P. 108)

2. Touch the lock sensor (the indentation on the upper part of the door handle) to lock all the doors.
   - Check that the door is securely locked.

**Wireless remote control (if equipped)**

- **Vehicles without a smart key system**
  
  1. Locks all the doors
     - Check that the door is securely locked.
  
  2. Unlocks all the doors
     - Pressing the button unlocks the driver’s door. Pressing the button again within 5 seconds unlocks the other doors.
3-2. Opening, closing and locking the doors

Vehicles with a smart key system

① Locks all the doors
   Check that the door is securely locked.

② Unlocks all the doors
   Pressing the button unlocks the driver’s door. Pressing the button again within 5 seconds unlocks the other doors.

Key

Turning the key operates the doors as follows:

Vehicles without a smart key system

① Locks all the doors

② Unlocks all the doors
   Driver’s side only: Turning the key unlocks the driver’s door. Turning the key again unlocks the other doors.

Vehicles with a smart key system

The doors can also be locked and unlocked with the mechanical key. (→P. 535)
3-2. Opening, closing and locking the doors

- **Operation signals**
  A buzzer sounds and the emergency flashers flash to indicate that the doors have been locked/unlocked. (Locked: once; Unlocked: twice)

- **Security feature**
  If a door is not opened within approximately 60 seconds after the vehicle is unlocked, the security feature automatically locks the vehicle again.

- **When the door cannot be locked by the lock sensor on the upper part of the door handle**
  If the door will not lock even when the top-side sensor area is touched, try using your palm to touch the lock sensor.

- **Door lock buzzer**
  If an attempt to lock the doors using the wireless remote control or smart key system is made when a door is not fully closed, a buzzer will sound for 5 seconds. Fully close the door, and lock the vehicle again.

- **Setting the alarm (if equipped)**
  Locking the doors will set the alarm system. (→P. 68)

- **If the smart key system or the wireless remote control does not operate properly**
  Use the mechanical key to lock and unlock the doors. (→P. 535)
  Replace the battery with a new one if it is depleted. (→P. 469)
3-2. Opening, closing and locking the doors

## Unlocking and locking the doors from the inside

### Door lock switches

1. Locks all the doors
2. Unlocks all the doors

### Inside lock buttons

1. Locks the door
2. Unlocks the door

The front doors can be opened by pulling the inside handle even if the lock buttons are in the lock position.

## Unlocking and locking the doors from the outside without a key

1. Move the inside lock button to the lock position.
2. Close the door.

- **Vehicles without a smart key system**
  The door cannot be locked if either of the front doors is open and the key is in the engine switch.

- **Vehicles with a smart key system**
  The door cannot be locked if the engine switch is in ACCESSORY or IGNITION ON mode, or the electronic key is left inside the vehicle. However, the key may not be detected correctly and the door may be locked.
3-2. Opening, closing and locking the doors

Rear door child-protector lock

The door cannot be opened from inside the vehicle when the lock is set.

1. Unlock
2. Lock

These locks can be set to prevent children from opening the rear doors. Push down on each rear door switch to lock both rear doors.
## Automatic door locking and unlocking systems

The following functions can be set or cancelled:

<table>
<thead>
<tr>
<th>Function</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function*¹</td>
<td>Shifting the shift lever out of P locks all doors.</td>
</tr>
<tr>
<td>Shift position linked door unlocking function*¹</td>
<td>Shifting the shift lever to P unlocks all doors.</td>
</tr>
<tr>
<td>Speed linked door locking function*²</td>
<td>All doors are locked when the vehicle speed is approximately 12 mph (20 km/h) or higher.</td>
</tr>
<tr>
<td>Driver’s door linked door unlocking function</td>
<td>♦ Vehicles without a smart key system</td>
</tr>
<tr>
<td></td>
<td>All doors are unlocked when the driver’s door is opened within approximately 45 seconds of turning the engine switch to “ACC” or “LOCK”.</td>
</tr>
<tr>
<td></td>
<td>♦ Vehicles with a smart key system</td>
</tr>
<tr>
<td></td>
<td>All doors are unlocked when the driver’s door is opened within approximately 45 seconds of turning the engine switch to ACCESSORY mode or OFF.</td>
</tr>
</tbody>
</table>

*¹: Vehicles with an automatic transmission or continuously variable transmission

*²: Vehicles with a smart key system
Setting and canceling the functions

To switch between set and canceled, follow the procedure below:

1. Vehicles without a smart key system: Close all the doors and switch the engine switch to the “ON” position. (Perform step 2 within 20 seconds.)

Vehicles with a smart key system: Close all the doors and switch the engine switch to IGNITION ON mode. (Perform step 2 within 20 seconds.)

2. Shift the shift lever to P or N, and press and hold the driver's door lock switch ( or ) for approximately 5 seconds and then release.

The shift lever and switch positions corresponding to the desired function to be set are shown as follows.

Use the same procedure to cancel the function.

<table>
<thead>
<tr>
<th>Function</th>
<th>Shift lever position</th>
<th>Driver's door lock switch position</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shift position linked door locking function*1</td>
<td>P</td>
<td></td>
</tr>
<tr>
<td>Shift position linked door unlocking function*1</td>
<td></td>

<td>N</td>
<td></td>
</tr>
<tr>
<td>Driver's door linked door unlocking function</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*1: Vehicles with an automatic transmission or continuously variable transmission

*2: Vehicles with a smart key system

When the setting or canceling operation is complete, all doors are locked and then unlocked.
3-2. Opening, closing and locking the doors

Switching the door unlock function (vehicles with a smart key system)

It is possible to set which doors the entry function unlocks using the wireless remote control.

1. Turn the engine switch off.

2. When the indicator light on the key surface is not on, press and hold 
   , or 
   for approximately 5 seconds while pressing and holding 
   .

The setting changes each time an operation is performed, as shown below. (When changing the setting continuously, release the buttons, wait for at least 5 seconds, and repeat step 2.)

<table>
<thead>
<tr>
<th>Multi-information display (if equipped)</th>
<th>Unlocking function</th>

<td>Holding the driver’s door handle unlocks only the driver’s door.</td>
<td>Exterior: Beeps 3 times</td>
</tr>
<tr>
<td></td>
<td>Holding the front passenger’s door handle unlocks all the doors.</td>
<td>Interior: Pings once</td>
</tr>
<tr>
<td></td>
<td>Holding either front door handle unlocks all the doors.</td>
<td>Exterior: Beeps twice</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Interior: Pings once</td>
</tr>
</tbody>
</table>

Vehicles with an alarm: To prevent unintended triggering of the alarm, unlock the doors using the wireless remote control and open and close a door once after the settings have been changed. (If a door is not opened within 60 seconds after 
   is pressed, the doors will be locked again and the alarm will automatically be set.)

In case that the alarm is triggered, immediately stop the alarm. (→P. 68)
Conditions affecting the operation of the smart key system or wireless remote control (with a wireless remote control function)

Vehicles without a smart key system
The wireless remote control function may not operate normally in the following situations:
- When the wireless key battery is depleted
- Near a TV tower, radio station, electric power plant, airport or other facility that generates strong radio waves
- When carrying a portable radio, cellular phone or other wireless communication devices
- When multiple wireless keys are in the vicinity
- When the wireless key is in contact with, or is covered by a metallic object
- When a wireless key (that emits radio waves) is being used nearby
- When the wireless key has been left near an electrical appliance such as a personal computer
- If window tint with a metallic content or metallic objects are attached to the rear window

Vehicles with a smart key system
→ P. 119

Customization
Settings (e.g. unlocking function using a key) can be changed.
(Customizable features: → P. 576)

CAUTION

To prevent an accident
Observe the following precautions while driving the vehicle. Failure to do so may result in a door opening and an occupant falling out, resulting in death or serious injury.
- Always use a seat belt.
- Always lock all the doors.
- Ensure that all doors are properly closed.
- Do not pull the inside handle of the doors while driving. The doors may be opened and the passengers are thrown out of the vehicle and it may result in serious injury or death.
  Be especially careful for the front doors, as the doors may be opened even if the inside lock buttons are in locked position.
- Set the rear door child-protector locks when children are seated in the rear seats.
3-2. Opening, closing and locking the doors

**Trunk**

The trunk can be opened using the trunk opener, entry function, wireless remote control or key.

**Opening the trunk from inside the vehicle**

Pull up the lever to release the trunk lid.

**Opening the trunk from outside the vehicle**

- **Smart key system (if equipped)**

  While carrying the electronic key, press the button on the trunk lid.

  When all the doors are unlocked with the power door lock system, the trunk can be opened without carrying the electronic key.
Wireless remote control (if equipped)

- Vehicles without a smart key system
  Press and hold the switch.

- Vehicles with a smart key system
  Press and hold the switch.

Key (vehicles with a key cylinder on the trunk lid)

- Turn the key clockwise to release the trunk lid.
3-2. Opening, closing and locking the doors

- **Operation signal (with a wireless remote control function)**
  A buzzer sounds to indicate that the trunk has been opened.

- **Trunk light**
  The trunk light turns on when the trunk is opened.

- **Function to prevent the trunk being locked with the electronic key inside (vehicles with a smart key system)**
  - When all doors are being locked, closing the trunk lid with the electronic key left inside the trunk will sound an alarm.
    In this case, the trunk lid can be opened by pressing the trunk release button on the trunk lid.
  - Even when the spare electronic key is put in the trunk with all the doors locked, the key confinement prevention function can be activated so the trunk can be opened. In order to prevent theft, take all electronic keys with you when leaving the vehicle.
  - Even when the electronic key is put in the trunk with all the doors are locked, the key may not be detected depending on the places and the surrounding radio wave conditions. In this case, the key confinement prevention function cannot be activated, causing the doors to lock when the trunk is closed. Make sure to check where the key is before closing the trunk.
  - The key confinement prevention function cannot be activated if any one of the doors is unlocked. In this case, open the trunk using the trunk opener.

- **Internal trunk release lever**
  The trunk lid can be opened by pushing the glow-in-the-dark lever located on the inside of the trunk lid to the side.
  The lever will continue to glow for some time after the trunk lid is closed.

- **Customization**
  The trunk unlocking operation can be changed.
  (Customizable features: →P. 576)
Caution while driving

- Keep the trunk lid closed while driving. If the trunk lid is left open, it may hit nearby objects while driving or luggage in the trunk may be unexpectedly thrown out, causing an accident. In addition, exhaust gases may enter the vehicle, causing death or a serious health hazard. Make sure to close the trunk lid before driving.

- Before driving the vehicle, make sure that the trunk lid is fully closed. If the trunk lid is not fully closed, it may open unexpectedly while driving, causing an accident.

- Never let anyone sit in the trunk. In the event of sudden braking or a collision, they are susceptible to death or serious injury.

When a child is in the vehicle

Observe the following precautions. Failure to do so may result in death or serious injury.

- Do not allow a child to play in the trunk. If a child is accidentally locked in the trunk, the child could suffer from heat exhaustion, suffocation or other injuries.

- Do not allow a child to open or close the trunk lid. Doing so may cause the trunk lid to operate unexpectedly, or cause the child’s hands, head, or neck to be caught by the closing trunk lid.
Using the trunk

Observe the following precautions.
Failure to do so may cause parts of the body to be caught, resulting in serious injury.

- Remove any heavy loads, such as snow and ice, from the trunk lid before opening it. Failure to do so may cause the trunk lid to suddenly shut again after it is opened.
- When opening or closing the trunk lid, thoroughly check to make sure the surrounding area is safe.
- If anyone is in the vicinity, make sure they are safe and let them know that the trunk is about to open or close.
- Use caution when opening or closing the trunk lid in windy weather as it may move abruptly in strong wind.
- The trunk lid may suddenly shut if it is not opened fully. It is more difficult to open or close the trunk lid on an incline than on a level surface, so beware of the trunk lid unexpectedly opening or closing by itself. Make sure that the trunk lid is fully open and secure before using the trunk.

- When closing the trunk lid, take extra care to prevent your fingers etc. from being caught.
- When closing the trunk lid, make sure to press it lightly on its outer surface. If the trunk handle is used to fully close the trunk lid, it may result in hands or arms being caught.

- Do not attach any accessories other than genuine Toyota parts to the trunk lid. Such additional weight on the trunk lid may cause the lid to suddenly shut again after it is opened.
3-2. Opening, closing and locking the doors

Smart key system*

The following operations can be performed simply by carrying the electronic key on your person, for example in your pocket. (The driver should always carry the electronic key.)

- Locks and unlocks the doors (→P. 101)
- Opens the trunk (→P. 110)
- Starts the engine (→P. 168)

Antenna location

1. Antennas outside the cabin
2. Antennas inside the cabin
3. Antenna inside the trunk
4. Antenna outside the trunk

*: If equipped
3-2. Opening, closing and locking the doors

Effective range (areas within which the electronic key is detected)

- When locking or unlocking the doors
  The system can be operated when the electronic key is within about 2.3 ft. (0.7 m) of either of the outside front door handles. (Only the doors detecting the key can be operated.)

- When starting the engine or changing engine switch modes
  The system can be operated when the electronic key is inside the vehicle.

- When opening the trunk
  The system can be operated when the electronic key is within about 2.3 ft. (0.7 m) of the trunk release button.

Alarms and warning indicators

- Vehicles with a drive monitor display
  A combination of exterior and interior alarms as well as warning lights are used to prevent theft of the vehicle and unforeseeable accidents resulting from erroneous operation. Take appropriate measures for the warning light that comes on. (→ P. 503)

- Vehicles with a multi-information display
  A combination of exterior and interior alarms as well as warning messages shown on the multi-information display are used to prevent theft of the vehicle and accidents resulting from erroneous operation. Take appropriate measures in response to any warning message on the multi-information display. (→ P. 510)
  The following table describes circumstances and correction procedures when only alarms are sounded.
## 3-2. Opening, closing and locking the doors

### Exterior alarm sounds once for 5 seconds

<table>
<thead>
<tr>
<th>Alarm</th>
<th>Situation</th>
<th>Correction procedure</th>

<td>An attempt was made to lock either front door by opening a door and putting the inside lock button into the lock position, then closing the door by pulling on the outside door handle with the electronic key still inside the vehicle.</td>
<td>Retrieve the electronic key from the vehicle and lock the doors again.</td>
</tr>
</tbody>
</table>
3-2. Opening, closing and locking the doors

Battery-saving function
The battery-saving function will be activated in order to prevent the electronic key battery and the vehicle battery from being discharged while the vehicle is not in operation for a long time.

In the following situations, the smart key system may take some time to unlock the doors.
- The electronic key has been left in an area of approximately 6 ft. (2 m) of the outside of the vehicle for 10 minutes or longer.
- The smart key system has not been used for 5 days or longer.

If the smart key system has not been used for 14 days or longer, the doors cannot be unlocked at any doors except the driver's door. In this case, take hold of the driver's door handle, or use the wireless remote control or the mechanical key, to unlock the doors.

Electronic Key Battery-Saving Function
When battery-saving mode is set, battery depletion is minimized by stopping the electronic key from receiving radio waves.

Press twice while pressing and holding . Confirm that the electronic key indicator flashes 4 times. While the battery-saving mode is set, the smart key system cannot be used. To cancel the function, press any of the electronic key buttons.

Conditions affecting operation

The smart key system uses weak radio waves. In the following situations, the communication between the electronic key and the vehicle may be affected, preventing the smart key system, wireless remote control and engine immobilizer system from operating properly. (Ways of coping: → P. 535)

- When the electronic key battery is depleted
- Near a TV tower, electric power plant, gas station, radio station, large display, airport or other facility that generates strong radio waves or electrical noise
- When carrying a portable radio, cellular phone, cordless phone or other wireless communication device
- When the electronic key is in contact with, or is covered by the following metallic objects
  - Cards to which aluminum foil is attached
  - Cigarette boxes that have aluminum foil inside
  - Metallic wallets or bags
  - Coins
  - Hand warmers made of metal
  - Media such as CDs and DVDs
- When other wireless keys (that emit radio waves) are being used nearby
- When carrying the electronic key together with the following devices that emit radio waves
  - Another vehicle’s electronic key or a wireless key that emits radio waves
  - Personal computers or personal digital assistants (PDAs)
  - Digital audio players
  - Portable game systems
- If window tint with a metallic content or metallic objects are attached to the rear window
- When the electronic key is placed near a battery charger or electronic devices
3-2. Opening, closing and locking the doors

**Note for the entry function**

- Even when the electronic key is within the effective range (detection areas), the system may not operate properly in the following cases:
  - The electronic key is too close to the window or outside door handle, near the ground, or in a high place when the doors are locked or unlocked.
  - The electronic key is near the ground or in a high place, or too close to the rear bumper center when the trunk is opened.
  - The electronic key is on the instrument panel, rear package tray or floor, or in the door pockets or glove box when the engine is started or engine switch modes are changed.

- Do not leave the electronic key on top of the instrument panel or near the door pockets when exiting the vehicle. Depending on the radio wave reception conditions, it may be detected by the antenna outside the cabin and the doors will become lockable from the outside, possibly trapping the electronic key inside the vehicle.

- As long as the electronic key is within the effective range, the doors may be locked or unlocked by anyone. However, only the doors detecting the electronic key can be used to unlock the vehicle.

- Even if the electronic key is not inside the vehicle, it may be possible to start the engine if the electronic key is near the window.

- The doors may unlock or lock if a large amount of water splashes on the door handle, such as in the rain or in a car wash, when the electronic key is within the effective range. (The doors will automatically be locked after approximately 60 seconds if the doors are not opened and closed.)

- If the wireless remote control is used to lock the doors when the electronic key is near the vehicle, there is a possibility that the door may not be unlocked by the entry function. (Use the wireless remote control to unlock the doors.)

- Touching the door lock or unlock sensor while wearing gloves may prevent lock or unlock operation.

- When the lock operation is performed using the lock sensor, recognition signals will be shown up to two consecutive times. After this, no recognition signals will be given.

- If the door handle becomes wet while the electronic key is within the effective range, the door may lock and unlock repeatedly. In this case, follow the following correction procedures to wash the vehicle:
  - Place the electronic key in a location 6 ft. (2 m) or more away from the vehicle. (Take care to ensure that the key is not stolen.)
  - Set the electronic key to battery-saving mode to disable the smart key system. (→P. 118)

- Vehicles with a drive monitor display: If the electronic key is inside the vehicle and a door handle becomes wet during a car wash, a buzzer will sound outside the vehicle. To turn off the alarm, lock all the doors.
3-2. Opening, closing and locking the doors

- Vehicles with a multi-information display: If the electronic key is inside the vehicle and a door handle becomes wet during a car wash, a message may be shown on the multi-information display and a buzzer will sound outside the vehicle. To turn off the alarm, lock all the doors.
- The lock sensor may not work properly if it comes into contact with ice, snow, mud, etc. Clean the lock sensor and attempt to operate it again.
- If there is another electronic key in the detection area, it may take slightly longer to unlock the doors after the door handle is gripped.
- Fingernails may scrape against the door during operation of the door handle. Be careful not to injure fingernails or damage the surface of the door.
- A sudden handle operation or a handle operation immediately after entering the effective range may prevent the doors from being unlocked. Touch the door unlock sensor and check that the doors are unlocked before pulling the door handle again.
- Unlocking the vehicle may take more time if another electronic key is within the effective range.

When the vehicle is not driven for extended periods
- To prevent theft of the vehicle, do not leave the electronic key within 6 ft. (2 m) of the vehicle.
- The smart key system can be deactivated in advance. (→ P. 576)

To operate the system properly

- Make sure to carry the electronic key when operating the system. Do not get the electronic key too close to the vehicle when operating the system from the outside of the vehicle.
- Depending on the position and holding condition of the electronic key, the key may not be detected correctly and the system may not operate properly. (The alarm may go off accidentally, or the door lock prevention function may not operate.)

If the smart key system does not operate properly
- Locking and unlocking the doors: Use the mechanical key. (→ P. 535)
- Starting the engine: → P. 536

Customization

- Settings (e.g. smart key system) can be changed. (Customizable features: → P. 576)

If the smart key system has been deactivated in a customized setting
- Locking and unlocking the doors and opening the trunk:
  - Use the wireless remote control or mechanical key. (→ P. 111, 535)
  - Starting the engine and changing engine switch modes: → P. 536
  - Stopping the engine: → P. 169

COROLLA_TMMMS_TMMC_U (OM12J84U)

ing interference that may cause undesired operation of the device.
3-2. Opening, closing and locking the doors

---

**Caution regarding interference with electronic devices**

- People with implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should keep away from the smart key system antennas. (→ P. 115)
  
  The radio waves may affect the operation of such devices. If necessary, the entry function can be disabled. Ask your Toyota dealer for details, such as the frequency of radio waves and timing of the emitted radio waves.
  
  Then, consult your doctor to see if you should disable the entry function.

- User of any electrical medical device other than implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves.
  
  Radio waves could have unexpected effects on the operation of such medical devices.

Ask your Toyota dealer for details for disablig the entry function.
Front seats

Adjustment procedure

► Manual seat

1. Seat position adjustment lever
2. Seatback angle adjustment lever
3. Vertical height adjustment lever (driver’s side only)

► Power seat (driver’s side only)

1. Seat position adjustment switch
2. Seatback angle adjustment switch
3. Seat cushion (front) angle adjustment switch
4. Vertical height adjustment switch
CAUTION

Seat adjustment
- Be careful that the seat does not hit passengers or luggage.
- Do not recline the seat more than necessary when the vehicle is in motion to reduce the risk of sliding under the lap belt. If the seat is too reclined, the lap belt may slide past the hips and apply restraint forces directly to the abdomen or your neck may contact the shoulder belt, increasing the risk of death or serious injury in the event of an accident.
- Manual seat only: After adjusting the seat, make sure that the seat is locked in position.

When adjusting the seat positions
Make sure to leave enough space around the feet so they do not get stuck.
Rear seats

The seatbacks of the rear seats can be folded down.

Folding down the rear seatbacks

1. Stow the rear outside seat belt buckles and stow the rear center seat belt buckle as shown.

2. Pull the seatback lock release knob and fold the seatback down.
CAUTION

When folding the rear seatbacks down
Observe the following precautions. Failure to do so may result in death or serious injury.

- Do not fold the seatbacks down while driving.
- Stop the vehicle on level ground, set the parking brake and shift the shift lever to P (automatic transmission or continuously variable transmission) or N (manual transmission).
- Do not allow anyone to sit on a folded seatback or in the trunk while driving.
- Do not allow children to enter the trunk.
- Do not allow anyone to sit on the rear center seat if the rear right seat is folded down, as the seat belt buckle for the rear center seat belt is then concealed under the folded seat and cannot be used.
- Be careful not to catch your hand when folding the rear seatbacks.
- Adjust the position of the front seat before folding down the rear seatbacks so that the front seat does not interfere with the rear seatbacks when folding down the rear seatbacks.

After returning the seatback to the upright position
Observe the following precautions. Failure to do so may result in death or serious injury.

- Make sure that the seatback is securely locked in position by lightly rocking it back and forth.
  If the seatback is not securely locked, the red marking will be visible on the seatback lock release knob. Make sure that the red marking is not visible.
- Check that the seat belts are not twisted or caught under the seat.

NOTICE

When the rear right seatback is folded down
Make sure the luggage loaded in the enlarged trunk will not damage the webbing of the rear center seat belt.
Head restraints

Head restraints are provided for all seats.

Front seats

1. Up
   Pull the head restraints up.
2. Down
   Push the head restraint down while pressing the lock release button.

Rear seats

- Type A
  1. Up
     Pull the head restraints up.
  2. Down
     Push the head restraint down while pressing the lock release button.

- Type B
  1. Up
     Pull the head restraints up.
  2. Down
     Push the head restraint down while pressing the lock release button.
n Removing the head restraints (except for fixed rear head restraints)
Pull the head restraint up while pressing the lock release button.

n Installing the head restraints (except for fixed rear head restraints)
► Front seats and rear outside seats
Align the head restraint with the installation holes and push it down to the lock position.
Press and hold the lock release button when lowering the head restraint.

► Rear center seat
Align the head restraint with the installation holes and push it down to the lowest lock position while pressing the lock release button.

n Adjusting the height of the head restraints (except for fixed rear head restraints)
Make sure that the head restraints are adjusted so that the center of the head restraint is closest to the top of your ears.

n Adjusting the rear center seat head restraint
Always raise the head restraint one level from the stowed position when using.
Head restraint precautions
Observe the following precautions regarding the head restraints. Failure to do so may result in death or serious injury.

- Use the head restraints designed for each respective seat.
- Adjust the head restraints to the correct position at all times.
- After adjusting the head restraints, push down on them and make sure they are locked in position.
- Do not drive with the head restraints removed.
3-4. Adjusting the steering wheel and mirrors

**Steering wheel**

**Adjustment procedure**

1. Hold the steering wheel and push the lever down.

2. Adjust to the ideal position by moving the steering wheel horizontally and vertically.
   After adjustment, pull the lever up to secure the steering wheel.

**Horn**

To sound the horn, press on or close to the mark.
<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **Caution while driving**  
Do not adjust the steering wheel while driving.  
Doing so may cause the driver to mishandle the vehicle and cause an accident, resulting in death or serious injury. |
| **After adjusting the steering wheel**  
Make sure that the steering wheel is securely locked.  
Otherwise, the steering wheel may move suddenly, possibly causing an accident, and resulting in death or serious injury. Also, the horn may not sound if the steering wheel is not securely locked. |
Inside rear view mirror

The rear view mirror’s position can be adjusted to enable sufficient confirmation of the rear view.

Adjusting the height of rear view mirror

The height of the rear view mirror can be adjusted to suit your driving posture.

Adjust the height of the rear view mirror by moving it up and down.

Antiglare function

► Manual anti-glare inside rear view mirror

Reflected light from the headlights of vehicles behind can be reduced by operating the lever.

1 Normal position
2 Anti-glare position
Auto anti-glare inside rear view mirror

Responding to the level of brightness of the headlights of vehicles behind, the reflected light is automatically reduced.

Changing automatic anti-glare function mode

On/off

When the automatic anti-glare function is in ON mode, the indicator illuminates.

Vehicles without a smart key system: The function will set to ON mode each time the engine switch is turned to the "ON" position.

Pressing the button turns the function to OFF mode. (The indicator also turns off.)

Vehicles with a smart key system: The function will set to ON mode each time the engine switch is turned to IGNITION ON mode.

Pressing the button turns the function to OFF mode. (The indicator also turns off.)

To prevent sensor error (vehicles with an auto anti-glare inside rear view mirror)

To ensure that the sensors operate properly, do not touch or cover them.

CAUTION

Do not adjust the position of the mirror while driving. Doing so may lead to mishandling of the vehicle and cause an accident, resulting in death or serious injury.
Outside rear view mirrors

Adjustment procedure

1. To select a mirror to adjust, press the switch.
   ① Left
   ② Right

2. To adjust the mirror, press the switch.
   ① Up
   ② Right
   ③ Down
   ④ Left

Folding the mirrors

Push the mirror back in the direction of the vehicle’s rear.
3-4. Adjusting the steering wheel and mirrors

- **Mirror angle can be adjusted when**
  - Vehicles without a smart key system
    - The engine switch is in the “ACC” or “ON” position.
  - Vehicles with a smart key system
    - The engine switch is in ACCESSORY or IGNITION ON mode.

- **When the mirrors are fogged up (if equipped)**
  - The outside rear view mirrors can be cleared using the mirror defoggers. Turn on the rear window defogger to turn on the outside rear view mirror defoggers. (→ P. 387, 395)

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **Important points while driving**
  Observe the following precautions while driving. Failure to do so may result in loss of control of the vehicle and cause an accident, resulting in death or serious injury.
  - Do not adjust the mirrors while driving.
  - Do not drive with the mirrors folded.
  - Both the driver and passenger side mirrors must be extended and properly adjusted before driving.

- **When a mirror is moving**
  To avoid personal injury and mirror malfunction, be careful not to get your hand caught by the moving mirror.

- **When the mirror defoggers are operating (if equipped)**
  Do not touch the rear view mirror surfaces, as they can become very hot and burn you.
**Power windows**

**Opening and closing procedures**

The power windows can be opened and closed using the switches. Operating the switch moves the windows as follows:

1. **Closing**
2. **One-touch closing (driver’s window only)** *
3. **Opening**
4. **One-touch opening (driver’s window only)** *

*: To stop the window partway, operate the switch in the opposite direction.

**Window lock switch**

Press the switch to lock the passenger window switches.

Use this switch to prevent children from accidentally opening or closing a passenger window.
The power windows can be operated when

- Vehicles without a smart key system
  The engine switch is in the “ON” position.
- Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

Operating the power windows after turning the engine off

- Vehicles without a smart key system
  The power windows can be operated for approximately 45 seconds even after the engine switch is turned to the “ACC” or “LOCK” position. They cannot, however, be operated once either front door is opened.
- Vehicles with a smart key system
  The power windows can be operated for approximately 45 seconds even after the engine switch is turned to ACCESSORY mode or turned off. They cannot, however, be operated once either front door is opened.

Jam protection function (driver’s window only)
If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.
When the power window does not close normally (driver’s window only)

If the jam protection function is operating abnormally and a window cannot be closed, perform the following operations using the power window switch on the driver’s door.

Vehicles without a smart key system: After stopping the vehicle, the window can be closed by holding the power window switch in the one-touch closing position while the engine switch is turned to the “ON” position.

Vehicles with a smart key system: After stopping the vehicle, the window can be closed by holding the power window switch in the one-touch closing position while the engine switch is turned to IGNITION ON mode.

If the window still cannot be closed even by carrying out the operation as explained above, initialize the function by performing the following procedure.

1. Hold the power window switch in the one-touch closing position. Continue holding the switch for a further 6 seconds after the window has closed.
2. Hold the power window switch in the one-touch opening position. Continue holding the switch for a further 2 seconds after the window has opened completely.
3. Hold the power window switch in the one-touch closing position once again. Continue holding the switch for a further 2 seconds after the window has closed.

If you release the switch while the window is moving, start again from the beginning.

If the window continues to close but then re-open slightly even after performing the above procedure correctly, have the vehicle inspected by your Toyota dealer.
CAUTION

Observe the following precautions. Failure to do so may result in death or serious injury.

**Closing the windows**
- The driver is responsible for all the power window operations, including the operation for the passengers. In order to prevent accidental operation, especially by a child, do not let a child operate the power windows. It is possible for children and other passengers to have body parts caught in the power window. Also, when riding with a child, it is recommended to use the window lock switch. (→ P. 137)
- Check to make sure that all passengers do not have any part of their body in a position where it could be caught when a window is being operated.
- When exiting the vehicle, turn the engine switch off, carry the key and exit the vehicle along with the child. There may be accidental operation, due to mischief, etc., that may possibly lead to an accident.

**Jam protection function (driver's window only)**
- Never use any part of your body to intentionally activate the jam protection function.
- The jam protection function may not work if something gets caught just before the window fully closes.
Moon roof*

Use the overhead switches to open and close the moon roof and tilt it up and down.

- **Opening and closing**
  1. Opens the moon roof*
     - The moon roof stops slightly before the fully open position to reduce wind noise.
     - Press the switch again to fully open the moon roof.
  2. Closes the moon roof*
     - *: Lightly press the switch in either direction to stop the moon roof partway.

- **Tilt up and down**
  1. Tilts the moon roof up*
  2. Tilts the moon roof down*
     - *: Lightly press either of the moon roof switches to stop the moon roof partway.

*: If equipped
The moon roof can be operated when

▶ Vehicles without a smart key system
  The engine switch is in the “ON” position.
▶ Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

Operating the moon roof after turning the engine off

▶ Vehicles without a smart key system
  The moon roof can be operated for approximately 45 seconds after the engine switch is turned to the “ACC” or “LOCK” position. It cannot, however, be operated once either front door is opened.
▶ Vehicles with a smart key system
  The moon roof can be operated for approximately 45 seconds after the engine switch is turned to ACCESSORY mode or turned off. It cannot, however, be operated once either front door is opened.

Jam protection function

If an object is detected between the moon roof and the frame while the moon roof is closing or tilting down, travel is stopped and the moon roof opens slightly.

Sunshade

The sunshade can be opened and closed manually. However, the sunshade will open automatically when the moon roof is opened.
When the moon roof does not close normally

Perform the following procedure:

1. If the moon roof closes but then re-opens slightly
   - Stop the vehicle.
   - Press and hold the "CLOSE" switch.*1
     The moon roof will close, reopen and pause for approximately 10 seconds.*2 Then it will close again, tilt up and pause for approximately 1 second. Finally, it will tilt down, open and close.
   - Check to make sure that the moon roof is completely closed and then release the switch.

2. If the moon roof tilts down but then tilts back up
   - Stop the vehicle.
   - Press and hold the "UP" switch*1 until the moon roof moves into the tilt up position and stops.
   - Release the "UP" switch once and then press and hold the "UP" switch again.*1
     The moon roof will pause for approximately 10 seconds in the tilt up position.*2 Then it will adjust slightly and pause for approximately 1 second. Finally, it will tilt down, open and close.
   - Check to make sure that the moon roof is completely closed and then release the switch.

*1: If the switch is released at the incorrect time, the procedure will have to be performed again from the beginning.

*2: If the switch is released after the above mentioned 10 second pause, automatic operation will be disabled. In that case, press and hold the open/close switch in the close position or press and hold the "UP" switch.

The moon roof will tilt up and pause for approximately 1 second. Then it will tilt down, open and close. Check to make sure that the moon roof is completely closed and then release the switch.

If the moon roof does not fully close even after performing the above procedure correctly, have the vehicle inspected by your Toyota dealer.

Moon roof open reminder function

An alarm will sound when the driver’s door is opened with the moon roof not fully closed and the engine switch off.
1. **Opening the moon roof**
   - Observe the following precautions.
   - Failure to do so may cause death or serious injury.
   - Do not allow any passengers to put their hands or heads outside the vehicle while it is moving.
   - Do not sit on top of the moon roof.

2. **Closing the moon roof**
   - Observe the following precautions.
   - Failure to do so may result in death or serious injury.
   - The driver is responsible for moon roof opening and closing operations.
     - In order to prevent accidental operation, especially by a child, do not let a child operate the moon roof. It is possible for children and other passengers to have body parts caught in the moon roof.
   - Check to make sure that all passengers do not have any part of their bodies in a position where they could be caught when the moon roof is being operated.
   - When exiting the vehicle, turn the engine switch off, carry the key and exit the vehicle along with the child. There may be accidental operation, due to mischief, etc., that may possibly lead to an accident.

3. **Jam protection function**
   - Never use any part of your body to intentionally activate the jam protection function.
   - The jam protection function may not work if something gets caught just before the moon roof fully closes.

Driving the vehicle

The following procedures should be observed to ensure safe driving:

Starting the engine

→ P. 165, 168

Driving

► Automatic transmission or continuously variable transmission
  1. With the brake pedal depressed, shift the shift lever to D.  
     (→ P. 176, 178, 180)
  2. Release the parking brake. (→ P. 187)
  3. Gradually release the brake pedal and gently depress the accelerator pedal to accelerate the vehicle.

► Manual transmission
  1. While depressing the clutch pedal, shift the shift lever to 1.  
     (→ P. 184)
  2. Release the parking brake. (→ P. 187)
  3. Gradually release the clutch pedal. At the same time, gently depress the accelerator pedal to accelerate the vehicle.

Stopping

► Automatic transmission or continuously variable transmission
  1. With the shift lever in D, depress the brake pedal.
  2. If necessary, set the parking brake.
     If the vehicle is to be stopped for an extended period of time, shift the shift lever to P or N. (→ P. 176, 178, 180)

► Manual transmission
  1. While depressing the clutch pedal, depress the brake pedal.
  2. If necessary, set the parking brake.
     If the vehicle is to be stopped for an extended period of time, shift the shift lever to N. (→ P. 184)
Parking the vehicle

- Automatic transmission or continuously variable transmission
  1. With the shift lever in D, depress the brake pedal.
  2. Shift the shift lever to P. (→P. 176, 178, 180)
  3. Set the parking brake. (→P. 187)
  4. Vehicles without a smart key system: Turn the engine switch to the "LOCK" position to stop the engine.
     Vehicles with a smart key system: Press the engine switch to stop the engine.
  5. Lock the door, making sure that you have the key on your person.
     If parking on a hill, block the wheels as needed.

- Manual transmission
  1. While depressing the clutch pedal, depress the brake pedal.
  2. Shift the shift lever to N. (→P. 184)
     If parking on a hill, shift the shift lever to 1 or R.
  3. Set the parking brake. (→P. 187)
  4. Vehicles without a smart key system: Turn the engine switch to the "LOCK" position to stop the engine.
     Vehicles with a smart key system: Press the engine switch to stop the engine.
  5. Lock the door, making sure that you have the key on your person.
     If parking on a hill, block the wheels as needed.
Starting off on a steep uphill

- Automatic transmission or continuously variable transmission
  1. Make sure that the parking brake is set and shift the shift lever to D.
  2. Gently depress the accelerator pedal.
  3. Release the parking brake.

- Manual transmission
  1. With the parking brake firmly set and the clutch pedal fully depressed, shift the shift lever to 1.
  2. Lightly depress the accelerator pedal at the same time as gradually releasing the clutch pedal.
  3. Release the parking brake.
When starting off on an uphill
The hill-start assist control will activate. (→P. 215)

Driving in the rain
- Drive carefully when it is raining, because visibility will be reduced, the windows may become fogged-up, and the road will be slippery.
- Drive carefully when it starts to rain, because the road surface will be especially slippery.
- Refrain from high speeds when driving on an expressway in the rain, because there may be a layer of water between the tires and the road surface, preventing the steering and brakes from operating properly.

Engine speed while driving (except vehicles with a manual transmission)
In the following conditions, the engine speed may become high while driving. This is due to automatic up-shifting control or down-shifting implementation to meet driving conditions. It does not indicate sudden acceleration.
- The vehicle is judged to be driving uphill or downhill
- When the accelerator pedal is released
- When the brake pedal is depressed while sport mode is selected (if equipped)
- When the brake pedal is depressed suddenly and vehicle speed is reduced sharply (continuously variable transmission)

Breaking in your new Toyota
To extend the life of the vehicle, observing the following precautions is recommended:
- For the first 186 miles (300 km):
  Avoid sudden stops.
- For the first 621 miles (1000 km):
  • Do not drive at extremely high speeds.
  • Avoid sudden acceleration.
  • Do not drive continuously in low gears.
  • Do not drive at a constant speed for extended periods.

Operating your vehicle in a foreign country
Comply with the relevant vehicle registration laws and confirm the availability of the correct fuel. (→P. 552)

CAUTION

Observe the following precautions.
Failure to do so may result in death or serious injury.

When starting the vehicle (except vehicles with a manual transmission)
Always keep your foot on the brake pedal while stopped with the engine running. This prevents the vehicle from creeping.
Observe the following precautions.
Failure to do so may result in death or serious injury.

**When driving the vehicle**

- Do not drive if you are unfamiliar with the location of the brake and accelerator pedals to avoid depressing the wrong pedal.
  - Accidentally depressing the accelerator pedal instead of the brake pedal will result in sudden acceleration that may lead to an accident.
  - When backing up, you may twist your body around, leading to a difficulty in operating the pedals. Make sure to operate the pedals properly.
  - Make sure to keep a correct driving posture even when moving the vehicle only slightly. This allows you to depress the brake and accelerator pedals properly.
  - Depress the brake pedal using your right foot. Depressing the brake pedal using your left foot may delay response in an emergency, resulting in an accident.
- Do not drive the vehicle over or stop the vehicle near flammable materials. The exhaust system and exhaust gases can be extremely hot. These hot parts may cause a fire if there is any flammable material nearby.
- During normal driving, do not turn off the engine. Turning the engine off while driving will not cause loss of steering or braking control, but the power assist to these systems will be lost. This will make it more difficult to steer and brake, so you should pull over and stop the vehicle as soon as it is safe to do so. However, in the event of an emergency, such as if it becomes impossible to stop the vehicle in the normal way: →P. 489
- Use engine braking (downshift) to maintain a safe speed when driving down a steep hill. Using the brakes continuously may cause the brakes to overheat and lose effectiveness. (→P. 176, 178, 180, 184)
- Do not adjust the display, the positions of the steering wheel, the seat, or the inside or outside rear view mirrors while driving. Doing so may result in a loss of vehicle control.
- Always check that all passengers’ arms, heads or other parts of their body are not outside the vehicle.
- Do not drive in excess of the speed limit. Even if the legal speed limit permits it, do not drive over 85 mph (140 km/h) unless your vehicle has high-speed capability tires. Driving over 85 mph (140 km/h) may result in tire failure, loss of control and possible injury. Be sure to consult a tire dealer to determine whether the tires on your vehicle are high-speed capability tires or not before driving at such speeds.
### CAUTION

Observe the following precautions. Failure to do so may result in death or serious injury.

#### When driving on slippery road surfaces
- Sudden braking, acceleration and steering may cause tire slippage and reduce your ability to control the vehicle.
- Sudden acceleration, engine braking due to shifting, or changes in engine speed could cause the vehicle to skid.
- After driving through a puddle, lightly depress the brake pedal to make sure that the brakes are functioning properly. Wet brake pads may prevent the brakes from functioning properly. If the brakes on only one side are wet and not functioning properly, steering control may be affected.

#### When shifting the shift lever
- Except vehicles with a manual transmission: Do not let the vehicle roll backward while the shift lever is in a driving position, or roll forward while the shift lever is in R. Doing so may cause the engine to stall or lead to poor brake and steering performance, resulting in an accident or damage to the vehicle.
- Except vehicles with a manual transmission: Do not shift the shift lever to P while the vehicle is moving. Doing so can damage the transmission and may result in a loss of vehicle control.
- Do not shift the shift lever to R while the vehicle is moving forward. Doing so can damage the transmission and may result in a loss of vehicle control.
- Do not shift the shift lever to a driving position while the vehicle is moving backward. Doing so can damage the transmission and may result in a loss of vehicle control.
- Moving the shift lever to N while the vehicle is moving will disengage the engine from the transmission. Engine braking is not available when N is selected.
- Except vehicles with a manual transmission: Be careful not to shift the shift lever with the accelerator pedal depressed. Shifting the shift lever to a gear other than P or N may lead to unexpected rapid acceleration of the vehicle that may cause an accident and result in death or serious injury.
Observe the following precautions. Failure to do so may result in death or serious injury.

- **If you hear a squealing or scraping noise (brake pad wear limit indicators)**
  Have the brake pads checked and replaced by your Toyota dealer as soon as possible.
  Rotor damage may result if the pads are not replaced when needed.
  It is dangerous to drive the vehicle when the wear limits of the brake pads and/or those of the brake discs are exceeded.

- **When the vehicle is stopped**
  - Do not race the engine.
    If the vehicle is in any gear other than P (automatic transmission or continuously variable transmission) or N, the vehicle may accelerate suddenly and unexpectedly, causing an accident.
  - Except vehicles with a manual transmission: In order to prevent accidents due to the vehicle rolling away, always keep depressing the brake pedal while the engine is running, and apply the parking brake as necessary.
  - If the vehicle is stopped on an incline, in order to prevent accidents caused by the vehicle rolling forward or backward, always depress the brake pedal and securely apply the parking brake as needed.
  - Avoid revving or racing the engine.
    Running the engine at high speed while the vehicle is stopped may cause the exhaust system to overheat, which could result in a fire if combustible material is nearby.

- **When the vehicle is parked**
  - Do not leave glasses, cigarette lighters, spray cans, or soft drink cans in the vehicle when it is in the sun.
    Doing so may result in the following:
    - Gas may leak from a cigarette lighter or spray can, and may lead to a fire.
    - The temperature inside the vehicle may cause the plastic lenses and plastic material of glasses to deform or crack.
    - Soft drink cans may fracture, causing the contents to spray over the interior of the vehicle, and may also cause a short circuit in the vehicle’s electrical components.
Observe the following precautions. Failure to do so may result in death or serious injury.

**When the vehicle is parked**
- Do not leave cigarette lighters in the vehicle. If a cigarette lighter is in a place such as the glove box or on the floor, it may be lit accidentally when luggage is loaded or the seat is adjusted, causing a fire.
- Do not attach adhesive discs to the windshield or windows. Do not place containers such as air fresheners on the instrument panel or dashboard. Adhesive discs or containers may act as lenses, causing a fire in the vehicle.
- Do not leave a door or window open if the curved glass is coated with a metallized film such as a silver-colored one. Reflected sunlight may cause the glass to act as a lens, causing a fire.
- Vehicles with an automatic transmission or continuously variable transmission: Always apply the parking brake, shift the shift lever to P, stop the engine and lock the vehicle. Do not leave the vehicle unattended while the engine is running.
- Vehicles with a manual transmission: Always apply the parking brake, stop the engine and lock the vehicle. Do not leave the vehicle unattended while the engine is running.
- Do not touch the exhaust pipes while the engine is running or immediately after turning the engine off. Doing so may cause burns.

**When taking a nap in the vehicle**
Always turn the engine off. Otherwise, if you accidentally move the shift lever or depress the accelerator pedal, this could cause an accident or fire due to engine overheating. Additionally, if the vehicle is parked in a poorly ventilated area, exhaust gases may collect and enter the vehicle, leading to death or a serious health hazard.
### CAUTION

Observe the following precautions. Failure to do so may result in death or serious injury.

**When braking**
- When the brakes are wet, drive more cautiously. Braking distance increases when the brakes are wet, and this may cause one side of the vehicle to brake differently than the other side. Also, the parking brake may not securely hold the vehicle.
- If the power brake assist function does not operate, do not follow other vehicles closely and avoid hills or sharp turns that require braking. In this case, braking is still possible, but the brake pedal should be depressed more firmly than usual. Also, the braking distance will increase. Have your brakes fixed immediately.
- Do not pump the brake pedal if the engine stalls. Each push on the brake pedal uses up the reserve for the power-assisted brakes.
- The brake system consists of 2 individual hydraulic systems; if one of the systems fails, the other will still operate. In this case, the brake pedal should be depressed more firmly than usual and the braking distance will increase. Have your brakes fixed immediately.

### NOTICE

**When driving the vehicle (except vehicles with a manual transmission)**
- Do not depress the accelerator and brake pedals at the same time during driving, as this may restrain the engine output.
- Do not use the accelerator pedal or depress the accelerator and brake pedals at the same time to hold the vehicle on a hill.
**NOTICE**

**When driving the vehicle (vehicles with a manual transmission)**
- Do not depress the accelerator and brake pedals at the same time during driving, as this may restrain the engine output.
- Do not shift gears unless the clutch pedal is fully depressed. After shifting, do not release the clutch pedal abruptly. Doing so may damage the clutch, transmission and gears.
- Observe the following to prevent the clutch from being damaged.
  - Do not rest your foot on the clutch pedal while driving. Doing so may cause clutch trouble.
  - Do not use any gear other than the 1st gear when starting off and moving forward. Doing so may damage the clutch.
  - Do not use the clutch to hold the vehicle when stopping on an uphill grade. Doing so may damage the clutch.
- Do not shift the shift lever to R when the vehicle is still moving. Doing so may damage the clutch, transmission and gears.

**When parking the vehicle (except vehicles with a manual transmission)**
Always shift the shift lever to P. Failure to do so may cause the vehicle to move or the vehicle may accelerate suddenly if the accelerator pedal is accidentally depressed.

**Avoiding damage to vehicle parts**
- Do not turn the steering wheel fully in either direction and hold it there for an extended period of time. Doing so may damage the power steering motor.
- When driving over bumps in the road, drive as slowly as possible to avoid damaging the wheels, underside of the vehicle, etc.
NOTICE

**If you get a flat tire while driving**
A flat or damaged tire may cause the following situations. Hold the steering wheel firmly and gradually depress the brake pedal to slow down the vehicle.
- It may be difficult to control your vehicle.
- The vehicle will make abnormal sounds or vibrations.
- The vehicle will lean abnormally.
Information on what to do in case of a flat tire (→P. 520)

**When encountering flooded roads**
Do not drive on a road that has flooded after heavy rain etc. Doing so may cause the following serious damage to the vehicle:
- Engine stalling
- Short in electrical components
- Engine damage caused by water immersion
In the event that you drive on a flooded road and the vehicle is flooded, be sure to have your Toyota dealer check the following:
- Brake function
- Changes in quantity and quality of engine oil, transaxle fluid, etc.
- Lubricant condition for the bearings and suspension joints (where possible), and the function of all joints, bearings, etc.
**Cargo and luggage**

Take notice of the following information about storage precautions, cargo capacity and load:

### Capacity and distribution

Cargo capacity depends on the total weight of the occupants.

\[ \text{Cargo capacity} = \text{(Total load capacity)} - \text{(Total weight of occupants)} \]

**Steps for Determining Correct Load Limit —**

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.

2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.

3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

4. The resulting figure equals the available amount of cargo and luggage load capacity.

   For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lb passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. \((1400 - 750 \times 5 = 650 \text{ lbs.})\)

5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.

6. If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

   (→P. 160)

Toyota does not recommend towing a trailer with your vehicle. Your vehicle is not designed for trailer towing.
When 2 people with the combined weight of \( A \) lb. (kg) are riding in your vehicle, which has a total load capacity (vehicle capacity weight) of \( B \) lb. (kg), the available amount of cargo and luggage load capacity will be \( C \) lb. (kg) as follows:

\[
B - A = C
\]

*1: A = Weight of people  
*2: B = Total load capacity  
*3: C = Available cargo and luggage load

In this condition, if 3 more passengers with the combined weight of \( D \) lb. (kg) get on, the available cargo and luggage load will be reduced \( E \) lb. (kg) as follows:

\[
C - D = E
\]

*4: D = Additional weight of people  
*5: E = Available cargo and luggage load

As shown in the example above, if the number of occupants increases, the cargo and luggage load will be reduced by an amount that equals the increased weight due to the additional occupants. In other words, if an increase in the number of occupants causes an excess of the total load capacity (combined weight of occupants plus cargo and luggage load), you must reduce the cargo and luggage on your vehicle.
CAUTION

Things that must not be carried in the trunk
The following things may cause a fire if loaded in the trunk:
- Receptacles containing gasoline
- Aerosol cans

Storage precautions
Observe the following precautions.
Failure to do so may prevent the pedals from being depressed properly, may block the driver’s vision, or may result in items hitting the driver or passengers, possibly causing an accident.
- Stow cargo and luggage in the trunk whenever possible.
- To prevent cargo and luggage from sliding forward during braking, do not stack anything in the enlarged trunk. Keep cargo and luggage low, as close to the floor as possible.
- Do not place cargo or luggage in or on the following locations.
  - At the feet of the driver
  - On the front passenger or rear seats (when stacking items)
  - On the package tray
  - On the instrument panel
  - On the dashboard
  - Tray that has no lid
- Secure all items in the occupant compartment.
- When you fold down the rear seats, long items should not be placed directly behind the front seats.
- Never allow anyone to ride in the enlarged trunk. It is not designed for passengers. They should ride in their seats with their seat belts properly fastened.

Capacity and distribution
- Do not exceed the maximum axle weight rating or the total vehicle weight rating.
- Even if the total load of occupant's weight and the cargo load is less than the total load capacity, do not apply the load unevenly. Improper loading may cause deterioration of steering or braking control which may cause death or serious injury.
Total load capacity means the combined weight of occupants, cargo and luggage.

Seating capacity means the maximum number of occupants whose estimated average weight is 150 lb. (68 kg) per person.

Towing capacity
Toyoda does not recommend towing a trailer with your vehicle.

Cargo capacity
Cargo capacity may increase or decrease depending on the weight and the number of occupants.

These details are also described on the tire and loading information label.

Do not overload the vehicle.
It may not only cause damage to the tires, but also degrade steering and braking ability, resulting in an accident.
**Trailer towing**

Toyota does not recommend towing a trailer with your vehicle. Toyota also does not recommend the installation of a tow hitch or the use of a tow hitch carrier for a wheelchair, scooter, bicycle, etc. Your vehicle is not designed for trailer towing or for the use of tow hitch mounted carriers.

[Image of a car with a prohibition symbol and a trailer]
**Dinghy towing (except vehicles with a manual transmission)**

Your vehicle is not designed to be dinghy towed (with 4 wheels on the ground) behind a motor home.

⚠ **NOTICE**

- To avoid serious damage to your vehicle
  - Do not tow your vehicle with four wheels on the ground.
To prevent damage to your vehicle, perform the following procedures before towing.

1. Shift the shift lever to N.
2. Turn the engine switch to the “ACC” position (without a smart key system) or ACCESSORY mode (with a smart key system). (→P. 165, 170)
3. Ensure that the audio system and other powered devices are turned off.
4. Release the parking brake.
5. After towing, leave the engine in idle for at least 3 minutes before driving the vehicle.

**Necessary equipment and accessories**
Specialized equipment and accessories are required for dinghy towing. Contact the service branch of the motor home manufacturer regarding recommended equipment.
NOTICE

- Dinghy towing direction
  Do not tow the vehicle backwards. Doing so may cause serious damage.

- To prevent the steering from locking
  Vehicles without a smart key system: Ensure the engine switch is in the "ACC" position.
  Vehicles with a smart key system: Ensure the engine switch is in ACCESSORY mode.
Driving

**Corolla_TMMMS_TMMC_U (OM12J84U)**

## 4-2. Driving procedures

### Engine (ignition) switch (vehicles without a smart key system)

#### Starting the engine

- **Automatic transmission or continuously variable transmission**
  1. Check that the parking brake is set.
  2. Check that the shift lever is set in P.
  3. Firmly depress the brake pedal.
  4. Turn the engine switch to the “START” position and start the engine.

- **Manual transmission**
  1. Check that the parking brake is set.
  2. Check that the shift lever is set in N.
  3. Firmly depress the clutch pedal.
  4. Turn the engine switch to the “START” position and start the engine.

#### Changing the engine switch positions

1. **“LOCK”**
   - The steering wheel is locked and the key can be removed. (Vehicles with an automatic transmission or continuously variable transmission: The key can be removed only when the shift lever is in P.)

2. **“ACC”**
   - Some electrical components such as the audio system can be used.

3. **“ON”**
   - All electrical components can be used.

4. **“START”**
   - For starting the engine.
Turning the key from “ACC” to “LOCK”

1. Shift the shift lever to P (automatic transmission or continuously variable transmission) or N (manual transmission). (→P. 176, 178, 180, 184)

2. Push in the key and turn it to the “LOCK” position.

If the engine does not start

The engine immobilizer system may not have been deactivated. (→P. 66) Contact your Toyota dealer.

When the steering lock cannot be released

When starting the engine, the engine switch may seem stuck in the “LOCK” position. To free it, turn the key while turning the steering wheel slightly left and right.

Key reminder function

A buzzer sounds if the driver’s door is opened while the engine switch is in the “LOCK” or “ACC” position to remind you to remove the key.

CAUTION

When starting the engine

Always start the engine while sitting in the driver’s seat. Do not depress the accelerator pedal while starting the engine under any circumstances. Doing so may cause an accident resulting in death or serious injury.

Caution when driving

Do not turn the engine switch to the “LOCK” position while driving. If, in an emergency, you must turn the engine off while the vehicle is moving, turn the engine switch only to the “ACC” position to stop the engine. An accident may result if the engine is stopped while driving. (→P. 489)
### NOTICE

- **To prevent battery discharge**
  Do not leave the engine switch in the “ACC” or “ON” position for long periods of time without the engine running.

- **When starting the engine**
  1. Do not crank the engine for more than 30 seconds at a time. This may overheat the starter and wiring system.
  1. Do not race a cold engine.
  1. If the engine becomes difficult to start or stalls frequently, have your vehicle checked by your Toyota dealer immediately.
Engine (ignition) switch (vehicles with a smart key system)

Performing the following operations when carrying the electronic key on your person starts the engine or changes engine switch modes.

Starting the engine

1. Check that the parking brake is set.
   - Vehicles with a drive monitor display

2. Continuously variable transmission: Check that the shift lever is set in P. Firmly depress the brake pedal.
   Manual transmission: Check that the shift lever is set in N. Firmly depress the clutch pedal.
   The smart key system indicator light (green) will turn on. If the indicator light does not turn on, the engine cannot be started.

3. Press the engine switch.
   The engine will crank until it starts or for up to 30 seconds, whichever is less.
   Continue depressing the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) until the engine is completely started.
   The engine can be started from any engine switch mode.
Vehicles with a multi-information display

2 Continuously variable transmission: Check that the shift lever is set in P. Firmly depress the brake pedal.

Manual transmission: Check that the shift lever is set in N. Firmly depress the clutch pedal.

will be displayed on the multi-information display.

If it is not displayed, the engine cannot be started.

3 Press the engine switch.

The engine will crank until it starts or for up to 30 seconds, whichever is less.

Continue depressing the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) until the engine is completely started.

The engine can be started from any engine switch mode.

Stopping the engine

1 Stop the vehicle.

2 Continuously variable transmission: Shift the shift lever to P.

Manual transmission: Shift the shift lever to N.

3 Set the parking brake. (→P. 187)

4 Press the engine switch.

5 Vehicles with a drive monitor display: Release the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and check that the smart key system indicator light (green) is off.

Vehicles with a multi-information display: Release the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and check that “POWER ON” on the multi-information display is off.
Changing engine switch modes

Modes can be changed by pressing the engine switch with the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) released. (The mode changes each time the switch is pressed.)

- Vehicles with a drive monitor display
  - Off*
    - The emergency flashers can be used.
    - The smart key system indicator light (green) is off.
  - ACCESSORY mode
    - Some electrical components such as the audio system can be used.
    - The smart key system indicator light (green) flashes slowly.
  - IGNITION ON mode
    - All electrical components can be used.
    - The smart key system indicator light (green) flashes slowly.

*: Vehicles with a continuously variable transmission: If the shift lever is in a position other than P when turning off the engine, the engine switch will be turned to ACCESSORY mode, not to off.
Vehicles with a multi-information display

**Off***
- The emergency flashers can be used.
- The multi-information display will not be displayed.

**ACCESSORY mode**
- Some electrical components such as the audio system can be used.
- "POWER ON" will be displayed on the multi-information display.

**IGNITION ON mode**
- All electrical components can be used.
- "POWER ON" will be displayed on the multi-information display.

*: Vehicles with a continuously variable transmission: If the shift lever is in a position other than P when turning off the engine, the engine switch will be turned to ACCESSORY mode, not to off.
When stopping the engine with the shift lever in a position other than P (vehicles with a continuously variable transmission)

If the engine is stopped with the shift lever in a position other than P, the engine switch will not be turned off but instead be turned to ACCESSORY mode. Perform the following procedure to turn the switch off:

1. Check that the parking brake is set.
2. Shift the shift lever to P.
   - Vehicles with a drive monitor display
3. Check that the smart key system indicator light (green) flashes slowly and then press the engine switch once.
4. Check that the smart key system indicator light (green) is off.
   - Vehicles with a multi-information display
3. Check that “POWER ON” and “TURN POWER OFF” are displayed alternately on the multi-information display and then press the engine switch once.
4. Check that “POWER ON” and “TURN POWER OFF” on the multi-information display are off.

Auto power off function

- Vehicles with a continuously variable transmission
  If the vehicle is left in ACCESSORY mode for more than 20 minutes or IGNITION ON mode (the engine is not running) for more than an hour with the shift lever in P, the engine switch will automatically turn off. However, this function cannot entirely prevent battery discharge. Do not leave the vehicle with the engine switch in ACCESSORY or IGNITION ON mode for long periods of time when the engine is not running.

- Vehicles with a manual transmission
  If the vehicle is left in ACCESSORY mode for more than 20 minutes or IGNITION ON mode (the engine is not running) for more than an hour, the engine switch will automatically turn off. However, this function cannot entirely prevent battery discharge. Do not leave the vehicle with the engine switch in ACCESSORY or IGNITION ON mode for long periods of time when the engine is not running.
Electronic key battery depletion
→ P. 99

Conditions affecting operation
→ P. 119

Notes for the entry function
→ P. 120

If the engine does not start
- The engine immobilizer system may not have been deactivated. (→ P. 66)
  Contact your Toyota dealer.
- Vehicles with a continuously variable transmission: Check that the shift lever is securely set in P. The engine may not start if the shift lever is displaced out of P.
  ▶ Vehicles with a drive monitor display
    The smart key system indicator light (green) will flash quickly.
  ▶ Vehicles with a multi-information display
    “SHIFT TO P POSITION TO START” will be displayed on the multi-information display.

Steering lock
After turning the engine switch off and opening and closing the doors, the steering wheel will be locked due to the steering lock function. Operating the engine switch again automatically cancels the steering lock.

When the steering lock cannot be released
Vehicles with a drive monitor display: The smart key system indicator light (green) will flash quickly.

Vehicles with a multi-information display: “STEERING LOCK ACTIVE” will be displayed on the multi-information display.

Vehicles with a continuously variable transmission: Check that the shift lever is set in P. Press the engine switch while turning the steering wheel left and right.

Vehicles with a manual transmission: Press the engine switch while turning the steering wheel left and right.

Steering lock motor overheating prevention
To prevent the steering lock motor from overheating, the motor may be suspended if the engine is turned on and off repeatedly in a short period of time. In this case, refrain from operating the engine. After about 10 seconds, the steering lock motor will resume functioning.
When the smart key system indicator light flashes in yellow (vehicles with a drive monitor display)
The system may be malfunctioning. Have the vehicle inspected by your Toyota dealer immediately.

When “CHECK SMART KEY SYSTEM” will be displayed on the multi-information display (vehicles with a multi-information display)
The system may be malfunctioning. Have the vehicle inspected by your Toyota dealer immediately.

If the electronic key battery is depleted
→ P. 469

Operation of the engine switch
- When operating the engine switch, one short, firm press is enough. If the switch is pressed improperly, the engine may not start or the engine switch mode may not change. It is not necessary to press and hold the switch.
- If attempting to restart the engine immediately after turning the engine switch off, the engine may not start in some cases. After turning the engine switch off, please wait a few seconds before restarting the engine.

If the smart key system has been deactivated in a customized setting
→ P. 535

CAUTION

When starting the engine
Always start the engine while sitting in the driver’s seat. Do not depress the accelerator pedal while starting the engine under any circumstances. Doing so may cause an accident resulting in death or serious injury.

Caution while driving
If engine failure occurs while the vehicle is moving, do not lock or open the doors until the vehicle reaches a safe and complete stop. Activation of the steering lock in this circumstance may lead to an accident, resulting in death or serious injury.

Stopping the engine in an emergency
If you want to stop the engine in an emergency while driving the vehicle, press and hold the engine switch for more than 2 seconds, or press it briefly 3 times or more in succession. (→ P. 489)

However, do not touch the engine switch while driving except in an emergency. Turning the engine off while driving will not cause loss of steering or braking control, but the power assist to these systems will be lost. This will make it more difficult to steer and brake, so you should pull over and stop the vehicle as soon as it is safe to do so.
<table>

<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| **To prevent battery discharge**  
  | Do not leave the engine switch in ACCESSORY or IGNITION ON mode for long periods of time without the engine running.  
  | Vehicles with a drive monitor display:  
  | If the smart key system indicator light (green) is illuminated, the engine switch is not off. When exiting the vehicle, always check that the engine switch is off.  
  | Vehicles with a multi-information display:  
  | If “POWER ON” is displayed on the multi-information display, the engine switch is not off. When exiting the vehicle, always check that the engine switch is off.  
  | Vehicles with a continuously variable transmission:  
  | Do not stop the engine when the shift lever is in a position other than P. If the engine is stopped in another shift lever position, the engine switch will not be turned off but instead be turned to ACCESSORY mode. If the vehicle is left in ACCESSORY mode, battery discharge may occur. |
| **When starting the engine**  
  | Do not race a cold engine.  
  | If the engine becomes difficult to start or stalls frequently, have your vehicle checked by your Toyota dealer immediately. |
| **Symptoms indicating a malfunction with the engine switch**  
  | If the engine switch seems to be operating somewhat differently than usual, such as the switch sticking slightly, there may be a malfunction. Contact your Toyota dealer immediately. |
While the engine switch is in the “ON” position, depress the brake pedal and move the shift lever.

*: If equipped
Driving procedures

Shifting to the D position allows the system to select a gear suitable for driving conditions. Setting the shift lever to the D position is recommended for normal driving.

**Shift position uses**

<td>Position for more powerful engine braking</td>
</tr>
<tr>
<td>L</td>
<td>Position for maximum engine braking</td>
</tr>
</tbody>
</table>

*: Shifting to the D position allows the system to select a gear suitable for driving conditions. Setting the shift lever to the D position is recommended for normal driving.

**Downshifting restrictions**

The shift lever cannot be downshifted if the following speeds are exceeded.

<table>
<thead>
<tr>
<th>Downshifting</th>
<th>Maximum speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>3→2</td>
<td>59 (94)</td>
</tr>
<tr>
<td>2→L</td>
<td>27 (43)</td>
</tr>
</tbody>
</table>

**When driving with cruise control activated (if equipped)**

Even when performing the following actions with the intent of enabling engine braking, engine braking will not activate while downshifting to 3 because cruise control will not be canceled. (→P. 201)

**If the shift lever cannot be shifted from P**

→P. 534

**AI-SHIFT**

AI-SHIFT automatically selects the suitable gear according to driver performance and driving conditions.

AI-SHIFT automatically operates when the shift lever is in the D position.

**CAUTION**

**When driving on slippery road surfaces**

Be careful of downshifting and sudden acceleration, as this could result in the vehicle skidding to the side or spinning.
Vehicles without a smart key system:
While the engine switch is in the “ON” position, depress the brake pedal and move the shift lever.
Vehicles with a smart key system:
While the engine switch is in IGNITION ON mode, depress the brake pedal and move the shift lever.
When shifting the shift lever between P and D, make sure that the vehicle is completely stopped.
Driving procedures

* To improve fuel efficiency and reduce noises, set the shift lever in D for normal driving.

To enhance the fuel economy, because the torque corresponding to the accelerator pedal depression amount can be generated more smoothly than it is in normal conditions and the operation of the air conditioning system (heating/cooling) will be minimized.

Press the switch again to return to normal mode.

When driving with cruise control activated

Even when performing the following actions with the intent of enabling engine braking, engine braking will not activate while downshifting to S because cruise control will not be canceled. (→p. 201)

If the shift lever cannot be shifted from P

→P. 534

CAUTION

When driving on slippery road surfaces

Be careful of downshifting and sudden acceleration, as this could result in the vehicle skidding to the side or spinning.

**Continuously variable transmission (vehicles with paddle shift switches)**

### Shifting the shift lever

- **Vehicles without a smart key system:**
  While the engine switch is in the “ON” position, depress the brake pedal and move the shift lever.

- **Vehicles with a smart key system:**
  While the engine switch is in IGNITION ON mode, depress the brake pedal and move the shift lever.

When shifting the shift lever between P and D, make sure that the vehicle is completely stopped.

*: If equipped
Driving procedures

4.2. Driving procedures

**Shift position purpose**

<table>
<thead>
<tr>
<th>Shift position</th>
<th>Objective or function</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Parking the vehicle/starting the engine</td>
</tr>
<tr>
<td>R</td>
<td>Reversing</td>

</tr>
<tr>
<td>D</td>
<td>Normal driving*1</td>
</tr>
<tr>
<td>M</td>
<td>7-speed sport sequential shiftmatic mode driving*2</td>
</tr>
</tbody>
</table>

*1: To improve fuel efficiency and reduce noises, set the shift lever in D for normal driving.

*2: Selecting gear step using the M position achieves suitable engine braking forces by operating the shift lever.

**Sport mode**

Press the switch.

For powerful acceleration and driving in mountainous regions.

Press the switch again to return to normal mode.

**Temporarily engaged gear steps selection mode in the D position**

To drive in temporary gear steps selection mode, operate the “-” and “+” paddle shift switches. The gear steps can then be selected by operating the “-” and “+” paddle shift switches. By selecting gear step using paddle shift switches, you can control engine braking forces.

1. **Upshifting**
2. **Downshifting**

   The selected gear step, from D1 to D7, will be displayed in the meter.

   To return to normal D position driving, the “+” paddle shift switch must be held down for a period of time.
Driving procedures

Changing gear steps in the M position

To enter 7-speed sport sequential shiftmatic mode, shift the shift lever to M. Gear steps can then be selected by operating the shift lever, allowing you to drive in the gear step of your choosing.

1. **Upshifting**
2. **Downshifting**

   The gear changes once every time the shift lever is operated.
   The selected gear step, from M1 to M7, will be displayed in the meter.

However, even when in the M position, the gear steps will be automatically changed if the engine speed is too high, or too low.

- **Gear step functions**
  - You can choose from 7 levels of engine braking force.
  - A lower gear step will provide greater engine braking force than a higher gear step, and the engine speed will also increase.

- **If the “M” indicator flashes or a buzzer beeps after shifting the shift lever to M**
  This may indicate a malfunction in the continuously variable transmission system. Have the vehicle inspected by your Toyota dealer immediately.
  (In this situation, the transmission will operate in the same manner as when the shift lever is in D.)

- **When the vehicle comes to a stop with the shift lever in the M position**
  - The transmission will automatically downshift to M1 once the vehicle is stopped.
  - After a stop, the vehicle will start off in M1.
  - When the vehicle is stopped, the transmission is set at M1.
When driving with cruise control activated
Even when performing the following actions with the intent of enabling engine braking, engine braking will not activate because cruise control will not be canceled.
- While driving in D or 7-speed sport sequential shiftmatic mode, downshifting to 6, 5 or 4. (→P. 182)
- When switching the driving mode to sport mode while driving in D position. (→P. 181)

Downshifting restrictions warning buzzer
To help ensure safety and driving performance, downshifting operation may sometimes be restricted. In some circumstances, downshifting may not be possible even when the shift lever is operated. (A buzzer will sound twice.)

Sport mode automatic deactivation
Sport mode is automatically deactivated if the engine switch is turned off after driving in sport mode.

If the shift lever cannot be shifted from P
→P. 534

⚠️ CAUTION

When driving on slippery road surfaces
Be careful of downshifting and sudden acceleration, as this could result in the vehicle skidding to the side or spinning.
Fully depress the clutch pedal before operating the shift lever, and then release it slowly.

**Shifting the shift lever to R**
Shift the shift lever to R while lifting up the ring section.

*: If equipped
### Maximum allowable speeds

Observe the following maximum allowable speeds in each gear when maximum acceleration is necessary.

<table>
<thead>
<tr>
<th>Shift position</th>
<th>Maximum speed</th>
<th>mph (km/h)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Vehicles with 15-inch and 16-inch tires</td>

<td>30 (49)</td>
</tr>
<tr>
<td>2</td>
<td>56 (91)</td>
<td>56 (90)</td>
</tr>
<tr>
<td>3</td>
<td>82 (133)</td>
<td>82 (132)</td>
</tr>
<tr>
<td>4</td>
<td>111 (179)</td>
<td>111 (179)</td>
</tr>
<tr>
<td>5</td>
<td>—</td>
<td>—</td>
</tr>
</tbody>
</table>

**NOTICE**

- **To prevent damage to the transmission**
  - Do not shift the shift lever to R without depressing the clutch pedal.
  - Do not lift up the ring section except when shifting the lever to R.
  - Shift the shift lever to R only when the vehicle is stationary.
**Turn signal lever**

**Operating instructions**

1. **Right turn**
   - Lane change to the right (move the lever partway and release it)
     - The right hand signals will flash 3 times.

2. **Lane change to the left (move the lever partway and release it)**
   - The left hand signals will flash 3 times.

3. **Left turn**

---

- **Turn signals can be operated when**
  - Vehicles without a smart key system
    - The engine switch is in the “ON” position.
  - Vehicles with a smart key system
    - The engine switch is in IGNITION ON mode.

- **If the indicator flashes faster than usual**
  - Check that a light bulb in the front or rear turn signal lights has not burned out.

- **Customization**
  - The number of times the turn signals flash during a lane change can be changed. (Customizable feature → P. 576)
Parking brake

Operating instructions

1. To set the parking brake, fully pull the parking brake lever while depressing the brake pedal.

2. To release the parking brake, slightly raise the lever and lower it completely while pressing the button.

*1: For U.S.A.
*2: For Canada

Parking brake engaged warning buzzer

A buzzer will sound if the vehicle is driven at a speed of approximately 3 mph (5 km/h) or more with the parking brake engaged. (→P. 498, 510)

Usage in winter time

→P. 221

NOTICE

Before driving

Fully release the parking brake. Driving the vehicle with the parking brake set will lead to brake components overheating, which may affect braking performance and increase brake wear.
4-3. Operating the lights and wipers

Headlight switch

The headlights can be operated manually or automatically.

Operating instructions

Turning the end of the lever turns on the lights as follows:

- Type A

  1. **DRL** The daytime running lights turn on. (→ P. 192)
  2. ![Diagram](image)
     - The side marker, parking, tail, license plate, daytime running lights (→ P. 192) and instrument panel lights turn on.
  3. ![Diagram](image)
     - The headlights and all the lights listed above (except daytime running lights) turn on.
  4. **OFF** The daytime running lights turn off.

*: Vehicles with a multi-information display
4-3. Operating the lights and wipers

Type B

1. The daytime running lights turn on (→P. 192)

2. The side marker, parking, tail, license plate, daytime running lights (→P. 192) and instrument panel lights turn on.

3. The headlights and all the lights listed above (except daytime running lights) turn on.

*: Vehicles with a multi-information display
4-3. Operating the lights and wipers

Type C

1. **AUTO** The headlights and all the lights listed below turn on and off automatically.
   (Vehicles without a smart key system: When the engine switch is in the “ON” position)
   (Vehicles with a smart key system: When the engine switch is in IGNITION ON mode)

2. The side marker, parking, tail, license plate, daytime running lights (→P. 192) and instrument panel lights turn on.

3. The headlights and all the lights listed above (except daytime running lights) turn on.

4. The daytime running lights turn off.

*: Vehicles with a multi-information display
4-3. Operating the lights and wipers

Type D

1. **AUTO**

   The headlights and all the lights listed below turn on and off automatically.

   (Vehicles without a smart key system: When the engine switch is in the “ON” position)

   (Vehicles with a smart key system: When the engine switch is in IGNITION ON mode)

2. $

   The side marker, parking, tail, license plate, daytime running lights (→P. 192) and instrument panel lights turn on.

3. 

   The headlights and all the lights listed above (except daytime running lights) turn on.

4. 

   The daytime running lights turn on. (→P. 192)

*: Vehicles with a multi-information display
Turning on the high beam headlights

1. With the headlights on, push the lever away from you to turn on the high beams.
   Pull the lever toward you to the center position to turn the high beams off.
2. Pull the lever toward you and release it to flash the high beams once.

   You can flash the high beams with the headlights on or off.

Daytime running light system

To make your vehicle more visible to other drivers during daytime driving, the daytime running lights turn on automatically whenever the engine is started and the parking brake is released with the headlight switch in the “DRL”, “ ”, “ ”, or “AUTO” position. (Illuminate darker than headlight low beams.) Daytime running lights are not designed for use at night. For the U.S.A.: Daytime running lights can be turned off by operating the switch.

Compared to turning on the headlights, the daytime running light system offers greater durability and consumes less electricity, so it can help improve fuel economy.

Headlight control sensor (if equipped)

The sensor may not function properly if an object is placed on the sensor, or anything that blocks the sensor is affixed to the windshield. Doing so interferes with the sensor detecting the level of ambient light and may cause the automatic headlight system to malfunction.
Automatic light off system

- Vehicles without a smart key system
  - When the headlights are on: The headlights and tail lights turn off 30 seconds after the engine switch is turned to the “ACC” or “LOCK” position and a door is opened and closed. (Vehicles with a wireless remote control: The lights turn off immediately if on the key is pressed after all the doors are locked.)
  - When only the tail lights are on: The tail lights turn off automatically if the engine switch is turned to the “ACC” or “LOCK” position and the driver's door is opened.
  
  To turn the lights on again, turn the engine switch to “ON” position, or turn the light switch off once and then back to or .

- Vehicles with a smart key system
  - When the headlights are on: The headlights and tail lights turn off 30 seconds after the engine switch is turned to ACCESSORY mode or turned off and a door is opened and closed. (The lights turn off immediately if on the key is pressed after all the doors are locked.)
  - When only the tail lights are on: The tail lights turn off automatically if the engine switch is turned to ACCESSORY mode or turned off and the driver's door is opened.

  To turn the lights on again, turn the engine switch to IGNITION ON mode, or turn the light switch off once and then back to or .

Light reminder buzzer

- Vehicles without a smart key system
  - A buzzer sounds when the engine switch is turned to “LOCK” position and the driver's door is opened while the lights are turned on.

- Vehicles with a smart key system
  - A buzzer sounds when the engine switch is turned off or turned to ACCESSORY mode and the driver's door is opened while the lights are turned on.
**Battery-saving function**

In the following conditions, the headlights and the other remaining lights will go off automatically after 20 minutes in order to prevent the vehicle battery from being discharged:

- The headlights and/or tail lights are on.
- Vehicles without a smart key system: The engine switch is in the “ACC” or “LOCK” position.
- Vehicles with a smart key system: The engine switch is turned to ACCESSORY mode or turned off.

This function will be canceled in any of the following situations:

- Vehicles without a smart key system: When the engine switch is turned to the “ON” position.
- Vehicles with a smart key system: When the engine switch is turned to IGNITION ON mode.
- When the light switch is operated
- When the door or trunk is opened or closed

**Customization**

Settings (e.g. light sensor sensitivity) can be changed. (Customizable features: →P. 576)

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>

**To prevent battery discharge**

Do not leave the lights on longer than necessary when the engine is not running.
Fog light switch

The fog lights secure excellent visibility in difficult driving conditions, such as in rain and fog.

1. OFF *1 or *2
   - Turns the front fog lights off
2. *3
   - Turns the front fog lights on

*1: For U.S.A.
*2: For Canada

*: If equipped

Fog lights can be used when
The headlights are on in low beam.
Windshield wipers and washer

Operating the wiper lever

The wiper operation is selected by moving the lever as follows. When intermittent windshield wiper operation is selected, the wiper interval can be also adjusted.

1. **INT** *1 or ▲ *2
   Intermittent windshield wiper operation

2. **LO** *1 or ▼ *2
   Low speed windshield wiper operation

3. **HI** *1 or ▼ *2
   High speed windshield wiper operation

4. **MIST** *1 or ◄ *2
   Temporary operation

*1: For U.S.A.
*2: For Canada

Wiper intervals can be adjusted when intermittent operation is selected.

5. Increases the intermittent windshield wiper frequency*3

6. Decreases the intermittent windshield wiper frequency*3

*3: The interval adjuster may not be equipped depending on the grade.
Washer/wiper dual operation

Wipers will automatically operate a couple of times after the washer squirts.

The windshield wiper and washer can be operated when

- Vehicles without a smart key system
  The engine switch is in the “ON” position.
- Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

If no windshield washer fluid sprays
Check that the washer nozzles are not blocked if there is washer fluid in the windshield washer fluid reservoir.

CAUTION

Caution regarding the use of washer fluid
When it is cold, do not use the washer fluid until the windshield becomes warm. The fluid may freeze on the windshield and cause low visibility. This may lead to an accident, resulting in death or serious injury.

NOTICE

- When the windshield is dry
  Do not use the wipers, as they may damage the windshield.
- When the washer fluid tank is empty
  Do not operate the switch continually as the washer fluid pump may overheat.
- When a nozzle becomes blocked
  In this case, contact your Toyota dealer. Do not try to clear it with a pin or other object. The nozzle will be damaged.
198

4-4. Refueling

Opening the fuel tank cap

Perform the following steps to open the fuel tank cap:

Before refueling the vehicle

- Close all the doors and windows, and turn the engine switch off.
- Confirm the type of fuel. (→P. 560)

Fuel types

→P. 560

Fuel tank opening for unleaded gasoline

To help prevent incorrect fueling, your vehicle has a fuel tank opening that only accommodates the special nozzle on unleaded fuel pumps.

⚠️ CAUTION

When refueling the vehicle

Observe the following precautions while refueling the vehicle. Failure to do so may result in death or serious injury.

- After exiting the vehicle and before opening the fuel door, touch an unpainted metal surface to discharge any static electricity. It is important to discharge static electricity before refueling because sparks resulting from static electricity can cause fuel vapors to ignite while refueling.

- Always hold the grips on the fuel tank cap and turn it slowly to remove it.
  A whooshing sound may be heard when the fuel tank cap is loosened. Wait until the sound cannot be heard before fully removing the cap. In hot weather, pressurized fuel may spray out the filler neck and cause injury.

- Do not allow anyone that has not discharged static electricity from their body to come close to an open fuel tank.

- Do not inhale vaporized fuel.
  Fuel contains substances that are harmful if inhaled.

- Do not smoke while refueling the vehicle.
  Doing so may cause the fuel to ignite and cause a fire.

- Do not return to the vehicle or touch any person or object that is statically charged.
  This may cause static electricity to build up, resulting in a possible ignition hazard.
1. Pull up the opener to open the fuel filler door.

2. Turn the fuel tank cap slowly to remove it and hang it on the back of the fuel filler door.

**CAUTION**

- **When refueling**
  - Observe the following precautions to prevent fuel overflowing from the fuel tank:
    - Securely insert the fuel nozzle into the fuel filler neck.
    - Stop filling the tank after the fuel nozzle automatically clicks off.
    - Do not top off the fuel tank.

**NOTICE**

- **Refueling**
  - Do not spill fuel during refueling.
  - Doing so may damage the vehicle, such as causing the emission control system to operate abnormally or damaging fuel system components or the vehicle’s painted surface.
Closing the fuel tank cap

After refueling, turn the fuel tank cap until you hear a click. Once the cap is released, it will turn slightly in the opposite direction.

**CAUTION**

- **When replacing the fuel tank cap**
  Do not use anything but a genuine Toyota fuel tank cap designed for your vehicle. Doing so may cause a fire or other incident which may result in death or serious injury.
Cruise control*

Summary of functions
Use the cruise control to maintain a set speed without depressing the accelerator pedal.

1. Indicators
2. Cruise control switch

Setting the vehicle speed

1. Press the “ON-OFF” button to activate the cruise control.
   
   Cruise control indicator will come on.
   
   Press the button again to deactivate the cruise control.

2. Accelerate or decelerate the vehicle to the desired speed, and push the lever down to set the speed.
   
   “SET” indicator will come on.
   
   The vehicle speed at the moment the lever is released becomes the set speed.

*: If equipped
Adjusting the set speed

To change the set speed, operate the lever until the desired set speed is obtained.

1. Increases the speed
2. Decreases the speed
   - Fine adjustment: Momentarily move the lever in the desired direction.
   - Large adjustment: Hold the lever in the desired direction.

The set speed will be increased or decreased as follows:
   - Fine adjustment: By approximately 1 mph (1.6 km/h) each time the lever is operated.
   - Large adjustment: The set speed can be increased or decreased continuously until the lever is released.

Canceling and resuming the constant speed control

1. Pulling the lever toward you cancels the constant speed control.
   - The speed setting is also canceled when the brakes are applied or the clutch pedal (manual transmission) is depressed.
2. Pushing the lever up resumes the constant speed control.
   - Resuming is available when the vehicle speed is more than approximately 25 mph (40 km/h).
Cruise control can be set when
- Vehicles with an automatic transmission
  - The shift lever is in the D or range 3.
  - Vehicle speed is above approximately 25 mph (40 km/h).
- Vehicles with a continuously variable transmission (without paddle shift switches)
  - The shift lever is in the D or S.
  - Vehicle speed is above approximately 25 mph (40 km/h).
- Vehicles with a continuously variable transmission (with paddle shift switches)
  - The shift lever is in the D or range 4 or higher of M has been selected.
  - Range 4 or higher has been selected by using the paddle shift.
  - Vehicle speed is above approximately 25 mph (40 km/h).
- Vehicles with a manual transmission
  - Vehicle speed is above approximately 25 mph (40 km/h).

Accelerating after setting the vehicle speed
- The vehicle can be accelerated normally. After acceleration, the set speed resumes.
- Even without canceling the cruise control, the set speed can be increased by first accelerating the vehicle to the desired speed and then pushing the lever down to set the new speed.

Automatic cruise control cancelation
Cruise control will stop maintaining the vehicle speed in any of the following situations.
- Actual vehicle speed falls more than approximately 10 mph (16 km/h) below the preset vehicle speed.
  At this time, the memorized set speed is not retained.
- Actual vehicle speed is below approximately 25 mph (40 km/h).
- VSC is activated.

If the cruise control indicator light comes on in yellow (vehicles with a drive monitor display)
Press the “ON-OFF” button once to deactivate the system, and then press the button again to reactivate the system.
If the cruise control speed cannot be set or if the cruise control cancels immediately after being activated, there may be a malfunction in the cruise control system. Have the vehicle inspected by your Toyota dealer.
If the warning message for the cruise control is shown on the multi-information display (vehicles with a multi-information display)
Press the “ON-OFF” button once to deactivate the system, and then press the button again to reactivate the system.
If the cruise control speed cannot be set or if the cruise control cancels immediately after being activated, there may be a malfunction in the cruise control system. Have the vehicle inspected by your Toyota dealer.

CAUTION

To avoid operating the cruise control by mistake
Switch the cruise control off using the “ON-OFF” button when not in use.

Situations unsuitable for cruise control
Do not use cruise control in any of the following situations. Doing so may result in loss of control and could cause an accident resulting in death or serious injury.

- In heavy traffic
- On roads with sharp bends
- On winding roads
- On slippery roads, such as those covered with rain, ice or snow
- On steep hills
  Vehicle speed may exceed the set speed when driving down a steep hill.
- During emergency towing
Rear view monitor system*

The rear view monitor system assists the driver by displaying guide lines and an image of the view behind the vehicle while backing up, for example while parking.

Vehicles without a smart key system: The rear view image is displayed when the shift position is in R and the engine switch is in the “ON” position.

Vehicles with a smart key system: The rear view image is displayed when the shift position is in R and the engine switch is in IGNITION ON mode.

The rear view monitor system will be deactivated when the shift lever is in any position other than R.

*: If equipped
Using the rear view monitor system

Screen description

1. Vehicle width guide lines
   The line indicates a guide path when the vehicle is being backed straight up.
   The displayed width is wider than the actual vehicle width.

2. Vehicle center guide lines
   These lines indicate the estimated vehicle center on the ground.

3. Distance guide line
   The line shows points approximately 1.5 ft. (0.5 m) (red) from the edge of the bumper.

4. Distance guide line
   The line shows distance behind the vehicle, a point approximately 3 ft. (1 m) (blue) from the edge of the bumper.
Rear view monitor system precautions

Area displayed on screen

The rear view monitor system displays an image of the view from the bumper of the rear area of the vehicle.

To adjust the image on the rear view monitor system screen. (→P. 301)

• The area displayed on the screen may vary according to vehicle orientation conditions.
• Objects which are close to either corner of the bumper or under the bumper cannot be displayed.
• The camera uses a special lens. The distance of the image that appears on the screen differs from the actual distance.
• Items which are located higher than the camera may not be displayed on the monitor.
Rear view monitor system camera

The camera for the rear view monitor system is located above the license plate.

Using the camera

If dirt or foreign matter (such as water droplets, snow, mud etc.) is adhering to the camera, it cannot transmit a clear image. In this case, flush it with a large quantity of water. After that, rinse the camera lens with water and wipe it clean with a soft and wet cloth.

Differences between the screen and the actual road

The distance guide lines and the vehicle width guide lines may not actually be parallel with the dividing lines of the parking space, even when they appear to be so. Be sure to check visually.

The distances between the vehicle width guide lines and the left and right dividing lines of the parking space may not be equal, even when they appear to be so. Be sure to check visually.

The distance guide lines give a distance guide for flat road surfaces. In any of the following situations, there is a margin of error between the fixed guide lines on the screen and the actual distance/course on the road.
1 When the ground behind the vehicle slopes up sharply

The distance guide lines will appear to be closer to the vehicle than the actual distance. Because of this, objects will appear to be farther away than they actually are. In the same way, there will be a margin of error between the guidelines and the actual distance/course on the road.

1 When the ground behind the vehicle slopes down sharply

The distance guide lines will appear to be farther from the vehicle than the actual distance. Because of this, objects will appear to be closer than they actually are. In the same way, there will be a margin of error between the guidelines and the actual distance/course on the road.
When any part of the vehicle sags

When any part of the vehicle sags due to the number of passengers or the distribution of the load, there is a margin of error between the fixed guide lines on the screen and the actual distance/course on the road.

When approaching three-dimensional objects

The distance guide lines are displayed according to flat surfaced objects (such as the road). It is not possible to determine the position of three-dimensional objects (such as vehicles) using the vehicle width guide lines and distance guide lines. When approaching a three-dimensional object that extends outward (such as the flatbed of a truck), be careful of the following.

Distance guide lines

Visually check the surroundings and the area behind the vehicle. On the screen, it appears that a truck is parked at point 2. However, in reality if you back up to point 1, you will hit the truck. On the screen, it appears that 1 is closest and 3 is farthest away. However, in reality, the distance to 1 and 3 is the same, and 2 is farther than 1 and 3.
Vehicle width guide lines

Visually check the surroundings and the area behind the vehicle. In the case shown below, the truck appears to be outside of the vehicle width guide lines and the vehicle does not look as if it hits the truck. However, the rear body of the truck may actually cross over the vehicle width guide lines. In reality if you back up as guided by the vehicle width guide lines, the vehicle may hit the truck.

Vehicle width guide lines
Things you should know

If you notice any symptoms

If you notice any of the following symptoms, refer to the likely cause and the solution, and re-check.

If the symptom is not resolved by the solution, have the vehicle inspected by your Toyota dealer.

<table>
<thead>
<tr>
<th>Likely cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The image is difficult to see</td>
<td>If this happens due to these causes, it does not indicate a malfunction. Back up while visually checking the vehicle’s surroundings. (Use the monitor again once conditions have been improved.) To adjust the image on the rear view monitor system screen. (→P. 301)</td>
</tr>
<tr>
<td>The image is blurry</td>
<td>Flush the camera with a large quantity of water. After that, rinse the camera lens with water and wipe it clean with a soft and wet cloth.</td>
</tr>
<tr>
<td>The image is out of alignment</td>
<td>Have the vehicle inspected by your Toyota dealer.</td>
</tr>
<tr>
<td>The fixed guide lines are very far out of alignment</td>
<td>If this happens due to these causes, it does not indicate a malfunction. Back up while visually checking the vehicle’s surroundings.</td>
</tr>
</tbody>
</table>

- The vehicle is in a dark area
- The temperature around the lens is either high or low
- The outside temperature is low
- There are water droplets on the camera
- It is raining or humid
- Foreign matter (mud etc.) is adhering to the camera
- Sunlight or headlights are shining directly into the camera
- The vehicle is under fluorescent lights, sodium lights, mercury lights etc.

- Dirt or foreign matter (such as water droplets, snow, mud etc.) is adhering to the camera.

- The vehicle is tilted (there is a heavy load on the vehicle, tire pressure is low due to a tire puncture, etc.)
- The vehicle is used on an incline.

- The camera position is out of alignment.
## CAUTION

### When using the rear view monitor system

The rear view monitor system is a supplemental device intended to assist the driver when backing up. When backing up, be sure to visually check all around the vehicle both directly and using the mirrors before proceeding. If you do not, you may hit another vehicle, and could possibly cause an accident.

Pay attention to the following precautions when using the rear view monitor system.

1. Never depend on the rear view monitor system entirely when backing up. The image and the position of the guide lines displayed on the screen may differ from the actual state. Use caution, just as you would when backing up any vehicle.

2. Be sure to back up slowly, depressing the brake pedal to control vehicle speed.

3. The instructions given are only guidelines. When and how much to turn the steering wheel will vary according to traffic conditions, road surface conditions, vehicle condition, etc. when parking. It is necessary to be fully aware of this before using the rear view monitor system.

4. When parking, be sure to check that the parking space will accommodate your vehicle before maneuvering into it.

5. Do not use the rear view monitor system in the following cases:
   - On icy or slick road surfaces, or in snow
   - When using tire chains or the compact spare tire
   - When the trunk lid is not closed completely
   - On roads that are not flat or straight, such as curves or slopes.

6. In low temperatures, the screen may darken or the image may become faint. The image could distort when the vehicle is moving, or you may become unable to see the image on the screen. Be sure to visually check all around the vehicle both directly and using the mirrors before proceeding.

7. If the tire sizes are changed, the position of the fixed guide lines displayed on the screen may change.

8. The camera uses a special lens. The distances between objects and pedestrians that appear in the image displayed on the screen will differ from the actual distances. (→P. 208)
How to use the camera

The rear view monitor system may not operate properly in the following cases.

- If the back of the vehicle is hit, the position and mounting angle of the camera may change.
- As the camera has a waterproof construction, do not detach, disassemble or modify it. This may cause incorrect operation.
- When cleaning the camera lens, flush the camera with a large quantity of water, rinse the camera lens with water and wipe it with a soft and wet cloth. Failure to do so may cause the camera lens to be scratched and unable to transmit a clear image.
- Do not allow organic solvent, car wax, window cleaner or glass coating to adhere to the camera. If this happens, wipe it off as soon as possible.
- If the temperature changes rapidly, such as when hot water is poured on the vehicle in cold weather, the system may not operate normally.
- When washing the vehicle, do not apply intensive bursts of water to the camera or camera area. Doing so may result in the camera malfunctioning.

Do not expose the camera to strong impact as this could cause a malfunction. If this happens, have the vehicle inspected by your Toyota dealer as soon as possible.
### Driving assist systems

To help enhance driving safety and performance, the following systems operate automatically in response to various driving situations. Be aware, however, that these systems are supplementary and should not be relied upon too heavily when operating the vehicle.

<table>
<thead>
<tr>
<th>System</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ABS (Anti-lock Brake System)</strong></td>
<td>Helps to prevent wheel lock when the brakes are applied suddenly, or if the brakes are applied while driving on a slippery road surface</td>
</tr>
<tr>
<td><strong>Brake assist</strong></td>
<td>Generates an increased level of braking force after the brake pedal is depressed when the system detects a panic stop situation</td>
</tr>
<tr>
<td><strong>VSC (Vehicle Stability Control)</strong></td>
<td>Helps the driver to control skidding when swerving suddenly or turning on slippery road surfaces</td>
</tr>
<tr>
<td><strong>TRAC (Traction Control)</strong></td>
<td>Helps to maintain drive power and prevent the drive wheels from spinning when starting the vehicle or accelerating on slippery roads</td>
</tr>
<tr>
<td><strong>Hill-start assist control</strong></td>
<td>Helps to prevent the vehicle from rolling backward when starting on an incline</td>
</tr>
<tr>
<td><strong>EPS (Electric Power Steering)</strong></td>
<td>Employs an electric motor to reduce the amount of effort needed to turn the steering wheel</td>
</tr>
</tbody>
</table>
When the TRAC or VSC system is operating

The slip indicator light will flash while the TRAC or VSC system is operating.

Disabling the TRAC system

If the vehicle gets stuck in mud, dirt or snow, the TRAC system may reduce power from the engine to the wheels. Pressing to turn the system off may make it easier for you to rock the vehicle in order to free it.

To turn the TRAC system off, quickly press and release .

The “TRAC OFF” indicator light will come on.

Press again to turn the system back on.
Turning off both TRAC and VSC systems

To turn the TRAC and VSC systems off, press and hold  for more than 3 seconds while the vehicle is stopped.
The “TRAC OFF” indicator light and VSC OFF indicator light will come on.

Press  again to turn the systems back on.

When the “TRAC OFF” indicator light comes on even if the VSC OFF switch has not been pressed
TRAC cannot be operated. Contact your Toyota dealer.

Sounds and vibrations caused by the ABS, brake assist, TRAC, VSC and hill-start assist control systems

A sound may be heard from the engine compartment when the engine is started or just after the vehicle begins to move. This sound does not indicate that a malfunction has occurred in any of these systems.

Any of the following conditions may occur when the above systems are operating. None of these indicates that a malfunction has occurred.

• Vibrations may be felt through the vehicle body and steering.
• A motor sound may be heard after the vehicle comes to a stop.
• The brake pedal may pulsate slightly after the ABS is activated.
• The brake pedal may move down slightly after the ABS is activated.

EPS operation sound
When the steering wheel is operated, a motor sound (whirring sound) may be heard. This does not indicate a malfunction.

Automatic reactivation of TRAC and VSC systems
After turning the TRAC and VSC systems off, the systems will be automatically re-enabled in the following situations:

• Vehicles without a smart key system: When the engine switch is turned to the “LOCK” position
• Vehicles with a smart key system: When the engine switch is turned off
• If only the TRAC system is turned off, the TRAC will turn on when vehicle speed increases.
• If both the TRAC and VSC systems are turned off, automatic re-enabling will not occur when vehicle speed increases.

Reduced effectiveness of the EPS system
The effectiveness of the EPS system is reduced to prevent the system from overheating when there is frequent steering input over an extended period of time. The steering wheel may feel heavy as a result. Should this occur, refrain from excessive steering input or stop the vehicle and turn the engine off. The EPS system should return to normal within 10 minutes.
Operating conditions of hill-start assist control
When the following four conditions are met, the hill-start assist control will operate:
- When starting off forward/backward
  ▶ Vehicles with a manual transmission
    • The shift lever is in a position other than R (when starting off forward on an upward incline).
    • The shift lever is in R (when starting off backward on an upward incline).
  ▶ Vehicles with an automatic transmission or continuously variable transmission
    The shift lever is in a position other than P or N (when starting off forward/backward on an upward incline).
- The vehicle is stopped.
- The accelerator pedal is not depressed.
- The parking brake is not engaged.

Automatic system cancelation of hill-start assist control
The hill-start assist control will turn off in any of the following situations:
- When starting off forward/backward
  ▶ Vehicles with a manual transmission
    • The shift lever is in R (when starting off forward on an upward incline).
    • The shift lever is in a position other than R (when starting off backward on an upward incline).
  ▶ Vehicles with an automatic transmission or continuously variable transmission
    The shift lever is moved to P or N.
- The accelerator pedal is depressed.
- The parking brake is engaged.
- Approximately 2 seconds elapse after the brake pedal is released.
<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>

**The ABS does not operate effectively when**
- The limits of tire gripping performance have been exceeded (such as excessively worn tires on a snow covered road).
- The vehicle hydroplanes while driving at high speed on wet or slick roads.

**Stopping distance when the ABS is operating may exceed that of normal conditions**
The ABS is not designed to shorten the vehicle’s stopping distance. Always maintain a safe distance from the vehicle in front of you, especially in the following situations:
- When driving on dirt, gravel or snow-covered roads
- When driving with tire chains
- When driving over bumps in the road
- When driving over roads with potholes or uneven surfaces

**TRAC may not operate effectively when**
Directional control and power may not be achievable while driving on slippery road surfaces, even if the TRAC system is operating. Drive the vehicle carefully in conditions where stability and power may be lost.

**Hill-start assist control does not operate effectively when**
- Do not overly rely on hill-start assist control. Hill-start assist control may not operate effectively on steep inclines and roads covered with ice.
- Unlike the parking brake, hill-start assist control is not intended to hold the vehicle stationary for an extended period of time. Do not attempt to use hill-start assist control to hold the vehicle on an incline, as doing so may lead to an accident.

**When the VSC is activated**
The slip indicator light flashes. Always drive carefully. Reckless driving may cause an accident. Exercise particular care when the indicator light flashes.

**When the TRAC or VSC system is turned off**
Be especially careful and drive at a speed appropriate to the road conditions. As these are the systems to help ensure vehicle stability and driving force, do not turn the TRAC or VSC system off unless necessary.
### CAUTION

**Replacing tires**
Make sure that all tires are of the specified size, brand, tread pattern and total load capacity. In addition, make sure that the tires are inflated to the recommended tire inflation pressure level.
The ABS, TRAC and VSC systems will not function correctly if different tires are installed on the vehicle.
Contact your Toyota dealer for further information when replacing tires or wheels.

**Handling of tires and the suspension**
Using tires with any kind of problem or modifying the suspension will affect the driving assist systems, and may cause a system to malfunction.
Winter driving tips

Carry out the necessary preparations and inspections before driving the vehicle in winter. Always drive the vehicle in a manner appropriate to the prevailing weather conditions.

Preparation for winter

- Use fluids that are appropriate to the prevailing outside temperatures.
  - Engine oil
  - Engine coolant
  - Washer fluid
- Have a service technician inspect the condition of the battery.
- Have the vehicle fitted with four snow tires or purchase a set of tire chains for the front tires.
  
  Ensure that all tires are the same size and brand, and that chains match the size of the tires.

Before driving the vehicle

Perform the following according to the driving conditions:

- Do not try to forcibly open a window or move a wiper that is frozen. Pour warm water over the frozen area to melt the ice. Wipe away the water immediately to prevent it from freezing.
- To ensure proper operation of the climate control system fan, remove any snow that has accumulated on the air inlet vents in front of the windshield.
- Check for and remove any excess ice or snow that may have accumulated on the exterior lights, vehicle’s roof, chassis, around the tires or on the brakes.
- Remove any snow or mud from the bottom of your shoes before getting in the vehicle.
When driving the vehicle

Accelerate the vehicle slowly, keep a safe distance between you and the vehicle ahead, and drive at a reduced speed suitable to road conditions.

When parking the vehicle

Park the vehicle and move the shift lever to P (automatic transmission or continuously variable transmission), 1 or R (manual transmission) without setting the parking brake. The parking brake may freeze up, preventing it from being released. If necessary, block the wheels to prevent inadvertent sliding or creeping.

Selecting tire chains

- Vehicles with 15-inch tires
  Use the tire chains of correct size and type.
  Use SAE Class “S” type radial tire chains except radial cable chains or V-bar type chains.
- Vehicles with 16-inch and 17-inch tires
  Use the correct tire chain size when mounting the snow chains. Chain size is regulated for each tire size.

  Side chain:
  ① 0.12 in. (3 mm) in diameter
  ② 0.39 in. (10 mm) in width
  ③ 1.18 in. (30 mm) in length

  Cross chain:
  ④ 0.16 in. (4 mm) in diameter
  ⑤ 0.55 in. (14 mm) in width
  ⑥ 0.98 in. (25 mm) in length

Regulations on the use of tire chains

Regulations regarding the use of tire chains vary depending on location and type of road. Always check local regulations before installing chains.
Tire chain installation

Observe the following precautions when installing and removing chains:

- Install and remove tire chains in a safe location.
- Install tire chains on the front tires. Do not install tire chains on the rear tires.
- Install tire chains on front tires as tightly as possible. Retighten chains after driving 1/4 — 1/2 mile (0.5 — 1.0 km).
- Install tire chains following the instructions provided with the tire chains.

CAUTION

Driving with snow tires

Observe the following precautions to reduce the risk of accidents. Failure to do so may result in a loss of vehicle control and cause death or serious injury.

- Use tires of the size specified.
- Maintain the recommended level of air pressure.
- Do not drive in excess of 75 mph (120 km/h), regardless of the type of snow tires being used.
- Use snow tires on all, not just some wheels.

Driving with tire chains

Observe the following precautions to reduce the risk of accidents. Failure to do so may result in the vehicle being unable to be driven safely, and may cause death or serious injury.

- Do not drive in excess of the speed limit specified for the tire chains being used, or 30 mph (50 km/h), whichever is lower.
- Avoid driving on bumpy road surfaces or over potholes.
- Avoid sudden acceleration, abrupt steering, sudden braking and shifting operations that cause sudden engine braking.
- Slow down sufficiently before entering a curve to ensure that vehicle control is maintained.

NOTICE

Repairing or replacing snow tires (vehicles with a tire pressure warning system)

Request repairs or replacement of snow tires from Toyota dealers or legitimate tire retailers. This is because the removal and attachment of snow tires affects the operation of the tire pressure warning valves and transmitters.

Fitting tire chains (vehicles with a tire pressure warning system)

The tire pressure warning valves and transmitters may not function correctly when tire chains are fitted.

COROLLA_TMMMS_TMMC_U (OM12J84U)
CAUTION

Canada
IC: 216J-PTA184

NOTE:
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes :
(1) l’appareil ne doit pas produire de brouillage, et
(2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

This radio transmitter (identify the device by certification number, or model number if Category II) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio (identifier le dispositif par son numéro de certification ou son numéro de modèle s’il fait partie du matériel de catégorie I) a été approuvé par Industrie Canada pour fonctionner avec les types d’antenne énumérés ci-dessous et ayant un gain admissible maximal et l’impédance requise pour chaque type d’antenne. Les types d’antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l’exploitation de l’émetteur.

LASER PRODUCTS

Do not take this unit apart or attempt to make any changes yourself.
This is an intricate unit that uses a laser pickup to retrieve information from the surface of compact discs.
The laser is carefully shielded so that its rays remain inside the cabinet.
Therefore, never try to disassemble the player or alter any of its parts since you may be exposed to laser rays and dangerous voltages.

This product utilizes a laser.
Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
5-1. Basic Operations

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
</table>
| n **To prevent battery discharge**  
  Do not leave the audio system on longer than necessary when the engine is off.  
| n **To avoid damaging the audio system**  
  Take care not to spill drinks or other fluids on the audio system. |
Steering wheel audio switches

Some audio features can be controlled using the switches on the steering wheel. Operation may differ depending on the type of audio system or navigation system. For details, refer to the manual provided with the audio system or navigation system.

Operating the audio system using the steering wheel switches

1. Volume switch:
   - Press: Increases/decreases volume
   - Press and hold: Continuously increases/decreases volume

2. Radio mode:
   - Press: Selects a radio station
   - Press and hold: Seeks up/down

CD, MP3/WMA disc, Bluetooth®, iPod or USB mode:
   - Press: Selects a track/file/song
   - Press and hold: Selects a folder or album (MP3/WMA disc, Bluetooth®, iPod or USB)

3. "MODE" switch:
   - Press: Turns the power on, selects an audio source
   - Press and hold: Mutes or pauses the current operation.
   To cancel the mute or pause, press and hold again.

CAUTION

To reduce the risk of an accident
Exercise care when operating the audio switches on the steering wheel.
AUX port/USB port

Connect an iPod, USB memory device or portable audio player to the AUX port/USB port as indicated below. Press \[ \text{Mode} \] to select “iPod”, “USB” or “AUX”.

Connecting using the AUX port/USB port

- **iPod**
  
  Open the cover and connect an iPod using an iPod cable.
  
  Turn on the power of the iPod if it is not turned on.

- **USB memory**
  
  Open the cover and connect a USB memory device.
  
  Turn on the power of the USB memory device if it is not turned on.

- **Portable audio player**
  
  Open the cover and connect a portable audio player.
  
  Turn on the power of the portable audio player if it is not turned on.

⚠️ **CAUTION**

- **While driving**
  
  Do not connect a device or operate the device controls.
## Optimal use of the audio system

<table>
<thead>
<tr>
<th>Sound quality (treble/bass) and volume balance can be adjusted.</th>
</tr>
</thead>
</table>

1. Displays the current mode
2. Changes the following setting
   - Sound quality and volume balance (→P. 235)
   - The sound quality and balance setting can be changed to produce the best sound.
   - Automatic Sound Levelizer on/off (→P. 236)
3. Selects a mode

### Using the audio control function

#### Changing sound quality modes

1. Press \[ \text{SETUP} \] .
2. Turn \[ \text{SETUP} \] to select “Sound Setting”.
3. Press \[ \text{SETUP} \] .
4. Turn \[ \text{SETUP} \] to select the desired mode.
   - “BASS”, “TREBLE”, “FADE”, “BALANCE”, or “ASL”
5. Press \[ \text{SETUP} \] .
5-2. Using the audio system

- **Adjusting sound quality**

  Turning \( \text{音量} \) adjusts the level.

<table>
<thead>
<tr>
<th>Sound quality mode</th>
<th>Mode displayed</th>
<th>Level</th>
<th>Turn to the left</th>
<th>Turn to the right</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bass*</td>
<td>“BASS”</td>
<td>-5 to 5</td>
<td>Low</td>
<td>High</td>
</tr>
<tr>
<td>Treble*</td>
<td>“TREBLE”</td>
<td>-5 to 5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Front/rear volume balance</td>
<td>“FADER”</td>
<td>F7 to R7</td>
<td>Shifts to rear</td>
<td>Shifts to front</td>
</tr>
<tr>
<td>Left/right volume balance</td>
<td>“BALANCE”</td>
<td>L7 to R7</td>
<td>Shifts to left</td>
<td>Shifts to right</td>
</tr>
</tbody>
</table>

*: The sound quality level is adjusted individually in each audio mode.

- **Adjusting the Automatic Sound Levelizer (ASL)**

  When ASL is selected, turning \( \text{音量} \) to the right changes the amount of ASL in the order of “LOW”, “MID” and “HIGH”.

  Turning \( \text{音量} \) to the left turns ASL off.

  ASL automatically adjusts the volume and tone quality according to the vehicle speed.
## Using the radio

Select “AM” or “FM” to begin listening to the radio.

### Radio operation

- **Power**
- **Volume**
- **Station selectors**
- **Adjust frequency or select an item**
- **AM/FM mode button**
- **Scan for receivable stations**
- **Seek a frequency**

### Setting station presets

1. Search for a desired station by turning or pressing or

2. Press and hold a desired station selector button until you hear a beep.
Scanning radio stations

Scanning preset radio stations

1. Press and hold $\text{F3}$ until you hear a beep.
   Preset stations will be played for 5 seconds each.

2. When the desired station is reached, press $\text{F3}$ again.

Scanning all radio stations within range

1. Press $\text{F1}$.
   All stations with reception will be played for 5 seconds each.

2. When the desired station is reached, press $\text{F1}$ again.

When the battery is disconnected

Station presets are erased.

Reception sensitivity

1. Maintaining perfect radio reception at all times is difficult due to the continually changing position of the antenna, differences in signal strength and surrounding objects, such as trains, transmitters, etc.

2. The radio antenna is mounted inside the rear window. To maintain clear radio reception, do not attach metallic window tinting or other metallic objects to the antenna wire mounted inside the rear window.

3. When $\text{F0}$ is used, automatic station selection may not be possible.
CD player operation

Insert a disc or press \[\text{Play}\] to begin listening to a disc.

1. Power
2. Volume
3. Eject a disc
4. Repeat play
5. Random playback
6. Select a track/file or display track/folder list
7. Displays text message
8. Playback
9. Select a folder (MP3/WMA discs only), fast-forward or reverse
10. Search playback
11. Select a track/file

Loading CDs or MP3 and WMA discs

Insert a disc.

Ejecting CDs or MP3 and WMA discs

Press \[\text{Eject}\] and remove the disc.
Using the CD player

n Selecting a track

  Turn \( \text{\textup{↑/↓}} \) or press \( \text{\textup{↑/↓}} \) to move up or \( \text{\textup{↑/↓}} \) to move down until the desired track number is displayed.

n Selecting a track from a track list

1. Press \( \text{\textup{↑/↓}} \).
   
   The track list will be displayed.

2. Turn and press \( \text{\textup{↑/↓}} \) to select a track.
   
   To return to the previous display, press \( - \) (BACK).

n Scanning tracks

1. Press \( \text{\textup{REW}} \).
   
   The first 10 seconds of each track will be played.

2. Press \( \text{\textup{REW}} \) again when the desired track is reached.

n Fast-forwarding and reversing a track

To fast-forward or reverse, press and hold \( \text{-} \) (\( \leftrightarrow \)) or \( \text{\textup{FF}} \) (\( \text{\textup{FF}} \)).

n Repeat play

Press \( \text{\textup{RPT}} \) (RPT).

The current track is played repeatedly until \( \text{\textup{RPT}} \) (RPT) is pressed again.
Random playback
Press (RDM).
Tracks are played in a random order until (RDM) is pressed again.

Switching the display
Press \button{CD} to display or hide the CD title.
If there is additional text, \icon{\textprev} is displayed.
Press and hold \button{CD} to display the remaining text.

Playing back MP3 and WMA discs

Selecting a folder
To select the desired folder, press ( ) or ( ).

Selecting a folder and file from a folder list

1. Press ( ).
   The folder list will be displayed.

2. Turn and press ( ) to select a folder and a file.
   To return to the previous display, press (BACK).

Returning to the first folder
Press and hold ( ) until you hear a beep.

Scanning files

1. Press ( ).
   The first 10 seconds of all files in the folder will be played.

2. When the desired file is reached, press ( ) again.
5-4. Playing audio CDs and MP3/WMA discs

- **Scanning folders**
  1. Press and hold until you hear a beep.
     The first 10 seconds of the first file in each folder will be played.
  2. When the desired folder is reached, press again.

- **Selecting a file**
  Turn or press or to select the desired file.

- **Fast-forwarding and reversing a file**
  To fast-forward or reverse, press and hold or or .

- **Repeat play**
  Pressing (RPT) changes the repeat play mode in the following order:
  File repeat → Folder repeat* → Off.
  
  *: Available except when RDM (random playback) is selected

- **Random playback**
  Pressing (RDM) changes the random playback mode in the following order:
  Folder random → Disc random → Off.

- **Switching the display**
  Press to display or hide the album title.
  If there is additional text, is displayed.
  Press and hold to display the remaining text.
Display
Depending on the contents recorded, the characters may not be displayed properly or may not be displayed at all.

Error messages
If an error message is displayed, refer to the following table and take the appropriate measures. If the problem is not rectified, take the vehicle to your Toyota dealer.

<table>

<td>Eject the disc.</td>
</tr>
</tbody>
</table>

Discs that can be used
Discs with the marks shown below can be used. Playback may not be possible depending on recording format or disc features, or due to scratches, dirt or deterioration.

CDs with copy-protect features may not be used.

CD player protection feature
To protect the internal components, playback is automatically stopped when a problem is detected while the CD player is being used.

If a disc is left inside the CD player or in the ejected position for extended periods
The disc may be damaged and may not play properly.

Lens cleaners
Do not use lens cleaners. Doing so may damage the CD player.
**5.4. Playing audio CDs and MP3/WMA discs**

- **MP3 and WMA files**

  MP3 (MPEG Audio LAYER3) is a standard audio compression format.
  Files can be compressed to approximately 1/10 of their original size by using MP3 compression.

  WMA (Windows Media Audio) is a Microsoft audio compression format.
  This format compresses audio data to a size smaller than that of the MP3 format.

  MP3 and WMA file and media/format compatibility are limited.

  - **MP3 file compatibility**
    - Compatible standards
      - MP3 (MPEG1 LAYER3, MPEG2 LSF LAYER3)
    - Compatible sampling frequencies
      - MPEG1 LAYER3: 32, 44.1, 48 (kHz)
      - MPEG2 LSF LAYER3: 16, 22.05, 24 (kHz)
    - Compatible bit rates (compatible with VBR)
      - MPEG1 LAYER3: 32, 40, 48, 56, 64, 80, 96, 112, 128, 160, 192, 224, 256, 320 (kbps)
      - MPEG2 LSF LAYER3: 8, 16, 24, 32, 40, 48, 56, 64, 80, 96, 112, 128, 144, 160 (kbps)
    - Compatible channel modes: stereo, joint stereo, dual channel and monaural

  - **WMA file compatibility**
    - Compatible standards
      - WMA Ver. 7, 8, 9
    - Compatible sampling frequencies
      - 32, 44.1, 48 (kHz)
    - Compatible bit rates (only compatible with 2-channel playback)
      - Ver. 7, 8: CBR 48, 64, 80, 96, 128, 160, 192 (kbps)
      - Ver. 9: CBR 48, 64, 80, 96, 128, 160, 192, 256, 320 (kbps)

  - **Compatible media**

    Media that can be used for MP3 and WMA playback are CD-Rs and CD-RWs.

    Playback in some instances may not be possible if the CD-R or CD-RW is not finalized. Playback may not be possible or the audio may jump if the disc is scratched or marked with fingerprints.
245

5-4. Playing audio CDs and MP3/WMA discs

Compatible disc formats
The following disc formats can be used.

• Disc formats: CD-ROM Mode 1 and Mode 2
  CD-ROM XA Mode 2, Form 1 and Form 2
• File formats: ISO9660 Level 1, Level 2, (Romeo, Joliet)
  MP3 and WMA files written in any format other than those listed above
  may not play correctly, and their file names and folder names may not be
  displayed correctly.

Items related to standards and limitations are as follows.
• Maximum directory hierarchy: 8 levels
• Maximum length of folder names/file names: 32 characters
• Maximum number of folders: 192 (including the root)
• Maximum number of files per disc: 255

File names
The only files that can be recognized as MP3/WMA and played are those
with the extension .mp3 or .wma.

Multi-sessions
As the audio system is compatible with multi-sessions, it is possible to play
discs that contain MP3 and WMA files. However, only the first session can
be played.

ID3 and WMA tags
ID3 tags can be added to MP3 files, making it possible to record the track
title, artist name, etc.
  The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3 ID3 tags.
  (The number of characters is based on ID3 Ver. 1.0 and 1.1.)
WMA tags can be added to WMA files, making it possible to record the
track title and artist name in the same way as with ID3 tags.

MP3 and WMA playback
When a disc containing MP3 or WMA files is inserted, all files on the disc
are first checked. Once the file check is finished, the first MP3 or WMA file
is played. To make the file check finish more quickly, we recommend you do
not write in any files other than MP3 or WMA files or create any unnec-
essary folders.
  If the discs contain a mixture of music data and MP3 or WMA format data,
only music data can be played.
If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be mistakenly recognized and played as MP3 and WMA files. This may result in large amounts of interference and damage to the speakers.

Playback

- To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
- CD-R or CD-RW playback may not be possible in some instances, depending on the characteristics of the disc.
- There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
- When files other than MP3 or WMA files are recorded on a disc, it may take more time to recognize the disc and in some cases, playback may not be possible at all.
- Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the U.S. and other countries.

CERTIFICATION FOR THE CD PLAYER

This product is a class I laser product.
Do not open the cover of the player or attempt to repair the unit yourself.
Refer servicing to qualified personnel.
NOTICE

Discs and adapters that cannot be used
Do not use the following types of discs. Also, do not use 3 in. (8 cm) disc adapters, Dual Discs or printable discs. Doing so may damage the player and/or disc insert/eject function.

- Discs that have a diameter that is not 4.7 in. (12 cm).
- Low-quality or deformed discs.
- Discs with a transparent or translucent recording area.
- Discs that have tape, stickers or CD-R labels attached to them, or that have had the label peeled off.

Player precautions
Failure to follow the precautions below may result in damage to the discs or the player itself.

- Do not insert anything other than discs into the disc slot.
- Do not apply oil to the player.
- Store discs away from direct sunlight.
- Never try to disassemble any part of the player.
Listening to an iPod

Connecting an iPod enables you to enjoy music from the vehicle speakers. Press \[ \text{35} \] until “iPod” is displayed.

Connecting an iPod

→ P. 234

Control panel

1. Power
2. Volume
3. Fast-forward or reverse
4. Repeat play
5. Shuffle playback
6. Select an iPod menu/song or display song list

5-5. Using an external device

Selecting a list

1. Turn to display the first selection list.
2. Press to select the desired item.
   - Pressing the knob changes to the second selection list.
3. Repeat the same procedure to select the desired item.
   - To return to the previous selection list, press (BACK).

Selecting a song

Turn or press or to select the desired song.

Selecting a song from the song list

1. Press .
   - The song list will be displayed.
2. Turn to select a song.
3. Press to play the song.
   - To return to the previous display, press (BACK).

Fast-forwarding and reversing a song

To fast-forward or reverse, press and hold or .

Repeat play

Press (RPT).
   - To cancel, press (RPT) again.
Shuffle playback

Pressing \( \text{RDM} \) changes the shuffle playback mode in the following order:
Track shuffle \( \rightarrow \) Album shuffle \( \rightarrow \) Off.

Switching the display

Press \( \text{TEXT} \) to display or hide the album title.

If there is additional text, \( \text{TEXT} \) is displayed.

Press and hold \( \text{TEXT} \) to display the remaining text.

Adjusting sound quality and volume balance

1. Press \( \text{STAY} \) to enter iPod menu mode.
2. Press \( \text{TEXT} \) to change sound modes. (→P. 235)

About iPod

“Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod, or iPhone, respectively, and has been certified by the developer to meet Apple performance standards.

Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance.

iPhone, iPod, iPod classic, iPod nano and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.
iPod functions

- When an iPod is connected and the audio source is changed to iPod mode, the iPod will resume play from the same point in which it was last used.
- Depending on the iPod that is connected to the system, certain functions may not be available. If a function is unavailable due to a malfunction (as opposed to a system specification), disconnecting the device and reconnecting it once again may resolve the problem.
- While connected to the system, the iPod cannot be operated with its own controls. It is necessary to use the controls of the vehicle’s audio system instead.
- When the battery level of an iPod is very low, the iPod may not operate. If so, charge the iPod before use.
- Supported models (→P. 254)

iPod problems

To resolve most problems encountered when using your iPod, disconnect your iPod from the vehicle iPod connection and reset it. For instructions on how to reset your iPod, refer to your iPod Owner’s Manual.

Display

→P. 243
## Error messages

If an error message is displayed, refer to the following table and take the appropriate measures. If the problem is not rectified, take the vehicle to your Toyota dealer.

</tbody>
</table>
5-5. Using an external device

Compatible models
The following iPod®, iPod nano®, iPod classic®, iPod touch® and iPhone® devices can be used with this system.

- Made for
  - iPod touch (4th generation)
  - iPod touch (3rd generation)
  - iPod touch (2nd generation)
  - iPod touch (1st generation)
  - iPod classic
  - iPod with video
  - iPod nano (6th generation)
  - iPod nano (5th generation)
  - iPod nano (4th generation)
  - iPod nano (3rd generation)
  - iPod nano (2nd generation)
  - iPod nano (1st generation)
  - iPhone 4
  - iPhone 3GS
  - iPhone 3G
  - iPhone

Depending on differences between models or software versions etc., some models might be incompatible with this system.

Items related to standards and limitations are as follows:
- Maximum number of lists in device: 9999
- Maximum number of songs in device: 65535
- Maximum number of songs per list: 65535

⚠️ CAUTION

Caution while driving
Do not connect iPod or operate the controls.

⚠️ NOTICE

To prevent damage to iPod
- Do not leave the iPod in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the iPod.
- Do not push down on or apply unnecessary pressure to the iPod while it is connected.
- Do not insert foreign objects into the port.
Listening to a USB memory device

Connecting a USB memory device enables you to enjoy music from the vehicle speakers. Press until “USB” is displayed.

</table>
USB memory

Compatible devices
USB memory that can be used for MP3 and WMA playback

Compatible device formats
The following device formats can be used:
• USB communication formats: USB2.0 FS (12 Mbps)
• File formats: FAT16/32 (Windows)
• Correspondence class: Mass storage class
MP3 and WMA files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.

Items related to standards and limitations are as follows:
• Maximum directory hierarchy: 8 levels
• Maximum number of folders in a device: 999 (including the root)
• Maximum number of files in a device: 9999
• Maximum number of files per folder: 255

MP3 and WMA files
MP3 (MPEG Audio LAYER 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size using MP3 compression.

WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format.

MP3 and WMA file and media/format compatibility are limited.

MP3 file compatibility

• Compatible standards
  MP3 (MPEG1 AUDIO LAYERIII, MPEG2 AUDIO LAYERIII, MPEG2.5)

• Compatible sampling frequencies
  MPEG1 AUDIO LAYERIII: 32, 44.1, 48 (kHz)
  MPEG2 AUDIO LAYERIII: 16, 22.05, 24 (kHz)
  MPEG2.5: 8, 11.025, 12 (kHz)

• Compatible bit rates (compatible with VBR)
  MPEG1 AUDIO LAYERII, III: 32-320 (kbps)
  MPEG2 AUDIO LAYERII, III: 8-160 (kbps)
  MPEG2.5: 8-160 (kbps)

• Compatible channel modes: stereo, joint stereo, dual channel and monoaural
WMA file compatibility

- Compatible standards
  WMA Ver. 7, 8, 9
- Compatible sampling frequencies
  HIGH PROFILE 32, 44.1, 48 (kHz)
- Compatible bit rates
  HIGH PROFILE 48-320 (kbps, CBR)

File names

The only files that can be recognized as MP3/WMA and played are those with the extension .mp3 or .wma.

ID3 and WMA tags

ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.

The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3, 2.4 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)

WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.

MP3 and WMA playback

- When a device containing MP3 or WMA files is connected, all files in the USB memory are checked. Once the file check is finished, the first MP3 or WMA file is played. To make the file check finish more quickly, we recommend that you do not include any files other than MP3 or WMA files or create any unnecessary folders.
- When the USB memory is connected and the audio source is changed to USB memory mode, the USB memory will start playing the first file in the first folder. If the same device is removed and reinserted (and the contents have not been changed), the USB memory will resume play from the same point in which it was last used.

Extensions

If the file extensions .mp3 and .wma are used for files other than MP3 and WMA files, they will be skipped (not played).

Playback

- To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
- There is a wide variety of freeware and other encoding software for MP3 and WMA files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
- Microsoft, Windows, and Windows Media are registered trademarks of Microsoft Corporation in the U.S.A. and other countries.
CAUTION

**Caution while driving**
Do not connect USB memory or operate the controls.

NOTICE

**To prevent damage to USB memory**
- Do not leave USB memory in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the device.
- Do not push down on or apply unnecessary pressure to the USB memory while it is connected.
- Do not insert foreign objects into the port.
Using the AUX port

This port can be used to connect a portable audio device and listen to it through the vehicle's speakers. Press until “AUX” is displayed.

Connecting a portable player

→ P. 234

Operating portable audio devices connected to the audio system

The volume can be adjusted using the vehicle's audio controls. All other adjustments must be made on the portable audio device itself.

When using a portable audio device connected to the power outlet

Noise may occur during playback. Use the power source of the portable audio device.
Bluetooth® audio/phone

The following can be performed using Bluetooth® wireless communication:

- **Bluetooth® audio**
  
The Bluetooth® audio system enables you to enjoy music played on a portable player from the vehicle speakers via wireless communication.
  
  This audio system supports Bluetooth®, a wireless data system capable of playing portable audio music without cables. If your portable player does not support Bluetooth®, the Bluetooth® audio system cannot be used.

- **Bluetooth® phone (hands-free phone system)**
  
  This system supports Bluetooth®, which allows you to make or receive calls without using cables to connect a cellular phone to the system, and without operating the cellular phone.
Device registration/connection flow

1. Register a Bluetooth® device to be used with the audio system (→ P. 268)

2. Connect a registered Bluetooth® device to be used (→ P. 269, 270)

3. Set automatic connection of the device (→ P. 271)

4. Check the Bluetooth® connection condition (→ P. 264)

   To be used for audio
   To be used for hands-free phone

5. Use Bluetooth® audio (→ P. 279)

5. Use Bluetooth® phone (→ P. 282)
Audio unit

1. Bluetooth® connection status
   If "BT" is not displayed, the Bluetooth® audio/phone cannot be used.

2. Display
   A message, name, number, etc. is displayed.
   Lower-case characters and special characters cannot be displayed.

3. Displays the set up menu

4. Selects items such as menu and number
   Turn: Selects an item
   Press: Inputs the selected item

5. Off-hook switch
   Turns the hands-free system on,starts a call

6. On-hook switch
   Turns the hands-free system off,ends a call/refuses a call

7. Displays information that is too long to be displayed at one time on the display (press and hold)

8. Selects speed dials
## Microphone

- Vehicles without moon roof
- Vehicles with moon roof

## Menu list of the Bluetooth® audio/phone

To enter a menu, press \( \text{\textup{\(\text{\texttimes}\)}} \) and navigate menus by using \( \text{\textup{\(\text{\texttimes}\)}} \):

<table>
<thead>
<tr>

Using Bluetooth® devices

### Bluetooth® audio/phone system functions
Depending on the Bluetooth® device, certain functions may not be available.
Using the steering wheel switches

The steering wheel switches can be used to operate a connected cellular phone or portable digital audio player (portable player).

Operating a Bluetooth® phone using the steering wheel switches

1. Volume
   The voice guidance volume cannot be adjusted using these buttons.

2. Off-hook switch
   Turns the hands-free system on/starts a call

3. On-hook switch
   Turns the hands-free system off/ends a call/refuses a call
Registering a Bluetooth® device

Before using the Bluetooth® audio/phone, it is necessary to register a Bluetooth® device in the system. You can register up to 5 Bluetooth® devices.

How to register a Bluetooth® device

1. Press \( \text{SP} \) and select “Bluetooth*” using \( \text{EP} \).

2. Press \( \text{EP} \) and select “BT Pairing” using \( \text{EP} \).

A passkey will be displayed.

3. SSP (Secure Simple Pairing) incompatible Bluetooth® devices:
   - Input the passkey into the device.

   SSP (Secure Simple Pairing) compatible Bluetooth® devices:
   - Select “Yes” to register the device. Depending on the type of device, it may register automatically.

If a Bluetooth® device has both music player and cellular phone functions, both functions will be registered at the same time. When deleting the device, both functions will be deleted at the same time.

If the off-hook switch is pressed and the “Phone” mode is entered when no phones have been registered, the registration screen will be automatically displayed.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Using the “SET UP” menu ( “Bluetooth” menu)

Registering a Bluetooth® device in the system allows the system to function. The following functions can be used for registered devices:

### Registering a portable player

Select “BT Pairing” using (→ P. 265), and perform the procedure for registering a portable player. (→ P. 268)

### Listing the registered cellular phones

Select “List Phone” using (→ P. 265) The list of registered cellular phones will be displayed.

1. Connecting the registered cellular phone to the audio system
   1. Select the name of the cellular phone to be connected using .
   2. Select “Select” using .

2. Deleting a registered cellular phone
   1. Select the name of the cellular phone to be deleted using .
   2. Select “Delete” using .
   3. Press (YES).
Listing the registered portable players

Select “List Audio” using \( \text{List} \) . (→P. 265) The list of registered portable players will be displayed.

1 Connecting the registered portable player to the audio system

1 Select the name of the portable player to be connected using \( \text{Name} \).

2 Select “Select” using \( \text{Select} \).

1 Deleting the registered portable player

1 Select the name of the portable player to be deleted using \( \text{Name} \).

2 Select “Delete” using \( \text{Delete} \).

3 Press \( \text{Yes} \) (YES).
Changing the passkey

1. Select “Passkey” using . (→P. 265)

2. Input a 4 to 8-digit passkey using .
   Input the number 1 digit at a time.

3. When the entire number to be registered as a passkey has been input, press again.
   If the passkey to be registered has 8 digits, pressing again is not necessary.

Setting automatic connection of the device on or off

If “BT power” is set to on, the registered device will be connected automatically when the engine switch is turned to the “ACC” position (vehicles without a smart key system) or ACCESSORY mode (vehicles with a smart key system).

1. Select “BT Power” using . (→P. 265)

2. Select “ON” or “OFF” using .
Displaying the device status

Select “Bluetooth* info” using . (→P. 265)

1. Displaying the device name

   Select “Device Name” using .

2. Displaying the device address

   Select “Device Address” using .

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Setting the automatic connection confirmation display to on or off

If the “Display Setting” is set to on, the portable player connection status will be displayed when the engine switch is turned to the “ACC” or “ON” position (vehicles without a smart key system) or ACCESSORY or IGNITION ON mode (vehicles with a smart key system).

1. Select “Display Setting” using . (→P. 265)

2. Select “ON” or “OFF” using .
Select “Initialize” using ✎. (→P. 265)

1 Initializing the sound settings

Select “Sound setting” using ✎ and press ✎ (YES).

For details about sound settings: →P. 277

1 Initializing the device information

Select “Car Device Info” using ✎ and press ✎ (YES).

Automatic connection of a portable device, the automatic connection confirmation display and passkey will be initialized.

1 Initializing all the settings

Select "All Initialize" using ✎ and press ✎ (YES).
Using the “SET UP” menu (“Phone” menu)

### Adding a new phone number

Select “Add contacts” using \( \text{REX} \). (\( \rightarrow \) P. 265)

1. Transferring all contacts from the cellular phone
   
   Select “Overwrite all contacts” using \( \text{REX} \) and press \( \text{OK} \) (YES).

2. Transferring one contact from the cellular phone
   
   Select “Add one contact” using \( \text{REX} \) and press \( \text{OK} \) (YES).

### Setting speed dials

1. Select “Add SD” using \( \text{REX} \). (\( \rightarrow \) P. 265)

2. Select the desired data using \( \text{REX} \).

3. Press and hold the desired preset button (from \( \text{OK} \) to \( \text{OK} \)).
   
   For details about setting speed dials from the call history: \( \rightarrow \) P. 284
   
   For details about deleting speed dials: \( \rightarrow \) P. 283
Deleting call histories

Select “Delete Call History” using . (→P. 265)

1 Deleting outgoing call history

1 Select “Outgoing Calls” using .

2 Select the desired phone number using and press . (YES).

To delete all outgoing call history data, press . (ALL) and then press . (YES).

1 Deleting incoming call history

1 Select “Incoming calls” using .

2 Select the desired phone number using and press . (YES).

To delete all incoming call history data, press . (ALL) and then press . (YES).
1 Deleting missed call history

   1 Select “Missed calls” using .

   2 Select the desired phone number using and press (YES).

   To delete all missed call history data, press (ALL) and then press (YES).

1 Deleting a number from all call histories (Outgoing calls, Incoming calls and Missed calls)

   1 Select “All Calls” using .

   2 Select the desired phone number using and press (YES).

   To delete all of the call histories data, press (ALL) and then press (YES).
Deleting a registered phone number

1. Select “Delete contacts” using (→P. 265)

2. Select the desired phone number using and press (YES).
   To delete all of the registered phone numbers, select “All delete” using and press (YES).

Deleting another cellular phone’s phonebook

1. Select “Delete other PB” using (→P. 265)

2. Select the desired phonebook using and press (YES).

Setting call volume

1. Select “Call volume” using (→P. 265)

2. Change the call volume.
   To decrease the volume: Turn clockwise.
   To increase the volume: Turn clockwise.

Setting ringtone volume

1. Select “Ringtone volume” using (→P. 265)

2. Change the ringtone volume.
   To decrease the volume: Turn clockwise.
   To increase the volume: Turn clockwise.
**Setting ringtone**

1. Select “Ringtone” using \( \text{ringtone} \). (→ P. 265)

2. Using \( \text{menu} \), select a ringtone (1 - 3). To set the selected ringtone,
   press \( \text{set} \).

**Transferring call histories**

Select “Transfer Histories” using \( \text{menu} \) and press \( \text{set} \) (YES).

- **Phone number**
  Up to 1000 names can be stored.

- **Call history**
  Up to 10 numbers can be stored in each of the outgoing, incoming and missed call history memories.

- **Limitation of number of digits**
  A phone number that exceeds 24 digits cannot be registered.
Operating a Bluetooth® enabled portable player

1. Power
2. Volume
3. Select an album, fast-forward or reverse
4. Repeat play
5. Random playback
6. Selecting an item
7. Displays text message
8. Playback
9. Playback/pause
10. Search playback
11. Select a track
Selecting an album
Press \( \bullet \) ( or \( \bullet \) ( ) to select the desired album.

Scanning an album
1 Press and hold \( \text{SCRM} \) until you hear a beep.
The first 10 seconds of the first track in each album will be played.
2 When the desired album is reached, press \( \text{SCRM} \) again.

Selecting a track
Press \( \bullet \leftarrow \) or \( \bullet \rightarrow \) to select the desired track.

Scanning tracks
1 Press \( \text{SCRM} \).
The first 10 seconds of all tracks in the album will be played.
2 When the desired track is reached, press \( \text{SCRM} \) again.

Playing and pausing a track
Press \( \bullet \) ( \( \text{PLAY} \) ) to play or pause a track.

Fast-forwarding and reversing a track
To fast-forward or reverse, press and hold \( \bullet \) ( \( \text{REW} \) ) or \( \bullet \) ( \( \text{FF} \) ).

Random playback
Pressing \( \bullet \) ( \( \text{RDM} \) ) changes the random playback mode in the following order:
Album random \( \rightarrow \) All track random \( \rightarrow \) Off
### Repeat play
Pressing \[\text{RPT}\] (RPT) changes the repeat play mode in the following order:
- Track repeat → Album repeat* → Off
*: Available except when RDM (random playback) is selected

### Switching the display
Press \[\text{DISP}\].
- Track title and artist name are displayed on the display.
- To return to the previous display, press \[\text{DISP}\] or \[\text{BACK}\].

#### Bluetooth® audio system functions
Depending on the portable player that is connected to the system, certain functions may not be available.
Making a phone call

To enter the “PHONE” mode, press the off-hook switch.

- Making a phone call
  - Dialing by selecting a name
  - Speed dialing
  - Dialing by entering the number
  - Dialing from call histories

- Receiving a phone call
  - Answering the phone
  - Refusing a call

- Operations during a call
  - Transferring a call
  - Muting your voice
  - Inputting digits
  - Setting call volume

- Adjusting the ringtone volume when receiving a call
Dialing by selecting a name

1. Select “Phonebook” using  and press the off-hook switch.

2. Select the desired name using  and press the off-hook switch.

By pressing  (Add S. Dial) and then one of the speed dial buttons (from  to  ) while the desired name is selected, it can be registered as a speed dial.

Speed dialing

1. Select “Speed dials” using  and press the off-hook switch.

2. Press the desired preset button (from  to  ) and press the off-hook switch.

Dialing by entering the number

1. Select “Dial by number” using  and press the off-hook switch.

2. Enter the phone number and press the off-hook switch.
Dialing from call histories

1. Select “All calls”, “Missed calls”, “Incoming calls” or “Outgoing calls” using.

2. Select the desired number using and press the off-hook switch.

The following operations can be performed:

1. Registering a number as a speed dial

   Press (Add S. Dial) and then press and hold the desired preset button (from to).

1. Deleting the selected number

   Press (DELETE) and press (YES).
Receiving a phone call

- **Answering the phone**
  Press the off-hook switch.

- **Refusing a call**
  Press the on-hook switch.

- **Receiving a call when on another call**
  Press the off-hook switch.
  Pressing the off-hook switch again returns you to the previous call.

- **Adjusting the ringtone volume when receiving a call**

  Change the ringtone volume using 📡,

  To decrease the volume: Turn 📡 counterclockwise.

  To increase the volume: Turn 📡 clockwise.
Speaking on the phone

**Transferring a call**

A call can be transferred between the cellular phone and system while dialing, receiving a call, or during a call. Use one of the following methods:

a. Operate the cellular phone.
   Refer to the manual that comes with the cellular phone for the operation of the phone.

b. Press * (PHONE).
   *: This operation can be performed only when transferring a call from the cellular phone to the system during a call.

**Muting your voice**

Press MUTE.

**Inputting digits**

Press (0 - 9) and use to input the desired digits.

- To send the input digits, press SEND.
- When finished, press EXIT to return to the previous screen.

**Setting call volume**

Change the call volume using .

To decrease the volume: Turn counterclockwise.

To increase the volume: Turn clockwise.
When talking on the phone
- Do not talk at the same time as the other party.
- Keep the volume of the received voice down. Otherwise, voice echo will increase.

Automatic volume adjustment
When vehicle speed is 50 mph (80 km/h) or more, the volume automatically increases. The volume returns to the previous volume setting when vehicle speed drops to 43 mph (70 km/h) or less.

Phone call system functions
Depending on the cellular phone, certain functions may not be available.

Situations where the system may not recognize your voice
- When driving on a rough road
- When driving at high speeds
- When air is blowing out of the vents onto the microphone
- When the air conditioning fan emits a loud noise
When using the Bluetooth® audio system
- In the following situations, the system may not function.
  - The portable player does not support Bluetooth®
  - The cellular phone is located outside the service area
  - The Bluetooth® device is switched off
  - The Bluetooth® device has a low battery
  - The Bluetooth® device is not connected to the system
  - The Bluetooth® device is behind the seat or in the glove box or console box, or is touching or covered by metal objects
- There may be a delay if a cellular phone connection is made during Bluetooth® audio playback.
- Depending on the type of portable audio player that is connected to the system, operation may differ slightly and certain functions may not be available.

When transferring ownership of the vehicle
Be sure to initialize the system to prevent personal data from being improperly accessed. (→P. 273)

About Bluetooth®
Bluetooth is a registered trademark of Bluetooth SIG. Inc.

Compatible models
- Bluetooth® specifications:
  - Ver. 1.1, or higher (recommended: Ver. 2.1 + EDR or higher)
- Following Profiles:
  - A2DP (Advanced Audio Distribution Profile) Ver. 1.0, or higher (recommended: Ver. 1.2 or higher)
  - AVRCP (Audio/Video Remote Control Profile) Ver. 1.0 or higher (recommended: Ver. 1.3 or higher)
- Portable players must correspond to the above specifications in order to be connected to the Bluetooth® audio system. However, please note that some functions may be limited depending on the type of portable player.
- Cellular phone
  - HFP (Hands Free Profile) Ver. 1.0 or higher (recommended: Ver. 1.5)
  - OPP (Object Push Profile) Ver. 1.1
  - PBAP (Phone Book Access Profile) Ver. 1.0
CAUTION

While driving
Do not operate the portable audio player, cellular phone or connect a device to the Bluetooth® system.

Caution regarding interference with electronic devices
- Your audio unit is fitted with Bluetooth® antennas. People with implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should maintain a reasonable distance between themselves and the Bluetooth® antennas. The radio waves may affect the operation of such devices.
- Before using Bluetooth® devices, users of any electrical medical device other than implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

NOTICE

When leaving the vehicle
Do not leave your portable audio player or cellular phone in the vehicle. The inside of the vehicle may become hot, causing damage to the portable audio player or cellular phone.
Multimedia system

With Entune Audio

Operations such as listening to audio, using the hands-free phone and changing multimedia system settings are started by using the following buttons.

With Entune Audio Plus

Owners of this system should refer to the “NAVIGATION AND MULTIMEDIA SYSTEM OWNER'S MANUAL”.

Multimedia system operation buttons

- **“AUDIO” button**
  Display the “Select Audio Source” screen or audio top screen.  
  (→P. 303)

- **“SETUP” button**
  Press this button to customize the function settings.  
  (→P. 296)

- **button**
  Press this button to access the Bluetooth® hands-free system.  
  (→P. 343)

- **“CAR” button**
  Press this button to access the fuel consumption screen.  
  (→P. 89)

*: If equipped
Operating the touch screen

By touching the screen with your finger, you can control the multimedia system, etc.

Drag*

Touch the screen with your finger, and move the screen to the desired position.

- Scrolling the lists

Flick*

Touch the screen with your finger and quickly move the screen by flicking your finger.

- Scrolling the main screen page

*: The above operations may not be performed on all screens.

When using the touch screen

- If the screen is cold, the display may be dark, or the system may seem to be operating slightly slower than normal.
- The screen may seem dark and hard to see when viewed through sunglasses. Change your angle of viewing, adjust the display on the “Display Settings” screen (→P. 301) or remove your sunglasses.
- Flick operations may not be performed smoothly in high altitudes.

NOTICE

To avoid damaging the touch screen

- To prevent damaging the screen, lightly touch the screen buttons with your finger.
- Do not use objects other than your finger to touch the screen.
- Wipe off fingerprints using a glass cleaning cloth. Do not use chemical cleaners to clean the screen, as they may damage the touch screen.
Steering wheel audio switches

Some audio features can be controlled using the switches on the steering wheel. Operation may differ depending on the type of multimedia system or navigation system. For details, refer to the manual provided with the multimedia system or navigation system.

Operating the multimedia system using the steering wheel switches

1. Volume switch
   - Increases/decreases volume
   - Press and hold: Continuously increases/decreases volume

2. Back switch
   - Returns to the previous screen

3. Cursor switch
   - Selects (radio stations/radio presets/tracks/files/songs)
   - Moves cursor
   - Press and hold: Seek up/down (radio stations)
   - Fast up/down (tracks/files)

4. Enter switch
   - Displays the preset/list screen
   - Selects items

5. “MODE/HOLD” switch
   - Changes audio source
   - Press and hold this switch to mute or pause the current operation
     To cancel the mute or pause, press and hold.

CAUTION

To reduce the risk of an accident
Exercise care when operating the audio switches on the steering wheel.
USB port/AUX port

Connect an iPod, USB memory device or portable audio player to the USB/AUX port as indicated below. Select “iPod”, “USB” or “AUX” on the audio source selection screen and the device can be operated via multimedia system.

Connecting using the USB/AUX port

- **iPod**
  Open the cover and connect an iPod using an iPod cable.
  Turn on the power of the iPod if it is not turned on.

- **USB memory**
  Open the cover and connect the USB memory device.
  Turn on the power of the USB memory device if it is not turned on.

- **Portable audio player**
  Open the cover and connect the portable audio player.
  Turn on the power of the portable audio player if it is not turned on.

**CAUTION**

- **While driving**
  Do not connect a device or operate the device controls.
Basic audio operations

Basic audio operations and functions common to each mode are explained in this section.

Operating the multimedia system

Press this knob to turn the multimedia system on and off, and turn it to adjust the volume.

Turn this knob to select radio station bands, tracks and files. Also, the knob can be used to select items in the list display.

Press this button to eject a disc.

Insert a disc into the disc slot.

Press to pause or resume playing music.

Track1

Press the “<” or “>” button to seek up or down for a radio station, or to access a desired track or file.

II: Select to pause music.

II: Select to resume playing music.

Press to resume or resume playing music.
Random playback
Select \( \text{RAN} \) to change on/off.

Repeat play
Select \( \text{REP} \) to change on/off.

**Using cellular phones**
Interference may be heard through the multimedia system's speakers if a cellular phone is being used inside or close to the vehicle while the multimedia system is operating.

---

**CAUTION**

**Laser product**
This product is a class 1 laser product.
Do not open the cover of the player or attempt to repair the unit yourself.
Refer servicing to qualified personnel.

**Laser products**
- Do not take this unit apart or attempt to make any changes yourself.
  This is an intricate unit that uses a laser pickup to retrieve information from the surface of compact discs. The laser is carefully shielded so that its rays remain inside the cabinet. Therefore, never try to disassemble the player or alter any of its parts since you may be exposed to laser rays and dangerous voltages.
- This product utilizes a laser.
  Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
  **THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.**

---

**NOTICE**

**To prevent battery discharge**
Do not leave the multimedia system on longer than necessary when the engine is off.

**To avoid damaging the multimedia system**
Take care not to spill drinks or other fluids on the multimedia system.
Setup menu

You can adjust the multimedia system to your desired settings.

Display “Setup” screen

Press the “SETUP” button to display the “Setup” screen.

1. Select to adjust the settings for operation sounds, screen animation, etc. (→P. 297)
2. Select to set the voice settings. (→P. 302)
3. Select to adjust the settings for contrast and brightness of the screen. (→P. 301)
4. Select to adjust the settings for registering, removing, connecting and disconnecting Bluetooth® devices. (→P. 339)
5. Select to adjust the settings for phone sound, contact, etc. (→P. 362)
6. Select to set audio settings. (→P. 299)
7. Select to turn the screen off.
8. Select to set the vehicle customization (→P. 576).
General settings

Settings are available for adjusting the operation sounds, screen animation, etc.

Screen for general settings

1. Press the “SETUP” button.
2. Select “General” on the “Setup” screen.
   1. “English”, “Français” or “Español” can be selected.
   2. On/off can be selected to sound beeps.
   3. Select to change the screen color.
   4. Select to change the keyboard layout.
   5. The animation effect for the screen can be set to on/off.
   6. Select to delete personal data (→P. 298)
   7. Select to update program versions. For details, contact your Toyota dealer.
   8. Select to display the software information. Notices related to third party software used in this product are enlisted. (This includes instructions for obtaining such software, where applicable.)

To return to the default volume settings
Select “Default”, and then “Yes.”
298  5-12. Setup (Multimedia system)

### Delete personal data

1. Select “Delete Personal Data” on the “General Settings” screen.
2. Select “Delete”.
   
   Check carefully beforehand, as data cannot be retrieved once deleted.

3. A confirmation screen will be displayed. Select “Yes”.

   The following personal data will be deleted or changed to its default settings.
   - General settings
   - Audio settings
   - Phone settings
Audio settings

Settings are available for adjusting the radio operation, cover art, etc.

Screen for audio settings

1. Press the “SETUP” button.
2. Select “Audio” on the “Setup” screen.

- Number of Radio Presets
  Select the number of radio preset stations.
- Display Cover Art on/off
- Automatic Sound Levelizer
  (→P. 300)
5-12. Setup (Multimedia system)

<table>
<thead>
<tr>
<th>Automatic sound leveliser (ASL)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Select “Automatic Sound Levelizer”.</td>
</tr>
<tr>
<td>2 Select “High”, “Mid”, “Low” or “Off”.</td>
</tr>
</tbody>
</table>

About Automatic Sound Leveliser (ASL)

ASL automatically adjusts the volume and tone quality according to the vehicle speed.
**Display settings**

Settings are available for adjusting the contrast and brightness of the screen.

**Screen for display settings**

1. Press the “SETUP” button.
2. Select “Display” on the “Setup” screen.
   - Adjust screen contrast/brightness
   - Adjust screen contrast/brightness of the rear view monitor camera
   - Changes to day mode.

**Adjusting the screen contrast/brightness**

1. Select “General” on the “Display Settings” screen.
2. Adjust the display as desired by selecting “+” or “-”.

**Day mode**

When the headlights are turned on, the screen dims. However, the screen can be switched to day mode by selecting “Day Mode”.

The screen will stay in day mode when the headlights are turned on until “Day Mode” is selected again.
**Voice settings**

This screen is used for guidance for voice command systems setting.

1. Adjust the voice guidance volume setting.
2. Set the voice recognition prompts “High”, “Low” or “Off”.
3. Set the train voice recognition.
4. Set the voice prompt interrupt on/off.
5. Set the voice recognition tutorial.

To return to the default volume settings
Select “Default”, and then “Yes”.

COROLLA_TMMMS_TMMC_U (OM12J84U)
Selecting the audio source

Switching between audio sources such as radio and CD are explained in this section.

Changing audio source

1. Press the “AUDIO” button to display the audio source selection screen.
   If the audio source selection screen is not displayed, press the “AUDIO” button again.

2. Select the desired audio source.
   ① Select the desired audio source then [ ] or [ ] to reorder.

Using the steering wheel switches to change audio source

The audio source changes as follows each time the “MODE/HOLD” switch is pressed.
List screen operation

When a list screen is displayed, use the appropriate buttons to scroll through the list.

How to scroll

- Select to scroll to the next or previous page.
- If appears to the right of titles, the complete titles are too long for the display. Select this button to scroll the title.

Turn the “TUNE/SCROLL” knob to move the cursor box to select a desired item from the list, and press the “TUNE/SCROLL” knob to play it. The track that is being played is highlighted.

To return to the top screen, select “Now Playing” on the list screen.
Selecting, fast-forwarding and reversing tracks/files/songs

Selecting a track/file/song
Press the “▼” or “▲” button on “SEEK/TRACK” or turn the “TUNE/SCROLL” knob to select the desired track/file/song number.
To fast-forward or reverse, press and hold the “▼” or “▲” button on “SEEK/TRACK”.

Selecting a track/file/song from the track/file/song list
1. Select “Browse” or cover art.
2. Select the desired track/file/song.

When an MP3/WMA/AAC disc or USB memory device is being used, the folder can be selected. When a Bluetooth® device or iPod is being used, the album can be selected.

According to the audio device, the following is displayed.

<table>
<thead>
<tr>
<th>Audio source</th>

</tr>
</tbody>
</table>
5-13. Using the Multimedia system

Optimal use of the multimedia system

On the “Sound Settings” screen, sound quality (Treble/Mid/Bass), volume balance can be adjusted.

How to adjust the sound settings and sound quality

1. Select “-” or “+” to adjust the treble, mid or bass to a level between -5 and 5.
2. Select “Front” or “Rear” to adjust the front/rear audio balance.
3. Select “L” or “R” to adjust the left/right audio balance.

The sound quality level is adjusted individually

The treble, mid and bass levels can be adjusted for each audio mode separately.
Radio operation

Select “AM” or “FM” on the audio source selection screen to begin listening to the radio.

Audio control screen

Pressing the “AUDIO” button displays the audio control screen from any screens of the selected source.

1. Audio source selection screen appears
2. Preset stations
3. Select to display RBDS text messages*
4. Scanning for receivable station
5. Select to display a list of receivable stations
6. Setting the sound (→P. 306)

*: FM only

Selecting a station

Tune in to the desired station using one of the following methods.

- **Seek tuning**
  Press the “▼” or “▲” button on “SEEK/TRACK”.
  The radio will begin seeking up or down for a station of the nearest frequency and will stop when a station is found.

- **Manual tuning**
  Turn the “TUNE/SCROLL” knob.

- **Preset stations**
  Select the desired preset station.
5-14. Using the radio (Multimedia system)

### Setting station presets

1. Search for desired stations by turning the "TUNE/SCROLL" knob or pressing the "▲" or "▼" button on "SEEK/TRACK".

2. Select "(add new)".
   - To change the preset station to a different one, select and hold the preset station.

3. Select "Yes".

4. Select "OK" after setting the new preset station.

   Select "(add new)".

### Refreshing the station list

1. Select "Refresh" on the "Station List" screen.
   - To cancel the refresh, select "Cancel Refresh".

### Reception sensitivity

- Maintaining perfect radio reception at all times is difficult due to the continually changing position of the antenna, differences in signal strength and surrounding objects, such as trains, transmitters, etc.

- The radio antenna is mounted inside the rear window. To maintain clear radio reception, do not attach metallic window tinting or other metallic objects to the antenna wire mounted inside the rear window.
CD player operation

Insert disc or select “CD” on the audio source selection screen with a disc inserted to begin listening to a CD.

Audio control screen

Pressing the “AUDIO” button displays the audio control screen from any screens of the selected source.

1 Audio source selection screen appears
2 Displaying the track/file list
   MP3/WMA/AAC: Displaying the folder list
3 Random playback (→ P. 295)
4 Repeat play (→ P. 295)
5 Pause
   Select  to resume play
6 Setting the sound (→ P. 306)
Displaying the title and artist name
If a CD-TEXT disc is inserted, the title of the disc and track will be displayed.

Error messages
If an error message is displayed, refer to the following table and take the appropriate measures. If the problem is not rectified, take the vehicle to your Toyota dealer.

Discs that can be used
Discs with the marks shown below can be used. Playback may not be possible depending on recording format or disc features, or due to scratches, dirt or deterioration.

- CDs with copy-protection features may not play correctly.

CD player protection feature
To protect the internal components, playback is automatically stopped when a problem is detected.

If a disc is left inside the CD player or in the ejected position for extended periods
Disc may be damaged and may not play properly.

Lens cleaners
Do not use lens cleaners. Doing so may damage the CD player.
5-15. Playing an audio CD and MP3/WMA/AAC discs (Multimedia system) 311

MP3, WMA and AAC files
MP3 (MPEG Audio LAYER3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size by using MP3 compression.
WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format.
AAC is short for Advanced Audio Coding and refers to an audio compression technology standard used with MPEG2 and MPEG4.
MP3, WMA and AAC file and media/formats compatibility are limited.

MP3 file compatibility
• Compatible standards
  MP3 (MPEG1 LAYER3, MPEG2 LSF LAYER3)
• Compatible sampling frequencies
  MPEG1 LAYER3: 32, 44.1, 48 (kHz)
  MPEG2 LSF LAYER3: 16, 22.05, 24 (kHz)
• Compatible bit rates (compatible with VBR)
  MPEG1 LAYER3: 32-320 (kbps)
  MPEG2 LSF LAYER3: 8-160 (kbps)
• Compatible channel modes: stereo, joint stereo, dual channel and monaural

WMA file compatibility
• Compatible standards
  WMA Ver. 7, 8, 9
• Compatible sampling frequencies
  32, 44.1, 48 (kHz)
• Compatible bit rates (only compatible with 2-channel playback)
  Ver. 7, 8: CBR 48-192 (kbps)
  Ver. 9: CBR 48-320 (kbps)
 AAC file compatibility

- **Compatible standards**
  - MPEG4/AAC-LC
- **Compatible sampling frequencies**
  - 11.025/12/16/22.05/24/32/44.1/48 (kHz)
- **Compatible bit rates**
  - 16-320 (kbps)
- **Compatible channel modes**: 1ch and 2ch

Compatible media

Media that can be used for MP3, WMA and AAC playback are CD-Rs and CD-RWs.

Playback in some instances may not be possible if the CD-R or CD-RW is not finalized. Playback may not be possible or the audio may jump if the disc is scratched or marked with fingerprints.

Compatible disc formats

The following disc formats can be used.

- **Disc formats**: CD-ROM Mode 1 and Mode 2
  - CD-ROM XA Mode 2, Form 1 and Form 2
- **File formats**: ISO9660 Level 1, Level 2, (Romeo, Joliet)
  - UDF (2.01 or lower)

MP3, WMA and AAC files written in any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.

Items related to standards and limitations are as follows.

- **Maximum directory hierarchy**: 8 levels (including the root)
- **Maximum length of folder names/file names**: 32 characters
- **Maximum number of folders**: 192 (including the root)
- **Maximum number of files per disc**: 255

File names

The only files that can be recognized as MP3/WMA/AAC and played are those with the extension .mp3, .wma or .m4a.

Discs containing multi-session recordings

As the multimedia system is compatible with multi session discs, it is possible to play discs that contain MP3, WMA and AAC files. However, only the first session can be played.
ID3, WMA and AAC tags

ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.

The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)

WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.

AAC tags can be added to AAC files, making it possible to record the track title and artist name in the same way as with ID3 tags.

MP3, WMA and AAC playback

When a disc containing MP3, WMA or AAC files is inserted, all files on the disc are first checked. Once the file check is finished, the first MP3, WMA or AAC file is played. To make the file check finish more quickly, we recommend you do not write any files to the disc other than MP3, WMA or AAC files or create any unnecessary folders.

Discs that contain a mixture of music data and MP3, WMA or AAC format data cannot be played.

Extensions

If the file extensions .mp3, .wma and .m4a are used for files other than MP3, WMA and AAC files, they may be mistakenly recognized and played as MP3, WMA and AAC files. This may result in large amounts of interference and damage to the speakers.

Playback

- To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
- CD-R or CD-RW playback may not be possible in some instances, depending on the characteristics of the disc.
- There is a wide variety of freeware and other encoding software for MP3, WMA and AAC files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
- When files other than MP3, WMA or AAC files are recorded on a disc, it may take more time to recognize the disc and in some cases, playback may not be possible at all.
- Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the U.S.A. and other countries.
Discs and adapters that cannot be used
Do not use the following types of CDs. Also, do not use 3 in. (8 cm) CD adapters, Dual Discs or printable discs. Doing so may damage the CD player and/or the CD insert/eject function.

- Discs that have a diameter that is not 4.7 in. (12 cm).
- Low-quality or deformed discs.
- Discs with a transparent or translucent recording area.
- Discs that have tape, stickers or CD-R labels attached to them, or that have had the label peeled off.

Player precautions
Failure to follow the precautions below may result in damage to the discs or the player itself.
- Do not insert anything other than discs into the disc slot.
- Do not apply oil to the player.
- Store discs away from direct sunlight.
- Never try to disassemble any part of the player.
Listening to an iPod

Connecting an iPod enables you to enjoy music from the vehicle speakers.
Select “iPod” on the audio source selection screen.
When the iPod connected to the system includes iPod video, the system can only output the sound by selecting the browse screen.

Connecting an iPod
→P. 293

Audio control screen
Pressing the “AUDIO” button displays the audio control screen from any screens of the selected source.

1. Audio source selection screen appears
2. Displays cover art
3. Selecting the play mode (→P. 316)
4. Shuffle play (→P. 316)
5. Repeat play (→P. 316)
6. Pause
   Select ▶ to resume playback
7. Setting the sound (→P. 306)
### Selecting a play mode

1. Select “Browse” on the screen.
2. Select the desired play mode. Then select a song to begin using the selected play mode.

#### Shuffle play

Select 🔄 to change on/off.

#### Repeat play

Select 🔄 to change on/off.
About iPod

- “Made for iPod”, “Made for iPhone” and “Made for iPad” mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards.
- Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone or iPad may affect wireless performance.
- iPod, iPhone, iPod, iPod classic, iPod nano, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. Lightning is a trademark of Apple Inc.

iPod cover art
- Depending on the iPod and songs in the iPod, iPod cover art may be displayed.
- This function can be changed to on/off. (→P. 299)
- It may take time to display iPod cover art, and the iPod may not be operated while the cover art display is in process.
- Only iPod cover art that is saved in JPEG format can be displayed.

iPod functions
- When an iPod is connected and the audio source is changed to iPod mode, the iPod will resume play from the same point in which it was last used.
- Depending on the iPod that is connected to the system, certain functions may not be available. If a function is unavailable due to a malfunction (as opposed to a system specification), disconnecting the device and reconnecting it may resolve the problem.
- While connected to the system, the iPod cannot be operated with its own controls. It is necessary to use the controls of the vehicle’s multimedia system instead.
- When the battery level of an iPod is very low, the iPod may not operate. If so, charge the iPod before use.
- Compatible models (→P. 319)
5-16. Using an external device (Multimedia system)

iPod problems

To resolve most problems encountered when using your iPod, disconnect your iPod from the vehicle iPod connection and reset it. For instructions on how to reset your iPod, refer to your iPod Owner's Manual.

5-16. Using an external device (Multimedia system)

Compatible models
The following iPod®, iPod nano®, iPod classic®, iPod touch® and iPhone® devices can be used with this system.

Made for
• iPod touch (5th generation)
• iPod touch (4th generation)
• iPod touch (3rd generation)
• iPod touch (2nd generation)
• iPod touch (1st generation)
• iPod classic
• iPod with video
• iPod nano (7th generation)
• iPod nano (6th generation)
• iPod nano (5th generation)
• iPod nano (4th generation)
• iPod nano (3rd generation)
• iPod nano (2nd generation)
• iPod nano (1st generation)
• iPhone 5s
• iPhone 5c
• iPhone 5
• iPhone 4S
• iPhone 4
• iPhone 3GS
• iPhone 3G
• iPhone

Depending on differences between models or software versions etc. some models might be incompatible with this system.

CAUTION

While driving
Do not connect an iPod or operate the controls.

NOTICE

To prevent damage to the iPod or its terminals
• Do not leave the iPod in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the iPod.
• Do not push down on or apply unnecessary pressure to the iPod while it is connected.
• Do not insert foreign objects into the port.
Listening to a USB memory device

Connecting a USB memory device enables you to enjoy music from the vehicle speakers. Touch “USB” on the audio source selection screen.

Connecting a USB memory device
→P. 293

Audio control screen
Pressing the “AUDIO” button displays the audio control screen from any screens of the selected source.

1. Audio source selection screen appears
2. Displaying the folder list
3. Random playback (→P. 295)
4. Repeat play (→P. 295)
5. Pause
   Select to resume playback
6. Setting the sound (→P. 306)

Selecting a play mode
1. Select “Browse” on the screen.
2. Select the desired play mode. Then select a song to begin using the selected play mode.

n Displaying the now playing list
   Touch the cover art display.
USB memory functions
- Depending on the USB memory device that is connected to the system, the device itself may not be operable and certain functions may not be available. If the device is inoperable or a function is unavailable due to a malfunction (as opposed to a system specification), disconnecting the device and reconnecting it may resolve the problem.
- If the USB memory device still does not begin operation after being disconnected and reconnected, format the memory.

<td>This indicates that no MP3/WMA/AAC files are included on the USB memory device.</td>
</tr>
</tbody>
</table>

USB memory
- Compatible devices
  USB memory device that can be used for MP3, WMA and AAC playback.
- Compatible device formats
  The following device format can be used:
  - USB communication format: USB2.0 HS (Mbps) and FS (12 Mbps)
  - File system format: FAT16/32 (Windows)
  - Correspondence class: Mass storage class
    MP3, WMA and AAC files written to a device with any format other than those listed above may not play correctly, and their file names and folder names may not be displayed correctly.
  Items related to standards and limitations are as follows:
  - Maximum directory hierarchy: 8 levels
  - Maximum number of folders in a device: 3000 (including the root)
  - Maximum number of files in a device: 9999
  - Maximum number of files per folder: 255
- MP3, WMA and AAC files
  MP3 (MPEG Audio LAYER 3) is a standard audio compression format. Files can be compressed to approximately 1/10 of their original size using MP3 compression.
  WMA (Windows Media Audio) is a Microsoft audio compression format. This format compresses audio data to a size smaller than that of the MP3 format.
  AAC is short for Advanced Audio Coding and refers to an audio compression technology standard used with MPEG2 and MPEG4.
  MP3, WMA and AAC file and media/formats compatibility are limited.
MP3 file compatibility
- Compatible standards
  MP3 (MPEG1 AUDIO LAYER II, III, MPEG2 AUDIO LAYER II, III)
- Compatible sampling frequencies
  MPEG1 AUDIO LAYER II, III: 32, 44.1, 48 (kHz)
  MPEG2 AUDIO LAYER II, III: 16, 22.05, 24 (kHz)
- Compatible bit rates (compatible with VBR)
  MPEG1 AUDIO LAYER II, III: 32-320 (kbps)
  MPEG2 AUDIO LAYER II, III: 8-160 (kbps)
- Compatible channel modes: stereo, joint stereo, dual channel and monaural

WMA file compatibility
- Compatible standards
  WMA Ver. 7, 8, 9
- Compatible sampling frequencies
  HIGH PROFILE 32, 44.1, 48 (kHz)
- Compatible bit rates
  HIGH PROFILE 48-320 (kbps, VBR)

AAC file compatibility
- Compatible standards
  MPEG4/AAC-LC
- Compatible sampling frequencies
  11.025/12/16/22.05/24/32/44.1/48 (kHz)
- Compatible bit rates
  16-320 (kbps)
- Compatible channel modes: 1 ch and 2 ch

File names
The only files that can be recognized as MP3/WMA/AAC and played are those with the extension .mp3, .wma or .m4a.

ID3, WMA and AAC tags
ID3 tags can be added to MP3 files, making it possible to record the track title, artist name, etc.
The system is compatible with ID3 Ver. 1.0, 1.1, and Ver. 2.2, 2.3 ID3 tags. (The number of characters is based on ID3 Ver. 1.0 and 1.1.)
WMA tags can be added to WMA files, making it possible to record the track title and artist name in the same way as with ID3 tags.
AAC tags can be added to AAC files, making it possible to record the track title and artist name in the same way as with ID3 tags.
MP3, WMA and AAC playback

- When a device containing MP3, WMA and AAC files is connected, all files in the USB memory device are checked. Once the file check is finished, the first MP3, WMA and AAC file is played. To make the file check finish more quickly, we recommend that you do not include any files other than MP3, WMA and AAC files or create any unnecessary folders.
- When a USB memory device is connected and the audio source is changed to USB memory mode, the USB memory device will start playing the first file in the first folder. If the same device is removed and reconnected (and the contents have not been changed), the USB memory device will resume play from the same point in which it was last used.

Extensions

If the file extensions .mp3, .wma and .m4a are used for files other than MP3, WMA and AAC files, they will be skipped (not played).

Playback

- To play MP3 files with steady sound quality, we recommend a fixed bit rate of at least 128 kbps and a sampling frequency of 44.1 kHz.
- There is a wide variety of freeware and other encoding software for MP3, WMA and AAC files on the market, and depending on the status of the encoding and the file format, poor sound quality or noise at the start of playback may result. In some cases, playback may not be possible at all.
- Microsoft, Windows, and Windows Media are the registered trademarks of Microsoft Corporation in the U.S.A. and other countries.

**CAUTION**

**While driving**

Do not connect a USB memory device or operate the device controls.

**NOTICE**

**To prevent damage to the USB memory device or its terminals**

- Do not leave the USB memory device in the vehicle. The temperature inside the vehicle may become high, resulting in damage to the USB memory device.
- Do not push down on or apply unnecessary pressure to the USB memory device while it is connected.
- Do not insert foreign objects into the port.
### Using the AUX port

To use the AUX port, connect a portable player, press the “AUDIO” button, then select “AUX” to display the audio control screen.

### Connecting a portable audio player

→P. 293

- **Operating portable audio players connected to the multimedia system**
  The volume can be adjusted using the vehicle's audio controls. All other adjustments must be made on the portable audio player itself.

- **When using a portable audio player connected to the power outlet**
  Noise may occur during playback. Use the power source of the portable audio player.

<table>

<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **While driving**  
Do not connect a portable audio player or operate the device controls. |
Preparations to use wireless communication

The following can be performed using Bluetooth® wireless communication:

- A portable audio player can be operated and listened to via multimedia system
- Hands-free phone calls can be made via a cellular phone

In order to use wireless communication, register and connect a Bluetooth® device by performing the following procedures.

About Bluetooth®

The Bluetooth® word mark and logos are registered trademarks owned Bluetooth SIG, Inc. and any use of such marks by Fujitsu Ten Limited is under license. Other trademarks and trade names are those of their respective owners.

Certifications for the Bluetooth®

FCC ID: BABFT0049A
CAUTION

CAUTION: Radio Frequency Radiation Exposure
This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 20cm and more between the radiator and person's body in normal use position.

• Co-location: This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
• This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

IC: 2024B-FT0049A

• This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

CAUTION: Radio Frequency Radiation Exposure
This equipment complies with IC radiation exposure limits set forth for uncontrolled equipment and meets RSS-102 of the IC radio frequency (RF) Exposure rules.

This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE).

But it is desirable that it should be installed and operated with at least 20cm and more between the radiator and person’s body (excluding extremities: hands, wrists, feet and ankles).
### Device registration/connection flow

1. Register the Bluetooth® device to be used with multimedia system (→ P. 329, 330, 331)

2. Connect the Bluetooth® device to be used (→ P. 334)
   - To be used for audio
   - To be used for hands-free phone

3. Start Bluetooth® connection (→ P. 334)

4. Check connection status (→ P. 341)

5. Use Bluetooth® audio (→ P. 341)
Registering and connecting from the “Bluetooth® Setup” screen

To display the screen shown below, press the “SETUP” button and select “Bluetooth®” on the “Setup” screen.

① Select to connect the device to be used with multimedia system. (→P. 334)

② Select to register a Bluetooth® device to be used with multimedia system. (→P. 331)

③ Select to set detailed Bluetooth® system settings. (→P. 339)

④ Select to delete registered devices. (→P. 333)

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Corolla_TMMMS_TMMC_U (OM12J84U)
Registering a Bluetooth® phone for the first time

To use the hands-free system, it is necessary to register a Bluetooth® phone with the system.

Once the phone has been registered, it is possible to use the hands-free system.

For details about registering a Bluetooth® device (→P. 331)

1. Turn the Bluetooth® connection setting of your cellular phone on.
2. Press the " " button.
3. Select "OK" to register a phone.
4. Follow the steps in "How to registering a Bluetooth® device" from step 3. (→P. 331)
Registering a Bluetooth® device

Bluetooth® compatible phones (HFP) and portable audio players (AVP) can be registered simultaneously. You can register up to 5 Bluetooth® devices.

How to registering a Bluetooth® device

1. Display the "Bluetooth* Setup" screen. (P. 328)
2. Select "Add".
3. When this screen is displayed, search for the device name displayed on this screen on the screen of your Bluetooth® device.
   For details about operating the Bluetooth® device, see the manual that comes with it.
   To cancel the registration, select "Cancel".
4. Register the Bluetooth® device using your Bluetooth® device.
   A PIN-code is not required for SSP (Secure Simple Pairing) compatible Bluetooth® devices. Depending on the type of Bluetooth® device being connected, a message confirming registration may be displayed on the Bluetooth® device’s screen. Respond and operate the Bluetooth® device according to the confirmation message.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Check that this screen is displayed when registration is complete.

Select “OK” when the connection status changes from “Connecting...” to “Connected”.

If an error message is displayed, follow the guidance on the screen to try again.

Registration can be performed from screens other than the “Bluetooth* Setup” screen.

When registering from the “Bluetooth* Audio” screen

1. Display the “Bluetooth* Audio” screen. (→P. 303)
2. Select “Select Device”.
3. Follow the steps in “How to registering a Bluetooth® device” from step 2. (→P. 331)

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Deleting a Bluetooth® device

1. Display the “Bluetooth® Setup” screen. (→P. 328)
2. Select “Remove”.
3. Select the desired device.
4. A confirmation message will be displayed, select “Yes” to delete the device.
5. Check that a confirmation screen is displayed when the operation is complete.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Connecting a Bluetooth® device

Up to 5 Bluetooth® devices (Phones (HFP) and audio players (AVP)) can be registered.

If more than 1 Bluetooth® device has been registered, select which device to connect to.

1. Press the “SETUP” button.
2. Select “Bluetooth*”.
3. Select the device to be connected.
   - Supported profile icons will be displayed.
     1. Phone
     2. Audio player
   - Supported profile icons for currently connected devices will illuminate.
   - Dimmed icons can be selected to connect to the function directly.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
3-17. Connecting Bluetooth® (Multimedia system)

**Auto connection**

To turn auto connection mode on, set “Bluetooth* Power” to on. (→P. 339)

When you register a phone, auto connection will be activated. Always set it to this mode and leave the Bluetooth® phone in a place where a connection can be established.

When the engine switch is turned to ACCESSORY or ON (IGNITION ON) mode, the system will search for a nearby cellular phone you have registered.

Next, the system automatically connects with the most recent of the phones connected to in the past. Then, the connection result is displayed.

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

**Manual connection**

When auto connection has failed or “Bluetooth* Power” is turned off, you must connect the Bluetooth® device manually.

1. Follow the steps in “Connecting a Bluetooth® device” from step 1. (→P. 334)

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

**Connecting a Bluetooth® audio player**

1. Registering an additional device

   1. Select “Select Device” on the Bluetooth® audio control screen.
   2. For more information: →P. 331

2. Selecting a registered device

   1. Select “Select Device” on the Bluetooth® audio control screen.
   2. For more information: →P. 334
Reconnecting a Bluetooth® phone

If the system cannot connect due to poor signal strength with the engine switch in ACCESSORY or ON (IGNITION ON) mode, the system will automatically attempt to reconnect.

If the system is attempting to connect to a Bluetooth® phone and the Bluetooth® phone is turned off and then back on, the system will attempt to reconnect.
Displaying a Bluetooth® device details

You can confirm and change the registered device details.

Bluetooth® device registration status

1. Display the “Bluetooth* Setup” screen. (→P. 328)
2. Select the device.
3. Select “Device Info”.
4. Following screen is displayed:
   ① Device Name
   ② Change connection method (→P. 338)
   ③ Bluetooth® Address
   ④ Display your telephone number
      The number may not be displayed depending on the model of phone.
   ⑤ Compatibility profile of the device
   ⑥ Restore default settings

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
## Changing connection method

1. Select "Connect Audio Player from".
2. Select “Vehicle” or “Device”.

   "Vehicle": Connect the multimedia system to the portable audio player.
   "Device": Connect the portable audio player to the multimedia system.
5-17. Connecting Bluetooth® (Multimedia system) 339

**Detailed Bluetooth® system settings**

You can confirm and change the detailed Bluetooth® settings.

**How to check and change detailed Bluetooth® settings**

1. Display the “Bluetooth* Setup” screen. (→P. 328)
2. Select “System Settings”.
3. The following screen is displayed:

   1. Bluetooth* Power on/off
   
   You can change Bluetooth* function on/off

   2. Bluetooth* Name

   3. Change PIN-code (→P. 340)

   4. Bluetooth* Address

   5. Display Phone Status

   You can set the system to show the status confirmation display when connecting a telephone

   6. Display Audio Player Status

   You can set the system to show the status confirmation display when connecting an audio player

   7. Compatibility profile of the system

   8. Restore default settings

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
You can change the PIN-code that is used to register your Bluetooth® devices in the system.

1. Select "Bluetooth® PIN".
2. Input a PIN-code, and select "OK".

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Listening to Bluetooth® Audio

The Bluetooth® audio system enables the user to enjoy music played on a portable player from the vehicle speakers via wireless communication.

When a Bluetooth® device cannot be connected, check the connection status on the “Bluetooth® Audio” screen. If the device is not connected, either register or reconnect the device. (→ P. 334)

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Status display

You can check such indicators as signal strength and battery charge on the screen.

① Connection status
② Battery charge
**Playing Bluetooth® audio**

Select [ ] or [ ] to Play/Pause.

For details on “Bluetooth* Audio” screen operation methods, refer to Basic Audio Operations. (→P. 294)

For details on how to select a track or album, refer to selecting, fast-forwarding and reversing tracks/files/songs. (→P. 305)

*: Bluetooth is a registered trademark of Bluetooth SIG, Inc.
Using a Bluetooth® Phone

The hands-free system is a function that allows you to use your cellular phone without touching it.

This system supports Bluetooth®. Bluetooth® is a wireless data system that allows the cellular phone to wirelessly connect to the hands-free system and make/receive calls.

Before making a phone call, check the connection status, battery charge, call area and signal strength. (→P. 344)

If a Bluetooth® device cannot be connected, check the connection status on the phone screen. If the device is not connected, either register or reconnect it. (→P. 334)

Phone screen

To display the screen shown below, press the switch on the steering wheel or the button.

Several functions are available to operate on each screen that is displayed by selecting the 4 tabs.

1. Device name
2. Bluetooth® connection status
Telephone switch (→ P. 359)

Microphone

- Vehicles without moon roof
- Vehicles with moon roof

The vehicle’s built-in microphone is used when talking on the phone.
The person you are speaking to can be heard from the front speakers.

To use the hands-free system, you must register your Bluetooth® phone in the system. (→ P. 331)

Status display

You can check indicators such as signal strength and battery charge on the phone screen.

1. Connection status
2. Signal strength
3. Battery charge

Making a call

Once a Bluetooth® phone is registered, you can make a call using the following procedure:

**Dialing**

1. Display the phone screen. (→P. 343)
2. Select the “Dial Pad” tab and enter a phone number.
   - To delete the input phone number, select .
   - For the first digit, you can enter “+” by selecting “*” for a while.
3. Press the switch on the steering wheel or select .

**Dialing from the contacts list**

You can dial a number from the contact data imported from your cellular phone. The system has one contact for each registered phone. Up to 2500 contacts may be stored in each contact. (→P. 346)

1. Display the phone screen. (→P. 343)
2. Select “Contacts” tab.
3. Choose the desired contact to call from the list.
4. Choose the number and then press the switch on the steering wheel or select .

**When the contact is empty**

You can transfer the phone numbers in a Bluetooth® phone to the system.

Operation methods differ between PBAP (Phone Book Access Profile) compatible and PBAP incompatible Bluetooth® phones. If the cellular phone does not support either PBAP or OPP (Object Push Profile) service, you cannot transfer contacts.
1. Press the switch on the steering wheel. If the phonebook is empty, a message will be displayed.
   - For a PBAP compatible Bluetooth® phone and “Automatic Transfer” is off
2. Select the desired item.
   1. Select to transfer new contacts from a cellular phone, select “Always” and then enable “Automatic Transfer”.
   2. Select to transfer all the contacts from a connected cellular phone only once.
   3. Select to cancel transferring.
   - For PBAP incompatible but OPP compatible Bluetooth® phones
2. Select the desired item.
   1. Select to transfer the contacts from the connected cellular phone.
   2. Select to add a new contact manually.
   3. Select to cancel transferring.

- When “Transfer” is selected
3. Follow the steps in “Update contacts from phone” from step 2. (→P. 363)
- When “Add” is selected
3. Follow the steps in “Registering a new contact to the contacts list” from step 2. (→P. 365)
### Calling using favorites list

You can make a call using numbers registered in the contact.

1. Display the phone screen. (→P. 343)
2. Select “Favorites” tab.
3. Select the desired number to make a call.

### Dialing from call history

You can make a call using the call history, which has the 3 functions below.

- 🔥: calls which you missed
- 📞: calls which you received
- ✉️: calls which you made

1. Display the phone screen. (→P. 343)
2. Select “Call History” tab.
3. Select 🔥 or the desired entry from the list.

   ▶️ When 🔥 is selected
   
4. Check that the “Call” screen is displayed.
   
   ▶️ When the desired contact is selected

4. Select the desired number.
5. Check that the “Call” screen is displayed.

### Call history list

- If you make a call to or receive a call from a number registered in the contact, the name is displayed in the call history.
- If you make multiple calls to the same number, only the last call made is displayed in the call history.

### International calls

You may not be able to make international calls, depending on the mobile phone in use.
Receiving a call

When a call is received, the following screen is displayed together with a sound.

To answer the phone

Press the switch on the steering wheel or select .

To refuse a call

Press the switch on the steering wheel or select .

To adjust the incoming call volume

Turn the “PWR/VOL” knob. You can also adjust the volume using the steering switches.

International calls

Received international calls may not be displayed correctly depending on the cellular phone in use.
**Speaking on the phone**

The following screen is displayed when speaking on the phone.

![Call screen](image)

- **To adjust the call volume**
  
  Select “-” or “+”. You can also adjust the volume using the steering switches or the volume knob.

- **To prevent the other party from hearing your voice**
  
  Select “Mute”.

- **Inputting tones**
  
  When using phone services such as an answering service or a bank, you can store phone numbers and code numbers in the contact.

  1. Select “0-9”.
  2. Input the number.

- **Release Tones**
  
  “Release Tones” appear when a continuous tone signal(s) containing a (w) is registered in the contact list.

  1. Select “Release Tones”.

COROLLA_TMMMS_TMMC_U (OM12J84U)
Release Tones

- A continuous tone signal is a character string that consists of numbers and the characters p or w. (e.g., 056133w0123p#1+)
- When the “p” pause tone is used, the tone data up until the next pause tone will be automatically sent after 2 seconds have elapsed. When the “w” pause tone is used, the tone data up until the next pause tone will be automatically sent after a user operation is performed.
- Release tones can be used when automated operation of a phone based service such as an answering machine or bank phone service is desired. A phone number with continuous tone signals can be registered in the contact list.
- Tone data after a “w” pause tone can be operated on voice command during a call.
To transfer a call
Select “Handset Mode” to on from a hands-free call to a cellular phone call.
Select “Handset Mode” to off from a cellular phone call to a hands-free call.

Transmit volume setting
1. Select “Transmit Volume”.
2. Select the desired level for the transmit volume.
3. Select “OK”.

To hang up
Press the switch on the steering wheel or select .

Call waiting
When a call is interrupted by a third party while talking, an incoming call message will be displayed.

To talk with the other party:
• Press the switch on the steering wheel.
• Select .

To refuse the call:
• Press the switch on the steering wheel.
• Select .

Every time you press the switch on the steering wheel or select during call waiting, you will be switched to the other party.
Transferring calls
- If you transfer from the cellular phone to hands-free, the hands-free screen will be displayed, and you can operate the system using the screen.
- Transfer method and operation may vary according to the cellular phone used.
- For operation of the cellular phone in use, see the phone’s manual.

Call waiting operation
Call waiting operation may differ depending on your phone company and cellular phone.
Bluetooth® phone message function

Received messages can be forwarded from the connected Bluetooth® phone, enabling checking and replying using the multimedia system.
Depending on the type of Bluetooth® phone connected, received messages may not be transferred to the message inbox.
If the phone does not support the message function, this function cannot be used.

Displaying message inbox screen

1. Press the " " button.
2. Select  .

Receiving a message

When an e-mail/SMS/MMS is received, the incoming message screen pops up with sound and is ready to be operated on the screen.

1. Select to check the message.
2. Select to refuse the message.
3. Select to call the message sender.
Receiving a message

- Depending on the cellular phone used for receiving messages, or its registration status with the navigation system, some information may not be displayed.

- The pop up screen is separately available for incoming e-mail and SMS/MMS messages under the following conditions:
  - E-mail:
    - "Incoming E-mail Display" is set to "Full Screen". (→P. 370)
    - "E-mail Notification Popup" is set to on. (→P. 370)
  - SMS/MMS:
    - "Incoming SMS/MMS Display" is set to "Full screen". (→P. 370)
    - "SMS/MMS Notification Popup" is set to on. (→P. 370)
Checking the messages

1. Display the message inbox screen. (→ P. 354)
2. Select the desired message from the list.
3. Check that the message is displayed.

   ① E-mails: Select “Mark Unread” or “Mark Read” to mark mail unread or read on the message inbox screen.
   
   This function is available when “Update Read Status on Phone” is set to on (→ P. 370)

4. Select to make a call to the sender.
5. Select to have messages read out. To cancel this function, select “Stop”.
6. Select to display the previous or next message.
7. Select to reply the message.
Check the messages
- Depending on the type of Bluetooth® phone being connected, it may be necessary to perform additional steps on the phone.
- Messages are displayed in the appropriate connected Bluetooth® phone's registered mail address folder.
- Select the tab of the desired folder to be displayed.
- Only received messages on the connected Bluetooth® phone can be displayed.
- The text of the message is not displayed while driving.
- When “Automatic Message Readout” is set to on, messages will be automatically read out. (→P. 370)
- Turn the “PWR/VOL” knob, or use the volume switch on the steering wheel to adjust the message read out volume.
- The message read out function is available even while driving.

Replying to a message
1. Display the message inbox screen. (→P. 354)
2. Select the desired message from the list.
3. Select “Quick Message”.
4. Select the desired message.
5. Select “Send”.

Editing quick reply message
1. Select “Quick Message”.
2. Select corresponding to the desired message to edit.
3. Select “OK” when editing is completed.
Calling the message sender

Calls can be made to an e-mail/SMS/MMS message sender's phone number.

1. Display the message inbox screen. (→P. 354)
2. Select the desired message.
3. Select 📞.
4. Check that the “Call” screen is displayed.

Calling from a number within a message

Calls can be made to a number identified in a message's text area.

1. Display the message inbox screen. (→P. 354)
2. Select the desired message.
3. Select the text area.
4. Select 📞 corresponding to the desired number.
5. Check that the “Call” screen is displayed.

Calling from the incoming message screen

→P. 352
Using the steering wheel switches

The steering wheel switches can be used to operate a connected cellular phone.

Operating a telephone using the steering wheel switches

Steering wheel switches on the right hand side

1. Off hook switch
   • Make a call
   • Receive a call
   • Display “Phone” screen
2. On hook switch
   • End a call
   • Refuse a call

Steering wheel switches on the left hand side

1. Volume switch
   • Increase/Decrease the volume
   • Press and hold: Continuously increase/decrease the volume
2. Back switch
   • Return to the previous screen
3. Cursor switch
   • Select a list/tab
4. Enter switch
   • Select an item
Bluetooth® phone settings

You can adjust the hands-free system to your desired settings.

“Phone/Message Settings” screen

To display the screen shown below, press the “SETUP” button, and select “Phone” on the “Setup” screen.

1. Set the phone connection (→ P. 331)
2. Setting the sound (→ P. 361)
3. Contact/Call History Settings (→ P. 362)
4. Set the message settings (→ P. 370)
5. Set the phone display (→ P. 371)
Display the “Phone/Message Settings” screen. (→P. 360)
Select “Sound Settings” on the “Phone/Message Settings” screen.

1. Set the desired ringtone.
2. Adjust the ringtone volume.
3. Adjust the message readout volume.
4. Set the desired incoming SMS/MMS tone.
5. Adjust the incoming SMS/MMS tone volume.
6. Set the incoming e-mail tone.
7. Adjust the incoming e-mail tone volume.
8. Adjust the default volume of the other party’s voice.

To return to the default volume settings
Select “Default”, and then “Yes”.
Contact/Call History Settings

The contact can be transferred from a Bluetooth® phone to the system. The contact also can be added, edited and deleted.

The call history can be deleted and contact and favorites can be changed.

1. Display the “Phone/Message Settings” screen. (→P. 360)
2. Select “Contact/Call History Settings”.
3. Select the desired item to be set.
   ① For PBAP compatible Bluetooth® phones, select to set “Automatic Transfer” on/off. When set to on, the phone’s contact data and history are automatically transferred.
   ② Select to update contacts from the connected phone. (→P. 363)
   ③ Select to sort contacts by the first name or last name field.
   ④ Select to add contacts to the favorites list. (→P. 367)
   ⑤ Select to delete contacts from the favorites list. (→P. 369)
   ⑥ Select to display contact images.
   ⑦ Select to clear contacts from the call history.*
   ⑧ Select to add new contacts to the contact list.* (→P. 365)
   ⑨ Select to edit contacts in the contact list.* (→P. 366)
   ⑩ Select to delete contacts from the contact list.* (→P. 367)
  ⑪ Select to reset all setup items.

*: For PBAP compatible Bluetooth® phones only, this function is available when “Automatic Transfer” is set to off. (→P. 362)
For PBAP Compatible Bluetooth® Phones

1. Select “Update Contacts from Phone”.
2. Check that a confirmation screen is displayed when the operation is complete.

This operation may be unnecessary depending on the type of cellular phone.

Depending on the type of cellular phone, OBEX authentication may be required when transferring contact data. Enter “1234” into the Bluetooth® phone.

If another Bluetooth® device is connected when transferring contact data, depending on the phone, the connected Bluetooth® device may need to be disconnected.

Depending on the type of Bluetooth® phone being connected, it may be necessary to perform additional steps on the phone.
For PBAP Incompatible but OPP compatible Bluetooth® Phones

1. Select “Update Contacts from Phone”.
2. Transfer the contact data to the system using a Bluetooth® phone.
   This operation may be unnecessary depending on the type of cellular phone.
   Depending on the type of cellular phone, OBEX authentication may be required when transferring contact data. Enter “1234” into the Bluetooth® phone.
   To cancel this function, select “Cancel”.
3. Select “Done” when it appears on the screen.
4. Check that a confirmation screen is displayed when the operation is complete.

Updating the contacts in a different way (From the “Call History” screen)

For PBAP compatible Bluetooth® phones, this function is available when “Automatic Transfer” is set to off. (→ P. 362)

1. Display the phone screen. (→ P. 343)
2. Select the “Call History” tab and select a contact not yet registered in the contact list.
3. Select “Update Contact”.
4. Select the desired contact.
5. Select a phone type for the phone number.
Registering a new contact to the contact list

New contact data can be registered. Up to 4 numbers per person can be registered. For PBAP compatible Bluetooth® phones, this function is available when “Automatic Transfer” is set to off. (→P. 362)

1 Select “New Contact”.
2 Enter the name and select “OK”.
3 Enter the phone number and select “OK”.
4 Select the phone type for the phone number.
5 To add another number to this contact, select “Yes”.

Registering a new contact in a different way (From the “Call History” screen)

1 Display the phone screen. (→P. 343)
2 Select the “Call History” tab and select a contact not yet registered in the contact list.
3 Select “Add to Contacts”.
4 Follow the steps in “Registering a new contact to the contacts list” from step 3. (→P. 365)
Editing the contact data

For PBAP compatible Bluetooth® phones, this function is available when "Automatic Transfer" is set to off. (→P. 362)

1. Select “Edit Contact”.
2. Select the desired contact.
3. Select corresponding to the desired name or number.
   ▶ For editing the name
   4. Follow the steps in “Registering a new contact to the contacts list” from step 3. (→P. 365)
   ▶ For editing the number
   4. Follow the steps in “Registering a new contact to the contacts list” from step 4. (→P. 365)

Editing the contacts in a different way (From the “Contact Details” screen)

1. Display the phone screen. (→P. 343)
2. Select the “Contacts”, “Call History” tab or the “Favorites” tab and select the desired contact.
3. Select “Edit Contact”.
   “E-mail Addresses”: Select to display all registered e-mail addresses for the contact.
4. Follow the steps in “Editing the contact data” from step 4. (→P. 366)
Deleting the contact data

For PBAP compatible Bluetooth® phones, this function is available when "Automatic Transfer" is set to off. (→ P. 362)

1. Select “Delete Contacts”.
2. Select the desired contact and select “Delete”.
3. Select “Yes” when the confirmation screen appears.

Deleting the contact in a different way (From the “Contact Details” screen)

1. Display the phone screen. (→ P. 343)
2. Select the “Contacts”, “Call History” tab or the “Favorites” tab and select the desired contact.
3. Select “Edit Contact”.
4. Select “Yes” when the confirmation screen appears.

Favorites list setting

Up to 15 contacts (maximum of 4 numbers per contact) can be registered in the favorites list.

Registering the contacts in the favorites list

1. Select “Add Favorite”.
2. Select the desired contact to add to the favorites list.

Dimmed contacts are already stored as a favorite.
3. Check that a confirmation screen is displayed when the operation is complete.
When 15 contacts have already been registered to the favorites list

1. When 15 contacts have already been registered to the favorites list, a registered contact needs to be replaced. Select “Yes” when the confirmation screen appears to replace a contact.

2. Select the contact to be replaced.

3. Check that a confirmation screen is displayed when the operation is complete.

Registering contacts in the favorites list in a different way (from the “Contacts” screen)

1. Display the phone screen. (⇒P. 343)

2. Select the “Contacts” tab.

3. Select ☆ at the beginning of the desired contact list name to be registered in the favorites list.
   When selected, ☆ is changed to ★, and the contact is registered in the favorites list.

Registering contacts in the favorites list in a different way (from the “Contact Details” screen)

1. Display the phone screen. (⇒P. 343)

2. Select the “Contacts” tab or the “Call History” tab and select the desired contact.

3. Select “Add Favorite”.

4. Check that a confirmation screen is displayed when the operation is complete.
Deleting the contacts in the favorites list

1. Select “Remove Favorite”.
2. Select the desired contacts and select “Remove”.
3. Select “Yes” when the confirmation screen appears.
4. Check that a confirmation screen is displayed when the operation is complete.

Deleting contacts in the favorites list in a different way (from the “Contacts” screen)

1. Display the phone screen. (→ P. 343)
2. Select the “Contacts” tab.
3. Select ★ at the beginning of the contact list name to be deleted from the favorites list.
   When selected, ★ is changed to ☆, and the data is deleted from the list.

Deleting contacts in the favorites list in a different way (from the “Contact Details” screen)

1. Display the phone screen. (→ P. 343)
2. Select the “Contacts”, “Call History” tab or the “Favorites” tab and select the desired contact to delete.
3. Select “Remove Favorite”.
4. Select “Yes” when the confirmation screen appears.
5. Check that a confirmation screen is displayed when the operation is complete.
Display the "Phone/Message Settings" screen. (P. 360)
Select "Messaging Settings".
Select the desired item to be set.

1. Set automatic message transfer on/off.
2. Set automatic message readout on/off.
3. Set the SMS/MMS notification popup on/off.
4. Set the e-mail notification popup on/off.
5. Set adding the vehicle signature to outgoing messages on/off.
6. Set updating message read status on phone on/off.
7. Change the incoming SMS/MMS display.
   "Full Screen": When an SMS/MMS message is received, the incoming SMS/MMS display screen is displayed and can be operated on the screen.
   "Drop-Down": When an SMS/MMS message is received, a message is displayed on the upper side of the screen.
8. Change the incoming e-mail display.
   "Full Screen": When an e-mail is received, the incoming e-mail display screen is displayed and can be operated on the screen.
   "Drop-Down": When an e-mail is received, a message is displayed on the upper side of the screen.
9. Set display of messaging account names on the inbox tab on/off.
   When set to on, messaging account names used on the cellular phone will be displayed.

To return to the default volume settings
Select "Default", and then "Yes".
Displaying the “Messaging Settings” screen in a different way

1. Display the phone screen. (→P. 343)
2. Select 📞.
3. Select “Settings”.

**Phone Display Settings**

1. Display the “Phone/Message Settings” screen. (→P. 360)
2. Select “Phone Display Settings”.
3. Select the desired item to be set.

1. Change the incoming call display.
   “Full Screen”: When a call is received, the hands-free screen is displayed and can be operated on the screen.
   “Drop-Down”: A message is displayed on the upper side of the screen.

2. Set display of the contact/history transfer completion message on/off.
If there is a problem with the hands-free system or a Bluetooth® device, first check the table below.

<table>
<thead>
<tr>
<th>What to do if... (Troubleshooting)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The hands-free system or Bluetooth® device does not work.</td>

When using the phonebook

| Phonebook data cannot be transferred manually/automatically. |
| The profile version of the connected cellular phone may not be compatible with transferring phonebook data. |
| For a list of specific devices which operation has been confirmed on this system, check with your Toyota dealer or the following website: http://www.toyota.com/entune.html |

| Automatic phonebook transfer function on this system is set to off. |
| Set automatic phonebook transfer function on this system to on. (P. 362) |

| Passcode has not been entered on the cellular phone. |
| Enter the passcode on the cellular phone if requested (default passcode: 1234). |

| Transfer operation on the cellular phone has not completed. |
| Complete transfer operation on the cellular phone (approve transfer operation on the phone). |

| Phonebook data cannot be edited. |

| Automatic phonebook transfer function on this system is set to on. |
| Set automatic phonebook transfer function on this system to off. (P. 362) |

When using the Bluetooth® message function

| Messages cannot be viewed. |
| Message transfer is not enabled on the cellular phone. |
| Enable message transfer on the cellular phone (approve message transfer on the phone). |

| Automatic transfer function on this system is set to off. |
| Set automatic transfer function on this system to on. (P. 370) |

| New message notifications are not displayed. |
| Notification of SMS/MMS/E-mail reception on this system is set to off. |
| Set notification of SMS/MMS/E-mail reception on this system to on. (P. 370) |

| Automatic message transfer function is not enabled on the cellular phone. |
| Enable automatic message transfer function on the cellular phone. |
In other situations

Even though all conceivable measures have been taken, the symptom status does not change.

The cellular phone is not close enough to this system.
→ Bring the cellular phone closer to this system.

The cellular phone is the most likely cause of the symptom.
→ Turn the cellular phone off, remove and reinstall the battery pack, and then restart the cellular phone.
→ Enable the cellular phone’s Bluetooth® connection.
→ Stop the cellular phone’s security software and close all applications.
→ Before using an application installed on the cellular phone, carefully check its source and how its operation might affect this system.
When using the Bluetooth® audio system

- In the following conditions, the system may not function.
  - If the portable audio player is turned off
  - If the portable audio player is not connected
  - If the portable audio player’s battery is low
- There may be a delay if a cellular phone connection is made during Bluetooth® audio play.
- Depending on the type of portable audio player that is connected to the system, operation may differ slightly and certain functions may not be available.

When using the hands-free system

- The multimedia system is muted when making a call.
- If both parties speak at the same time, it may be difficult to hear.
- If the received call volume is overly loud, an echo may be heard.
- If the Bluetooth® phone is too close to the system, quality of the sound may deteriorate and connection status may deteriorate.
- In the following circumstances, it may be difficult to hear the other party:
  - When driving on unpaved roads
  - When driving at high speeds
  - If a roof or window is open
  - If the air conditioning is blowing directly on the microphone
  - If there is interference from the network of the cellular phone

Conditions under which the system will not operate

- If using a cellular phone that does not support Bluetooth®
- If the cellular phone is turned off
- If you are outside of cellular phone service coverage
- If the cellular phone is not connected
- If the cellular phone’s battery is low
- When outgoing calls are controlled, due to heavy traffic on telephone lines, etc.
- When the cellular phone itself cannot be used
- When transferring contact data from the cellular phone
Bluetooth® antenna
The antenna is built into the display.
If the portable audio player is behind the seat or in the glove box or console box, or is touching or covered by metal objects, the connection status may deteriorate.
If the cellular phone is behind the seat or in the console box, or touching or covered by metal objects, the connection status may deteriorate.

Battery charge/signal status
- This display may not correspond exactly with the portable audio player or cellular phone itself.
- This system does not have a charging function.
- The portable audio player or cellular phone battery will be depleted quickly when the device is connected to Bluetooth®.

When using the Bluetooth® audio and hands-free system at the same time
The following problems may occur.
- The Bluetooth® audio connection may be interrupted.
- Noise may be heard during Bluetooth® audio playback.

About the contact in this system
The following data is stored for every registered cellular phone. When another phone is connecting, you cannot read the registered data.
- Contact data
- Call history
- Favorite
- Message
When removing a Bluetooth® phone from the system, the above-mentioned data is also deleted.
Compatible models

The Bluetooth® audio system supports portable audio players with the following specifications.

- **Bluetooth® specifications:**
  - Ver. 2.0, or higher (Recommended: Ver. 3.0+EDR or higher)

- **Profiles:**
  - A2DP (Advanced Audio Distribution Profile) Ver. 1.0, or higher
    (Recommended: Ver. 1.2 or higher)
    This is a profile to transmit stereo audio or high quality sound to the multimedia system.
  - AVRCP (Audio/Video Remote Control Profile) Ver. 1.0 or higher
    (Recommended: Ver. 1.4 or higher)
    This is a profile to allow remote control the A/V equipment.

However, please note that some functions may be limited depending on the type of portable audio player connected.

The hands-free system supports cellular phones with the following specifications.

- **Bluetooth® specification:**
  - Ver. 2.0 or higher (Recommended: Ver. 3.0+EDR or higher)

- **Profiles:**
  - HFP (Hands Free Profile) Ver. 1.0 or higher (Recommended: Ver. 1.6 or higher)
    This is a profile to allow hands-free phone calls using a cellular phone or head set. It has outgoing and incoming call functions.
  - OPP (Object Push Profile) Ver. 1.1 or higher (Recommended: Ver. 1.2)
    This is a profile to transfer contact data. When a Bluetooth® compatible cellular phone has both PBAP and OPP, OPP cannot be used.
  - PBAP (Phone Book Access Profile) Ver. 1.0 or higher (Recommended: Ver. 1.1)
    This is a profile to transfer contact data.
  - MAP (Message Access Profile) Ver. 1.0 or higher
    This is a profile to using phone message.

If the cellular phone does not support HFP, you cannot register it with the hands-free system. OPP, PBAP or MAP services must be selected individually.
Certification

NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CAUTION:
Radio Frequency Radiation Exposure
This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 20 cm and more between the radiator and person's body in normal use position.

Co-location:
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Reconnecting the portable audio player
If the portable audio player is disconnected due to poor reception when the engine switch is in ACCESSORY or IGNITION ON mode, the system automatically reconnects the portable audio player.

If you have switched off the portable audio player yourself, follow the instructions below to reconnect:
- Select the portable audio player again
- Enter the portable audio player

When you sell your car
Be sure to delete your personal data. (→P. 298)
CAUTION

While driving
Do not use the portable audio player, cellular phone or connect a device to the Bluetooth® system.

Caution regarding interference with electronic devices
- Your audio unit is fitted with Bluetooth® antennas. People with implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should maintain a reasonable distance between themselves and the Bluetooth® antennas. The radio waves may affect the operation of such devices.
- Before using Bluetooth® devices, users of any electrical medical device other than implantable cardiac pacemakers, cardiac resynchronization therapy-pacemakers or implantable cardioverter defibrillators should consult the manufacturer of the device for information about its operation under the influence of radio waves. Radio waves could have unexpected effects on the operation of such medical devices.

NOTICE

When leaving the vehicle
Do not leave your portable audio player or cellular phone in the vehicle. The inside of the vehicle may become hot, causing damage to the portable audio player or cellular phone.
Voice command system

The voice command system enables the hands-free system to be operated using voice commands. Operations of the voice command system can be performed by selecting the menu corresponding to each function on the screen. Even if any menu is selected, commands displayed on all menus can be operated.

Using the voice command system

1. Press the talk switch.

   ① Select to train voice recognition.
   ② Select to start the voice recognition tutorial.

2. Select “OK” and say the desired command.
   On the list screen, you can select the desired command.
   To cancel the voice command system, press and hold the talk switch.

Microphone
→ P. 344

When using the microphone
   ① It is unnecessary to speak directly into the microphone when giving a command.
   ② When “Voice Prompt Interrupt” set to on, it is not necessary to wait for the confirmation beep before speaking a command. (→ P. 302)
   ③ Voice commands may not be recognized if:
In the following conditions, the system may not recognize the command properly and using voice commands may not be possible:

- The command is incorrect or unclear. Note that certain words, accents or speech patterns may be difficult for the system to recognize.
- There is excessive background noise, such as wind noise.

**Casual speech recognition**

Due to natural language speech recognition technology, this system enables recognition of a command when spoken naturally. However, the system cannot recognize every variation of each command.

In some situations, it is possible to omit the command for the procedure and directly state the desired operation.

Not all voice commands are displayed in the short cut menu.

This function is available in English, Spanish and French.

**Expression examples for each function**

<table>
<thead>
<tr>
<th>Command</th>
<th>Expression examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;Call (name) (type)&quot;</td>
<td>Get me (Robert Brown). I need to call (Robert Brown) at (Work) right away.</td>
</tr>
<tr>
<td>&quot;Dial (number)&quot;</td>
<td>Please dial the number (3334445555). Ring (3334445555).</td>
</tr>
</tbody>
</table>
Command list

Some recognizable voice commands and their actions are shown below as examples.

- **Basic**

<table>
<thead>
<tr>
<th>Command</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Help”</td>
<td>Prompts voice guidance to offer examples of commands or operation methods</td>
</tr>
<tr>
<td>“Go Back”</td>
<td>Returns to the previous screen</td>
</tr>
</tbody>
</table>

- **Phone**

<table>
<thead>
<tr>
<th>Command</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Redial”</td>
<td>Places a call to the phone number of the latest outgoing call</td>
</tr>
<tr>
<td>“Call Back”</td>
<td>Places a call to the phone number of latest incoming call</td>
</tr>
<tr>
<td>“Show Recent Calls”</td>
<td>Displays the call history screen</td>
</tr>
<tr>
<td>“Dial (phone number)”</td>
<td>Places a call to the said phone number</td>
</tr>
<tr>
<td>“Call (contacts) (phonetypes)”</td>
<td>Place a call to the said phone type of the contact from the phone book</td>
</tr>
</tbody>
</table>

**Mobile Assistant**

The Mobile Assistant feature will activate Apple’s Siri® Eyes Free mode via the steering wheel switches. To operate the Mobile Assistant, a compatible cellular phone must be registered and connected to this system via Bluetooth®. (→P. 331)

1. Press and hold the button on the steering wheel until you hear the beeps.
The Mobile Assistant can be used only when the following screen is displayed.

To cancel the Mobile Assistant, select “Cancel”, or press and hold the \( \text{ cancellation button } \) on the steering wheel.

To restart the Mobile Assistant for additional commands, press the \( \text{ restart button } \) on the steering wheel.

- Mobile Assistant can only be restarted after the system responds to a voice command.
- After some phone and music commands, the Mobile Assistant feature will automatically end to complete the requested action.

### Adjusting the Mobile Assistant volume

The volume of the Mobile Assistant can be adjusted using the “PWR/VOL” knob or steering wheel volume switches. The Mobile Assistant and phone call volumes are synchronized.

### Notes about Mobile Assistant

- The available features and functions may vary based on the iOS version installed on the connected device.
- Some Siri features are limited in Eyes Free mode. If you attempt to use an unavailable function, Siri will inform you that the function is not available.
- If Siri is not enabled on the cellular phone connected via Bluetooth®, an error message will be displayed on the screen.
- While a phone call is active, the Mobile Assistant cannot be used.
- If using the navigation feature of the cellular phone, ensure the active audio source is Bluetooth® audio or iPod in order to hear turn by turn direction prompts.

Manual air conditioning system

Air conditioning controls

- **Heater**

  To adjust the temperature setting, turn the dial clockwise to increase the temperature.

- **Air conditioning system**

  To adjust the temperature setting, turn the dial clockwise (warm) or counterclockwise (cool).

  If **A/C** is not pressed, the system will blow ambient temperature air or heated air.

- **Fan speed setting**

  To adjust the fan speed, turn the dial clockwise (increase) or counterclockwise (decrease).

  Turning the dial to “0” turns off the fan.

- **Change the airflow mode**

  To select the air outlets, set the dial to the desired position.

*: If equipped
387

</tbody>
</table>
Air outlets

- **Location of air outlets**
  The air outlets and air volume changes according to the selected airflow mode.
  ➡️: Some models

- **Adjusting the position of and opening and closing the air outlets**
  ▶️ Front center outlets
  Direct air flow to the left or right, up or down.
Front side outlets
Direct air flow to the left or right, up or down.

1. Close the vent
   Sliding the knob to the most outer position.
2. Open the vent
For quick cooling (vehicles with air conditioning system)

Turn the dial to the “MAX A/C” position and select the recirculated air mode.

Fogging up of the windows

- Vehicles with the button: The windows will easily fog up when the humidity in the vehicle is high. Turning on will dehumidify the air from the outlets and defog the windshield effectively.

- Vehicles with the button: If you turn off, the windows may fog up more easily.

- The windows may fog up if the recirculated air mode is used.

Outside/recirculated air mode

When driving on dusty roads such as tunnels or in heavy traffic, set the outside/recirculated air mode button to the recirculated air mode. This is effective in preventing outside air from entering the vehicle interior. During cooling operation, setting the recirculated air mode will also cool the vehicle interior effectively.

When the outside temperature is low (vehicles with the button)

The air conditioning system may not operate even when is pressed.

Ventilation and air conditioning odors

- To let fresh air in, set the air conditioning system to the outside air mode.

- During use, various odors from inside and outside the vehicle may enter into and accumulate in the air conditioning system. This may then cause odor to be emitted from the vents.

- To reduce potential odors from occurring: It is recommended that the air conditioning system be set to outside air mode prior to turning the vehicle off.

Air conditioning filter

→ P. 467
To prevent the windshield from fogging up

Do not set the air outlet selector dial to [ ] during cool air operation in extremely humid weather. The difference between the temperature of the outside air and that of the windshield can cause the outer surface of the windshield to fog up, blocking your vision.

Do not place anything on the instrument panel which may cover the air outlets. Otherwise, air flow may be obstructed, preventing the windshield defoggers from defogging.

To prevent burns (vehicles with outside rear view mirror defoggers)

Do not touch the rear view mirror surfaces when the outside rear view mirror defoggers are on.

To prevent battery discharge

Do not leave the air conditioning system on longer than necessary when the engine is stopped.
**Automatic air conditioning system**

Air outlets and fan speed are automatically adjusted according to the temperature setting.

**Air conditioning controls**

Adjusting the temperature setting

To adjust the temperature setting, turn \( \bigcirc \) clockwise to increase the temperature and turn \( \bigcirc \) counterclockwise to decrease the temperature.

*: If equipped
Fan speed setting

Press “>” on  to increase the fan speed.

Press “<” on  to decrease the fan speed.

Change the airflow mode

To change the airflow, press “<” or “>” on .

The air outlets used are switched each time either side of the button is pressed.

Other functions

1. Switching between outside air and recirculated air modes
(→P. 387)
1. Defogging the windshield (→P. 387)
1. Defogging the rear window and outside rear view mirrors
(→P. 387)
Using automatic mode

1. Press \[ \text{[AUTO]} \].

The dehumidification function begins to operate. Air outlets and fan speed are automatically adjusted according to the temperature setting.

2. Adjust the temperature setting.

Automatic mode indicator

If the fan speed setting or air flow modes are operated, the automatic mode indicator goes off. However, automatic mode for functions other than that operated is maintained.

Other functions

Switching between outside air and recirculated air modes

Press \[ \text{[Outside/Recirculated]} \].

The mode switches between outside air mode (indicator off) and recirculated air mode (indicator on) each time \[ \text{[Outside/Recirculated]} \] is pressed.

Defogging the windshield

Defoggers are used to defog the windshield and front side windows.

Press \[ \text{[Defog]} \].

The dehumidification function operates and fan speed increases. Set the outside/recirculated air mode button to the outside air mode if the recirculated air mode is used. (It may switch automatically.)

To defog the windshield and the side windows early, turn the air flow and temperature up.

To return to the previous mode, press \[ \text{[Defog]} \] again when the windshield is defogged.
Defogging the rear window and outside rear view mirrors

Defoggers are used to defog the rear window, and to remove raindrops, dew and frost from the outside rear view mirrors.

Press \[ \text{defogger button} \].

The defoggers will automatically turn off after a period of time.
Air outlets

Location of air outlets

The air outlets and air volume changes according to the selected airflow mode.

: Some models

Adjusting the position of and opening and closing the air outlets

► Front center outlets
Direct air flow to the left or right, up or down.

► Front side outlets
Direct air flow to the left or right, up or down.
6-1. Using the air conditioning system and defogger

**Operation of the air conditioning system in Eco drive mode (if equipped)**

In Eco drive mode, the air conditioning system is controlled as follows to prioritize fuel efficiency:

- Engine speed controlled to restrict heating/cooling capacity.
- Outside/recirculated air mode may automatically switch depending on the temperature setting or the inside temperature.
- Fan speed restricted when automatic mode is selected

To improve air conditioning performance, perform the following operations:

- Adjust the fan speed.
- Turn off Eco drive mode. (→P. 179)

**Using automatic mode**

Fan speed is adjusted automatically according to the temperature setting and the ambient conditions.

Therefore, the fan may stop for a while until warm or cool air is ready to flow immediately after the button is pressed.
6-1. Using the air conditioning system and defogger

- **Fogging up of the windows**
  - The windows will easily fog up when the humidity in the vehicle is high.
  - Turning **on** will dehumidify the air from the outlets and defog the windshield effectively.
  - If you turn **off**, the windows may fog up more easily.
  - The windows may fog up if the recirculated air mode is used.

- **Outside/recirculated air mode**
  - When driving on dusty roads such as tunnels or in heavy traffic, set the outside/recirculated air mode button to recirculated air mode. This is effective in preventing outside air from entering the vehicle interior. During cooling operation, setting the recirculated air mode will also cool the vehicle interior effectively.
  - Outside/recirculated air mode may automatically switch depending on the temperature setting or the inside temperature.
When the outside temperature exceeds 75°F (24°C) and the air conditioning system is on

- In order to reduce the air conditioning power consumption, the air conditioning system may switch to recirculated air mode automatically. This may also reduce fuel consumption.
  - Vehicles without a smart key system
    - Recirculated air mode is selected as a default mode when the engine switch is turned to the “ON” position.
  - Vehicles with a smart key system
    - Recirculated air mode is selected as a default mode when the engine switch is turned to IGNITION ON mode.
    - It is possible to switch to outside air mode at any time by pressing [ ].

When the outside temperature is low

The dehumidification function may not operate even when [ ] is pressed.

Ventilation and air conditioning odors

- To let fresh air in, set the air conditioning system to the outside air mode.
- During use, various odors from inside and outside the vehicle may enter into and accumulate in the air conditioning system. This may then cause odor to be emitted from the vents.
- To reduce potential odors from occurring:
  - It is recommended that the air conditioning system be set to outside air mode prior to turning the vehicle off.
  - The start timing of the blower may be delayed for a short period of time immediately after the air conditioning system is started in automatic mode.

Air conditioning filter

→P. 467

Customization that can be configured at Toyota dealer

Settings (e.g. air conditioning setting) can be changed.
(Customizable features →P. 576)
To prevent the windshield from fogging up

- Do not use during cool air operation in extremely humid weather. The difference between the temperature of the outside air and that of the windshield can cause the outer surface of the windshield to fog up, blocking your vision.
- Do not place anything on the instrument panel which may cover the air outlets. Otherwise, air flow may be obstructed, preventing the windshield defoggers from defogging.

To prevent burns

Do not touch the rear view mirror surfaces when the outside rear view mirror defoggers are on.

To prevent battery discharge

Do not leave the air conditioning system on longer than necessary when the engine is stopped.
### Interior lights list

1. Front interior light/personal lights (→ P. 402)
2. Rear interior light (→ P. 403)
3. Engine switch light (vehicles with a smart key system)
**Front interior light/personal lights**

- **Front interior light**
  - Type A
  - Type B

  ![Diagram of front interior light](CTH02AK002)

  1. Off
  2. Door position
  3. On

- **Personal lights**
  - Type A
  - Type B

  ![Diagram of personal lights](CTH02AK004)

  On/off

  ![Diagram of personal lights](CTH02AK005)

  1. On
  2. Off

When a light is on due to its door link switch, the light will not turn off even if the lens or switch is pressed.
6-2. Using the interior lights

**Rear interior light**

1. On
2. Door position
3. Off

- **Illuminated entry system**
  - Vehicles without a smart key system
    When the interior light switch is in the door position, the interior light automatically turns on/off according to the engine switch position, whether the doors are locked/unlocked and whether the doors are open/closed.
  - Vehicles with a smart key system
    When the interior light switch is in the door position, the interior light and engine switch light automatically turn on/off according to engine switch mode, the presence of the electronic key, whether the doors are locked/unlocked and whether the doors are open/closed.

- **To prevent battery discharge**
  The following lights will go off automatically after 20 minutes:
  - Front interior light/personal lights
  - Rear interior light
  - Trunk light

- **Customization**
  Setting (e.g. the time elapsed before lights turn off) can be changed.
  (Customizable features: → P. 576)
List of storage features

1. Glove box  (→P. 405)
2. Bottle holders  (→P. 406)
3. Console box  (→P. 405)
4. Cup holders  (→P. 407)

CAUTION

Items that should not be left in the storage spaces
Do not leave glasses, lighters or spray cans in the storage spaces, as this may cause the following when cabin temperature becomes high:

- Glasses may be deformed by heat or cracked if they come into contact with other stored items.
- Lighters or spray cans may explode. If they come into contact with other stored items, the lighter may catch fire or the spray can may release gas, causing a fire hazard.

When driving or when the storage compartments are not in use
Keep the lids closed.
In the event of sudden braking or sudden swerving, an accident may occur due to an occupant being struck by an open lid or the items stored inside.
### Glove box
Pull up the lever to open the glove box.

### Console box
- Console box
  Lift the lid while pulling up the knob on the right side.

- Upper level box
  Lift the lid while pulling up the knob on the left side.
Bottle holders

Front

Rear

When using the holder as a bottle holder

- When storing a bottle, close the cap.
- The bottle may not be stored depending on its size or shape.

CAUTION

- Items unsuitable for the bottle holder
  Do not place anything other than a bottle in the bottle holders. Other items may be thrown out of the holders in the event of an accident or sudden braking and cause injury.

NOTICE

- Items that should not be stowed in the bottle holders
  Put the cap on before stowing a bottle. Do not place open bottles in the bottle holders, or glass or paper cups containing liquid. The contents may spill and glass cups may break.
Cup holders

Front

Rear

- With console box
- With armrest (if equipped)

Pull the lid to open. Pull the armrest down.
6-3. Using the storage features

- **Adjusting the size of the cup holder (front)**
  1. Remove the cup holder insert.

- **Removing the cup holder insert (front)**
  The cup holder insert may be removed for cleaning.

### CAUTION

- **Items unsuitable for the cup holders**
  Do not place anything other than cups or aluminum cans in the cup holders. Other items may be thrown out of the holders in the event of an accident or sudden braking, causing injury. If possible, cover hot drinks to prevent burns.
Other interior features

Sun visors

1. To set the visor in the forward position, flip it down.
2. To set the visor in the side position, flip down, unhook, and swing it to the side.

Vanity mirrors

Slide the cover.

Clock

The clock can be adjusted.

1. Adjusts the hours
2. Adjusts the minutes
3. Rounds to the nearest hour*

*: e.g. 1:00 to 1:29 → 1:00
   1:30 to 1:59 → 2:00
Outside temperature display

The temperature display shows temperatures within the range of -40°F (-40°C) to 122°F (50°C).

- Type A
- Type B
- Type C
- Type D

The outside temperature is displayed when
- Vehicles without a smart key system
  The engine switch is in the “ON” position.
- Vehicles with a smart key system
  The engine switch is in IGNITION ON mode.

Display
In the following situations, the correct outside temperature may not be displayed, or the display may take longer than normal to change.
- When the vehicle is stopped, or moving at low speeds (less than 9 mph [15 km/h]).
- When the outside temperature has changed suddenly (at the entrance/exit of a garage, tunnel, etc.)

When “--"F” is displayed
The system may be malfunctioning. Take your vehicle to your Toyota dealer.
Power outlet

Please use as a power supply for electronic goods that use less than 12 VDC/10 A (power consumption of 120 W).

Open the lid.

The power outlet can be used when
- Vehicles without a smart key system
  The engine switch is in the “ACC” or “ON” position.
- Vehicles with a smart key system
  The engine switch is in ACCESSORY or IGNITION ON mode.

NOTICE

- To avoid damaging the power outlet, close the power outlet lid when the power outlet is not in use. Foreign objects or liquids that enter the power outlet may cause a short circuit.
- To prevent battery discharge, do not use the power outlet longer than necessary when the engine is off.
**Assist grips**

An assist grip installed on the ceiling can be used to support your body while sitting on the seat.

---

⚠️ **CAUTION**

Do not use the assist grip when getting in or out of the vehicle or rising from your seat.

---

⚠️ **NOTICE**

To prevent damage to the assist grip, do not put a heavy load on the assist grip.
Compass

The compass on the inside rear view mirror indicates the direction in which the vehicle is heading.

Operation

To turn the compass on or off, press and hold “AUTO” for 3 seconds.

Displays and directions

<table>
<thead>
<tr>
<th>Display</th>
<th>Direction</th>

</tbody>
</table>

*: If equipped
The direction display deviates from the true direction determined by the earth's magnetic field. The amount of deviation varies according to the geographic position of the vehicle.

If you cross over a map boundary shown in illustration, the compass will deviate.
To obtain higher precision or perfect calibration, refer to the following.

**Deviation calibration**

1. Stop the vehicle.
2. Press and hold “AUTO” for 6 seconds.
   A number (1 to 15) appears on the compass display.

3. Press the switch and referring to the map above, select the number of the zone where you are.
   If the direction is displayed several seconds after adjustment, the calibration is complete.
Circling calibration

1. Stop the vehicle in a place where it is safe to drive in a circle.

2. Press and hold “AUTO” for 9 seconds.
   C appears on the compass display.

3. Drive the vehicle at 5 mph (8 km/h) or less in a circle until a direction is displayed.
   If there is not enough space to drive in a circle, drive around the block until the direction is displayed.
Conditions unfavorable to correct operation
The compass may not show the correct direction in the following conditions:
- The vehicle is stopped immediately after turning.
- The vehicle is on an inclined surface.
- The vehicle is in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields (underground car park/parking lot, under a steel tower, between buildings, roof car park/parking lot, near an intersection, near a large vehicle, etc.).
- The vehicle has become magnetized.
  (There is a magnet or metal object near the inside rear view mirror.)
- The battery has been disconnected.
- A door is open.

CAUTION

While driving the vehicle
Do not adjust the display. Adjust the display only when the vehicle is stopped.

When doing the circling calibration
Secure a wide space, and watch out for people and vehicles in the neighborhood. Do not violate any local traffic rules while performing circling calibration.

NOTICE

To avoid compass malfunctions
Do not place magnets or any metal objects near the inside rear view mirror. Doing this may cause the compass sensor to malfunction.

To ensure normal operation of the compass
- Do not perform circling calibration of the compass in a place where the earth’s magnetic field is subject to interference by artificial magnetic fields.
- During calibration, do not operate electric systems (moon roof, power windows, etc.) as they may interfere with the calibration.
Seat heaters

Press the switch.

1. High temperature
2. Low temperature

The indicator light comes on when the switch is on.

- The seat heaters can be used when
  - Vehicles without a smart key system
    The engine switch is in the “ON” position.
  - Vehicles with a smart key system
    The engine switch is in IGNITION ON mode.

- When not in use
  Put the switch in the neutral position. The indicator will turn off.

*: If equipped
**CAUTION**

**Burns**
- Use caution when seating the following persons in a seat with the seat heater on to avoid the possibility of burns:
  - Babies, small children, the elderly, the sick and the physically challenged
  - Persons with sensitive skin
  - Persons who are fatigued
  - Persons who have taken alcohol or drugs that induce sleep (sleeping drugs, cold remedies, etc.)
- Do not cover the seat with anything when using the seat heater. Using the seat heater with a blanket or cushion increases the temperature of the seat and may lead to overheating.
- Do not use seat heater more than necessary. Doing so may cause minor burns or overheating.

**NOTICE**

**To prevent seat heater damage**
- Do not put heavy objects that have an uneven surface on the seat and do not stick sharp objects (needles, nails, etc.) into the seat.

**To prevent battery discharge**
- Turn the seat heaters off when the engine is not running.

Cleaning and protecting the vehicle exterior

Perform the following to protect the vehicle and maintain it in prime condition:

- Working from top to bottom, liberally apply water to the vehicle body, wheel wells and underside of the vehicle to remove any dirt and dust.
- Wash the vehicle body using a sponge or soft cloth, such as a chamois.
- For hard-to-remove marks, use car wash soap and rinse thoroughly with water.
- Wipe away any water.
- Wax the vehicle when the waterproof coating deteriorates.
- If water does not bead on a clean surface, apply wax when the vehicle body is cool.

Automatic car washes

- Fold the mirrors before washing the vehicle. Start washing from the front of the vehicle. Make sure to extend the mirrors before driving.
- Brushes used in automatic car washes may scratch the vehicle surface and harm your vehicle's paint.
- Vehicles with rear spoiler: In certain automatic car washes, the rear spoiler may interfere with machine operation. This may prevent the vehicle from being cleaned properly or result in damage to the rear spoiler.

High pressure car washes

- Do not allow the nozzles of the car wash to come within close proximity of the windows.
- Before using the car wash, check that the fuel filler door on your vehicle is closed properly.
When using a car wash (vehicles with a smart key system)
If the door handle becomes wet while the electronic key is within the effective range, the door may lock and unlock repeatedly. In that case, follow the following correction procedures to wash the vehicle:

- Place the key in a position 6 ft. (2 m) or more separate from the vehicle while the vehicle is being washed. (Take care to ensure that the key is not stolen.)
- Set the electronic key to battery-saving mode to disable the smart key system. (→P. 118)

Aluminum wheels (if equipped)
- Remove any dirt immediately by using a neutral detergent. Do not use hard brushes or abrasive cleaners. Do not use strong or harsh chemical cleaners.
  Use the same mild detergent and wax as used on the paint.
- Do not use detergent on the wheels when they are hot, for example after driving for long distance in the hot weather.
- Wash detergent from the wheels immediately after use.

Bumpers
Do not scrub with abrasive cleaners.

CAUTION

When washing the vehicle
Do not apply water to the inside of the engine compartment. Doing so may cause the electrical components etc. to catch fire.

Precautions regarding the exhaust pipe
Exhaust gasses cause the exhaust pipe to become quite hot.
When washing the vehicle, be careful not to touch the pipe until it has cooled sufficiently, as touching a hot exhaust pipe can cause burns.
NOTICE

To prevent paint deterioration and corrosion on the body and components (aluminum wheels etc.)

Wash the vehicle immediately in the following cases:

- After driving near the sea coast
- After driving on salted roads
- If coal tar or tree sap is present on the paint surface
- If dead insects, insect droppings or bird droppings are present on the paint surface
- After driving in an area contaminated with soot, oily smoke, mine dust, iron powder or chemical substances
- If the vehicle becomes heavily soiled with dust or mud
- If liquids such as benzene and gasoline are spilled on the paint surface

If the paint is chipped or scratched, have it repaired immediately.

To prevent the wheels from corroding, remove any dirt and store in a place with low humidity when storing the wheels.

Cleaning the exterior lights

Wash carefully. Do not use organic substances or scrub with a hard brush. This may damage the surfaces of the lights.

Do not apply wax to the surfaces of the lights. Wax may cause damage to the lenses.

To prevent damage to the windshield wiper arms

When lifting the wiper arms away from the windshield, pull the driver side wiper arm upward first, and then the passenger side. When returning the wipers to their original position, do so from the passenger side first.

When using a high pressure car wash

Do not bring the nozzle tip close to boots (rubber or resin manufactured cover), connectors or the following parts. The parts may be damaged if they come into contact with high-pressure water.

- Traction related parts
- Steering parts
- Suspension parts
- Brake parts
Cleaning and protecting the vehicle interior

The following procedures will help protect your vehicle’s interior and keep it in top condition:

Protecting the vehicle interior

Remove dirt and dust using a vacuum cleaner. Wipe dirty surfaces with a cloth dampened with lukewarm water.

Cleaning the synthetic leather areas

1. Remove loose dirt using a vacuum cleaner.
1. Apply a mild soap solution to the synthetic leather using a sponge or soft cloth.
1. Allow the solution to soak in for a few minutes. Remove the dirt and wipe off the solution with a clean, damp cloth.
Shampooing the carpets
There are several commercial foaming-type cleaners available. Use a sponge or brush to apply the foam. Rub in overlapping circles. Do not use water. Wipe dirty surfaces and let them dry. Excellent results are obtained by keeping the carpet as dry as possible.

Seat belts
Clean with mild soap and lukewarm water using a cloth or sponge. Also check the belts periodically for excessive wear, fraying or cuts.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>

Water in the vehicle
\[\text{Do not splash or spill liquid in the vehicle.}
\[\text{Doing so may cause electrical components etc. to malfunction or catch fire.}
\[\text{Do not get any of the SRS components or wiring in the vehicle interior wet. (→P. 35)}
\[\text{An electrical malfunction may cause the airbags to deploy or not function properly, resulting in death or serious injury.}

Cleaning the interior (especially instrument panel)
Do not use polish wax or polish cleaner. The instrument panel may reflect off the windshield, obstructing the driver's view and leading to an accident, resulting in death or serious injury.
**NOTICE**

### Cleaning detergents
- Do not use the following types of detergent, as they may discolor the vehicle interior or cause streaks or damage to painted surfaces:
  - Non-seat portions: Organic substances such as benzene or gasoline, alkaline or acidic solutions, dye, and bleach
  - Seats: Alkaline or acidic solutions, such as thinner, benzene, and alcohol
- Do not use polish wax or polish cleaner. The instrument panel's or other interior part's painted surface may be damaged.

### Preventing damage to leather surfaces
Observe the following precautions to avoid damage to and deterioration of leather surfaces:
- Remove any dust or dirt from leather surfaces immediately.
- Do not expose the vehicle to direct sunlight for extended periods of time. Park the vehicle in the shade, especially during summer.
- Do not place items made of vinyl, plastic, or containing wax on the upholstery, as they may stick to the leather surface if the vehicle interior heats up significantly.

### Water on the floor
Do not wash the vehicle floor with water. Vehicle systems such as the audio system may be damaged if water comes into contact with electrical components such as the audio system above or under the floor of the vehicle. Water may also cause the body to rust.

### Cleaning the inside of the rear window
- Do not use glass cleaner to clean the rear window, as this may cause damage to the rear window defogger heater wires or antenna. Use a cloth dampened with lukewarm water to gently wipe the window clean. Wipe the window in strokes running parallel to the heater wires or antenna.
- Be careful not to scratch or damage the heater wires or antenna.
7-2. Maintenance

Maintenance requirements

To ensure safe and economical driving, day-to-day care and regular maintenance are essential. It is the owner’s responsibility to perform regular checks. Toyota recommends the following maintenance:

General maintenance

General maintenance should be performed on a daily basis. This can be done by yourself or by a Toyota dealer.

Scheduled maintenance

Scheduled maintenance should be performed at specified intervals according to the maintenance schedule.

For details about maintenance items and schedules, refer to the “Scheduled Maintenance Guide” or “Owner’s Manual Supplement”.

Do-it-yourself maintenance

You can perform some maintenance procedures by yourself. Please be aware that do-it-yourself maintenance may affect warranty coverage.

The use of Toyota Repair Manuals is recommended.

For details about warranty coverage, refer to the separate “Owner’s Warranty Information Booklet” or “Owner’s Manual Supplement”.

Repair and replacement

- It is recommended that genuine Toyota parts be used for repairs to ensure performance of each system. If non-Toyota parts are used in replacement or if a repair shop other than a Toyota dealer performs repairs, confirm the warranty coverage.

Resetting the reminder light (vehicles with a drive monitor display) or the message (vehicles with a multi-information display) indicating maintenance is required (U.S.A. only)

- After the required maintenance is performed according to the maintenance schedule, please reset the reminder light (vehicles with a drive monitor display) or the message (vehicles with a multi-information display).
- To reset the reminder light (vehicles with a drive monitor display) or the message (vehicles with a multi-information display), follow the procedure described below:

1. Vehicles without a smart key system: Turn the engine switch to the "LOCK" position with the trip meter A reading shown. (→ P. 77, 82)
   - Vehicles with a smart key system: Turn the engine switch off with the trip meter A reading shown. (→ P. 77, 82)

2. Vehicles without a smart key system:
   - While pressing the “DISP” switch*1 (→ P. 77) or display change button*2 (→ P. 82), turn the engine switch to the "ON" position (do not start the engine because reset mode will be canceled).
   - Vehicles with a smart key system:
     - While pressing the “DISP” switch*1 (→ P. 77) or display change button*2 (→ P. 82), turn the engine switch to the IGNITION ON mode (do not start the engine because otherwise the reset mode will be canceled).

*1: Vehicles with a drive monitor display
*2: Vehicles with a multi-information display

- Continue to press and hold the button until the trip meter displays "000000".

Allow inspection and repairs to be performed by a Toyota dealer

- Toyota technicians are well-trained specialists and are kept up to date with the latest service information. They are well informed about the operations of all systems on your vehicle.
- Keep a copy of the repair order. It proves that the maintenance that has been performed is under warranty coverage. If any problem should arise while your vehicle is under warranty, your Toyota dealer will promptly take care of it.
**CAUTION**

- **If your vehicle is not properly maintained**
  Improper maintenance could result in serious damage to the vehicle and possible death or serious injury.

- **Handling of the battery**
  1. Engine exhaust, some of its constituents, and a wide variety of automobile components contain or emit chemicals known to the State of California to cause cancer and birth defects and other reproductive harm. Work in a well ventilated area.
  1. Oils, fuels and fluids contained in vehicles as well as waste produced by component wear contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Avoid exposure and wash any affected area immediately.
  1. Battery posts, terminals and related accessories contain lead and lead compounds which are known to cause brain damage. Wash your hands after handling. (→P. 450)
General maintenance

Listed below are the general maintenance items that should be performed at the intervals specified in the “Owner’s Warranty Information Booklet” or “Owner’s Manual Supplement/Scheduled Maintenance Guide”. It is recommended that any problem you notice should be brought to the attention of your Toyota dealer or qualified service shop for advice.

</tbody>
</table>

### CAUTION

If the engine is running

Turn the engine off and ensure that there is adequate ventilation before performing maintenance checks.
Emission inspection and maintenance (I/M) programs

Some states have vehicle emission inspection programs which include OBD (On Board Diagnostics) checks. The OBD system monitors the operation of the emission control system.

If the malfunction indicator lamp comes on

The OBD system determines that a problem exists somewhere in the emission control system. Your vehicle may not pass the I/M test and may need to be repaired. Contact your Toyota dealer to service the vehicle.

Your vehicle may not pass the I/M test in the following situations:

1. When the battery is disconnected or discharged
   Readiness codes that are set during ordinary driving are erased. Also, depending on your driving habits, the readiness codes may not be completely set.

2. When the fuel tank cap is loose
   The malfunction indicator lamp comes on indicating a temporary malfunction and your vehicle may not pass the I/M test.

When the malfunction indicator lamp still remains on after several driving trips

The error code in the OBD system will not be cleared unless the vehicle is driven 40 or more times.

If your vehicle does not pass the I/M test

Contact your Toyota dealer to prepare the vehicle for re-testing.
# Do-it-yourself service precautions

If you perform maintenance by yourself, be sure to follow the correct procedure as given in these sections.

<table>
<thead>
<tr>
<th>Items</th>
<th>Parts and tools</th>
</tr>
</thead>
</table>
| Battery condition (→P. 450) | • Warm water  
• Baking soda  
• Grease  
• Conventional wrench  
(for terminal clamp bolts) |
| Brake fluid level (→P. 448) | • FMVSS No.116 DOT 3 or SAE J1703 brake fluid  
• Rag or paper towel  
• Funnel (used only for adding brake fluid) |
| Engine coolant level (→P. 446) | • “Toyota Super Long Life Coolant” or a similar high quality ethylene glycol-based non-silicate, non-amine, non-nitrite and non-borate coolant with long-life hybrid organic acid technology  
For the U.S.A.: “Toyota Super Long Life Coolant” is pre-mixed with 50% coolant and 50% deionized water.  
For Canada: “Toyota Super Long Life Coolant” is pre-mixed with 55% coolant and 45% deionized water.  
• Funnel (used only for adding engine coolant) |
| Engine oil level (→P. 442) | • “Toyota Genuine Motor Oil” or equivalent  
• Rag or paper towel  
• Funnel (used only for adding engine oil) |
| Fuses (→P. 472) | • Fuse with same amperage rating as original |
Light bulbs (→P. 475)
• Bulb with same number and wattage rating as original
• Phillips-head screwdriver
• Flathead screwdriver
• Wrench

Radiator/condenser (→P. 448)

Tire inflation pressure (→P. 462)
• Tire pressure gauge
• Compressed air source

Washer fluid (→P. 453)
• Water or washer fluid containing antifreeze (for winter use)
• Funnel (used only for adding water or washer fluid)

CAUTION

The engine compartment contains many mechanisms and fluids that may move suddenly, become hot, or become electrically energized. To avoid death or serious injury, observe the following precautions.

When working on the engine compartment

1. Keep hands, clothing and tools away from the moving fan and engine drive belt.

1. Be careful not to touch the engine, radiator, exhaust manifold, etc. right after driving as they may be hot. Oil and other fluids may also be hot.

1. Do not leave anything that may burn easily, such as paper and rags, in the engine compartment.

1. Do not smoke, cause sparks or expose an open flame to fuel or the battery. Fuel and battery fumes are flammable.

1. Be extremely cautious when working on the battery. It contains poisonous and corrosive sulfuric acid.
When working near the electric cooling fan or radiator grille
Vehicles without a smart key system: Be sure the engine switch is off. With the engine switch in the “ON” position, the electric cooling fan may automatically start to run if the air conditioning is on and/or the coolant temperature is high. (→P. 448)
Vehicles with a smart key system: Be sure the engine switch is off. With the engine switch in IGNITION ON mode, the electric cooling fan may automatically start to run if the air conditioning is on and/or the coolant temperature is high. (→P. 448)

Safety glasses
Wear safety glasses to prevent flying or falling material, fluid spray, etc. from getting in your eyes.

If you remove the air cleaner filter
Driving with the air cleaner filter removed may cause excessive engine wear due to dirt in the air.
Hood

Release the lock from the inside of the vehicle to open the hood.

1. Pull the hood lock release lever. The hood will pop up slightly.

2. Pull up the auxiliary catch lever and lift the hood.

3. Hold the hood open by inserting the support rod into the slot.
Pre-driving check
Check that the hood is fully closed and locked. If the hood is not locked properly, it may open while the vehicle is in motion and cause an accident, which may result in death or serious injury.

After installing the support rod into the slot
Make sure the rod supports the hood securely preventing it from falling down onto your head or body.

When closing the hood
Be sure to return the support rod to its clip before closing the hood. Closing the hood with the support rod not clipped could cause the hood to bend.
**Positioning a floor jack**

When using a floor jack, follow the instructions in the manual provided with the jack and perform the operation safely.

When raising your vehicle with a floor jack, position the jack correctly. Improper placement may damage your vehicle or cause injury.

### Front

![Front Diagram]

### Rear

1. Take out the jack attachment.

![Rear Diagram]

---

**COROLLA_TMMMS_TMMC_U (OM12J84U)**
2 Set the jack attachment on the floor jack and position the jack.

3 Before raising the vehicle, make sure that the floor jack is positioned so that the protrusion on the jack attachment fits securely into the hole of the jack point.

⚠️ CAUTION

Make sure to set the protrusion on the jack attachment properly into the hole of the jack point. Raising the vehicle with an improperly positioned floor jack will damage the vehicle and may cause the vehicle to fall off the floor jack.
7-3. Do-it-yourself maintenance

Engine compartment

1. Washer fluid tank (→P. 453)
2. Engine oil filler cap (→P. 444)
3. Engine oil level dipstick (→P. 442)
4. Brake fluid reservoir (→P. 448)
5. Battery (→P. 450)
6. Fuse box (→P. 472)
7. Electric cooling fan
8. Engine coolant reservoir (→P. 446)
9. Condenser (→P. 448)
10. Radiator (→P. 448)
With the engine at operating temperature and turned off, check the oil level on the dipstick.

**Checking the engine oil**

1. Park the vehicle on level ground. After warming up the engine and turning it off, wait more than 5 minutes for the oil to drain back into the bottom of the engine.

2. Holding a rag under the end, pull the dipstick out.

3. Wipe the dipstick clean.

4. Flat dipstick: Reinsert the dipstick fully.

4. Non-flat dipstick: Reinsert the non-flat dipstick fully with its protruding areas (1 in the illustration) pointing towards the engine.
5. Holding a rag under the end, pull the dipstick out and check the oil level.
   1. Low
   2. Normal
   3. Excessive

- Flat dipstick
- Non-flat dipstick

The shape of the dipstick may differ depending on the type of vehicle or engine.

6. Wipe the dipstick and reinsert it fully.
444  7-3. Do-it-yourself maintenance

Adding engine oil

If the oil level is below or near the low level mark, add engine oil of the same type as that already in the engine.

Make sure to check the oil type and prepare the items needed before adding oil.

<table>
<thead>
<tr>
<th>Engine oil selection</th>
<th>→P. 553</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil quantity (Low → Full)</td>
<td>1.6 qt. (1.5 L, 1.3 Imp. qt.)</td>
</tr>
<tr>
<td>Items</td>
<td>Clean funnel</td>
</tr>
</tbody>
</table>

1. Remove the oil filler cap by turning it counterclockwise.
2. Add engine oil slowly, checking the dipstick.
3. Install the oil filler cap by turning it clockwise.
## Engine oil consumption
A certain amount of engine oil will be consumed while driving. In the following situations, oil consumption may increase, and engine oil may need to be refilled in between oil maintenance intervals.

- When the engine is new, for example directly after purchasing the vehicle or after replacing the engine
- If low quality oil or oil of an inappropriate viscosity is used
- When driving at high engine speeds or with a heavy load, or when driving while accelerating or decelerating frequently
- When leaving the engine idling for a long time, or when driving frequently through heavy traffic

### CAUTION

#### Used engine oil
- Used engine oil contains potentially harmful contaminants which may cause skin disorders such as inflammation and skin cancer, so care should be taken to avoid prolonged and repeated contact. To remove used engine oil from your skin, wash thoroughly with soap and water.
- Dispose of used oil and filters only in a safe and acceptable manner. Do not dispose of used oil and filters in household trash, in sewers or onto the ground.
- Call your Toyota dealer, service station or auto parts store for information concerning recycling or disposal.
- Do not leave used engine oil within the reach of children.

### NOTICE

#### To prevent serious engine damage
Check the oil level on a regular basis.

#### When replacing the engine oil
- Be careful not to spill engine oil on the vehicle components.
- Avoid overfilling, or the engine could be damaged.
- Check the oil level on the dipstick every time you refill the vehicle.
- Be sure the engine oil filler cap is properly tightened.
Engine coolant

The coolant level is satisfactory if it is between the “F” and “L” lines on the reservoir when the engine is cold.

1. Reservoir cap
2. “F” line
3. “L” line

If the level is on or below the “L” line, add coolant up to the “F” line. (→P. 543)

Coolant selection

Only use “Toyota Super Long Life Coolant” or a similar high quality ethylene glycol based non-silicate, non-amine, non-nitrite, and non-borate coolant with long-life hybrid organic acid technology.

For the U.S.A.: “Toyota Super Long Life Coolant” is a mixture of 50% coolant and 50% deionized water. (Minimum temperature: -31°F [-35°C])

For Canada: “Toyota Super Long Life Coolant” is a mixture of 55% coolant and 45% deionized water. (Minimum temperature: -44°F [-42°C])

For more details about engine coolant, contact your Toyota dealer.

If the coolant level drops within a short time of replenishing

Visually check the radiator, hoses, engine coolant reservoir caps, drain cock and water pump.

If you cannot find a leak, have your Toyota dealer test the cap and check for leaks in the cooling system.
**CAUTION**

- **When the engine is hot**
  Do not remove the engine coolant reservoir cap or the radiator cap. (→P. 545)
  The cooling system may be under pressure and may spray hot coolant if the cap is removed, causing serious injuries, such as burns.

**NOTICE**

- **When adding coolant**
  Coolant is neither plain water nor straight antifreeze. The correct mixture of water and antifreeze must be used to provide proper lubrication, corrosion protection and cooling. Be sure to read the antifreeze or coolant label.

- **If you spill coolant**
  Be sure to wash it off with water to prevent it from damaging parts or paint.
Radiator and condenser

Check the radiator and condenser and clear away any foreign objects. If either of the above parts is extremely dirty or you are not sure of their condition, have your vehicle inspected by your Toyota dealer.

CAUTION

When the engine is hot
Do not touch the radiator or condenser as they may be hot and cause serious injuries, such as burns.

Brake fluid

Checking fluid level
The brake fluid level should be between the "MAX" and "MIN" lines on the tank.

Adding fluid
Make sure to check the fluid type and prepare the necessary item.

<table>
<thead>
<tr>
<th>Fluid type</th>
<th>FMVSS No.116 DOT 3 or SAE J1703 brake fluid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Item</td>
<td>Clean funnel</td>

</tbody>
</table>

1. Slide and lift up the rubber strip to partially remove it as shown.
Disconnect the claws and remove the service cover.

Remove the reservoir cap.

Add brake fluid slowly while checking the fluid level.

**Brake fluid can absorb moisture from the air**
Excess moisture in the brake fluid can cause a dangerous loss of braking efficiency. Use only newly opened brake fluid.

**CAUTION**

**When filling the reservoir**
Take care as brake fluid can harm your hands and eyes and damage painted surfaces.
If fluid gets on your hands or in your eyes, flush the affected area with clean water immediately.
If you still experience discomfort, see a doctor.

**NOTICE**

**If the fluid level is low or high**
It is normal for the brake fluid level to go down slightly as the brake pads wear out or when the fluid level in the accumulator is high.
However, if the reservoir needs frequent refilling, there may be a serious problem. Have the vehicle inspected at your Toyota dealer as soon as possible.
Battery

Check the battery as follows.

Battery exterior

Make sure that the battery terminals are not corroded and that there are no loose connections, cracks, or loose clamps.

1. Terminals
2. Hold-down clamp

Before recharging

When recharging, the battery produces hydrogen gas which is flammable and explosive. Therefore, observe the following before recharging:

- If recharging with the battery installed on the vehicle, be sure to disconnect the ground cable.
- Make sure the power switch on the charger is off when connecting and disconnecting the charger cables to the battery.

After recharging/reconnecting the battery (vehicles with a smart key system)

- Unlocking the doors using the smart key system may not be possible immediately after reconnecting the battery. If this happens, use the wireless remote control or the mechanical key to lock/unlock the doors.
- Start the engine with the engine switch in ACCESSORY mode. The engine may not start with the engine switch turned off. However, the engine will operate normally from the second attempt.
- The engine switch mode is recorded by the vehicle. If the battery is reconnected, the vehicle will return the engine switch mode to the status it was in before the battery was disconnected. Make sure to turn off the engine before disconnect the battery. Take extra care when connecting the battery if the engine switch mode prior to discharge is unknown.

If the system will not start even after multiple attempts, contact your Toyota dealer.
CAUTION

Chemicals in the battery
Batteries contain poisonous and corrosive sulfuric acid and may produce hydrogen gas which is flammable and explosive. To reduce the risk of death or serious injury, take the following precautions while working on or near the battery:

- Do not cause sparks by touching the battery terminals with tools.
- Do not smoke or light a match near the battery.
- Avoid contact with eyes, skin and clothes.
- Never inhale or swallow electrolyte.
- Wear protective safety glasses when working near the battery.
- Keep children away from the battery.

Where to safely charge the battery
Always charge the battery in an open area. Do not charge the battery in a garage or closed room where there is insufficient ventilation.

How to recharge the battery
Only perform a slow charge (5 A or less). The battery may explode if charged at a quicker rate.

Emergency measures regarding electrolyte

- If electrolyte gets in your eyes
  Flush your eyes with clean water for at least 15 minutes and get immediate medical attention. If possible, continue to apply water with a sponge or cloth while traveling to the nearest medical facility.

- If electrolyte gets on your skin
  Wash the affected area thoroughly. If you feel pain or burning, get medical attention immediately.

- If electrolyte gets on your clothes
  It can soak through clothing on to your skin. Immediately take off the clothing and follow the procedure above if necessary.

- If you accidentally swallow electrolyte
  Drink a large quantity of water or milk. Get emergency medical attention immediately.
When recharging the battery
Never recharge the battery while the engine is running. Also, be sure all accessories are turned off.
Add washer fluid in the following situations:

- A washer does not work.
- Vehicles with a drive monitor display: The low windshield washer fluid warning light (if equipped) comes on. (→P. 500)
- Vehicles with a multi-information display: The warning message (if equipped) appears on the multi-information display. (→P. 512)

### CAUTION

- **When adding washer fluid**
  Do not add washer fluid when the engine is hot or running as washer fluid contains alcohol and may catch fire if spilled on the engine etc.

### NOTICE

- **Do not use any fluid other than washer fluid**
  Do not use soapy water or engine antifreeze instead of washer fluid. Doing so may cause streaking on the vehicle’s painted surfaces.

- **Diluting washer fluid**
  Dilute washer fluid with water as necessary. Refer to the freezing temperatures listed on the label of the washer fluid bottle.
Replace or rotate tires in accordance with maintenance schedules and treadwear.

Checking tires

Check if the treadwear indicators are showing on the tires. Also check the tires for uneven wear, such as excessive wear on one side of the tread.

Check the spare tire condition and pressure if not rotated.

1. New tread
2. Worn tread
3. Treadwear indicator

The location of treadwear indicators is shown by a “TWI” or “Δ” mark, etc., molded into the sidewall of each tire.

Replace the tires if the treadwear indicators are showing on a tire.

Tire rotation

Rotate the tires in the order shown.

To equalize tire wear and extend tire life, Toyota recommends that tire rotation is carried out at the same interval as tire inspection.
Your vehicle is equipped with a tire pressure warning system that uses tire pressure warning valves and transmitters to detect low tire inflation pressure before serious problems arise. (→ P. 498)

Installing tire pressure warning valves and transmitters

When replacing tires or wheels, tire pressure warning valves and transmitters must also be installed.

When new tire pressure warning valves and transmitters are installed, new ID codes must be registered in the tire pressure warning computer and the tire pressure warning system must be initialized. Have tire pressure warning valves and transmitter ID codes registered by your Toyota dealer. (→ P. 457)

Initializing the tire pressure warning system

The tire pressure warning system must be initialized in the following circumstances:

1. When changing the tire size.
2. When the tire inflation pressure is changed such as when changing traveling speed or load weight.

When the tire pressure warning system is initialized, the current tire inflation pressure is set as the benchmark pressure.
How to initialize the tire pressure warning system

1. Park the vehicle in a safe place and turn the engine switch off. Initialization cannot be performed while the vehicle is moving.

2. Adjust the tire inflation pressure to the specified cold tire inflation pressure level. (→P. 558)
   Make sure to adjust the tire pressure to the specified cold tire inflation pressure level. The tire pressure warning system will operate based on this pressure level.

3. Turn the engine switch to the “ON” position (vehicles without a smart key system) or IGNITION ON mode (vehicles with a smart key system).

4. Press and hold the tire pressure warning reset switch until the tire pressure warning light blinks slowly 3 times.

5. Vehicles without a smart key system: Wait for a few minutes with the engine switch in the “ON” position and then turn the engine switch to the “ACC” or “LOCK” position.
   Vehicles with a smart key system: Wait for a few minutes with the engine switch in IGNITION ON mode and then turn the engine switch off.
Registering ID codes

The tire pressure warning valve and transmitter is equipped with a unique ID code. When replacing a tire pressure warning valve and transmitter, it is necessary to register the ID code. Have the ID code registered by your Toyota dealer.

When to replace your vehicle's tires

Tires should be replaced if:

- The treadwear indicators are showing on a tire.
- You have tire damage such as cuts, splits, cracks deep enough to expose the fabric, and bulges indicating internal damage.
- A tire goes flat repeatedly or cannot be properly repaired due to the size or location of a cut or other damage.

If you are not sure, consult with your Toyota dealer.

Replacing tires and wheels (vehicles with a tire pressure warning system)

If the ID code of the tire pressure warning valve and transmitter is not registered, the tire pressure warning system will not work properly. After driving for about 20 minutes, the tire pressure warning light blinks for 1 minute and stays on to indicate a system malfunction.

Tire life

Any tire over 6 years old must be checked by a qualified technician even if it has seldom or never been used or damage is not obvious.

Routine tire inflation pressure checks (vehicles with a tire pressure warning system)

The tire pressure warning system does not replace routine tire inflation pressure checks. Make sure to check tire inflation pressure as part of your routine of daily vehicle checks.

Low profile tires (17-inch tires)

Generally, low profile tires will wear more rapidly and tire grip performance will be reduced on snowy and/or icy roads when compared to standard tires. Be sure to use snow tires or tire chains on snowy and/or icy roads and drive carefully at a speed appropriate for road and weather conditions.
Maximum load of tire
Check that the maximum load of the replacement tire is greater than 1/2 of the Gross Axle Weight Ratings (GAWR) of either the front axle or the rear axle, whichever is greater.

For the GAWR, see the Certification Label. For the maximum load of the tire, see the load limit at maximum cold tire inflation pressure mentioned on the sidewall of the tire. (P. 563)

Tire types
- Summer tires
  Summer tires are high-speed performance tires best suited to highway driving under dry conditions. Since summer tires do not have the same traction performance as snow tires, summer tires are inadequate for driving on snow-covered or icy roads. For driving on snow-covered roads or icy roads, the use of snow tires is recommended. When installing snow tires, be sure to replace all four tires.
- All season tires
  All season tires are designed to provide better traction in snow and to be adequate for driving in most winter conditions as well as for use year-round. All season tires, however, do not have adequate traction performance compared with snow tires in heavy or loose snow. Also, all season tires fall short in acceleration and handling performance compared with summer tires in highway driving.
- Snow tires
  For driving on snow-covered roads or icy roads, we recommend using snow tires. If you need snow tires, select tires of the same size, construction and load capacity as the originally installed tires. Since your vehicle has radial tires as original equipment, make sure your snow tires also have radial construction. Do not install studded tires without first checking local regulations for possible restrictions. Snow tires should be installed on all wheels. (P. 221)

Initializing the tire pressure warning system (vehicles with a tire pressure warning system)
Initialize the system with the tire inflation pressure adjusted to the specified level.

If the tread on snow tires wears down below 0.16 in. (4 mm)
The effectiveness of the tires as snow tires is lost.
If you press the tire pressure warning reset switch accidentally (vehicles with a tire pressure warning system)
If initialization is performed, adjust the tire inflation pressure to the specified level and initialize the tire pressure warning system again.

When initialization of the tire pressure warning system has failed (vehicles with a tire pressure warning system)
Initialization can be completed in a few minutes. However, in the following cases, the settings have not been recorded and the system will not operate properly. If repeated attempts to record tire inflation pressure settings are unsuccessful, have the vehicle inspected by your Toyota dealer.
- When operating the tire pressure warning reset switch, the tire pressure warning light does not blink 3 times.
- After driving for a certain period of time since the initialization has been completed, the warning light comes on after blinking for 1 minute.

Tire pressure warning system certification
► For the U.S.A.
FCC ID: HYQ23AAK  FCC ID: PAXPMVC010
NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
FCC WARNING:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
► For Canada
NOTE:
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
L’utilisation de ce dispositif est autorisée seulement aux deux conditions suivantes : (1) il ne doit pas produire de brouillage, et (2) l’utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.
<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| **When inspecting or replacing tires**  
Observe the following precautions to prevent accidents. Failure to do so may cause damage to parts of the drive train as well as dangerous handling characteristics, which may lead to an accident resulting in death or serious injury.  
1. Do not mix tires of different makes, models or tread patterns. Also, do not mix tires of remarkably different treadwear.  
1. Do not use tire sizes other than those recommended by Toyota.  
1. Do not mix differently constructed tires (radial, bias-belted or bias-ply tires).  
1. Do not mix summer, all season and snow tires.  
1. Do not use tires that have been used on another vehicle. Do not use tires if you do not know how they were used previously. |
| **When initializing the tire pressure warning system (vehicles with a tire pressure warning system)**  
Do not operate the tire pressure warning reset switch without first adjusting the tire inflation pressure to the specified level. Otherwise, the tire pressure warning light may not come on even if the tire inflation pressure is low, or it may come on when the tire inflation pressure is actually normal. |

**Notice**

- Repairing or replacing tires, wheels, tire pressure warning valves, transmitters and tire valve caps (vehicles with a tire pressure warning system)
  - When removing or fitting the wheels, tires or the tire pressure warning valves and transmitters, contact your Toyota dealer as the tire pressure warning valves and transmitters may be damaged if not handled correctly.
  - When replacing tire valve caps, do not use tire valve caps other than those specified. The cap may become stuck.

- To avoid damage to the tire pressure warning valves and transmitters (vehicles with a tire pressure warning system)
  When a tire is repaired with liquid sealants, the tire pressure warning valve and transmitter may not operate properly. If a liquid sealant is used, contact your Toyota dealer or other qualified service shop as soon as possible. Make sure to replace the tire pressure warning valve and transmitter when replacing the tire. (→P. 455)

- Driving on rough roads
  - Take particular care when driving on roads with loose surfaces or potholes.
  - These conditions may cause losses in tire inflation pressure, reducing the cushioning ability of the tires. In addition, driving on rough roads may cause damage to the tires themselves, as well as the vehicle’s wheels and body.

- Low profile tires (17-inch tires)
  - Low profile tires may cause greater damage than usual to the tire wheel when sustaining impact from the road surface. Therefore, pay attention to the following:
    - Be sure to use proper tire inflation pressure. If tires are under-inflated, they may be damaged more severely.
    - Avoid potholes, uneven pavement, curbs and other road hazards. Failure to do so may lead to severe tire and wheel damage.

- If tire inflation pressure of each tire becomes low while driving
  Do not continue driving, or your tires and/or wheels may be ruined.
Tire inflation pressure

The recommended cold tire inflation pressure and tire size are displayed on the tire and loading information label. (→ P. 558)
7-3. Do-it-yourself maintenance

**Inspection and adjustment procedure**

1. Remove the tire valve cap.
2. Press the tip of the tire pressure gauge onto the tire valve.
3. Read the pressure using the gauge gradations.
4. If the tire inflation pressure is not at the recommended level, adjust the pressure.
   - If you add too much air, press the center of the valve to deflate.
5. After completing the tire inflation pressure measurement and adjustment, apply soapy water to the valve and check for leakage.
6. Put the tire valve cap back on.

**Tire inflation pressure check interval**

- You should check tire inflation pressure every two weeks, or at least once a month.
- Do not forget to check the spare.

**Effects of incorrect tire inflation pressure**

- Driving with incorrect tire inflation pressure may result in the following:
  - Reduced fuel economy
  - Reduced driving comfort and poor handling
  - Reduced tire life due to wear
  - Reduced safety
  - Damage to the drive train

If a tire needs frequent inflating, have it checked by your Toyota dealer.
Instructions for checking tire inflation pressure

When checking tire inflation pressure, observe the following:

- Check only when the tires are cold.
  If your vehicle has been parked for at least 3 hours or has not been driven for more than 1 mile or 1.5 km, you will get an accurate cold tire inflation pressure reading.
- Always use a tire pressure gauge.
  It is difficult to judge if a tire is properly inflated based only on its appearance.
- It is normal for the tire inflation pressure to be higher after driving as heat is generated in the tire. Do not reduce tire inflation pressure after driving.
- Never exceed the vehicle capacity weight.
  Passengers and luggage weight should be placed so that the vehicle is balanced.

CAUTION

Proper inflation is critical to save tire performance
Keep your tires properly inflated.
If the tires are not properly inflated, the following conditions may occur which could lead to an accident resulting in death or serious injury:

- Excessive wear
- Uneven wear
- Poor handling
- Possibility of blowouts resulting from overheated tires
- Air leaking from between tire and wheel
- Wheel deformation and/or tire damage
- Greater possibility of tire damage while driving (due to road hazards, expansion joints, sharp edges in the road, etc.)

NOTICE

When inspecting and adjusting tire inflation pressure
Be sure to put the tire valve caps back on.
If a valve cap is not installed, dirt or moisture may get into the valve and cause an air leak, resulting in decreased tire inflation pressure.
Wheels

If a wheel is bent, cracked or heavily corroded, it should be replaced. Otherwise, the tire may separate from the wheel or cause a loss of handling control.

Wheel selection

When replacing wheels, care should be taken to ensure that they are equivalent to those removed in load capacity, diameter, rim width and inset*.

Replacement wheels are available at your Toyota dealer.

*: Conventionally referred to as “offset”.

Toyota does not recommend using the following:

1. Wheels of different sizes or types
2. Used wheels
3. Bent wheels that have been straightened

Aluminum wheel precautions (if equipped)

1. Use only Toyota wheel nuts and wrenches designed for use with your aluminum wheels.
2. When rotating, repairing or changing your tires, check that the wheel nuts are still tight after driving 1000 miles (1600 km).
3. Be careful not to damage the aluminum wheels when using tire chains.
4. Use only Toyota genuine balance weights or equivalent and a plastic or rubber hammer when balancing your wheels.

When replacing wheels (vehicles with a tire pressure warning system)

The wheels of your vehicle are equipped with tire pressure warning valves and transmitters that allow the tire pressure warning system to provide advance warning in the event of a loss in tire inflation pressure. Whenever wheels are replaced, tire pressure warning valves and transmitters must be installed. (→P. 455)
CAUTION

When replacing wheels

- Do not use wheels that are a different size from those recommended in the Owner’s Manual, as this may result in a loss of handling control.
- Never use an inner tube in a leaking wheel which is designed for a tubeless tire. Doing so may result in an accident, causing death or serious injury.

When installing the wheel nuts

- Be sure to install the wheel nuts with the tapered ends facing inward. Installing the nuts with the tapered ends facing outward can cause the wheel to break and eventually cause the wheel to come off while driving, which could lead to an accident resulting in death or serious injury.
- Never use oil or grease on the wheel bolts or wheel nuts. Oil and grease may cause the wheel nuts to be excessively tightened, leading to bolt or disc wheel damage. In addition, the oil or grease can cause the wheel nuts to loosen and the wheel may fall off, causing an accident and resulting in death or serious injury. Remove any oil or grease from the wheel bolts or wheel nuts.

Use of defective wheels prohibited

Do not use cracked or deformed wheels. Doing so could cause the tire to leak air during driving, possibly causing an accident.

NOTICE

Replacing tire pressure warning valves and transmitters (vehicles with a tire pressure warning system)

- Because tire repair or replacement may affect the tire pressure warning valves and transmitters, make sure to have tires serviced by your Toyota dealer or other qualified service shop. In addition, make sure to purchase your tire pressure warning valves and transmitters at your Toyota dealer.
- Ensure that only genuine Toyota wheels are used on your vehicle. Tire pressure warning valves and transmitters may not work properly with non-genuine wheels.
Air conditioning filter

The air conditioning filter must be changed regularly to maintain air conditioning efficiency.

Removal method

1. Turn the engine switch off.
2. Open the glove box. Slide off the damper.
3. Push in the glove box on the vehicle’s outer side to disconnect the claws. Then pull out the glove box and disconnect the lower claws.
4. Remove the filter cover.
Replacement method

Remove the air conditioning filter and replace it with a new one. The “↑UP” marks shown on the filter should be pointing up.

Checking interval

Inspect and replace the air conditioning filter according to the maintenance schedule. In dusty areas or areas with heavy traffic flow, early replacement may be required. (For scheduled maintenance information, please refer to the “Schedule maintenance guide” or “Owner’s Manual Supplement”.)

If air flow from the vents decreases dramatically

The filter may be clogged. Check the filter and replace if necessary.

NOTICE

When using the air conditioning system

Make sure that a filter is always installed. Using the air conditioning system without a filter may cause damage to the system.
Wireless remote control/electronic key battery

Replace the battery with a new one if it is depleted.

You will need the following items:
- Flathead screwdriver
- Small flathead screwdriver
- Lithium battery CR2016 (vehicles without a smart key system), or CR2032 (vehicles with a smart key system)

Replacing the battery

- Vehicles without a smart key system

1. Remove the cover.
   To prevent damage to the key, cover the tip of the screwdriver with a rag.
   To prevent the buttons from being disassembled, face the button surface downward.

2. Remove the module.

*: If equipped
3 Open the case cover using a coin protected with tape etc. and remove the depleted battery using a small flathead screwdriver.
   Insert a new battery with the "+" terminal facing up.

- Vehicles with a smart key system

1 Take out the mechanical key.

2 Remove the cover.
   To prevent damage to the key, cover the tip of the screwdriver with a rag.

3 Remove the depleted battery.
   Insert a new battery with the "+" terminal facing up.
Do-it-yourself maintenance

- **Use a CR2016 (vehicles without a smart key system) or CR2032 (vehicles with a smart key system) lithium battery**
  - Batteries can be purchased at your Toyota dealer, local electrical appliance shops or camera stores.
  - Replace only with the same or equivalent type recommended by the manufacturer.
  - Dispose of used batteries according to local laws.

- **If the key battery is depleted**
  The following symptoms may occur:
  - The smart key system (if equipped) and wireless remote control will not function properly.
  - The operational range will be reduced.

---

**CAUTION**

- **Removed battery and other parts**
  These parts are small and if swallowed by a child, they can cause choking. Keep away from children. Failure to do so could result in death or serious injury.

---

**NOTICE**

- **For normal operation after replacing the battery**
  Observe the following precautions to prevent accidents:
  - Always work with dry hands.
  - Moisture may cause the battery to rust.
  - Do not touch or move any other component inside the remote control.
  - Do not bend either of the battery terminals.
Checking and replacing fuses

If any of the electrical components do not operate, a fuse may have blown. If this happens, check and replace the fuses as necessary.

1. Turn the engine switch off.
2. Open the fuse box cover.
   - Engine compartment
     Push the tab in and lift the lid off.

   - Under the driver’s side instrument panel
     Remove the lid.

3. Remove the fuse with the pull-out tool.
   Only type A fuses can be removed using the pullout tool.
Check if the fuse is blown.

1. Normal fuse
2. Blown fuse

Replace the blown fuse with a new fuse of an appropriate amperage rating. The amperage rating can be found on the fuse box lid.

- Type A
- Type B
- Type C
### After a fuse is replaced
- If the lights do not turn on even after the fuse has been replaced, a bulb may need replacement. (→P. 475)
- If the replaced fuse blows again, have the vehicle inspected by your Toyota dealer.

### If there is an overload in a circuit
The fuses are designed to blow, protecting the wiring harness from damage.

Light bulbs

You may replace the following bulbs yourself. The difficulty level of replacement varies depending on the bulb. If necessary bulb replacement seems difficult to perform, contact your Toyota dealer.

For more information about replacing other light bulbs, contact your Toyota dealer.

Preparing for light bulb replacement

Check the wattage of the light bulb to be replaced. (→P. 559)

Bulb locations

Front

1. Headlight high beams
2. Front turn signal/parking lights
3. Front side marker lights
4. Front fog lights (if equipped)
Rear

1. Back-up lights
2. Rear turn signal lights
3. Stop/tail/rear side marker lights
4. License plate lights

Replacing light bulbs

Headlight high beams

1. Turn the bulb base counterclockwise.

2. Pull the bulb out while pressing the lock release of the connector.
3 Replace the light bulb, and install the bulb base.
   Align the 3 tabs on the light bulb with the mounting and insert.

4 Turn and secure the bulb base.
   Shake the bulb base gently to check that it is not loose, turn the headlights on once and visually confirm that no light is leaking through the mounting.
Front fog lights (if equipped)

1. Remove the fender liner bolts and clip.

2. Partly remove the fender liner.

3. Unplug the connector while depressing the lock release.
4. Turn the bulb base counterclockwise.

5. Install a new light bulb.
   Align the 3 tabs on the light bulb with the mounting and insert.
   Turn clockwise and secure the bulb base.

6. Install the connector.
   Shake the connector gently to check that it is not loose, turn the front fog lights on once and visually confirm that no light is leaking through the mounting.

7. When installing the fender liner, install by conducting 2 and 1 with the directions reversed.
   Make sure that the fender liner is attached to the inside of the bumper.
Front side marker lights

1. Turn the bulb base counterclockwise.

2. Remove the light bulb.

3. When installing, reverse the steps listed.
Front turn signal/parking lights

1. Turn the bulb base counterclockwise.

2. Remove the light bulb.

3. When installing, reverse the steps listed.
Stop/tail/rear side marker lights and rear turn signal lights

1. Open the trunk lid and remove the clips.
   To prevent damage to the vehicle, cover the tip of the screw-driver with a rag.

2. Partly remove the luggage trim cover.

3. Turn the bulb base counterclockwise.
   ① Rear turn signal light
   ② Stop/tail/rear side marker light

4. Remove the light bulb.
   ① Rear turn signal light
   ② Stop/tail/rear side marker light

5. When installing, reverse the steps listed.
- **Back-up lights**
  1. Open the trunk lid and remove the cover.
  2. Turn the bulb base counterclockwise.
  3. Remove the light bulb.
  4. When installing, reverse the steps listed.
n **License plate lights**

1. Open the trunk lid and remove the trunk panel cover clips.
   To prevent damage to the vehicle, cover the tip of the screwdriver with a rag.

2. Partly remove the trunk panel cover and turn the bulb base counterclockwise.

3. Remove the light bulb.

4. When installing, reverse the steps listed.
Replacing the following bulbs
If any of the lights listed below has burnt out, have it replaced by your Toyota dealer.
- Headlight low beams/daytime running lights
- High mounted stoplights
- Side turn signal lights (if equipped)

LED light bulbs
The high mounted stoplights and headlight low beams/daytime running lights consist of a number of LEDs. If any of the LEDs burns out, take your vehicle to your Toyota dealer to have the light replaced.

Condensation build-up on the inside of the lens
Temporary condensation build-up on the inside of the headlight lens does not indicate a malfunction.
Contact your Toyota dealer for more information in the following situations:
- Large drops of water have built up on the inside of the lens.
- Water has built up inside the headlight.

CAUTION
Replacing light bulbs
- Turn off the lights. Do not attempt to replace the bulb immediately after turning off the lights. The bulbs become very hot and may cause burns.
- Do not touch the glass portion of the light bulb with bare hands. When it is unavoidable to hold the glass portion, use and hold with a clean dry cloth to avoid getting moisture and oils on the bulb. Also, if the bulb is scratched or dropped, it may blow out or crack.
- Fully install light bulbs and any parts used to secure them. Failure to do so may result in heat damage, fire, or water entering the headlight unit. This may damage the headlights or cause condensation to build up on the lens.

To prevent damage or fire
Make sure bulbs are fully seated and locked.
7-3. Do-it-yourself maintenance
When trouble arises

8-1. Essential information
   Emergency flashers .......... 488
   If your vehicle has to be stopped in an emergency ...................... 489

8-2. Steps to take in an emergency
   If your vehicle needs to be towed ................................. 491
   If you think something is wrong ........................................ 496
   Fuel pump shut off system ............................................. 497
   If a warning light turns on or a warning buzzer sounds ......................... 498
   If a warning message or indicator is displayed .................................. 510
   If you have a flat tire .......... 520
   If the engine will not start ............................................. 532
   If the shift lever cannot be shifted from P ............................. 534
   If the electronic key does not operate properly .......................... 535
   If the vehicle battery is discharged .................................... 538
   If your vehicle overheats ............................................. 543
   If the vehicle becomes stuck ........................................... 547
8-1. Essential information

**Emergency flashers**

The emergency flashers are used to warn other drivers when the vehicle has to be stopped in the road due to a breakdown, etc.

Press the switch.

All the turn signal lights will flash.
To turn them off, press the switch once again.

---

**Emergency flashers**

If the emergency flashers are used for a long time while the engine is not operating, the battery may discharge.
If your vehicle has to be stopped in an emergency

Only in an emergency, such as if it becomes impossible to stop the vehicle in the normal way, stop the vehicle using the following procedure:

1. Steadily step on the brake pedal with both feet and firmly depress it.
   Do not pump the brake pedal repeatedly as this will increase the effort required to slow the vehicle.

2. Shift the shift lever to N.
   ▶ If the shift lever is shifted to N

3. After slowing down, stop the vehicle in a safe place by the road.

4. Stop the engine.
   ▶ If the shift lever cannot be shifted to N

3. Keep depressing the brake pedal with both feet to reduce vehicle speed as much as possible.

4. Vehicles without a smart key system: Stop the engine by turning the engine switch to the "ACC" position.

4. Vehicles with a smart key system: To stop the engine, press and hold the engine switch for 2 consecutive seconds or more, or press it briefly 3 times or more in succession.

5. Stop the vehicle in a safe place by the road.
CAUTION

If the engine has to be turned off while driving

- Power assist for the brakes and steering wheel will be lost, making the brake pedal harder to depress and the steering wheel heavier to turn. Decelerate as much as possible before turning off the engine.
- Vehicles without a smart key system: Never attempt to remove the key, as doing so will lock the steering wheel.
When trouble arises

If your vehicle needs to be towed

If towing is necessary, we recommend having your vehicle towed by your Toyota dealer or commercial towing service, using a wheel-lift type truck or flatbed truck. Use a safety chain system for all towing, and abide by all state/provincial and local laws.

Situations when it is necessary to contact dealers before towing

The following may indicate a problem with your transmission. Contact your Toyota dealer or commercial towing service before towing.

- The engine is running but the vehicle does not move.
- The vehicle makes an abnormal sound.

Towing with a sling-type truck

Do not tow with a sling-type truck to prevent body damage.
492  8-2. Steps to take in an emergency

**Towing with a wheel-lift type truck**

- From the front
- From the rear

Release the parking brake.  
Use a towing dolly under the front wheels.

**Using a flatbed truck**

If your vehicle is transported by a flatbed truck, it should be tied down at the locations shown in the illustration.

If you use chains or cables to tie down your vehicle, the angles shaded in black must be 45°.  
Do not overly tighten the tie downs or the vehicle may be damaged.
8-2. Steps to take in an emergency

**Emergency towing**

If a tow truck is not available in an emergency, your vehicle may be temporarily towed using cables or chains secured to the emergency towing eyelet. This should only be attempted on hard surfaced roads for at most 50 miles (80 km) at under 18 mph (30 km/h).

A driver must be in the vehicle to steer and operate the brakes. The vehicle’s wheels, drive train, axles, steering and brakes must be in good condition.

**Emergency towing procedure**

1. Securely attach cables or chains to the towing eyelet. Take care not to damage the vehicle body.

2. Vehicles without a smart key system: Enter the vehicle being towed and start the engine. If the engine does not start, turn the engine switch to the “ON” position.
   Vehicles with a smart key system: Enter the vehicle being towed and start the engine. If the engine does not start, turn the engine switch to IGNITION ON mode.

3. Shift the shift lever to N and release the parking brake.
   Vehicles without a manual transmission: When the shift lever cannot be shifted: → P. 534

**While towing**

If the engine is not running, the power assist for the brakes and steering will not function, making steering and braking more difficult.

**Wheel nut wrench**

Wheel nut wrench is stored in the trunk. (→ P. 520)
CAUTION

Observe the following precautions. Failure to do so may result in death or serious injury.

When towing the vehicle

- Be sure to transport the vehicle with the front wheels raised or with all four wheels raised off the ground. If the vehicle is towed with the front wheels contacting the ground, the drivetrain and related parts may be damaged.

While towing

- When towing using cables or chains, avoid sudden starts, etc. which place excessive stress on the towing eyelet, cables or chains. The towing eyelet, cables or chains may become damaged, broken debris may hit people, and cause serious damage.
- Vehicles without a smart key system: Do not turn the engine switch to the "LOCK" position. There is a possibility that the steering wheel is locked and cannot be operated.
- Vehicles with a smart key system: Do not turn the engine switch off. There is a possibility that the steering wheel is locked and cannot be operated.
### 8-2. Steps to take in an emergency

**NOTICE**

- **To prevent damage to the vehicle when towing using a wheel-lift type truck**
  - Vehicles without a smart key system: Do not tow the vehicle from the rear when the engine switch is in the “LOCK” position or the key is removed. The steering lock mechanism is not strong enough to hold the front wheels straight.
  - Vehicles with a smart key system: Do not tow the vehicle from the rear when the engine switch is off. The steering lock mechanism is not strong enough to hold the front wheels straight.
  - When raising the vehicle, ensure adequate ground clearance for towing at the opposite end of the raised vehicle. Without adequate clearance, the vehicle could be damaged while being towed.

- **To prevent damage to the vehicle when towing with a sling-type truck**
  Do not tow with a sling-type truck, either from the front or rear.

- **To prevent damage to the vehicle during emergency towing**
  Do not secure cables or chains to the suspension components.
If you think something is wrong

If you notice any of the following symptoms, your vehicle probably needs adjustment or repair. Contact your Toyota dealer as soon as possible.

Visible symptoms

1. Fluid leaks under the vehicle.
   (Water dripping from the air conditioning after use is normal.)
2. Flat-looking tires or uneven tire wear
3. Vehicles with a drive monitor display: High engine coolant temperature warning light comes on.
4. Vehicles with a multi-information display: Engine coolant temperature gauge needle continually points higher than normal.

Audible symptoms

1. Changes in exhaust sound
2. Excessive tire squeal when cornering
3. Strange noises related to the suspension system
4. Pinging or other noises related to the engine

Operational symptoms

1. Engine missing, stumbling or running roughly
2. Appreciable loss of power
3. Vehicle pulls heavily to one side when braking
4. Vehicle pulls heavily to one side when driving on a level road
5. Loss of brake effectiveness, spongy feeling, pedal almost touches the floor
Follow the procedure below to restart the engine after the system is activated.

- Vehicles without a smart key system
  1. Turn the engine switch to the “ACC” or “LOCK” position.
  2. Restart the engine.
- Vehicles with a smart key system
  1. Turn the engine switch to ACCESSORY mode or turn it off.
  2. Restart the engine.

**NOTICE**

Before starting the engine
Inspect the ground under the vehicle.
If you find that fuel has leaked onto the ground, the fuel system has been damaged and is in need of repair. Do not restart the engine.
If a warning light turns on or a warning buzzer sounds

Calmly perform the following actions if any of the warning lights comes on or flashes. If a light comes on or flashes, but then goes off, this does not necessarily indicate a malfunction in the system. However, if this continues to occur, have the vehicle inspected by your Toyota dealer.

Warning light and warning buzzer list

| Once           | —               | (Flashes in yellow for 30 seconds) | Smart key system indicator light  
• When the doors were unlocked with the mechanical key and then the engine switch was pressed, the electronic key could not be detected in the vehicle.  
• The electronic key could not be detected in the vehicle even after the engine switch was pressed two consecutive times.  
→ Vehicles with a continuously variable transmission: Touch the electronic key to the engine switch while depressing the brake pedal.  
Vehicles with a manual transmission: Touch the electronic key to the engine switch while depressing the clutch pedal. |
SRS warning light
This warning light system monitors the airbag sensor assembly, front impact sensors, side impact sensors (front door), side impact sensors (front), side impact sensors (rear), driver’s seat belt buckle switch, front passenger occupant classification system, “AIR BAG ON” indicator light, “AIR BAG OFF” indicator light, front passenger’s seat belt buckle switch, seat belt pretensioners (front), airbags, interconnecting wiring and power sources. (→P. 35)

Front passenger detection sensor, seat belt reminder and warning buzzer
If luggage is placed on the front passenger seat, the front passenger detection sensor may cause the warning light to flash and the warning buzzer to sound even if a passenger is not sitting in the seat.

If the malfunction indicator lamp comes on while driving
First check the following:
- Is the fuel tank empty?
  - If it is, fill the fuel tank immediately.
- Is the fuel tank cap loose?
  - If it is, tighten it securely.

The light will go off after several driving trips.
If the light does not go off even after several trips, contact your Toyota dealer as soon as possible.

When the tire pressure warning light comes on (vehicles with a tire pressure warning system)
Check the tire inflation pressure and adjust to the appropriate level. Pushing the tire pressure warning reset switch will not turn off the tire pressure warning light.

The tire pressure warning light may come on due to natural causes (vehicles with a tire pressure warning system)
The tire pressure warning light may come on due to natural causes such as natural air leaks and tire inflation pressure changes caused by temperature. In this case, adjusting the tire inflation pressure will turn off the warning light (after a few minutes).
When a tire is replaced with a spare tire (vehicles with a tire pressure warning system)
The compact spare tire is not equipped with a tire pressure warning valve and transmitter. If a tire goes flat, the tire pressure warning light will not turn off even though the flat tire has been replaced with the spare tire. Replace the spare tire with the repaired tire and adjust the tire inflation pressure. The tire pressure warning light will go off after a few minutes.

Conditions that the tire pressure warning system may not function properly (vehicles with a tire pressure warning system)
The tire pressure warning system will be disabled in the following conditions:
(When the condition becomes normal, the system will work properly.)
- If tires not equipped with tire pressure warning valves and transmitters are used
- If the ID code on the tire pressure warning valves and transmitters is not registered in the tire pressure warning computer
- If the tire inflation pressure is 73 psi (500 kPa, 5.1 kgf/cm² or bar) or higher

The tire pressure warning system may be disabled in the following conditions:
(When the condition becomes normal, the system will work properly.)
- If electronic devices or facilities using similar radio wave frequencies are nearby
- If a radio set at similar frequency is in use in the vehicle
- If a window tint that affects the radio wave signals is installed
- If there is a lot of snow or ice on the vehicle, in particular around the wheels or wheel housings
- If non-genuine Toyota wheels are used (Even if you use Toyota wheels, the tire pressure warning system may not work properly with some types of tires.)
- If tire chains are used

If the tire pressure warning light frequently comes on after blinking for 1 minute (vehicles with a tire pressure warning system)
If the tire pressure warning light frequently comes on after blinking for 1 minute when the engine switch is turned on, have it checked by your Toyota dealer.

Warning buzzer
In some cases, the buzzer may not be heard because of noisy place or an audio sound.

Electric power steering system warning light (warning buzzer)
When the battery charge becomes insufficient or the voltage temporarily drops, the electric power steering system warning light may come on and the warning buzzer may sound.
CAUTION

- If both the ABS and the brake system warning lights remain on
  Stop your vehicle in a safe place immediately and contact your Toyota dealer. The vehicle will become extremely unstable during braking, and the ABS system may fail, which could cause an accident resulting in death or serious injury.

- When the electric power steering system warning light comes on
  The steering wheel may become extremely heavy.
  If the steering wheel becomes heavier than usual when operating, hold firmly and operate using more force than usual.

- If the tire pressure warning light comes on (vehicles with a tire pressure warning system)
  Be sure to observe the following precautions. Failure to do so could cause a loss of vehicle control and result in death or serious injury.
  1. Stop your vehicle in a safe place as soon as possible. Adjust the tire inflation pressure immediately.
  1. If the tire pressure warning light comes on even after tire inflation pressure adjustment, it is probable that you have a flat tire. Check the tires.
  1. If a tire is flat, change it with the spare tire and have the flat tire repaired by the nearest Toyota dealer.
  1. Avoid abrupt maneuvering and braking. If the vehicle tires deteriorate, you could lose control of the steering wheel or the brakes.

- If a blowout or sudden air leakage should occur (vehicles with a tire pressure warning system)
  The tire pressure warning system may not activate immediately.

When trouble arises
CAUTION

Maintenance of the tires

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label (tire and load information label). (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label [tire and load information label], you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS-tire pressure warning system) that illuminates a low tire pressure telltale (tire pressure warning light) when one or more of your tires is significantly under-inflated. Accordingly, when the low tire pressure telltale (tire pressure warning light) illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Please note that the TPMS (tire pressure warning system) is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale (tire pressure warning light).

Your vehicle has also been equipped with a TPMS (tire pressure warning system) malfunction indicator to indicate when the system is not operating properly. The TPMS (tire pressure warning system) malfunction indicator is combined with the low tire pressure telltale (tire pressure warning light). When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists. When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS (tire pressure warning system) malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS (tire pressure warning system) from functioning properly. Always check the TPMS (tire pressure warning system) malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS (tire pressure warning system) to continue to function properly.
NOTICE

To ensure the tire pressure warning system operates properly (vehicles with a tire pressure warning system)
Do not install tires with different specifications or makers, as the tire pressure warning system may not operate properly.
If a warning is shown on the multi-information display, stay calm and perform the following actions:

1. **Master warning light**
   The master warning light also comes on or flashes in order to indicate that a message is currently being displayed on the multi-information display.

2. **Multi-information display**

If any of the warning message or indicator comes on again after the following actions have been performed, contact your Toyota dealer.

### Warning message and warning buzzer list

2. Wheel nut wrench
3. Jack handle
4. Jack attachment*
5. Jack
6. Spare tire
7. Tool tray

*: The jack attachment is used when raising your vehicle with a floor jack. (→P. 439)
8-2. Steps to take in an emergency

**CAUTION**

**Using the tire jack**
Observe the following precautions. Improper use of the tire jack may cause the vehicle to suddenly fall off the jack, leading to death or serious injury.

- Do not use the tire jack for any purpose other than replacing tires or installing and removing tire chains.
- Only use the tire jack that comes with this vehicle for replacing a flat tire.
  - Do not use it on other vehicles, and do not use other tire jacks for replacing tires on this vehicle.
- Put the jack properly in its jack point.
- Do not put any part of your body under the vehicle while it is supported by the jack.
- Do not start the engine or drive the vehicle while the vehicle is supported by the jack.
- Do not raise the vehicle while someone is inside.
- When raising the vehicle, do not put an object on or under the jack.
- Do not raise the vehicle to a height greater than that required to replace the tire.
- Use a jack stand if it is necessary to get under the vehicle.
- When lowering the vehicle, make sure that there is no-one near the vehicle. If there are people nearby, warn them vocally before lowering.

**Taking out the jack**

1. Remove the luggage floor cover.
When trouble arises

1. Take out the jack.
   ① For tightening
   ② For loosening

2. Take out the spare tire
   ① Remove the luggage floor cover. (→P. 522)
   ② Remove the tool tray.
   ③ Loosen the center fastener that secures the spare tire.

⚠️ CAUTION

When storing the spare tire
Be careful not to catch fingers or other body parts between the spare tire and the body of the vehicle.
**Replacing a flat tire**

1. Chock the tires.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

2. For vehicles with steel wheels, remove the wheel ornament using the wrench.
   To protect the wheel ornament, place a rag between the wrench and the wheel ornament, as shown in the illustration.

3. Slightly loosen the wheel nuts (one turn).
4. Turn the tire jack portion “A” by hand until the notch of the jack is in contact with the jack point. The jack point guides are located under the rocker panel. They indicate the jack point positions.

5. Raise the vehicle until the tire is slightly raised off the ground.

6. Remove all the wheel nuts and the tire. When resting the tire on the ground, place the tire so that the wheel design faces up to avoid scratching the wheel surface.
**CAUTION**

### Replacing a flat tire

- Do not touch the disc wheels or the area around the brakes immediately after the vehicle has been driven. After the vehicle has been driven the disc wheels and the area around the brakes will be extremely hot. Touching these areas with hands, feet or other body parts while changing a tire, etc. may result in burns.
- Failure to follow these precautions could cause the wheel nuts to loosen and the tire to fall off, resulting in death or serious injury.
  - Have the wheel nuts tightened with a torque wrench to 76 ft•lbf (103 N•m, 10.5 kgf•m) as soon as possible after changing wheels.
  - Do not attach a heavily damaged wheel ornament, as it may fly off the wheel while the vehicle is moving.
  - When installing a tire, only use wheel nuts that have been specifically designed for that wheel.
  - If there are any cracks or deformations in the bolt screws, nut threads or bolt holes of the wheel, have the vehicle inspected by your Toyota dealer.
  - When installing the wheel nuts, be sure to install them with the tapered ends facing inward. (→ P. 466)
8-2. Steps to take in an emergency 527

Installing the spare tire

1. Remove any dirt or foreign matter from the wheel contact surface.

If foreign matter is on the wheel contact surface, the wheel nuts may loosen while the vehicle is in motion, causing the tire to come off.

2. Install the tire and loosely tighten each wheel nut by hand by approximately the same amount.

When replacing a steel wheel with a compact spare tire, tighten the wheel nuts until the tapered portion comes into loose contact with the disc wheel seat.

When replacing an aluminum wheel with a compact spare tire, tighten the wheel nuts until the tapered portion comes into loose contact with the disc wheel seat.

3. Lower the vehicle.
4 Firmly tighten each wheel nut two or three times in the order shown in the illustration.
   Tightening torque:
   76 ft•lb (103 N•m, 10.5 kgf•m)

5 Stow the flat tire, tire jack and all tools.
529

8-2. Steps to take in an emergency

The compact spare tire

The compact spare tire is identified by the label “TEMPORARY USE ONLY” on the tire sidewall. Use the compact spare tire temporarily, and only in an emergency.

Make sure to check the tire inflation pressure of the compact spare tire. (→ P. 558)

When the compact spare tire is equipped

The vehicle becomes lower when driving with the compact spare tire compared to when driving with standard tires.

After completing the tire change (vehicles with a tire pressure warning system)

The tire pressure warning system must be reset. (→ P. 456)

When using the compact spare tire (vehicles with a tire pressure warning system)

As the compact spare tire is not equipped with a tire pressure warning valve and transmitter, low inflation pressure of the spare tire will not be indicated by the tire pressure warning system. Also, if you replace the compact spare tire after the tire pressure warning light comes on, the light remains on.

If you have a flat front tire on a road covered with snow or ice

Install the compact spare tire on one of the rear wheels of the vehicle. Perform the following steps and fit tire chains to the front tires:

1 Replace a rear tire with the compact spare tire.
2 Replace the flat front tire with the tire removed from the rear of the vehicle.
3 Fit tire chains to the front tires.

When reinstalling the wheel ornament (vehicles with steel wheels)

Align the cutout of the wheel ornament with the valve stem as shown the illustration.
When using the compact spare tire

- Remember that the compact spare tire provided is specifically designed for use with your vehicle. Do not use your compact spare tire on another vehicle.
- Do not use more than one compact spare tires simultaneously.
- Replace the compact spare tire with a standard tire as soon as possible.
- Avoid sudden acceleration, abrupt steering, sudden braking and shifting operations that cause sudden engine braking.

When the compact spare tire is attached

The vehicle speed may not be correctly detected, and the following systems may not operate correctly:

- ABS & Brake assist
- VSC
- TRAC
- Cruise control (if equipped)
- EPS
- Rear view monitor system (if equipped)
- Navigation system (if equipped)

Speed limit when using the compact spare tire

Do not drive at speeds in excess of 50 mph (80 km/h) when a compact spare tire is installed on the vehicle.

The compact spare tire is not designed for driving at high speeds. Failure to observe this precaution may lead to an accident causing death or serious injury.

After using the tools and jack

Before driving, make sure all the tools and jack are securely in place in their storage location to reduce the possibility of personal injury during a collision or sudden braking.
Be careful when driving over bumps with the compact spare tire installed on the vehicle.
The vehicle becomes lower when driving with the compact spare tire compared to when driving with standard tires. Be careful when driving over uneven road surfaces.

Driving with tire chains and the compact spare tire
Do not fit tire chains to the compact spare tire. Tire chains may damage the vehicle body and adversely affect driving performance.

When replacing the tires (vehicles with a tire pressure warning system)
When removing or fitting the wheels, tires or the tire pressure warning valve and transmitter, contact your Toyota dealer as the tire pressure warning valve and transmitter may be damaged if not handled correctly.

To avoid damage to the tire pressure warning valves and transmitters (vehicles with a tire pressure warning system)
When a tire is repaired with liquid sealants, the tire pressure warning valve and transmitter may not operate properly. If a liquid sealant is used, contact your Toyota dealer or other qualified service shop as soon as possible. Make sure to replace the tire pressure warning valve and transmitter when replacing the tire. (→ P. 455)
If the engine will not start

If the engine will not start even though correct starting procedures are being followed (→P. 165, 168), consider each of the following points:

**The engine will not start even though the starter motor operates normally.**

One of the following may be the cause of the problem:

- There may not be sufficient fuel in the vehicle’s tank.
  - Refuel the vehicle.
- The engine may be flooded.
  - Try to restart the engine again following correct starting procedures. (→P. 168)
- There may be a malfunction in the engine immobilizer system. (→P. 66)

**The starter motor turns over slowly, the interior lights and headlights are dim, or the horn does not sound or sounds at a low volume.**

One of the following may be the cause of the problem:

- The battery may be discharged. (→P. 538)
- The battery terminal connections may be loose or corroded.

**The starter motor does not turn over (vehicles with a smart key system)**

The engine starting system may be malfunctioning due to an electrical problem such as electronic key battery depletion or a blown fuse. However, an interim measure is available to start the engine. (→P. 533)
When trouble arises

One of the following may be the cause of the problem:

- One or both of the battery terminals may be disconnected.
- The battery may be discharged. (→P. 538)
- There may be a malfunction in the steering lock system (vehicles with a smart key system).

Contact your Toyota dealer if the problem cannot be repaired, or if repair procedures are unknown.

The starter motor does not turn over, the interior lights and headlights do not turn on, or the horn does not sound.

One of the following may be the cause of the problem:

- One or both of the battery terminals may be disconnected.
- The battery may be discharged. (→P. 538)
- There may be a malfunction in the steering lock system (vehicles with a smart key system).

Contact your Toyota dealer if the problem cannot be repaired, or if repair procedures are unknown.

Emergency start function (vehicles with a smart key system)

When the engine does not start, the following steps can be used as an interim measure to start the engine if the engine switch is functioning normally:

1. Set the parking brake.
2. Shift the shift lever to P (continuously variable transmission) or N (manual transmission).
3. Turn the engine switch to ACCESSORY mode.
4. Press and hold the engine switch for about 15 seconds while depressing the brake pedal and clutch pedal (manual transmission) firmly.

Even if the engine can be started using the above steps, the system may be malfunctioning. Have the vehicle inspected by your Toyota dealer.
If the shift lever cannot be shifted from P (except vehicles with a manual transmission)

If the shift lever cannot be shifted with your foot on the brake pedal, there may be a problem with the shift lock system (a system to prevent accidental operation of the shift lever). Have the vehicle inspected by your Toyota dealer immediately. The following steps may be used as an emergency measure to ensure that the shift lever can be shifted:

1. Set the parking brake.
2. Vehicles without a smart key system: Turn the engine switch to the “ACC” position.
   Vehicles with a smart key system: Turn the engine switch to ACCESSORY mode.
3. Depress the brake pedal.
4. Pry the cover up with a flathead screwdriver or equivalent tool.
   To prevent damage to the cover, cover the tip of the screwdriver with a rag.
5. Press the shift lock override button.
   The shift lever can be shifted while the button is pressed.
If the electronic key does not operate properly (vehicles with a smart key system)

If communication between the electronic key and vehicle is interrupted (→P. 119) or the electronic key cannot be used because the battery is depleted, the smart key system and wireless remote control cannot be used. In such cases, the doors can be opened and the engine can be started by following the procedure below.

Locking and unlocking the doors

Use the mechanical key (→P. 97) in order to perform the following operations:

1. Locks all the doors
2. Unlocks the door

Turning the key rearward unlocks the driver’s door. Turning the key once again within 5 seconds unlocks the other doors.
Starting the engine

1. Continuously variable transmission: Ensure that the shift lever is in P and depress the brake pedal.
   Manual transmission: Shift the shift lever to N and depress the clutch pedal.

2. Touch the Toyota emblem side of the electronic key to the engine switch.
   When the electronic key is detected, a buzzer sounds and the engine switch will turn to IGNITION ON mode.
   When the smart key system is deactivated in customization setting, the engine switch will turn to ACCESSORY mode.

3. Vehicles with a drive monitor display: Firmly depress the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and check that the smart key system indicator light (green) turns on.
   Vehicles with a multi-information display: Firmly depress the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and check that is shown on the multi-information display.

4. Press the engine switch.
   In the event that the engine still cannot be started, contact your Toyota dealer.
8-2. Steps to take in an emergency

n **Stopping the engine**
Shift the shift lever to P (continuously variable transmission) or N (manual transmission) and press the engine switch as you normally do when stopping the engine.

n **Replacing the key battery**
As the above procedure is a temporary measure, it is recommended that the electronic key battery be replaced immediately when the battery is depleted. (→P. 469)

n **Changing engine switch modes**
Release the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and press the engine switch in step [3] above.
The engine does not start and modes will be changed each time the switch is pressed. (→P. 170)

n **When the electronic key does not work properly**
  1. Make sure that the smart key system has not been deactivated in the customization setting. If it is off, turn the function on.
     (Customizable features →P. 576)
  1. Check if battery-saving mode is set. If it is set, cancel the function.
     (→P. 118)
**If the vehicle battery is discharged**

The following procedures may be used to start the engine if the vehicle’s battery is discharged. You can also call your Toyota dealer or a qualified repair shop.

If you have a set of jumper (or booster) cables and a second vehicle with a 12-volt battery, you can jump start your vehicle by following the steps below.

1. Open the hood. (⇒ P. 437)
2. Remove the engine cover.
   - Raise the rear of the engine cover to remove the two rear clips, and then raise the front of the engine cover to remove the two front clips.
3. Connect the jumper cables according to the following procedure:

1. Connect a positive jumper cable clamp to the positive (+) battery terminal on your vehicle.
2. Connect the clamp on the other end of the positive cable to the positive (+) battery terminal on the second vehicle.
3. Connect a negative cable clamp to the negative (-) battery terminal on the second vehicle.
4. Connect the clamp at the other end of the negative cable to a solid, stationary, unpainted metallic point away from the battery and any moving parts, as shown in the illustration.
Start the engine of the second vehicle. Increase the engine speed slightly and maintain at that level for approximately 5 minutes to recharge the battery of your vehicle.

Vehicles with a smart key system: Open and close any of the doors of your vehicle with the engine switch off.

Vehicles without a smart key system: Maintain the engine speed of the second vehicle and turn the engine switch to the "ON" position, then start the vehicle's engine.

Vehicles with a smart key system: Maintain the engine speed of the second vehicle and turn the engine switch to IGNITION ON mode, then start the vehicle's engine.

Once the vehicle’s engine has started, remove the jumper cables in the exact reverse order from which they were connected.

Once the engine starts, have the vehicle inspected at your Toyota dealer as soon as possible.
8-2. Steps to take in an emergency

- **Starting the engine when the battery is discharged**
  The engine cannot be started by push-starting.

- **To prevent battery discharge**
  - Turn off the headlights and the audio system while the engine is off.
  - Turn off any unnecessary electrical components when the vehicle is running at a low speed for an extended period, such as in heavy traffic.

- **Charging the battery**
  The electricity stored in the battery will discharge gradually even when the vehicle is not in use, due to natural discharge and the draining effects of certain electrical appliances. If the vehicle is left for a long time, the battery may discharge, and the engine may be unable to start. (The battery recharges automatically during driving.)

- **When recharging or replacing the battery**
  - Vehicles with a smart key system: In some cases, it may not be possible to unlock the doors using the smart key system when the battery is discharged. Use the wireless remote control or the mechanical key to lock or unlock the doors.
  - The engine may not start on the first attempt after the battery has recharged but will start normally after the second attempt. This is not a malfunction.
  - Vehicles with a smart key system: The engine switch mode is memorized by the vehicle. When the battery is reconnected, the system will return to the mode it was in before the battery was discharged. Before disconnecting the battery, turn the engine switch off. If you are unsure what mode the engine switch was in before the battery discharged, be especially careful when reconnecting the battery.
  - Make sure that the key is not inside the vehicle when recharging or replacing the battery. The key may be locked in the vehicle if the alarm is activated. (→P. 69)
CAUTION

Avoiding battery fires or explosions
Observe the following precautions to prevent accidentally igniting the flammable gas that may be emitted from the battery:

- Make sure each jumper cable is connected to the correct terminal and that it is not unintentionally in contact with any other than the intended terminal.
- Do not allow the other end of the jumper cable connected to the “+” terminal to come into contact with any other parts or metal surfaces in the area, such as brackets or unpainted metal.
- Do not allow the + and - clamps of the jumper cables to come into contact with each other.
- Do not smoke, use matches, cigarette lighters or allow open flame near the battery.

Battery precautions
The battery contains poisonous and corrosive acidic electrolyte, while related parts contain lead and lead compounds. Observe the following precautions when handling the battery:

- When working with the battery, always wear safety glasses and take care not to allow any battery fluids (acid) to come into contact with skin, clothing or the vehicle body.
- Do not lean over the battery.
- In the event that battery fluid comes into contact with the skin or eyes, immediately wash the affected area with water and seek medical attention. Place a wet sponge or cloth over the affected area until medical attention can be received.
- Always wash your hands after handling the battery support, terminals, and other battery-related parts.
- Do not allow children near the battery.

NOTICE

When handling jumper cables
When connecting the jumper cables, ensure that they do not become entangled in the cooling fan or engine drive belt.
If your vehicle overheats

The following may indicate that your vehicle is overheating.

1. Vehicles with a drive monitor display: The high engine coolant temperature warning light (→P. 498) comes on or a loss of power is experienced.
2. Vehicles with a multi-information display: The engine coolant temperature gauge (→P. 82) enters the red zone or a loss of power is experienced.
3. Steam comes out from under the hood.

Correction procedures

1. Stop the vehicle in a safe place and turn off the air conditioning system, and then stop the engine.
2. If you see steam:
   Carefully lift the hood after the steam subsides.
   If you do not see steam:
   Carefully lift the hood.
3. After the engine has cooled down sufficiently, inspect the hoses and radiator core (radiator) for any leaks.
   1. Radiator
   2. Cooling fan
      If a large amount of coolant leaks, immediately contact your Toyota dealer.
4. The coolant level is satisfactory if it is between the “F” and “L” lines on the reservoir.
   1. Reservoir
   2. “F” line
   3. “L” line
   4. Radiator cap

5. Add engine coolant if necessary.
   Water can be used in an emergency if engine coolant is unavailable.

6. Start the engine to check that the radiator cooling fan operates and to check for coolant leaks from the radiator or hoses.
8-2. Steps to take in an emergency

If the fan is not operating:
Stop the engine immediately and contact your Toyota dealer.

If the fan is operating:
Have the vehicle inspected at the nearest Toyota dealer.

---

⚠️ CAUTION

- When inspecting under the hood of your vehicle
  - Observe the following precautions. Failure to do so may result in serious injury such as burns.
  - If steam is seen coming from under the hood, do not open the hood until the steam has subsided. The engine compartment may be very hot.
  - Keep hands and clothing (especially a tie, a scarf or a muffler) away from the fan and belts.
  - Do not loosen the radiator cap and the coolant reservoir cap while the engine and radiator are hot. High temperature steam or coolant could spray out.
**NOTICE**

- **When adding engine coolant**
  Add coolant slowly after the engine has cooled down sufficiently. Adding cool coolant to a hot engine too quickly can cause damage to the engine.

- **To prevent damage to the cooling system**
  Observe the following precautions:
  - Avoid contaminating the coolant with foreign matter (such as sand or dust etc.).
  - Do not use any coolant additives.
When trouble arises

- Stop the engine. Set the parking brake and shift the shift lever to P (automatic transmission or continuously variable transmission) or N (manual transmission).
- Remove the mud, snow or sand from around the front wheels.
- Place wood, stones or some other material under the front wheels to help provide traction.
- Restart the engine.
- Shift the shift lever to D or R (automatic transmission or continuously variable transmission) or 1 or R (manual transmission) and release the parking brake. Then, while exercising caution, depress the accelerator pedal.

If the vehicle becomes stuck

Carry out the following procedures if the tires spin or the vehicle becomes stuck in mud, dirt or snow:

1. Stop the engine. Set the parking brake and shift the shift lever to P (automatic transmission or continuously variable transmission) or N (manual transmission).
2. Remove the mud, snow or sand from around the front wheels.
3. Place wood, stones or some other material under the front wheels to help provide traction.
4. Restart the engine.
5. Shift the shift lever to D or R (automatic transmission or continuously variable transmission) or 1 or R (manual transmission) and release the parking brake. Then, while exercising caution, depress the accelerator pedal.
When it is difficult to free the vehicle (vehicles with a TRAC system)

Press to turn off TRAC.

⚠️ CAUTION

- When attempting to free a stuck vehicle
  If you choose to push the vehicle back and forth to free it, make sure the surrounding area is clear to avoid striking other vehicles, objects or people. The vehicle may also lunge forward or lunge back suddenly as it becomes free. Use extreme caution.
- When shifting the shift lever
  Be careful not to shift the shift lever with the accelerator pedal depressed. This may lead to unexpected rapid acceleration of the vehicle that may cause an accident resulting in death or serious injury.

⚠️ NOTICE

- To avoid damaging the transmission and other components
  - Avoid spinning the front wheels and depressing the accelerator pedal more than necessary.
  - If the vehicle remains stuck even after these procedures are performed, the vehicle may require towing to be freed.

Vehicle identification

Vehicle identification number

The vehicle identification number (VIN) is the legal identifier for your vehicle. This is the primary identification number for your Toyota. It is used in registering the ownership of your vehicle.

This number is stamped on the top left of the instrument panel.
This number is also on the Certification Label on the driver's side center pillar.

- **Engine number**

  The engine number is stamped on the engine block as shown.
9-1. Specifications

### Engine

</tbody>
</table>

### Lubrication system

| Oil capacity (Drain and refill — reference*) | 4.4 qt. (4.2 L, 3.7 Imp. qt.) with filter |
|                                           | 4.1 qt. (3.9 L, 3.4 Imp. qt.) without filter |

*: The engine oil capacity is a reference quantity to be used when changing the engine oil. Warm up and turn off the engine, wait more than 5 minutes, and check the oil level on the dipstick.
Engine oil selection

“Toyota Genuine Motor Oil” is used in your Toyota vehicle. Use Toyota approved “Toyota Genuine Motor Oil” or equivalent to satisfy the following grade and viscosity.

Oil grade: ILSAC GF-5 multigrade engine oil

Recommended viscosity:

SAE 0W-20

SAE 0W-20 is the best choice for good fuel economy and good starting in cold weather.

If SAE 0W-20 is not available, SAE 5W-20 oil may be used. However, it must be replaced with SAE 0W-20 at the next oil change.

Oil viscosity (0W-20 is explained here as an example):

• The 0W in 0W-20 indicates the characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.

• The 20 in 0W-20 indicates the viscosity characteristic of the oil when the oil is at high temperature. An oil with a higher viscosity (one with a higher value) may be better suited if the vehicle is operated at high speeds, or under extreme load conditions.

How to read oil container label

The International Lubricant Specification Advisory Committee (ILSAC) Certification Mark is added to some oil containers to help you select the oil you should use.
## Cooling system

<table>
<thead>
<tr>
<th>Capacity (Reference)</th>

## Manual transaxle

<table>
<thead>
<tr>
<th>Gear oil capacity (Reference)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.5 qt. (2.4 L, 2.1 Imp. qt.)</td>
</tr>
<tr>
<td>Gear oil type</td>
</tr>
<tr>
<td>Use either of the following:</td>
</tr>
<tr>
<td>• “TOYOTA Genuine Manual Transmission Gear Oil LV”</td>
</tr>
<tr>
<td>• Other gear oil that meets API GL-4 and SAE 75W specifications</td>
</tr>
</tbody>
</table>

⚠️ **NOTICE**

**Manual transmission gear oil**

Please be aware that depending on the particular characteristics of the gear oil used or the operating conditions, idle sound, shift feeling and/or fuel efficiency may be different or affected. Toyota recommends to use “TOYOTA Genuine Manual Transmission Gear Oil LV” to achieve optimal performance.
### Automatic transaxle

<table>
<thead>
<tr>
<th>Fluid capacity (Reference)</th>
<th>6.9 qt. (6.5 L, 5.7 Imp. qt.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fluid type</td>
<td>Toyota Genuine ATF WS</td>
</tr>
</tbody>
</table>

⚠️ NOTICE

**Automatic transmission fluid type**
Using automatic transmission fluid other than “Toyota Genuine ATF WS” may cause deterioration in shift quality, locking up of your transmission accompanied by vibration, and ultimately damage the transmission of your vehicle.

### Continuously variable transaxle

<table>
<thead>
<tr>
<th>Fluid capacity*</th>
<th>7.9 qt. (7.5 L, 6.6 Imp. qt.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fluid type</td>
<td>Toyota Genuine CVTF FE</td>
</tr>
</tbody>
</table>

*: The fluid capacity is a reference quantity. If replacement is necessary, contact your Toyota dealer.

⚠️ NOTICE

**Continuously variable transaxle fluid type**
Using continuously variable transaxle fluid other than “Toyota Genuine CVTF FE” may cause deterioration in shift quality, locking up of the transmission accompanied by vibration and, ultimately, damage to the vehicle’s transmission.

### Clutch

<table>

E: Double end bulbs
*: If equipped
Fuel information

You must only use unleaded gasoline. Select octane rating 87 (Research Octane Number 91) or higher. Use of unleaded gasoline with an octane rating lower than 87 may result in engine knocking. Persistent knocking can lead to engine damage.

At minimum, the gasoline you use should meet the specifications of ASTM D4814 in the U.S.A..

Gasoline quality
In very few cases, driveability problems may be caused by the brand of gasoline you are using. If driveability problems persist, try changing the brand of gasoline. If this does not correct the problem, consult your Toyota dealer.

Gasoline quality standards
- Automotive manufacturers in the U.S.A., Europe and Japan have developed a specification for fuel quality called the World-Wide Fuel Charter (WWFC), which is expected to be applied worldwide.
- The WWFC consists of four categories that are based on required emission levels. In the U.S., category 4 has been adopted.
- The WWFC improves air quality by lowering emissions in vehicle fleets, and improves customer satisfaction through better performance.

Recommendation of the use of gasoline containing detergent additives
- Toyota recommends the use of gasoline that contains detergent additives to avoid the build-up of engine deposits.
- All gasoline sold in the U.S.A. contains minimum detergent additives to clean and/or keep clean intake systems, per EPA’s lowest additives concentration program.
- Toyota strongly recommends the use of Top Tier Detergent Gasoline. For more information on Top Tier Detergent Gasoline and a list of marketers, please go to the official website www.toptiergas.com.
Recommendation of the use of low emissions gasoline
Gasolines containing oxygenates such as ethers and ethanol, as well as reformulated gasolines, are available in some cities. These fuels are typically acceptable for use, providing they meet other fuel requirements. Toyota recommends these fuels, since the formulations allow for reduced vehicle emissions.

Non-recommendation of the use of blended gasoline
- Use only gasoline containing up to 15% ethanol. DO NOT use any flex-fuel or gasoline that could contain more than 15% ethanol, including from any pump labeled E30, E50, E85 (which are only some examples of fuel containing more than 15% ethanol).
- If you use gasohol in your vehicle, be sure that it has an octane rating no lower than 87.
- Toyota does not recommend the use of gasoline containing methanol.
Non-recommendation of the use of gasoline containing MMT

Some gasoline contains an octane enhancing additive called MMT (Methylcyclopentadienyl Manganese Tricarbonyl).

Toyota does not recommend the use of gasoline that contains MMT. If fuel containing MMT is used, your emission control system may be adversely affected.

The malfunction indicator lamp on the instrument cluster may come on. If this happens, contact your Toyota dealer for service.

If your engine knocks

Consult your Toyota dealer.

You may occasionally notice light knocking for a short time while accelerating or driving uphill. This is normal and there is no need for concern.

---

**NOTICE**

Notice on fuel quality

- Do not use improper fuels. If improper fuels are used, the engine will be damaged.
- Do not use leaded gasoline. Lead gasoline can cause damage to your vehicle’s three-way catalytic converters causing the emission control system to malfunction.
- Do not use gasohol other than the type previously stated. Other gasohol may cause fuel system damage or vehicle performance problems.
- Using unleaded gasoline with an octane number or rating lower than the level previously stated will cause persistent heavy knocking. At worst, this will lead to engine damage.

Fuel-related poor driveability

If poor driveability (poor hot starting, vaporization, engine knocking, etc.) is encountered after using a different type of fuel, discontinue the use of that type of fuel.

When refueling with gasohol

Take care not to spill gasohol. It can damage your vehicle’s paint.
Tire information

Typical tire symbols

► Full-size tire

► Compact spare tire
9-1. Specifications

① Tire size (→ P. 566)
② DOT and Tire Identification Number (TIN) (→ P. 565)
③ Uniform tire quality grading
   For details, see “Uniform Tire Quality Grading” that follows.
④ Location of treadwear indicators (→ P. 454)
⑤ Tire ply composition and materials
   Plies are layers of rubber-coated parallel cords. Cords are the strands which form the plies in a tire.
⑥ Radial tires or bias-ply tires
   A radial tire has “RADIAL” on the sidewall. A tire not marked “RADIAL” is a bias-ply tire.
⑦ TUBELESS or TUBE TYPE
   A tubeless tire does not have a tube and air is directly put into the tire. A tube type tire has a tube inside the tire and the tube maintains the air pressure.
⑧ Load limit at maximum cold tire inflation pressure (→ P. 570)
⑨ Maximum cold tire inflation pressure (→ P. 570)
   This means the pressure to which a tire may be inflated.
⑩ Summer tires or all season tires (→ P. 458)
   An all season tire has “M+S” on the sidewall. A tire not marked “M+S” is a summer tire.
⑪ “TEMPORARY USE ONLY”
   A compact spare tire is identified by the phrase “TEMPORARY USE ONLY” molded on its sidewall. This tire is designed for temporary emergency use only.

11. Chafer
Uniform Tire Quality Grading

This information has been prepared in accordance with regulations issued by the National Highway Traffic Safety Administration of the U.S. Department of Transportation. It provides the purchasers and/or prospective purchasers of Toyota vehicles with information on uniform tire quality grading.

Your Toyota dealer will help answer any questions you may have as you read this information.

DOT quality grades

All passenger vehicle tires must conform to Federal Safety Requirements in addition to these grades. Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example: Treadwear 200 Traction AA Temperature A

Treadwear

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course.

For example, a tire graded 150 would wear one and a half (1 1/2) times as well on the government course as a tire graded 100.

The relative performance of tires depends upon the actual conditions of their use. Performance may differ significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

Traction AA, A, B, C

The traction grades, from highest to lowest, are AA, A, B and C, and they represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete.

A tire marked C may have poor traction performance.

Warning: The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include cornering (turning) traction.
**Temperature A, B, C**

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel.

Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure.

Grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109.

Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Warning: The temperature grades of a tire assume that it is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
### Glossary of tire terminology

<table>
<thead>
<tr>
<th>Tire related term</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cold tire inflation pressure</td>
<td>Tire pressure when the vehicle has been parked for three hours or more, or has not been driven more than 1 mile or 1.5 km under that condition</td>

Customizable features

Your vehicle includes a variety of electronic features that can be personalized to suit your preferences. Programming these preferences requires specialized equipment and may be performed by your Toyota dealer.

Customizing vehicle features

- **Changing by using the Entune Audio**
  1. Press the “SETUP” button.
  2. Select “Vehicle” on the “Setup” screen.
  Various setting can be changed. Refer to the list of settings that can be changed for details.

- **Changing by using the Entune Audio Plus or navigation system**
  1. Press the “APPS” button.
  2. Select “Setup” on the “Apps” screen and select “Vehicle”.
  Various setting can be changed. Refer to the list of settings that can be changed for details.

*1: Audio system with “CAR” button
*2: Audio system with “APPS” button

- **Changing by using the door lock switch**
  → P. 107
Customizable features

Some function settings are changed simultaneously with other functions being customized. Contact your Toyota dealer for further details.

*: Vehicles with a smart key system
Vehicle customization
When the doors remain closed after unlocking the doors and the timer activated automatic door lock function activates, signals will be generated in accordance with the operational signal (Emergency flashers) function settings.

When customizing using the navigation system
Stop the vehicle in a safe place, apply the parking brake, and shift the shift lever to P (automatic transmission or continuously variable transmission) or N (manual transmission). Also, to prevent battery discharge, leave the engine running while customizing the features.

**CAUTION**

During customization
As the engine needs to be running during customization, ensure that the vehicle is parked in a place with adequate ventilation. In a closed area such as a garage, exhaust gases including harmful carbon monoxide (CO) may collect and enter the vehicle. This may lead to death or a serious health hazard.

**NOTICE**

During customization
To prevent battery discharge, ensure that the engine is running while customizing features.
## Items to initialize

The following items must be initialized for normal system operation after such cases as maintenance being performed on the vehicle:

<table>
<thead>
<tr>
<th>Item</th>

For owners

Reporting safety defects for U.S. owners....................... 586
Seat belt instructions for Canadian owners (in French) .................. 587
SRS airbag instructions for Canadian owners (in French) .................. 589
| Reporting safety defects for U.S. owners |

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Toyota Motor Sales, U.S.A., Inc. (Toll-free: 1-800-331-4331).

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Toyota Motor Sales, U.S.A., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to [http://www.safercar.gov](http://www.safercar.gov); or write to: Administrator, NHTSA, 1200 New Jersey Ave, S.E., Washington, DC 20590. You can also obtain other information about motor vehicle safety from [http://www.safercar.gov](http://www.safercar.gov).
Seat belt instructions for Canadian owners (in French)

The following is a French explanation of seat belt instructions extracted from the seat belt section in this manual.
See the seat belt section for more detailed seat belt instructions in English.

Utilisation correcte des ceintures de sécurité

1. Déroulez la sangle diagonale de telle sorte qu’elle passe entièrement sur l’épaule, sans pour autant être en contact avec le cou ou glisser de l’épaule.
1. Placez la sangle abdominale aussi bas que possible sur les hanches.
1. Règlez la position du dossier de siège. Asseyez-vous le dos le plus droit possible et calez-vous bien dans le siège.
1. Ne virez pas la ceinture de sécurité.

Entretien et soin

Ceintures de sécurité

Nettoyez avec un chiffon ou une éponge humectée d’eau savonneuse tiède. Vérifiez régulièrement que les ceintures ne sont pas effilochées, entaillées ou exagérément usées.
### Dommage et usure de la ceinture de sécurité

Inspectez la ceinture de sécurité périodiquement. Vérifiez si elles ne sont pas entaillées, effilochées et que leurs ancrages ne sont pas desserrés. N'utilisez pas une ceinture de sécurité défectueuse avant qu'elle ne soit remplacée. Une ceinture de sécurité défectueuse n'apporte aucune garantie de protection de l'occupant en cas de blessures graves, voire mortelles.
SRS airbag instructions for Canadian owners (in French)

The following is a French explanation of SRS airbag instructions extracted from the SRS airbag section in this manual.

See the SRS airbag section for more detailed SRS airbag instructions in English.

**Coussins gonflables avant SRS**

1. Coussin gonflable conducteur SRS/coussin gonflable passager avant
   Participent à la protection de la tête et du thorax du conducteur et du passager avant contre les chocs avec les éléments intérieurs

2. Coussin gonflable de genoux du conducteur SRS
   Participe à la protection du conducteur

3. Coussin gonflable d’assise SRS
   Contribue à retenir le passager avant
**Coussins gonflables latéraux et rideaux SRS**

4. Coussins gonflables latéraux avant SRS  
Participent à la protection du thorax des occupants du siège avant  

5. Coussins gonflables rideaux SRS  
Participent principalement à la protection de la tête des occupants assis aux places extérieures  

**Compositions du système de coussin gonflable SRS**
Votre véhicule est équipé de COUSSINS GONFLABLES INTELLIGENTS conçus selon les normes de sécurité américaines applicables aux véhicules à moteur (FMVSS208). Le boîtier électronique (ECU) des coussins gonflables régle le déploiement de ces derniers sur la base des informations qu’il reçoit des capteurs, etc., indiqués ci-dessus dans le schéma illustrant les composants du système. Parmi ces informations figurent la gravité du choc et les informations de l’occupant. Le déploiement rapide des coussins gonflables est obtenu au moyen d’une réaction chimique dans les dispositifs pyrotechniques, qui produit un gaz inoffensif permettant d’amortir le mouvement des occupants.

ATTENTION

Précautions concernant le coussin gonflable SRS
Respectez les précautions suivantes concernant les coussins gonflables SRS.
Autrement, des blessures graves, voire mortelles, pourraient s'ensuivre.
Le conducteur et les passagers du véhicule doivent porter correctement leur ceinture de sécurité.
Les coussins gonflables SRS sont des dispositifs supplémentaires à utiliser avec les ceintures de sécurité.
Le coussin gonflable conducteur SRS se déploie avec une force considérable, et peut provoquer des blessures graves, voire mortelles, si le conducteur se trouve très près du coussin gonflable. L'autorité fédérale chargée de la sécurité routière aux États-Unis (NHTSA) conseille:
Sachant que la zone de danger pour le coussin gonflable conducteur se trouve dans les premiers 2 à 3 in. (50 - 75 mm) de déploiement, placez-vous à 10 in. (250 mm) de votre coussin gonflable conducteur vous garantit une marge de sécurité suffisante. Cette distance est mesurée entre l’axe du volant et votre sternum. Si vous êtes assis à moins de 10 in. (250 mm), vous pouvez changer votre position de conduite de plusieurs façons:
• Reculez votre siège le plus possible, de manière à pouvoir encore atteindre confortablement les pédales.
• Inclinez légèrement le dossier du siège.
Bien que les véhicules puissent être différents les uns des autres, la plupart des conducteurs peuvent s’asseoir à une distance de 10 in. (250 mm), même avec le siège conducteur complètement avancé, simplement en inclinant un peu le dossier de siège. Si vous avez des difficultés à voir la route après avoir incliné votre siège, utilisez un coussin ferme et antidérapant pour vous rehausser ou, si votre véhicule est équipé du réglage en hauteur du siège, remontez-le.
• Si votre volant est réglable, inclinez-le vers le bas. Cela a pour effet d’orienter le coussin gonflable en direction de votre poitrine plutôt que de votre tête et de votre cou.
Réglez votre siège selon les recommandations de la NHTSA ci-dessus, tout en conservant le contrôle des pédales, du volant et de l'affichage des commandes du tableau de bord.
Précautions concernant le coussin gonflable SRS

Si vous attachez une rallonge de ceinture de sécurité aux boucles de ceinture de sécurité du siège avant, mais pas au pêne de la ceinture de sécurité, les coussins gonflables avant SRS détectent que le conducteur et le passager avant ont attaché leur ceinture de sécurité, alors même que ce n'est pas le cas. Dans ce cas, il se peut que les coussins gonflables avant SRS ne se déplient pas correctement en cas de collision, ce qui peut provoquer des blessures graves, voire mortelles. Éloignez le siège du passager avant aussi loin que possible du coussin gonflable et réglez le dossier de siège de façon à ce que le passager avant soit assis bien droit dans le siège.

Le coussin gonflable passager avant SRS se déploie également avec une force considérable, ce qui peut provoquer des blessures graves, voire mortelles, si le passager avant se trouve très près du coussin gonflable. Éloignez le siège du passager avant aussi loin que possible du coussin gonflable et réglez le dossier de siège de façon à ce que le passager avant soit assis bien droit dans le siège.

Les nourrissons et les enfants qui ne sont pas correctement assis et/ou protégés peuvent être grièvement blessés ou tués par le déploiement du coussin gonflable. Installez dans un siège de sécurité enfant les enfants trop jeunes pour pouvoir utiliser la ceinture de sécurité. Toyota recommande vivement que les nourrissons et les enfants soient installés sur le siège arrière du véhicule et convenablement attachés. Les sièges arrière sont plus sûrs pour les nourrissons et les enfants que le siège du passager avant.

N'installez jamais un siège de sécurité enfant type dos à la route sur le siège du passager avant, même si le témoin indicateur "AIR BAG OFF" est allumé. En cas d’accident, par la violence et la vitesse de son déploiement, le coussin gonflable du passager avant peut blesser grièvement, voire tuer l’enfant si le siège de sécurité enfant type dos à la route est installé sur le siège du passager avant.
ATTENTION

Précautions concernant le coussin gonflable SRS

1. Ne vous asseyez pas sur le bord du siège et ne vous appuyez pas contre le tableau de bord.

2. Ne laissez pas un enfant se tenir debout devant le coussin gonflable passager avant SRS ou bien s'asseoir sur les genoux du passager avant.

3. Ne laissez pas les occupants du siège avant voyager avec un objet sur les genoux.

4. Ne vous appuyez pas contre la porte, le rail latéral de toit ou contre les montants avant, latéraux et arrière.

5. Ne laissez personne s'agenouiller sur les sièges passagers en appui contre la porte ou sortir la tête ou les mains à l'extérieur du véhicule.
**ATTENTION**

- **Précautions concernant le coussin gonflable SRS**

  - Ne fixez ni ne posez aucun objet sur des emplacements tels que le tableau de bord, la garniture du volant de direction et la partie inférieure du tableau de bord. Ces objets risquent de se transformer en projectile lorsque les coussins gonflables du conducteur, passager avant et genoux conducteur SRS se déclenchent.

  - Ne rien fixer aux emplacements tels que la porte, la vitre du pare-brise, la vitre latérale, au montant avant et arrière, au rail latéral de toit et à la poignée d’assistance.

⚠️ ATTENTION

Précautions concernant le coussin gonflable SRS

- Si un cache en plastique recouvre la partie où le coussin gonflable de genoux du conducteur SRS se déploie, veillez à le retirer.

- N’utilisez pas d’accessoires de siège venant recouvrir les zones de déploiement des coussins gonflables latéraux SRS et du coussin gonflable d’assise SRS, car ils risqueraient de gêner le déploiement des coussins gonflables SRS. De tels accessoires peuvent empêcher les coussins gonflables latéraux et le coussin gonflable d’assise de fonctionner correctement, désactiver le dispositif ou entraîner le déploiement accidentel des coussins gonflables latéraux et du coussin gonflable d’assise, entraînant la mort ou des blessures graves.

- Évitez de faire subir des chocs ou des pressions excessives aux zones renfermant les composants du coussin gonflable SRS. En effet, cela pourrait entraîner un dysfonctionnement des coussins gonflables SRS.

- Ne touchez aucun composant du système immédiatement après le déploiement (gonflage) des coussins gonflables SRS, car ils peuvent être très chauds.

- Si vous avez des difficultés à respirer après le déploiement des coussins gonflables SRS, ouvrez une porte ou une vitre pour faire entrer de l’air frais, ou bien descendez du véhicule si cela ne présente pas de danger. Essuyez tout résidu dès que possible afin d’éviter d’éventuelles irritations cutanées.

- Si les parties renfermant les coussins gonflables SRS, telles que la garniture du moyeu de volant et les garnitures de montants avant et arrière, apparaissent abîmées ou craquelées, faites-les remplacer par votre concessionnaire Toyota.

- Ne placez rien sur le siège du passager avant, comme un coussin par exemple. Cela a pour conséquence de répartir le poids du passager, ce qui empêche le capteur de détecter correctement le poids du passager. En conséquence, les coussins gonflables avant SRS du passager avant risquent de ne pas se déployer en cas de collision.
ATTENTION

- Modification et mise au rebut des éléments du système du coussin gonflables SRS
  Ne mettez pas votre véhicule au rebut et n’effectuez pas les modifications suivantes sans consulter votre concessionnaire Toyota. Les coussins gonflables SRS peuvent être défaillants ou se déployer (se gonfler) accidentellement, provoquant la mort ou de graves blessures.
  - Installation, retrait, démontage et réparation des coussins gonflables SRS
  - Réparations, modifications, retrait ou remplacement du volant, du tableau de bord, de la planche de bord, des sièges ou de leur garniture, des montants avant, latéraux et arrière ou des rails latéraux de toit
  - Réparations ou modifications de l’aile avant, du pare-choc avant, ou des flancs de l’habitatcle
  - Installation d’un protège-calandre (pare-buffles, pare-kangourou, etc.), de chasse-neige, de treuils
  - Modifications du système de suspension du véhicule
  - Installation d’appareils électroniques, tels qu’une radio émetteur/récepteur et d’un lecteur CD
  - Aménagements de votre véhicule pour une personne ayant un handicap physique
Vehicles with a navigation system or Entune Audio Plus:
For details of equipment related to the navigation system or Entune Audio Plus, such as the audio system, refer to the "NAVIGATION AND MULTIMEDIA SYSTEM OWNER'S MANUAL".
If you lose your keys or mechanical keys, new genuine keys or mechanical keys can be made by your Toyota dealer. (→P. 98)

If you lose your keys or electronic keys, the risk of vehicle theft increases significantly. Contact your Toyota dealer immediately. (→P. 100)

Is the key battery weak or depleted? (→P. 469)

Vehicles with a smart key system:
Is the engine switch in IGNITION ON mode?
When locking the doors, turn the engine switch off. (→P. 170)

Vehicles with a smart key system:
Is the electronic key left inside the vehicle?
When locking the doors, make sure that you have the electronic key on your person.

The function may not operate properly due to the condition of the radio wave. (→P. 119)
The rear door cannot be opened

- Is the child-protector lock set?
  The rear door cannot be opened from inside the vehicle when the lock is set. Open the rear door from outside and then unlock the child-protector lock. (→P. 105)

The trunk lid is closed with the electronic key left inside (vehicles with a smart key system)

- The function to prevent the electronic key from being left inside the trunk will operate and you can open the trunk as usual. Take the key out from the trunk. (→P. 112)
If you think something is wrong

The engine does not start
(vehicles without a smart key system)

- Vehicles with a manual transmission:
  Do you turn the key with the clutch pedal depressed firmly? (→P. 165)
- Except vehicles with a manual transmission:
  Is the shift lever in P? (→P. 165)
- Is the steering wheel unlocked? (→P. 165)
- Is the battery discharged? (→P. 538)

The engine does not start
(vehicles with a smart key system)

- Except vehicles with a manual transmission:
  Did you press the engine switch while firmly depressing the brake pedal? (→P. 168)
- Vehicles with a manual transmission:
  Did you press the engine switch while firmly depressing the clutch pedal? (→P. 168)
- Except vehicles with a manual transmission:
  Is the shift lever in P? (→P. 173)
- Is the electronic key anywhere detectable inside the vehicle? (→P. 116)
- Is the steering wheel unlocked? (→P. 173)
- Is the electronic key battery weak or depleted?
  In this case, the engine can be started in a temporary way. (→P. 536)
- Is the battery discharged? (→P. 538)
The shift lever cannot be shifted from P even if you depress the brake pedal (vehicles with an automatic transmission or continuously variable transmission)

- Vehicles without a smart key system:
  Is the engine switch in the “ON” position?
  If you cannot release the shift lever by depressing the brake pedal with the engine switch in the “ON” position. (→P. 534)

- Vehicles with a smart key system:
  Is the engine switch in IGNITION ON mode?
  If you cannot release the shift lever by depressing the brake pedal with the engine switch in IGNITION ON mode. (→P. 534)

The steering wheel cannot be turned after the engine is stopped

- Vehicles without a smart key system:
  It is locked to prevent theft of the vehicle if the key is pulled from the engine switch. (→P. 166)

- Vehicles with a smart key system:
  It is locked automatically to prevent theft of the vehicle. (→P. 173)

The windows do not open or close by operating the power window switches

- Is the window lock switch pressed?
  The power window except for the one at the driver’s seat cannot be operated if the window lock switch is pressed. (→P. 137)
What to do if... (Troubleshooting)

The engine switch is turned off automatically
(vehicles with a smart key system)
- The auto power off function will be operated if the vehicle is left in ACCESSORY or IGNITION ON mode (the engine is not running) for a period of time. (→ P. 172)

A warning buzzer sounds during driving
- The seat belt reminder light is flashing
  Are the driver and the front passenger wearing the seat belts? (→ P. 500)
- The brake system warning light is on
  Is the parking brake released? (→ P. 187)
  Depending on the situation, other types of warning buzzer may also sound. (→ P. 498, 510)

A warning buzzer sounds when leaving the vehicle
(vehicles with a smart key system)
- Is the electronic key left inside the vehicle?
  Vehicles with a multi-information display: Check the message on the multi-information display. (→ P. 510)

An alarm is activated and the horn sounds
(vehicles with an alarm)
- Did anyone inside the vehicle open a door during setting the alarm?
  The sensor detects it and the alarm sounds. (→ P. 68)
  ▶ Vehicles without a smart key system
  To stop the alarm, turn the engine switch to the “ON” position or start the engine.
  ▶ Vehicles with a smart key system
  To stop the alarm, turn the engine switch to IGNITION ON mode or start the engine.

A warning light turns on
(vehicles with a drive monitor display)
- When a warning light turns on, refer to P. 498.

A warning light turns on or a warning message or indicator is displayed (vehicles with a multi-information display)
- When a warning light turns on or a warning message or indicator is displayed, refer to P. 498, 510.
**When a problem has occurred**

- **If you have a flat tire**
  1. Stop the vehicle in a safe place and replace the flat tire with the spare tire. (→P. 520)

- **The vehicle becomes stuck**
  1. Try the procedure for when the vehicle becomes stuck in mud, dirt, or snow. (→P. 547)
